

IT To Take Over Walker; Minstrel, Dance Will Top Evening Of Fun And Frolic

What is IT? When is IT? Where is IT? These posters have been plaguing the students and faculty for the past week. Here are the answers.

IT is a project of the classes of '51 and '52. IT will consist of a dance, minstrel show, and general festivities. The dance will run from 8:15 p.m. to 1:00 a.m. on Monday night, February 21 (just before Washington's Birthday). Playing for the dance will be the Tectonians.

Blackface Act

Written by John R. Thomas, '51, the minstrel show will be the traditional blackface routine with several added touches. Many of the talented entertainers in the minstrel will be from the two lower classes.

Last but far from least, free beer will be served, "enough to swim in, if you so desire." It will be served in Morss Hall and in the 5:15 Clubroom. There will also be a pianist in the 5:15 room, so that the stags may have a party of their own.

Big Publicity Campaign

A great deal of publicity has been put forth by the committee in charge of IT. Several lectures have been disrupted by gunfire, and airplanes make from IT circulars. Many posters placed around the Institute and a large brass band attracted much attention. Tickets may be obtained from section representatives or in the lobby of Building 10. The stag ticket is \$1.00, while a couple ticket costs \$1.80.

There IT is—dancing, singing, a minstrel show, plenty of free beer, all at Walker Memorial on Monday night.

Smith Girls Swim To Music In Ballet

Intermission To Feature Relay, Skit, Novelty Act

On Saturday, February 26, the Smith College water ballet team will swim to music in the Alumni Pool. There will be two performances, one at 4:00 p.m. and one at 8:00 p.m., and both will last about one and one-half hours.

The Smith team, consisting of 26 girls, will be guests of the varsity swimming team. Between ballet numbers, the swimming team will present a relay race between two Technology teams, a water skit, and a specialty act, the nature of which has not been disclosed. Also featured, is some fancy diving to be done by the swimming team.

Admission in the afternoon will be 90 cents and admission to the evening performance will be \$1.50. Tickets may be purchased at either the T.C.A. or the A.A. office.

GET SENIOR RINGS

Any Juniors or Seniors who did not order class rings on February 16 and 17, when representatives of the L. G. Balfour Company were at the Institute, may order them directly from the Boston office of the L. G. Balfour Co., located at 230 Boylston Street, Boston.

Ski Club Planning Treks Into N. H. To Begin Sunday

Enthusiasts From Local Colleges To Be Included In Weekend Ski Jaunts

If our readers have estimated the number of students propelling themselves about the Institute on crutches as approaching at least a score or two, they'd be wrong. Records show that mid-term skiing escapades took their toll of about 15 skiing enthusiasts. Fortunately, however, only three or four of the mishaps required hospitalization.

Recently arrangements have been made by the Outing Club with neighboring colleges in collaboration with the Boston Council Intercollegiate Outing Club Association for weekly treks into the mountains of New Hampshire. The first of these ski trips, slated for Sunday, February 20, will begin at 7:30 a.m. at which time all attending will meet at Harvard Square in front of the information booth. Transportation will be by chartered bus.

Hundred-Mile Limit

According to William J. Milne, '51, ski bus director and "Outing Club News" editor, the skiing party ventures to the "closest place with the best snow and least people." One hundred miles has been set as the maximum distance which these parties are to travel. Among the more common haunts of the Ski Club are Brookline and Laconia, both in New Hampshire.

Options for the ski trips are for sale on Tuesdays and Wednesdays for one dollar in the lobby of Building 10 and in the Outing Club office.

Next September 10 Displaced Persons To Study Here Free

It was announced today that the Executive Committee of the Corporation will waive tuition fees for as many as ten European displaced persons to enable them to enter the Institute next fall.

The D.P. students who will be sponsored at Technology by a student organization, will be part of a group of several hundred who will study at U. S. colleges and universities next year through arrangements being made by the National Student Association and the World Student Service Fund.

