## Courtmen Fry Terriers For 4th Straight Win As Madden Paces Team

### Engineers Lead B. U. at Halftime Of Friday's Game

Copping its fourth straight victory, Tech's basketball team drubbed the Boston University courtmen, 62-52, on the B.U. floor last Friday night. Jim Madden, five times blasting Terrier attempts to maintain a slim lead, netted 23 points to pace the Engineers' effective attack.

Tomorrow night Ted Heuchling's quintet guns for its sixth triumph in eight starts, clashing with North-eastern at the Huskies' gym. Only Harvard and B.U., meeting M.I.T. during the first week in December, have been able to muster enough strength to down the Tech courtmen.

#### Control Boards

Its previous 51-45 victory over the Beavers, registered during the Techsappin week-end, was only a smudge on the Boston University books last Friday. The Terriers looked baffled and helpless under Tech's smooth offensive and deadly shots that zipped through the net without clipping the rim. Lou Morton and Bob Brown held the much-needed height to maintain the Engineers' domination of the boards.

Leading by three points at halftime, Tech never relinquished its lead during the second half of the game.

Madden dumped in Tech's first score to start the game rolling. With B.U. knotting the count at 4-4, Madden looped a foul toss through the cords to again push the Tech forces into the lead. As the Terriers twice thrust ahead, Madden's shots once more found the

## MIT Music Clubs Release Schedule

### Glee Club Sings With Many Nearby Colleges

The Combined Music Clubs, which consists of the Techtonians, the Men's Glee Club, the Symphony Orchestra, and the Women's Glee Club has announced a new spring schedule. For the first time in recent years the Combined Music Clubs are enlarging in scope, and Ronald J. R. Kallman, '48, general chairman of the clubs, expects the combined group to assume greater recognition among other such college groups in the near future.

One of the first presentations this spring will be an orchestra concert on February 28, under the direction of Klaus Liepmann, director of music at Technology. Early in February the Men's Glee Club will sing with a group from Lasell Junior College, and on March 12 the Glee Club will sing with Pine Manor Junior College. Both these presentations will be given away from Technology.

It has been scheduled for the Men's Glee Club to sing with Smith College on March 6 at Technology. As usual the presentation will be held in Morss Hall, and tickets will be on sale for all students. On April 3 a second Glee Club concert will be given, in Morss Hall, with a group from Mt. Holyoke College.

The concluding event of the season, expected to be a fitting culmination to the season, will be a concert with Radcliffe College on Open House weekend at Technology. It is expected that the parents and families of students, as well as a large student group will attend the concert.

### Summer Grads May Have Biographies In Technique

Although it is now too late to include pictures of Seniors if they have not yet been taken, Technique has announced that those who so desire may have their biographies in the year-book providing they act promptly. Application blanks should be procured from the Technique office in Walker Memorial before the end of the term.

The extension was made to accommodate those students who plan to attend the recently announced Summer Term as second-term seniors.

## Dorelan Raffles Bottle of Calvert

### Inductees Wear Robes, Carry Drinks to Class

The appearance of thirteen men carrying glasses containing a liquid reminiscent of whiskey, and dressed in bathrobes, disguised as dressing gowns, made many students think that gracious living had at last come to the Institute last week. Unfortunately, the men were only being initiated into Dorelan, an honorary society for Dorm juniors and seniors in activities.

The purpose of the bathrobe was frequently misunderstood. Professor Amdur, upon seeing Roland Doran ready for bed in one of his classes, remarked that he had seen many students sleeping in his classes, but that this was the first time he had ever seen a student come dressed for the purpose. Another of the "men of distinction" had to proctor a freshman quiz that morning. Students present, if they knew which side their bread was buttered on, had no comment to offer.

As part of a plan designed to make all students "men of distinction," the Dorelan also conducted a free raffle for a bottle of Lord Calvert whiskey which was won by Harold S. Wass, Jr., '50, a resident of Building 22.

Many could not believe that there was no catch to the offer of a free bottle of drink, despite the hawkers' proclamations that there were "no strings attached." A reporter from The Tech was assured, however, that Dorelan received no benefits from the lottery. The price of the Calvert was taken from the treasury and the Calvert company contributed only a few posters. The stunt was conceived by Charles W. Davis, '49, as an improvement over last year's idea, when the initiates shined the shoes of all comers.

