

BIG SHAKEUP IN DORM POLICY

All-Tech Sweeps '51 Mann, Fitch, Victorious

Arthur A. Wasserman was returned as new president of the Class of 1951 and chairman of the Institute Committee in the class elections held last Tuesday and approved by the Institute Committee on Wednesday.

Gerald S. Burns as runner-up to Wasserman will be Vice-President of the class. Wasserman's All-

Tech slate swept the other senior positions as follows: Secretary-treasurer, Margaret E. Irby; Institute Committee, Walter E. Casey and Lester W. Preston, Jr.

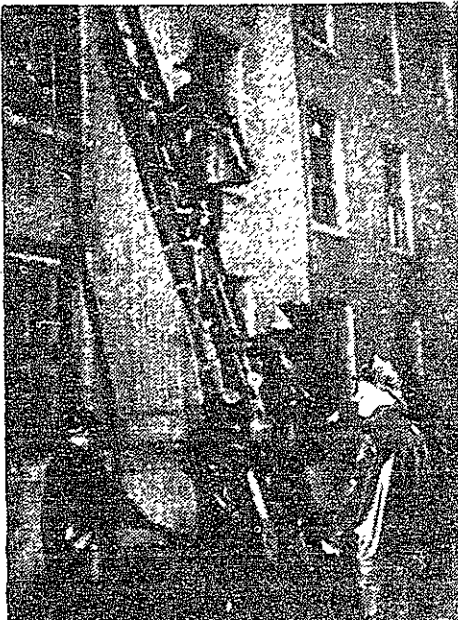

Mann Permanent President of '50 Permanent president of the class of 1950 will be Robert W. Mann, retiring chairman of Institute Com-

(Continued on Page 2)

Politics Get Hot As Banner Burns In Blaze At Dorms

Techmen called out the Cambridge fire department last Tuesday morning for the second time since the end of last term. Two hook-and-ladder trucks plus three pumpers and the rescue squad truck arrived at the Old Dorms on Ames Street about 12:30 a.m., Tuesday morning to put out a fire in the room of James A. Pitcock '51.

Robert S. Topas '53 discovered the fire which was caused by the

Tuesday's dorm fire caused by flaming banner soon brought firemen to scene.

burning embers of the political banner that had been hung on the side of the building. Covering his nose with a handkerchief, Topas entered the room, tore down a burning curtain and turned in the alarm.

Dorm men turned out en masse

(Continued on Page 2)

Frosh To Fill Most Of Old Dorms In New Student Housing Policy

With the exception of those men living on the first and second floors of Walcott, Bemis, and Goodale, Old Dorm residents will not be allowed to retain their rooms in the Bemis and Hayden units. These rooms will be reserved exclusively for the Class of '54, according to the new policy announced today by Director of Housing Frank M. Baldwin.

2 Million-Volt X-Ray Facilitate Treatment Of Malignant Tumors

Use of 2,000,000 volt x-rays in a new method of treating malignant tumors was announced today by Dr. John G. Trump, associate professor of electrical engineering at Technology.

This new technique has been used by radiologists of the Lahey Clinic and Massachusetts General Hospital in treating more than 50 patients in a special high-voltage x-ray laboratory at the Institute. Best results have been obtained treating malignancies in the head, neck, throat, lungs, and esophagus, Dr. Hare of the Lahey Clinic said.

"Two million-volt x-rays," according to Dr. Trump, "are fully equivalent in penetration to those from radium. The generator now in use has an x-ray output equal to that from more than 4000 grams of radium, or twice the available world's supply."

Dr. H. F. Hare of Lahey Clinic summed up the possibilities of the new development with the following statement. "This is the most promising method evolved so far for treating deep tumors susceptible to radiation therapy, including many cases previously inaccessible."

Approximately 750 freshmen are expected to enter the Institute next fall, and of these it is estimated that 350 will wish to live in the Dorms, 175 will join fraternities, about 150 will live at home in and around Boston, and the remaining 75 will live off campus for various personal reasons.

Rooms Guaranteed

Under the new policy, freshmen can be guaranteed living accommodation for the first time in years.

Riverside Apartments, recently acquired by the Institute, will be partially ready for occupancy by the beginning of the Fall Term. According to a statement by the Director of Housing, "It is expected that an adequate number of suites and rooms will be available by the opening of the Fall Term to provide accommodations for all graduate and undergraduate students who apply and also for those who are not assigned to the present permanent houses."

Priority System Changed

Under the priority system set up by the new policy, members of the Class of '54 have priority number one, present residents except those evicted number two, ousted residents number three, all members of '51 number four, present residents changing location number five, remaining students number six. A complete statement of the new policy is contained on page four of this issue.