Special Students

Final selection of the students is to be made by admissions officers of the Institute after studying recommendations from officials of international relief agencies in Europe. Not more than ten students will be accepted. Classified as "special students" at the Institute, they will attend regular classes and take part in all student activities.

Institute Severs Relations With 3.3% Of Student Body

Urey Urges World Government To Halt Atom Bomb And Worse

Photo by Gerhardt and Honlsberg
Prof. Harold C. Urey, who won the Nobel Prize for the discovery of heavy water, spoke to the faculty and students on World Government this week.

'Jakie's Dark' At Stag Party

Jr. Mug-Lift Features Singing, Movies, Jazz

Plans for the Class of '50 Junior Mug-Lift are nearing completion, and the committee announces that tickets will go on sale Monday, February 21, at a price of \$1.50 per man. In order to keep sales restricted to Juniors, the tickets will be distributed by personal contact.

Each fraternity will have its own agent, and among the dorm men and commuters there will be several. There will be no public sale in Building 10. The Mug-Lift will take place on March 2, in Rockwell Cage.

Beer, Coke, Hot Dogs

Refreshments will feature the best of "Jakie's Dark," the well known local beverage. In addition there will be "coke" for the teetotalers, hot dogs roasted on open fires, and pretzels to keep the thirst up.

To add to the entertainment of hot jazz, cartoons, and group singing, each person on entering will receive his own painted and engraved beer mug.

No Quizzes

In an effort to better acquaint the students with the faculty the Committee has invited several of the younger men who are instructing Junior courses to let their hair down for an evening and join in the fun. The instructors will be asked to postpone any quizzes scheduled for Thursday, March 3.

The following is a list of men selling tickets: dorms, Jim Baker, Phil Byrne, Joe Gottlieb, Bob Mann, Nat Roosin, John Urshin, and Jack Weaver. Commuters: Ken Fertig and Claude Tapley. Fraternities: Jack Stewart, Theta Chi, in charge.

TECHNIQUE OPTION SALE

starts February 21, and will continue only until 1,200 are sold. Don't wait—Lobby of Building 10.

A world government is the only means to a stable peace, according to Harold C. Urey, Distinguished Service Professor of Chemistry in the Institute for Nuclear Studies, University of Chicago, who spoke on "A Case for World Government" last Wednesday under the sponsorship of the Lecture Series Committee.

Next War Worse

According to Professor Urey, we can assume that the next war "will start with the atom bomb and end up with something much worse." New discoveries, such as the A-bomb and germ warfare methods, have far surpassed all other weapons in order of magnitude.

Professor Urey compared the League of Nations and the United Nations to the Articles of Confederation. Our national government was originally set up with limited powers, and the federal government was given jurisdiction over all citizens. When an individual committed a crime, the responsibility was placed on the individual, and not on the state in which he lived. Professor Urey feels that the same should be done on a world-wide basis. We should work for what we believe in, and not rely on expediency, for "it is not possible to resolve the problem of peace and war in an expedient way."

No Cure-All

There is no simple cure-all for the present situation, according to Professor Urey, but we should set up a planetary government. "Will it be a cure-all, democratic or tyrannical? We don't know, but it is conceivable that such a government would not be tyrannical."

The principal problem of the next twenty-five years is to do what we can to bring the United States, the Soviet Union, the United Kingdom, and Western Europe closer together. We cannot combine the United States and Russia.

War Not Solution

We should include as many nations in a world government as we can, but if the Soviet Union refused to join us, we could get along without it. Such a world government would not be an arbitrary alliance against Russia; "we cannot further the road to peace by dropping bombs." Russia would not and could not do anything against it. Professor Urey's objectives are:

(Continued on Page 4)

Metals Fabrication Films To Be Shown

A series of films entitled "Metals" is currently being presented under the sponsorship of the Department of Metallurgy and the student Metallurgical Society. Beginning on February 8th, the films will be presented every Tuesday in Huntington Hall until March 22.

General principles of metallurgy, with emphasis on extraction and fabrication of metals, constitute the main points of the program. New films on zinc, nickel, and magnesium will be shown in the coming weeks.