The evening of the raffle the society held a party and dance at the Lagoon Building, on the Esplanade, to the music of Hal Reeves and his orchestra, at which the new members gave a skit. The men inducted were Dennis D. Allegretti, '48; Thomas H. Henderson, '49; James K. Berman, '49; Roland J. Doran, '49; Frank T. Hulswit, '49; Frank J. Iskra, '48; Axel H. Kaufmann, '48; John D. Little, '49; James B. Mosely, '49; George Piness, Jr., '49; Robert Silberman, '48; Walter F. Wagner, Jr., '49; and Charles M. Walker, '49. J. David Cist, '48, is president of Dorelan, with Kenneth S. Brock, '48, and Royal H. Evans, Jr., '48, vice-president and secretary respectively.

## One Killed As Buick Plunges Into Charles

### Car Driven by Harvard Graduate Rips 90 Feet Of Harvard Bridge Rail

Technology students were kept from their lunches in droves by curiosity yesterday, after tragedy had struck close to the Institute in the pre-dawn hours of the morning, when a 1947 Buick driven by a 27 year-old Harvard graduate plunged off the Harvard bridge, tearing with it about 90 feet of railing.

Salvage operations did not get under way until 10:00 a.m. and by 12:00 noon the bumper was just visible above the water so that fraternity men returning to early lunch witnessed the efforts of 2 wrecking trucks to raise the remarkably undamaged car far enough for policemen in a Metropolitan District Commission boat to open one door to pull the lone victim ex-Marine Alfred Tucker from the icy water.

The time of the accident could not be accurately determined, but Technology night owls report that the bridge was still intact at 2:00 A.M. and students on their way to 9:00 A.M. classes were among the first to notice the missing railing, as M.D.C. officers did not arrive at the scene until after 9:15 A.M. Therefore the indications are that the accident occurred during the deserted hours just before dawn.

Cartracks indicate that the car was approaching Boston, and must have crossed the width of the bridge as it plunged through the Longfellow side of the railing about 300 feet from the Esplanade.

The car rented Saturday night from Robie's in Harvard square, seemed to have little body damage so that speculation ran high just how the car hit the railing with sufficient force to tear 6 sections of railing with it and still hurt at least 50 feet beyond the edge of the bridge.

Except for the snapping of the cable on one wrecking truck, which resulted in no further damage, salvage operations went without trouble so by 1:30 P.M. the car with the help of four wreckers and one crane, had been lifted upon the bridge and removed, and efforts were being made to recover the railing.

Operations were hampered to a little extent by a crowd of several hundred people, including many Technology students. Traffic on Harvard Bridge was tied up for a long time by the trucks and by cars parked by curious bystanders who watched the proceedings.

### A TOUGH FIGHT BUT . . .

A large cheer and several tigers are in order for the five Tech varsities which made this weekend all victorious for the Red and Gray.

Friday night the basketball team led by Jimmy Madden overwhelmed a strong Boston University Team to place itself as one of the top teams shooting at New England hoops. Saturday, the swimming, wrestling, and squash teams also scored impressive victories. The highlight of the mermen's victory was the record breaking 220 yard freestyle effort turned in by Carl Mellin. The revitalized hockey team, playing at full strength for the first time this season, completed the remarkable sports weekend with a sweeping win over Suffolk, Sunday morning, led by Jack Clifford, Ed Thompson and Don Lea.

## Sophs Submit Plans For Night Club Affair To Institute Committee

### Opportunity For Foreign Students To Visit TVA

Under a project initiated by the NSA there is a chance for several interested foreign students to make a tour of the TVA project during the mid-term vacation.

Foreign students interested in going and students willing to transport the former by car to and from Knoxville, Tenn., should contact Franklin R. Kellogg, '50, Box 458, Barracks, or Bertram E. Eakin, '50, Box 284, Dormitories.

## Economist Predicts Depression in '48

### Bancroft Tells A M A Inflation Now At Peak

One interpretation of the problem of checking the inflationary spiral was given by Mr. James R. Bancroft, president of the American Institute of Finance, in a speech to the MIT Management Association at the Graduate House Wednesday night. By tracing the history of inflationary and deflationary periods during the country's existence, he reached the conclusion that this inflation is at its peak and that it should begin declining in 1948. Hence, his recommendation is to keep "hands off" and allow the deflation to set in normally.