Rental in all units will remain the same next year, but many existing services will be discontinued. Instead of raising the rentals on dorm rooms, the Institute will not furnish blankets, bed linen, towels, or laundry service for bed linen and towels.

Building 22 will open for the Fall Term but may be closed down if adequate housing is available elsewhere.

At the present time there are accommodations for 736 men in the old dorms units reserved for incoming freshmen will house approximately 350 men.

The complete text of the Official Dormitory Policy appears on page four of this issue.

Brogan Accounts For English Labor Vote

British politics were analyzed by Professor Denis W. Brogan of Cambridge University, England, during a recent talk sponsored by the English and History Department.

Professor Brogan emphasized the fact that income groups largely determine party politics in England. Those who earn \$1,500 a year or less usually vote Labor, while those earning over \$1,500 generally vote Conservative. The income situation as it exists now has made the Labor Party what Professor Brogan termed "intrinsically stronger" than the Conservative Party.

Many Tall People Make Up "High" Society In Boston

Left to right, High Hubbers Jim Ricketts, Ann Bryant, Ed Sullivan, Louise McTeggart, George Fandell, and Ruth Cruickshank being "looked up to" by interviewer Dave Kessel.

By ALEX DANZBERGER

"Expect big people to do big things" is a saying we have all often heard. Back in 1946 three tall girls, each measuring about five feet ten inches from head to toe, really started a big thing when they decided that the Boston social scene was lacking in at least one facility—a club for tall people. Cities from

Maine to California had them, so why not Boston, they reasoned. To remedy the situation the High Hubbers club of Boston was organized with the help of a large number of Tech men to arrange group activities for those in "high" society. The idea caught on rapidly, and the club expanded with long strides; so that

"It Happened This Way"

By KARL T. COMPTON

In Tuesday's installment of his reminiscences, Dr. Compton described his life as a chemistry instructor at the College of Wooster and his experience as a graduate student in physics at Princeton.

Today Dr. Compton tells of his experience as a teacher at Reed College and his return to Princeton, where he became head of the Department of Physics. It was at this stage that he was unexpectedly offered the presidency of M.I.T.

Copyright, 1950, by THE TECH.

PART III

Once again Fate intervened from an unexpected quarter. Four of us at the graduate students' house had for two years carried on a continuous bridge tournament,—a chemist, an archeologist, an historian, and I. We limited ourselves to one rubber each night after dinner, before going back to our respective laboratories or seminars for the nightly sessions with our research problems. My partner in this bridge marathon had, in his undergraduate days, been student assistant to Professor William Trufant Foster of Bowdoin College, who had only recently been elected President of the newly founded Reed College in Portland, Oregon.

My partner, the archeologist, without my knowledge, wrote to President Foster to suggest me to organize and head the physics department in this new college. What he said about me I do not know. He may well have written: "If you have not yet selected the head for your physics department, I can suggest a man whom I know at second hand to have a pretty good reputation as a young physicist. All I know at first hand about his technical competence pertains to the field of bridge." However this may be, Dr. Foster came to Princeton and offered me the job at Reed College, where I spent two very satisfying years.

Around the middle of my second year at Reed College I received a letter which again altered my career. Professor O. W. Richardson, under whom I had received my research training and inspiration at Princeton, wrote that he was going back to England to accept the Wheatstone Professorship at the University of London, but that, before going, he had been asked by Yale University to suggest a young physicist for addition to its staff. He said that he had recommended me, and advised me to submit my application for the job, which I did promptly.

To strengthen my case before the authorities at Yale, I wrote to the head of the physics department at Princeton asking if he would support my application to Yale. To give him a basis for judging my performance since leaving Princeton, I told him about some of the interesting research which had been carried on by four of my Reed College undergraduates and which was soon to be reported in a series of papers in the Physical Review.

The net result of all this was that I never had any reply from Yale, but was highly pleased and surprised when a letter came quickly from Princeton offering me an assistant professorship and an opportunity to carry on research work with students in the general field of electronics, which Professor Richardson had established there with such notable success.