The films are of general interest and are being presented in conjunction with Freshman course selection.

Greatest Loser Is Class Of '50 With 40 Released

Official figures on the number of Institute students who flunked out at the end of last term have been released by the Office of the Dean of Students. A total of 127 students, or 3.3% of those registered failed to make grades sufficiently high to permit their continuation at Technology this term.

Under the rules for maintaining a minimum cumulative rating, a student may be suspended for one term, two terms, or be disqualified from further attendance. The severity of his suspension depends on the individual's record; those who have been suspended once previously are barred from further matriculation at the Institute.

Percentage-wise, the class of 1951 suffered the greatest loss among the four classes. The Sophomores also can boast the greatest number of permanent failures, 7 as compared to 6, 4, and 1 for the classes of 1950, 1949 and 1952 respectively.

Out of a total registration of 939, 39 (4.1%) of the Sophomores will not continue at the Institute this term. At the other end of the scale, only 1.6% of the Seniors flunked out.

In the freshman class, 32 have dropped out for one term and one student has been permanently dismissed. These figures represent 4.0% of the class.

The class of 1950 tied the Sophomores for single-term dismissals at a figure of 10 and beat the Sophomores, 24 to 22, for two-term dismissals. While with a total of 40 flunkies, the Juniors lead in number suspended, they are third in the list on a percentage basis, with only 3.5% disqualified.

Students suspended for one or two terms must petition the Institute to gain readmission.

Radcliffe, M. I. T. Join For Concert Selections By Handel, Schubert Are Planned

Combining their talents, the Radcliffe Choral Society and the M. I. T. Glee Club will present a concert in Walker Memorial on February 18, at 8:30 p.m.

A selection from Handel's Messiah along with pieces by Kodaly, Purcell, Villa-Lobos, Schubert, and Randall Thompson constitute the main portion of the concert. The two groups will sing these different selections both individually and in combination.

Composed of seventy voices, the Radcliffe choristers, under the direction of Wallace G. Woodworth, have recently done performances with Brown, Harvard and the Boston Symphony Orchestra.

Mr. Klaus Liepman will conduct the Tech singers who also have seventy men in the fold. They will feature James C. Bresbe, G, as baritone soloist.

Dance After Concert

Following the concert, which will end about 10:15, there will be a dance, with music furnished by the Tectonians lasting until 1:00 a.m. Tickets are 60 cents each for the concert, and \$1.20 each for the dance. No stag tickets will be sold for the dance, although they will be sold for the concert. Tickets will also be available at the door.

The Tech

Letters to the Editor

EXPRESSION OF OPINION

Dear Sir:

Your editorial in today's (February 15) issue is a close replica of a letter read to the Dorm Committee only last night as the expression of opinion of one barracks resident.

I would suggest that it may have been better to have published the material contained in your editorial as a letter to the editor.

Does this editorial represent the facts? I do not know the answer to this question. I only know that the Dormitory Committee as late as last night did not have the facts; for that reason a subcommittee was appointed to study present regulations.

If you feel that you are not absolutely certain of the validity of all the statements then a retraction would certainly be in order.

I am of the opinion that the Dorm managers earnestly try to work for the good of the students at large. For that reason also was I sorry to note the strong rebukes which were given these men, apparently as a matter of editorial policy.

It is to be hoped that The Tech will continue to further good student-administration relations by maintaining an impartial editorial policy.

Gerald G. Fisch, '49

The editorial had no relationship to the letter read to Dormitory Committee. In fact, the first draft of the editorial was written some three weeks ago, well before the current term began.

The editorial represents the facts as well as we have been able to determine them, inference from circumstantial evidence, and reasonable opinion. The wording of certain parts of the editorial was unfortunately misleading. The Tech will be happy to justify its statements before the Dormitory subcommittee and to publish the findings of the subcommittee when they are issued.

The Editor of The Tech is personally aware of the earnestness of the Dormitory manager and does not feel that the injustice done to many barracks residents stems from any dereliction on his part.