Mr. Bancroft warned, however, that "if the inflation continues through 1948 and lifts up to still higher levels (of) current prices, costs, and debts, then the readjustment when it (deflation) comes may indeed be catastrophic. Inevitably it will come."

Mr. Bancroft outlined the value of the 1939 dollar in the course of the country's history, showing that it fluctuated to a purchasing power

(Continued on Page 2)

## World Studytours Plan Faculty Trip

An opportunity for members of the faculty to travel in Southern Europe this Spring is being offered by World Studytours, a Columbia University travel service. To be led by Dean and Mrs. Hubert Phillips of Fresno State College, the trip will last from February 26 to April 19 at a total cost of about \$1195 per participant.

The Studytour offers, instead of the tourist variety of sightseeing, opportunities to meet leaders and visit social projects in Southern France, Italy, Switzerland, Czechoslovakia, Germany, and Paris. According to Goodwin Watson, director of the trips, every effort will be made to keep costs at a minimum while insuring a combination of recreation and education; of sightseeing, plus social insight.

The Studytours also have facilities for caring for any groups wishing to travel at home or abroad under the direction of a faculty member. The itinerary of these trips can be organized to fit the wishes of the group and living will be arranged on any desired level of cost.

Studytours of a similar nature are being organized for next summer for students, faculty members, and intelligent adult citizens. Those wishing further information can obtain it from World Studytours, Columbia University Travel Service, New York 27, N. Y.

### Plan To Convert Ballroom Of Hotel Into Club "50"

Following the Institute Committee's approval of a \$1,500 budget for a one-night affair, the Sophomore Prom Committee has submitted to the Executive Committee of the Institute Committee plans for a semi-formal "night club" affair, to be held Friday night, March 12, at a Boston hotel, as yet unannounced. The decision was reached at a meeting of the committee held Saturday afternoon, Frank Shannahan, president of the Sophomore class, announced.

The affair, to be designated "Club '50", is tentatively planned on the setting of a night club. The committee plans to convert the hotel ballroom into a night club providing music, dancing and entertainment.

The evening will be highlighted by a floor show which, it is expected, will consist of several acts, including a comedian and master of ceremonies, and specialty numbers.

The committee formulated the present plan rather than the usual prom, for it was felt that the approved budget was inadequate for a formal Sophomore Prom, which had previously been planned as a week-end affair with a "name" band.

An Institute Committee subcommittee, headed by Carleton H. Boll, '48, had objected to earlier Sophomore plans on the grounds that the Sophomore committee had presented their plans too late, as the proposed prom weekend would interfere with ticket sales for the Tech Show, which will be presented one week after the Sophomore affair.

Boll, when interviewed by The Tech, voiced approval of the new plan as outlined by the Sophomore Prom Committee, and felt that the idea of the affair was a novel one.

The plan for "Club '50" has been submitted to the Executive Committee, and must be approved by the Institute Committee, which will meet Thursday afternoon.

The Sophomore Prom Committee, headed by Co-Chairmen Francis J. Shannahan and Harris B. Stone, is comprised of the Sophomore class officers and the recently elected Junior Prom Committee. Other committee members are Roy W. Jenkins, Alan H. Vort, Allan R. Baer, Thomas R. Eggert, Max H. Schubert, Jr., Michael J. Fitzmorris Jr., Robert G. Brower and Vincent R. Simpson, Jr.

## Wallace Backers Announce Meeting To Form Group

Technology supporters of Henry A. Wallace have scheduled a meeting in Westgate No. 1 on Thursday, January 15, at 8:00 p.m. At the meeting the presidential candidacy of Henry Wallace is to be discussed. It is expected that speakers from the New York chapter of the Progressive Citizens of America will attend the meeting in order to explain the views of Mr. Wallace.

The formation of an MIT. Committee for Wallace will be considered at the meeting. This committee would be similar to groups already operating at Harvard and other colleges in the nation. Attendance at the meeting is open to all persons associated with the Institute.