Let me skip over fifteen happy and productive years on the Princeton faculty, including the period of World War I which was not without incidents, with the relating of only one revealing episode. Toward the end of my first year on the faculty, the head of my department stepped into my laboratory room one day and said that he had recommended me to be head of the physics department of a smaller university, and advised me to visit the institution and look the place over. I tried to thank him with a show of appreciation, but it was hard to put on the show, for I interpreted this to mean that my performance had not been up to the department's expectations and that I was

THE DISPOSSESSED

In an attempt to create some semblance of a "college spirit" and to unify the members of the entering class, the Housing Director has seen fit to establish the system of dormitory priorities presented elsewhere in this issue. As long as adequate facilities are available to accommodate all upperclassmen now living in the dormitory system we believe that the new priority system, with but one exception, is a sound one. However, it is to be noticed that all present residents of the Munroe, Hayden, and Wood dormitories and the residents of the third, fourth, and fifth floors of Wolcott, Bemis, and Goodale will be "dispossessed" come next September. It is our belief that this is an unjust decision. Although the people who would wish to remain in the above mentioned rooms represent only a minority of the total dormitory population, the fact remains that under a reasonable priority system any upperclassman now occupying a room should have first claim on the same room in the fall.

The dorm units under question represent a unique type of accommodation to be found nowhere else on the campus. Generally speaking, the rooms in the Hayden group are superior to those found in any other housing unit with the exception of the New Dormitories. We are advised that the Hayden group was selected for freshman reservation partially because it was felt that present residents considered these rooms least desirable of the accommodations in the Old Dormitories. This is a mistaken opinion; actually, present Dormdwellers consider the Hayden unit rooms the best in the Old Dorm group, and we can predict that many will howl very loudly when they discover that they will be forced to live elsewhere next term.

We agree that there are great benefits to be derived from providing a freshman dormitory. We have always felt that it would be of great value to require all freshmen to live in the dormitories for at least the first term, and certainly the new housing policy is a step in this direction. One reason for the establishment of the new policy came about when it was learned that many potential Techmen have cancelled their registration material when they discovered that they would not be assured of a place to live. Obviously, this is an undesirable situation in need of correction. By reserving space for 350 freshmen, the Admissions Office will be able to guarantee rooms for all freshmen who want them.

But to reserve space for a large body of freshmen doesn't imply that upperclassmen should not be present. We believe that upperclassmen in the same building with new students exert a stimulating and helpful influence on these people. These same upperclassmen provide a valuable source of information to the myriad questions and problems that the neophyte engineer faces. The problem is basically one of distribution and we believe the solution lies in having large groups of upperclassmen in the same building as a large group of new students. For example the top three floors of the Hayden unit could be set aside for members of the entering class and the bottom floors reserved for students wishing these accommodations, and freshmen might be interspersed with upperclassmen in any rooms that become available in Riverside next September.

—M. C. G.

Letters to the Editor

Editor, The Tech
Dear Sir:

Three cheers for The Tech, and whoever wrote the editorial on "Two Short Terms." It is an excellent solution to the Techman's primary problem of the allocation of his time. I sincerely hope that the wheels of the Institute grind this suggestion into something concrete.

W. R. Hewitt, '51

AFTER HOURS

DANCES

Courtesy "The Tomcat Hour"
FRIDAY, APRIL 14
 Boston YWCA—Stag dance with music by Art Brickley. Girls from a potential 28 girls schools. 140 Charendon St. Admission \$3.00, 8:15 p.m.
 Wellesley—Acquaintance Dance. Last dance was a huge success and this one should be even better. For tickets and further information contact Neil Panzier, Nichols 204 or Box 120, Dorms Mount Auburn Hospital—Margaret Jewett Hall, 8-12. No admission. Subway to Harvard Square, Waverley Car to Mount Auburn.
SATURDAY, APRIL 15
 Chamberlayne, Stratford, and Sherman, Inc.—Stag dance with music by George Lane and his orchestra. Hotel Sheraton, 91 Bay State Road at 8.
 Wellesley—Another acquaintance dance but with another dorm group. Contact Neil Panzier for tickets and information.

THEATRE
 Mr. Roberts—Colonial—A dramatization of Thomas Heggen's novel of shipboard unrest in the backwaters of the Pacific. The production is top-notch and will probably be around till the end of the summer.
 Miss Liberty—Schubert—The story of a rival newspaper squabble over the model for the statue which graces New York Harbor. By far the best attraction. In this musical is Irving Berlin's familiar score.
 Tickets Please—Flynouth—A new revue featuring the Hartmanns, who are always good insurance for an evening's entertainment.
 The Wild Duck—Brattle Hall—One of Ibsen's harsh and bitter tragedies starring Blanche Yurka as the unfortunate wife of an unhappy home.

SPORTS
FRIDAY, SATURDAY, SUNDAY
 Baseball, Braves vs. Red Sox. Three-Game Series, 2 p.m.
SUNDAY APRIL 16
 Basketball—Globe Trotters vs. College All-Stars. Boston Garden at 8:30.