The Dormitory Board would have done much to further good student-administration relations by defining and publishing a realistic, workable policy.

A GREAT INJUSTICE

Dear Sir:

We feel that a great injustice is being perpetrated upon the student body of M.I.T. On April 1, our new president, Dr. James R. Killian, is to be inaugurated with all due pomp and ceremony in Rockwell Cage. Invitations have been sent out already for this affair—how many nobody knows. However, in keeping with what seems to be the general Institute policy of placing the students, all 5000-odd \$350 a term students, at the place commonly reserved for the part that went over the fence last, only a few students have received these large and impressive invitations.

One possible reason for this state of affairs is that Rockwell Cage is not of sufficient size to accommodate outsiders as well as the students. Hence—no students. However, in spite of the fact that M.I.T. is now recognized as the foremost scientific institution in the world, the powers that be (namely, the Administration) neglected to consider such places as the Boston Garden, Braves Field, or, best of all, our own Great Court. Surely the expense already being allocated to these ceremonies would hardly feel the cost of such a worthy project. With such a scheme, the privileged few could be given seats, and the students could also be included, although it might mean that they would have to stand.

In closing we wish to express the hope that the present situation was not caused intentionally, but that this grievous slight upon the student body is the result of an oversight. If so, we believe that all possible steps should be taken to

(Continued on Page 5)

In The Spotlight

Dynamic and untiring is the description of Professor Hans Mueller as both a lecturer and a friend. Those who have attended his classes, fully realize his exceptional ability to simplify the subject matter and create interest in the course.

Earn and raised in the Swiss town of Amriswil, Professor Mueller completed his secondary school education and later attended the Swiss Institute of Technology (E. T. H.) The head of the Physics

The years following 1924 found him teaching a wide variety of courses including Atomic Physics and Meteorology. He progressed steadily on the ladder of teaching status until today, with the position of professor, he is one of the key men in the Physics Department.

"Tech is a factory," states Professor Mueller, "and the student has too much to learn to know anything well." As a registration officer he has found that the stu-

Photo by Gerhardt

Professor Hans Mueller fends off the admonishing finger of Professor Hans Mueller.

Department of E.T.H. was lecturing in the United States in 1924 and was asked to send one of his associates to M.I.T. Thus in 1925, Hans Mueller came to the Institute as a research assistant.

Marriage altered his original plans to remain in the United States only temporarily. However, he and his wife, a Simmons graduate, took a trip to Europe on their honeymoon. Three additional times he has returned to his native country, the last, in 1937, was on a one-year Guggenheim fellowship.

dents, already unable to digest his studies properly, are continually trying to take overloads and as a consequence, are spreading themselves thin. More outside reading on the basic work will be of greater value, he advises.

"Proper relaxation is essential to the student," he continued, "and a good summer's rest is desirable." Professor Mueller spends his own vacations either in his garden at his home near Plymouth or fishing in Maine.

Underground Tunnel Is Hot Stuff; Coed Finds Building 9

By Lydia R. Bacot

Building 9 has at last been found. It extends underground from Building 3 across Vassar Street to Building 37, the Institute's power plant. This underground chamber is constructed of concrete, and measures about six feet by six feet. Steam, which is used to heat the main buildings, is transported through two large pipes contained in this tunnel. Each of these pipes is about two feet in diameter.

The steam pipes are constructed of steel and covered with a fiber insulating material. This covering keeps in most of the heat, but the tunnel is still very hot. A fan system is used to keep the tunnel cool enough for maintenance men to work on the pipes. Even then the temperature is well over 100 degrees Fahrenheit. If the fan system should break down, the heat of the

tunnel would, of course, be unbearable.

In the tunnel are a few dim lights, intended to make passage through the tunnel easier. Most of the bulbs, especially those over short flights of stairs, are burned out. In addition, there are small hazards to be overcome, such as steam pipes crossing the tunnel, steep flights of stairs occurring suddenly in the darkness, and large puddles of water. At the power plant end of the tunnel there is a water-tight door so that if one of the pipes breaks, the plant will not be flooded.