## SCHOOL SPIRIT, SATURATION, AND PLANNING

An oft-heard cry in the Institute corridors is one which deplores the lack of a quality which has been conveniently designated as "school spirit."

"School spirit" is a favorite whipping boy—the jack of all trades upon which one can blame almost anything—especially poor planning. The most common occurrence of this quality is found in the way in which it is said to effect the attendance at social affairs—including dances, proms, dramatic presentations, and special events.

Accepting the figure of about 5,000 as being the total number of enrolled students, a basis is made for a start. From this number must first be subtracted about 1,000 graduate students who, through their lack of time and lack of interest due to other undergraduate school affiliation, do not usually attend Tech's social events.

Secondly, there is the large number of married students who find themselves severely limited by budgets. Also, there are numerous veterans who find that the necessities of living exceed \$65 a month. And lastly there exists a group of students who through lack of sufficient interest, socially or otherwise, fail to participate in extra-curricular activities.

This is but one phase of the problem. Dean Thomas P. Pitre remarked at the recent banquet of **The Tech** that the number of social events at the Institute appeared to be rapidly approaching saturation. There are just too many affairs during the school year. That this is quite true becomes obvious when one attempts to mentally list all the events that a student is solicited to attend. The list is long, and the ticket prices are high.

In the light of what has been said above as regards the number of what may be called "available" students, we must face the fact that too many people are being asked to buy too many tickets for too much money. And the end result of it all is that a situation of "dog eat dog" is rapidly ensuing. The number of available students is limited, as is the amount of money which can be spent for tickets. It is obvious that some events or affairs shall suffer.

Something needs to be done. The number of "availables" can be increased by lower ticket prices, but the best solution would seem to lie in the direction of **more and better planning**. So let us no longer bemoan the lack of school spirit, but rather the lack of planning.

Two alternatives seem open. One, a formal attempt at amelioratory action by the student government—the other, an attempt to correct the situation by the action of the interested activities and organizations themselves.

As for the latter suggestion. The interested parties in this situation number quite a few. A direct appeal for continence by the organizations is quite likely to fall upon deaf ears, chiefly because of the lack of any coordination between the groups. The formation of a committee of all interested parties would result in a large and unwieldy group—not to mention the difficulties in deciding which organizations were eligible for membership on the committee.

The chief disadvantage of Institute Committee action would seem to lie in a lack of equal representation of interested parties—a feature offset by the manner in which the Institute Committee could make its decisions stick. However through proper selection of disinterested parties, such as the publications, a planning committee could be created which could render unbiased decisions. The Institute Committee with control over the financial perambulations of most activities and through control over Morss Hall could enforce any decisions.

It is imperative that such action by the Institute Committee not be misinterpreted by the organizations as an assumption of dictatorial power. Each organization and activity must realize that each must concede a bit, and only in such a way can each be working under the optimum conditions. As it might have been in Eccl, "all interested parties must realize that they should be working a little lower down on the curve, and only through intelligent planning can the shift be made."

## Letters to the Editor

Editor, **The Tech**

Walker Memorial

Dear Sir:

In the article about the Soph Prom appearing in **The Tech**, issue of January 9, 1948, it was reported that, "Frank Shannahan—stated that no attempt would be made to hold any dance, following the Committee's approval of a \$1500 budget for the Prom." This is not true! I said, "Under the circumstances, there can be no Soph Prom."

My statement did not in any way preclude the possibility of another type of Soph function. A Prom, as usually offered at Tech and planned by the Soph Prom Committee, is a two night affair. The first night is a formal dance at a hotel, with a name band supplying the music. The second night is an informal dance and party. The usual Prom budget is about \$3000 or more, but the Soph Prom Committee submitted an operating budget of \$2600, one of the lowest Prom budgets presented to the Institute Committee. Obviously \$1500 is inadequate for such a Prom. There was no other course than to refuse to operate under such a curtailed budget. My refusal was made with the full approval of the Soph Prom Committee.

In the near future, I shall submit to the Institute Committee, a budget recommended by the Soph Prom Committee for a class function to replace the Prom.