Photo Deadline Now Postponed To Apr. 22
 Deadline for submission of photos for the Hobby Shop Photo Contest has been extended one week to Saturday, April 21. Judges for the contest will be Professor Harold R. Edgerton of the Electrical Engineering Department, Mr. Henry B. Kane, director of the Alumni Fund, and William B. Whiston '51.

Elections
 (Continued from Page 1)
 mittee. John T. Weaver will serve as Secretary and Joseph S. Gottlieb, Thomas J. McLeer, Jr., and Peter K. Stein will be Class Day Marshals.
 John Fitch, an independent candidate, took top honors in the class of 1952 presidential race. The Vice-Presidency went to Edward J. Margulies, Stanley I. Buchin won the position of Secretary-treasurer, and Institute Committee chairs went to Harold R. Lawrence and James L. Stockard.
 Ebner President of '53
 This year's freshman Secretary-Treasurer, Merrill Ebner, was chosen President of the Class of 1953 in its sophomore year. Other officers elected were: William E. Pennisi, Vice-President; Richard M. Jaffe, Secretary-Treasurer; and Gilbert D. Gardner and Edward Levy, Institute Committee.

EVERY FRIDAY NIGHT DANCING
 8:30 TO 1:00 IN THE BEAUTIFUL EMPIRE ROOM HOTEL KENMORE FOR YOUR DANCING AND LISTENING PLEASURE SWEET, DANCEABLE PROGRESSIVE JAZZ PERIODS BY THE FAMOUS LOUIS TRIO 9:30-10:00, 11:30-12:00 \$2.40 PER COUPLE, TAX INCL.

Boston Baedeker

By RICHARD J. POWELL

Too long the Friday recitals in E45 and E46 have gone by unknown to many a would-be interested person not enrolled in the music appreciation classes. It was not the intention to keep these recitals exclusive, but considered simply as a phase of the course, they went unannounced. In uncanning at least some portion of the music consumed by their students, Klaus Liepmann and Gregory Tucker during the year perform with care and competence a wealth of music from all periods. Actually each recital is repeated for the two Friday classes, the second of these, from 3 to 4 p.m., being a great deal smaller than the first, and thus making it possible for outsiders to attend. For this Friday, April 14th, a pupil of Mr. Tucker's at the Longy School will play the Beethoven Piano Concerto No. 4 in G, with a second piano acting as orchestra. All those interested in hearing this recital are welcome to attend. The time, 3 p.m., the place, 2-190.

Future E 46 programs are to include performances of Beethoven's Waldstein Sonata and Violin Concerto, Bach's Concerto for Oboe, Violin, and Piano, and the Horn Trio of Brahms. Louis Speyer and Willem Valkenier, both members of the Boston Symphony, are scheduled as guest artists.

B. S. O. Concert
 Once again Charles Munch yields the podium to his associate Richard Burgin, who is to conduct the Boston Symphony in their concert this week end. The program will consist of Bach's Passacaglia and Fugue in C minor, Kentucky Spring of Roy Harris (to be conducted by the composer), and Mahler's "Das Lied von der Erde" with Jennie Tourel, contralto, and David Garen, tenor, as soloists.

Juniors To Be Caged For Mug Lift, Tues.

This coming Tuesday evening at 8:30 the class of '51 will help celebrate the opening of Patriot's Day in their traditional Mug Lift gathering. "Rockwell" Cage has been selected for the stag affair. Beer and 'bop will highlight the program. Also on the agenda will be several motion picture shorts on sports and cartoons.

Oscar Hedlund, Institute track coach, has been chosen chug-a-lug master, and music will be supplied by the Dinner Music Society of upper Beacon Street. The '51 Mug Lift Committee, headed by Bill Shenkel, has ordered one and a half times the estimated beer requirement to guard against dry throats. A supply of specially designed beer mugs are on sale now in Building 10 for \$1.20 each. Tickets at \$1.25 have been on sale since April fourth.

High Hubbers

(Continued from Page 1)

today there are 75 active High Hubbers in Boston.

Membership is open to fellows who are over six feet two inches tall, and to gals who are over five feet ten. A High Hubber doesn't have to stay home Saturday nights because he can't find a suitable dancing partner. At least one party or dance is held every weekend, and the agenda often includes hay rides, swimming parties, and picnics; so that if you see a particularly "high" concentration of people around town it's probably the Hubbers en route to an evening of fun.

Tech Interest High

The Boston High Hubbers' club is only one of the many tall peoples clubs that range from coast to coast throughout the United States and Canada. Some of the larger clubs are located in New York, Los Angeles, Toronto, Cleveland, New Orleans, Vancouver, and Baltimore. These clubs are among the twenty members of the American Affiliation of Tall Peoples Clubs. In addition there are scores of non-affiliated clubs which contribute to this new force on the American scene.