In addition to this large steam pipe tunnel, there are smaller ones scattered throughout the Institute.

A. A. Appoints 3 New Officers

Appointment of Randall Gibson as Treasurer, Ralph Thornton as Equipment Manager, and Jack Stewart as Publicity Manager was approved by the Athletic Association at its first meeting of the term last Tuesday evening in Litchfield Lounge. All three appointments are for the coming year.

Other business of the meeting included the presentation of a varsity "T" and sweater to Director of Athletics Ivan J. Geiger in recognition of his contribution to athletic development at the Institute during the past year. The presentation was made by Jim Veras, retiring President of the AA.

In addition to the award given to Mr. Geiger, Executive Committee awards were presented to the outgoing Executive Committee by George Lopez, the AA's new President.

Pucksters Whip Bowdoin, 11-3, Point For League Playoff Berth

Cagers Bow To Devens, Brown Frosh Down Bruin Cubs, 51-39

Losing the prestige they had begun to reaccumulate, Tech's sporadic courtmen dropped two contests last Monday and Wednesday evenings to Devens and Brown respectively. The Devens encounter was dropped 39-37, while the Brown game provided a more humiliating drubbing at Walker Gym, 64-44. A 51-39 Frosh victory over the Bruins was the only consolation to disappointed Tech followers.

Unable to solve the steel fan-type backboards, the Engineers were only able to account for three baskets during the entire first half against Devens. Halftime showed Tech behind 21-13 and playing way off their

form of the B.U. contest. In the last period the Engineers managed to gain a bulge of five points, but once again fell back as they finally bowed, 39-37.

Brown Fast, Scrappy

Even the cheering section of the class of '51 couldn't help the faltering Engineers on Wednesday night, for the Brown Bears displayed a fast, scrappy attack which kept the Beavers in arrears throughout the entire fray. Lou Morton turned in some sparkling play, but without assistance from the rest of the squad it was of no avail. Moe Mahoney of the Bruins was particularly noticeable both offensively and defensively.

Employing its fast break to a distinct advantage, Brown jumped off to a 12-6 lead as the Beavers found it hard to convert their foul tries. Then Lou Morton tapped one in, but this was the nearest the Tech came to victory as the Bears poured it on, raising the score to 30-19 at the half.

The second half began to resemble a rout as the Bruins penetrated the Engineers' defense for five straight baskets to pull way out in front, 40-19. Here, Tech braced and closed the gap to 43-28, but it was apparent that the Engineers were outclassed in this one.

Frosh Win Eighth

Sloppy ball handling on the part of the Tech frosh during the first half contributed to handing the Bruins a 23-21 advantage at intermission. The playmaking of Captain Herb Glantz, and the accurate shooting of Cliff Herdman were the only bright spots in the Beaver offense.

The second half was a different story. Goals by Hank Hohorst and Herdman gave the Engineers a 30-26 lead which they never relinquished. Towards the end both sides substituted freely as the Beavers pulled out in front 47-35, and then proceeded to coast in. Possibly the loss of Mike Nacey on personal fouls hampered the Frosh offensive at first, but once they found the right combination they showed enough stuff to win easily.

Lea Scores Four Goals In Rout Of Polar Bears

After a slow start, the Tech hockey team came on to trounce Bowdoin, 11-3, last Monday night at the Boston Skating Club, and considerably improved its chances of landing a spot in the New England League playoffs. Don Lea flashed the red light four times to lead the Tech offense.

Play during the first period was fairly even as the Bowdoin defensemen covered well and slowed down the Tech forwards with many bruising body checks. The Engineers left the ice at the end of the period with a 2-1 lead as a result of goals by Lea and Jim Fuller.

Bowdoin Ties It Up

Bowdoin opened the scoring in the second period with a goal by Bonzagni on a nice pass from Crockford. At the 8-minute mark, after some hard checking, first line center Charley Nolan tangled with Atwood of the Polar Bears in a fist fight near the Bowdoin blue line. The decision in the fight was a draw, with both men getting misconduct penalties and being banished from the game.