Sincerely yours,  
 Frank Shannahan  
 President, Class of '50

## Depression

(Continued from Page 1)

of about forty-five cents during all inflations and to about a dollar and thirty-eight cents in all deflations. The current value of the dollar is forty-seven cents, one cent higher than in the post-World War I inflation. In making this survey, he said he was aware of the current theory that we are not at the peak of inflation. Proponents of this idea cite such facts as the huge amount of money in circulation and the demands of labor.

To support his opinion that this inflation will start downward in 1948, Mr. Bancroft enumerated the causes of the current situation and showed how they are disappearing. The bases of the present boom are (1) the tremendously increased buying power of consumers which has resulted from restrictions on wartime spending, (2) the desire on the part of business to expand and improve plants and production, and (3) the accumulated demand for countless products that were not available during the war.

Because of the imminent change in our economy (whether it comes in a few months or a few years is immaterial), Mr. Bancroft's advice is that the public should save rather than spend, and that business should adopt a conservative and cautious view in regard to expansion.

## In The Spotlight

Of all the freshmen our inquiring reporter has interviewed lately, he found one who measured up to the standards for a perfect Physical Training specimen. This young man is so unusual that this week **The Tech** turns the spotlight on him, but withholds his name to protect him from his less athletic classmates.

Peter W. Doe, '51, as we shall call him, was born on a tennis court on October 27, 1930, while his mother was playing in a mixed doubles match. His first signs of unusual athletic prowess became evident when his mother found that he had hurled the 2-ounce building block fifteen feet for an unofficial world's record in that class. From that time on his physical development was little short of phenomenal. From kindergarten up he led his class in high jump, broad jump, soft ball, hard ball, 50-yard dash, 100-yard dash, squash, tennis and, for that matter, any other sports he went out for. As a high school freshman he led his teams to victorious seasons in football, baseball and basketball.

In studies, too, Peter excelled his fellows. He came through high school with an over-all average of 97.3%. On admission to the Institute it was thought that he would make the model student.

In a typical day, Peter wakes up at 6:00 a.m. for six quick turns around the Briggs' Field track. Then he goes over to the Alumni Pool, but finding it closed he settles for a brisk cold shower. From 7:30 to 8:00 a.m. he finishes off his 8.01 homework and then trots over to Walker for a healthful breakfast including a large bowl of oatmeal and two glasses of milk. If you see a husky freshman jogging from class to class that's Peter.

Peter is making good in studies despite a heavy athletic schedule. His ten-week average was 4.63 and he hopes to raise that for the final report.

In addition to his study schedule, Peter is out for the swimming team and crew. He says, "Of course, any freshman can go out for activities. I get most of my homework in from eight to ten in the evening before I go to bed."

His roommates were at first antagonistic to Peter's activities and called him an unmitigated brow bagger. Early in the term, however, when he took on all thirteen of his roommates in a free-for-all battle and subdued them, a working agreement was reached whereby the fellows all tiptoe quietly out of the room at 10:00 p.m. so he can sleep and merely grumble and turn over at 6:00 a.m. when his alarm rings.

We wish Peter luck and some what sadly contemplate the passing of the old Techman as he heralds the new super-chrome-plated-physical-and-mental-giant that will be the Techman of tomorrow.

# Matmen, Natators Cop Victories Over Weekend

## Wrestlers Topple Springfield Team

Flashing the form that won them the New England Intercollegiate wrestling title last year, the Tech matmen subdued a stubborn Springfield College team, 20-13, at the Armory Saturday afternoon. The victory marked Tech's first win of the season against two setbacks.

The meet was closely contested all the way with the last match, which was won by a fall by Tech's Lars Soderburg over Springfield's Bailey, deciding the victory. The score was 15-13 going into this match and a win by either man would have clinched the meet for his side, but Lars prevailed for Tech.

### Pins Opponent

Tech's other points were accumulated by Joe Deptula, who pinned his opponent Finkle in the 121-pound class, Will Haggerty who tied his opponent Jordan in the 145-pound division, Everett Deguzzie who won a decision over his opponent in the 155-pound class, and Captain Whit Mauzy, who won by a fall in 52 seconds in the 155-pound class.

In one of the matches Tech's Will Haggerty was almost pinned, and for about two minutes he held off his opponent from being able to nail him completely. Haggerty came back later in the match to tie his opponent and almost win. Also entered in the match were Don Arnsberger, Ed Handy and Dick Lemmerman.

