Industry Positions Still Good But 1949 Grads Find Keen Competition

By J. Mark W. A. O. (Special to The Tech)

Last year, some two hundred Air Force bomb disposal experts arrived. This year, with the reorganization of the Air Force, only a few hundred are expected to come. The situation seems to be improving, however, with the recent announcement of a new training program for Air Force personnel.

The new program, known as the "Airman's Training Program," is designed to prepare personnel for a variety of roles within the Air Force. It includes both theoretical and practical training, with a focus on developing skills in areas such as communication, leadership, and technical expertise.

The program is open to all personnel who have completed basic training and have demonstrated a commitment to their profession. It offers a range of courses, from basic skills to advanced topics, and is designed to be flexible and adaptable to the needs of individual personnel.

In addition to the new training program, the Air Force is also looking to support personnel in their personal and professional development. This includes opportunities for continued education, leadership training, and career counseling.

Overall, the Air Force continues to prioritize the development of its personnel, recognizing the importance of a skilled and competent workforce in achieving its mission.

Nineteen Teams Vying In Debate

M.I.T. Glee Club Making Broadcast In Huntington Hall

On Sunday, February 5, the M.I.T. Glee Club will be making a broadcast in Huntington Hall. The broadcast will feature performances of popular songs and will be broadcast over the New England Network of Radio Stations.

The M.I.T. Glee Club, founded in 1869, is one of the oldest and most prestigious collegiate glee clubs in the United States. The club is known for its high level of musical talent and its commitment to performing music that is both classic and contemporary.

The broadcast will be a highlight of the club's annual fund-raising campaign, which is aimed at supporting the club's operational expenses and providing scholarships to students who demonstrate exceptional musical talent.

The broadcast will be broadcast from 4:50 p.m. to 5:30 p.m. and is expected to draw a large audience.

The M.I.T. Glee Club's broadcast is just one of the many events taking place throughout the year at MIT. The university is known for its commitment to excellence in all areas of academic and artistic endeavor.

Cuba beer, which is currently used in Havana to make rum, will provide 100% of the sugar needed for fermentation. This process will be used to produce a new type of rum that is more sustainable and eco-friendly than traditional rum-making techniques.

Heavy Bombers Contracted For Technology Flying Laboratories

Technology is now operating several new flying laboratories, which are being used for flight test purposes. These laboratories, which include a B-39, a C-47, and a B-26, are being used to test various aspects of technology-related projects.

One such project, which goes under the name "M.I.T. Bedford flight facility," was begun to enable air and space exploration. Under actual flight conditions, of course, it is impossible to predict how an aircraft will perform. This is why laboratories are built in which realistic flight conditions can be simulated.

One of the primary purposes of the M.I.T. Bedford flight facility is to provide a platform for testing and developing new technologies. The facility is equipped with advanced equipment and has been designed to simulate a wide range of flight conditions.

The use of flight testing is critical in the development of new technologies. It allows researchers to identify and address potential issues before they become problems in the field.

The FACTS of LIFE

That great and beneficent protector of the American Ideal, Life Magazine, has seen fit of late to include the following article in its usual laudatory review of the way in which the United States, and particularly Commie-land behind the iron curtain, is bearing the brunt of the free world's struggle against the Russia-first organizations backed by Hollywood and college people.

The nitwits who front for Communism on Hollywood salaries are not employed as professors at the University of Washington, five of its professors as a matter of fact, have been fired under the Act of March 31, 1879.

The story of the University of Washington's Kansas City office is as follows:

Several other nasty little incidents have occurred during the past year.

First of all, we would like to make it clear that the people in colleges who adhere to Communist doctrines are not “nitwits.” As a rule, nitwits are not employed as professors who work for a party that is dedicated to the violent overthrow of the state. If people such as these are Communists, it is probably because they have a great deal of original thought to the problem of world society, and have decided to solve it in their own way. If such people are Communists, it is probably because they are the only people with a chance to solve the problem of world society, and have decided to solve it in their own way.

The University of Washington fired three of its professors as a matter of fact, have been fired under the Act of March 31, 1879.

The second idea is perhaps best stated by Life as why the University of Washington fired three of its professors as a matter of fact, have been fired under the Act of March 31, 1879.

Icemen Trounced By Harvard, 13-6, After 5-4 Loss To Brown

Don Lea, 'star Tech forward, has just taken a shot which was blocked by Whittou, Brown goalie. Number 3 is Ned Dewey of the Bruins.

Meeting two strong Ivy League foes during the early part of this week, the Tech hockey squad went down to defeat in both games. The first was a 3-4 setback at the hands of Brown on Monday evening, while Harvard administered a 13-6 drubbing on Wednesday night at the Arena.