After the fight the Beavers seemed to catch on fire, as they fired in six straight goals before the period ended to turn the game into a rout. Tim Chisholm scored two of the goals, with Fuller, Lea, Tsotsi and Spaulding getting the others. Tsotsi's goal was the prettiest of the night as he skated the length of the rink, swung around the Bowdoin defense and hit the corner of the net with a neat angle shot.

Still hustling as they came out for the third period, the Engineers scored two goals right at the beginning, with Lea and Gerry Walworth scoring them. Lea added his final goal in the last minute of play.

Madden Still Out

Ben Martin's squad played this game after a three-week layoff and without the valuable services of Captain Teddy Madden, who was still in the infirmary. Although the team lacked finesse in its passing attack, the boys showed a lot of hustle and spirit in beating a pretty good Bowdoin squad.

In addition to his four goals, Lea also got three assists to increase his scoring totals. Jim Fuller again excelled on defense and gained credit for two assists, while Gerry Walworth got four assists as well as his goal. Goalie Scott Connor, improving with every contest, played a good, steady game in the nets.

Next Monday night the team engages Brown University at the Skating Club in a game starting at 7 p.m.

Frosh Swimmers Take Third Defeat

After journeying to Middletown, R. I., to engage the St. George Prep school, Tech's freshman swimmers lost their third meet of the season against four wins, by the score of 49½-29½. The frosh lost the first event of the meet and were behind the rest of the way. Jack Pines in the 100-yard breaststroke, Dirk Plummer in the 100-yard backstroke, and Mitchell in the diving, and the 100-yard medley relay team took first place honors for Tech.

The summary follows:
 40 yard freestyle: Won by Baird, St. George; 2—Huling, St. George; 3—Lucas, M.I.T. Time—19.6.
 100 yard breaststroke: Won by Pines (M.I.T.); 2—Beardsley (St. George); 3—Hoffman (St. George). Time—1:09.7.
 200 yard freestyle: Burnett (G); 2—Pierson (G); 3—Selig (M). Time—2:15.2.
 100 yard backstroke: 1—Plummer (M); 2—Williams (G); 3—Tie, Ceres (G), Ong (M). Time—1:06.7.
 1100 yard freestyle: 1—Lawson (G); 2—Daly (M); 3—Olsen (G). Time—56.7.
 Dives: 1—Mitchell (M); 2—Gidney (G); 3—Barnes (G). Time—40.4.
 120 yard ind. medley: 1—Burnett (G); 2—Damon (M); 3—Baker (M). Time—1:20.8.
 120 yard medley relay: Won by M.I.T. Time—1:08.3.
 160 yard relay: Won by St. George. Time—1:24.2.

'O Say Can You Si!' Now In Rehearsal

Tickets Will Go On Sale Mar. 1 For \$1.20, \$2.40

The cast of "Tech Show" has been working for four months to bring you this year's production entitled "O Say Can You Si." Behind the scenes gangs are working to insure completion of the stage, props, and scenery soon so that staging of the play can start.

"Even if we can't build a whole schooner on the stage we can at least build a part of one . . ." is the sort of talk that one hears at rehearsals. Since part of the play takes place on a boat the construction crew is having a difficult time figuring out how to build such things as gangplanks and huge collapsible boxes on a stage.

Tickets will go on sale about March 1st; they will be priced from \$1.20 to \$2.40. The show will be put on at the Cambridge High and Latin School, Cambridge.

I.O.C.A.'s Carnival Will Feature Skiing

The third I.O.C.A. Winter Carnival will be held at Happy Valley Golf Course, Lynn, on February 26. There will be skiing and skating events, supper, a songfest, and a square dance in the evening. On Sunday, February 27, busses will run to a ski area in lower New Hampshire for informal races and recreational skiing.

The tickets, which are printed in sections, may be purchased for one or for all events. They are on sale in the Outing Club office and also in Building 10.