### Freshmen Lose

The freshman wrestlers, however, were not successful in gaining their first victory of the year but instead took their third loss, this time the score was 23-13. The freshmen points were registered by Tom Callahan with a fall in 2 minutes and 18 seconds in the 145-pound class, and by Dave Findlay in the 155-pound class by a decision. The other points were obtained by a forfeit. Both Tech winners have won before for the frosh. Callahan has now been successful in all three matches he has entered, two by falls, while Findlay won his second match of the year, both by decision.

## Basketball

(Continued from Page 1)

mark to raise the score to 10-9 and 14-13 for the Beavers, with points by Doug Watson and Lou Morton also piling up the count.

### Smashes Hopes

With "deadeye" Jim Madden frustrating every B.U. hope of maintaining a lead, Bob Deutsch, Ozzie Honkalehto, Bob Brown and Rich Rorschach all bucketed a couple of points to stretch out Tech's first-half lead.

In the final intense minutes of the half, however, the University quintet sliced through Tech's margin to gain a 24-23 advantage. But this spurge was not to thwart Madden, who sunk two field goals from within the foul line, while Honkalehto laid up another two-pointer on a pass from Deutsch—matching a B.U. goal—and the half ended with Tech leading, 29-26.

### Tech Dominates

The final period was dominated by the Engineers, as Boston University never found an opening for its vaunted power. Once the Terriers managed to pull within two points of Tech, but Honkalehto, Madden, Corrie, and Morton all hastily corrected the error and B.U. never again saw the dim light of victory. With a foul toss by Madden in the last seconds of play providing the winning point, Tech defeated Brown University, 50-49, on December 17. Also victims of the Engineers during December were New Hampshire, Trinity, and New Bedford Textile.

Findlay's win was accomplished over a man who was about eighteen pounds heavier than Findlay himself. No 155-pound wrestlers ready to wrestle for Tech's frosh so Findlay, a wrestler in the 135-pound class, wrestled in the 155-pound class and won.

## Clifford, Lea, Thompson Lead Sextet To Win Over Suffolk

For the first time this year the first line of Co-Captains Jack Clifford and Ed Thompson, centered by Don Lea, played as a unit and the combination swept the Tech hockey team to an 11-4 victory over Suffolk, at the Skating Club last Sunday. Clifford's four goals and three assists led

## Foundrymen's Assn. Has First Meeting

The organizational meeting of a student chapter of the American Foundrymen's Association will be held from 5:00 p.m. to 6:00 p.m. Tuesday, January 13, in the foundry laboratory, Building 35.

At this time petitions for membership will be accepted, dues of \$4.00 will be accepted, a constitution will be written, and officers will be elected. The constitution will then be submitted to the Institute Committee for approval.

Payment of the \$4.00 fee entitles the student to receive regular monthly copies of the "American Foundryman" as well as all privileges accorded a regular member of the association. In addition at the end of the year he will receive a bound copy of "Transactions," which is a compilation of all the technical papers published by the A.F.A. during the year.

## Fire of Mysterious Origin In Building One Basement

A fire of mysterious origin in the basement of Building One last Friday, January 9, brought several companies of fire fighting equipment to the Institute.

Dense fumes were noticed by the janitor as he was making his rounds shortly after 8:00 p.m. and he summoned the fire department. The fire was located in a cylinder that is believed to have contained phosphorous and hydrochloric acid. Firemen had to use gas masks to remove the cylinder from the area near the Military Science Department rifle racks. Once removed, the mixture burned itself out.

There has been no indication thus far what the reason for the fire could be.

### Swimmers Drown Trinity Varsity As Freshmen Win

Last Saturday afternoon in Alumni Pool the Technology swimming team met the tankmen from Trinity College of Hartford. Showing very good form and plenty of speed throughout all of the swimming events, the Techmen swamped Trinity's swimmers by the score of 57-18.

In the 200-yard freestyle Carl Mellin took the lead at the start and held it all the way to come churning down the last lap with a new varsity record. The new record is 2 minutes, 28.2 seconds as compared with the old record set last year by Jack Searle of one tenth of a second more.