The Brown game was thrill-packed and hard-fought all the way. Accorded no chance in the pre-game predictions against a team which had taken Dartmouth to overtime before losing, the Engineers played sixty minutes of good hockey and were beaten mainly because of the brilliance of Don Whittou, Brown goalie.

Cagers Bow To Huskies, 57-56, In Final Minute; Freshmen Win, 57-49

Don Blair, a Northeastern Husky with ice-water in his veins, stood at the free throw line and calmly swished four free throws through the hoop during the final thirty seconds of play to hand the Tech couriers a heartbreaking 57-56 defeat at Waker Gym last Wednesday evening. In a preliminary game the Beaver frosh outcolled their Northeastern rivals to win, 37-30. The Sweatshirts' five played what was probably its best game of the season before a cheering crowd which was well interspersed with Northeasterners. Lou Morton had his hook shot working and did an admirable job of guarding Fins Walsh, the Huskies' big man, despite having to play almost the entire second period against him. Captain Jim Blair played without rest and scored 16 points before fouling out of the game.

The over defense played by the Huskies was something to behold, and the stunting of the Tech attack kept the Engineers to a respectable aggregate of points. Mike Nacey netted 19 points to lead the Huskies, but Juley Kassig, Herb Glantz, and Larry Garthe eventually did run out the clock.

A Team Victory

As the clock ran out before the Beavers could make their comeback, and so the Junior of the Tech team had to make the final basket to preserve the victory. The opening period was hard fought, and the Engineers were not a bit behind. After the intermission the Tech courtmen had a lead by 29-21 at halftime, and increased the margin to 56-55 after they were never headed. Tech headed the way to avenge an early-season setback.

In the third quarter the Huskies kicked in, and only two points were scored by the Engineers in the entire period. The clock ran out before the Beavers led 56-55.

In the fourth quarter, however, the Huskies were phenomenal from the foul line, scoring 10 points. In the last minute the score moved back forth continuously.

Maddox Foul Out

Tech's 6-4 inside man fouled out of the game with a foul shot by the Huskies, but the Beavers were still able to go on without him. The final point was scored when Tech's 6-4 inside man fouled out of the game. In the last minute, the score was 55-56.

Squashmen Lose To Harvard, 9-0

Tech's hapless squash team absorbed another 9-0 shelling last weekend. Although Harvard, this time at the hands of Harvard's neccessitous No. 1 racket, Arthur L. Shaw, put the Red on the back foot, the Engineers amassed their ninth successive drubbing.

Summary

Henry Farnsworth (H) defeated David D. Zimmermann (1); 2nd--Stanley (T); 3rd--Tyler (T). Time: 1:11.7.

Hockey

In a dally during this stanza, which ended with the score tied 4-4, the Bears seemed to have the edge during the last period, and fifteen of their shots went home, and Lewson's goal at the halfway point gave the visitors their winning margin. The Engineers had an excellent chance to come out of the last three minutes while Brown had two men in the penalty box. However, they could not capitalize.

Harrad Trails

The Harvard game looked like an easy win, and as Tech got off to a 3-0 lead, with Lea and Grady doing the scoring, the visitors thought they had the lid on with four goals in the second period. Tech leading by a surprising 3-4 advantage.

However, for the reminder of the game the Bears looked like a second-rate high school team as Harvard proceeded to turn the game into a rout. With Tech defense falling apart and the offense generally nonexistent, Harvard scored five goals in the second period and added four more in the last, while Telford's solo dash was the only Tech score for the remainder of the game.

Four of the Crimson's goals were scored while they themselves were short a man.

Swimming

WMR presents

WMR will feature two prominent musicians of the jazz world on its Friday, 11:00 P.M. "Night Owl" show. They will be Ed-

mune Ball, of Bob Willard’s band, and trumpeter Jimmy Archib. Both are now at the Savoy.

Designers Speaks To A.S.C.E. Group

Dr. B. B. Steinman, internationally famous bridge designer and author, spoke to the M.T.S. Student Chapter of the American Society of Civil Engineers at the Campus Room on Friday, Dr. Steinman addressed a capacity audience of students and faculty, and many slides were shown of the bridges which he designed both in this country and abroad. Guests at the dinner meeting were: Mr. Karl Emmernann, Chief Engineer of the Metropolitan Dist-

rict Water Supply Commission and the new Contact Member of the So-

ciety; Professor Albert Hasteilaff, of Harvard, and Mr. Arthur L. Shaw of the Macekaf and Rody Company.

Huddled in line for their深夜 treat: May have a Lucky, a delicious smoke, while we wait for the preceding crowd to leave.

Light up a Lucky! Luckies' fine tobacco picks you up when you're alive. So get on the Lucky level to do your level best, the lucky one. 34.