#### Leonard Wins

Jim Leonard showed plenty of speed in the 50-yard freestyle event as did teammate Bob Edgar, as they took first and second places respectively. In the other two freestyle events the men of Technology took both the winning and runner-up positions. Frank Conlin and Jack Searle dominated the 100-yard event with Conlin leading and finishing with the time of 55.6 seconds. Dave Kellom and Bill Russell literally swam away with the 440-yard event with Kellom finishing the winner with a time of 6 minutes, 4.3 seconds.

Dick Pitier showed all of the form and speed necessary to walk away with the first place in the 150-yard back stroke while teammate Ben Dann took the second position. The winning time for the event was 1 minute, 47.1 seconds.

#### Pelletier Triumphs

In the 200-yard backstroke sophomore Bob Pelletier took a fifteen-yard lead early in the race and finished in first place about twenty yards ahead of Jim Hodges, of M.I.T., and Dick Shepard, of Trinity, who fought all the way for the runner-up spot. Pelletier's time for

the event was 2 minutes, 38.2 seconds.

In the relay events each of the competing teams was victor in one of the races. The 300-yard medley relay team composed of Ben Dann, Bob Pelletier and Stan Loomis won in the time of three minutes, 13.1 seconds. The 400-yard freestyle relay was won by the team from Hartford.

In the diving event the Techmen took the first and third positions. Bob Ellis took the winning spot with 65.9 points while Lou Lehman was third with 59.2 points.

#### Frosh Take Two

Over the past week-end the freshmen swimmers recorded two victories. The first win of the week-end was made at the expense of the frosh from Boston University by the score of 50-15. Brookline high school was the second victim and last Saturday afternoon, before the varsity meet, the freshmen again triumphed by the score of 42-20.

### PRC Starts WMIT News Broadcasts

Biweekly newscasts over WMIT were started yesterday by the Public Relations Committee. At present they are broadcasting mostly sports events with stress on "Personalities in Tech News."

Though they now have only five minutes at 10:55 p.m. on Mondays and Wednesdays, they plan to expand to a fifteen-minute program next term. It will then include interviews of Technology men in the news.

## Activity Briefs

### CATHOLIC CLUB

The Catholic Club will hold the second Communion Breakfast of the semester at the Sheraton Hotel on Sunday, January 18, following the 9:00 a.m. Mass at St. Ann's Church, Boston. The breakfast is to be held in conjunction with the Newman Club of Boston Teachers' College. Richard J. Conlan, '48, Building 22, is chairman of the event.

### STUD.-FAC. COMMITTEE

During the week of January 12-16 elections for freshman associate membership to the Student-Faculty Committee, will be held in each section by the section leaders. Six men from the freshman class will be chosen at this time.

### RADIO SOCIETY

After several weeks of delay, the Radio Society has finally moved to its new location behind the Smith House, on Memorial Drive. The new quarters will house the station equipment and the business office of the society.

### Harvard - Oxford Debate On Jan. 18

The first debate in 20 years between Harvard University and Oxford University of England, will be held on January 18 at 8:00 p.m. in the Sanders Theater, Cambridge. Oxford will take the affirmative and Harvard the negative on the question: Resolved "that the social and economic advantages to be gained from nationalization of basic industries would be overwhelming."

# Why I'm an Air Force Pilot

"I guess it began when I was just a kid, making non-stop flights around the dining-room table. Later on, the town got an airport. I got to know every plane, right down to the smallest bolts and screws.

"During the war I took off with the Aviation Cadets. The folks were all for it. They figured—correctly—that it was the best way to get me into the air where I belonged.

"I made it all right. Trained in the best planes the Air Force has, and now I'm heading for transition work in jets. The pay? Now that I'm a pilot, \$336 a month, plus \$500 for each year of active duty. And there's plenty of room for promotions.

"But that's not the real point. Some men belong in the air. They were born wanting wings—with the action, the pride, the freedom that go with them. There's no better way to have all that, along with the world's finest flying training, than to join the Aviation Cadets. And the future—in civilian aviation or in the Air Force—is as wide open as the horizon. If you want the fast-moving life, why not drop around to the Recruiting Station in your community or the nearest Air Force installation."

U. S. Army and U. S. Air Force Recruiting Service