Tech's participation in this organization has always been strong. Boston Men of Science have held the majority of the memberships until just recently, and the president has always been a Tech student. The president of the High Hubbers, Daniel Lundgren, '50, has held the office for the past two years.

Annual Assemblies Ball Held Tonight In Walker

Unusual decorations, floodlighting, and Ruby Newman's orchestra will greet the 700 guests at tonight's Assemblies Ball in Walker Memorial. Chaperones for the evening include Dean and Mrs. Everett Baker, Dean and Mrs. Thomas Pitre and Mr. and Mrs. Frank Baldwin. Dancing will begin at 10 P.M.

Admission to Saturday night's "I Ball" will be by bid only.

Dorm Fire

(Continued from Page 1)

as the arriving firemen set up ladders to the third floor room, and cheered the fire fighters on with choruses of "If I Knew You Were Comin'" and "For He's a Jolly Good Fellow." Two quick-thinking residents procured the fire extinguisher from the Dorm office, carried it to the roof of the building, and "extinguished" the two hundred dorm men watching the fire. After fifteen minutes of fire fighting, the firemen departed, minus only one hundred feet of rope, which was later returned.

THE FIRST CHURCH OF CHRIST, SCIENTIST

THE MOTHER CHURCH FALMOUTH, NORWAY AND ST. PAUL STS., BOSTON
 Sunday services 10:45 a.m. and 7:30 p.m.; Sunday School 10:45 a.m.; Wednesday evening meetings at 7:30, which include testimonies of Christian Science healing.

SWIM MEET HERE

MIT will be host to over 250 swimmers today and tomorrow at Alumni Pool when the Boys' Clubs of America present their seventh annual National Junior and Senior Swimming Championships. Eighteen teams from New England and New York State will vie for top honors. Admission is free to all.

Rugby Club Opens Season Tomorrow

Tomorrow afternoon will see Technology's independent Rugby Club journey to Princeton for their first encounter of the season. The footballers, who are not affiliated in any way with the M.I.T.A.A., will engage the Orange and Black in the first of three scheduled tussles this season. Their home opener will be with Harvard on April 22, while they will also journey to New Haven to battle the sons of old Eli on April 29.

Eight veterans from last year's team will return to the wars, led by Capt. Maurice Kunstenaar at right wing forward. The starting lineup will be as follows:

right post—Tony Kurtz
hooker—Jim Noian
left post—Jack Nipkin
scrum half—Pete Laxen
standoff—Ost Wheller
inside center—Dale Van Rosenberg
right 2nd line—Roger Felleby
left 2nd line—John Paul
right wing for.—Maurice Kunstenaar
left wing for.—Pete Smead
lock—Freeman Dike
outside center—Al Newton
right wing—Walt Highlander
left wing—Jack Barker
fullback—Tim Hanley

Golf Team Opens Schedule Monday Against Harvard

Monday afternoon at two o'clock the Tech golfers will tee off in their initial match of the season against Harvard. The engagement will be held on the links of the Dedham Golf and Polo Club.

Due to a late start the Beaver varsity has not been chosen as yet but it looks like the team will consist mainly of last year's veterans. The final qualification rounds will be held this week.

As it stands now Coach Lew Layda will probably start Captain Jack Corrie, Jim Fuller, Jim Christolm, William Hewitt, Norman Tisdale and Dave Schoessel.

Last year's varsity finished with a record of four wins as against four losses. It is hoped that this year experience will tell and that Layda's seasoned team will carry themselves better in competition. Last year's tilt with Harvard ended in a tie, with each team winning three matches.

Baseball Team Beaten Badly By BU Battlers

Defensive lapses by Tech and some timely hitting by B.U. gave the Terriers an 11-1 victory in the opening game of the New England college season last Wednesday afternoon. The game was played in chilly weather at Nickerson Field in Weston.

After some early threats by both teams had been turned back, the game entered the last of the fourth a scoreless tie. With one out Amos Dixon walked Harry Agganis, and then proceeded to pick the Terrier grid star off first base. However, Hal Winkler walked, and Sheehan lifted a high fly which was misjudged by Barney Byrne and went for two bases, scoring Winkler.

Sigma Chi Unbeaten

Sigma Chi fraternity's intramural volleyball team is just one victory from the championship. After taking the League A title without a setback the Sigma Chi's have been undefeated in the round robin finals to date and need only a victory over Phi Delta Theta to cop the championship and close their season undefeated.

Fighting it out for second place is Sigma Alpha Epsilon and Phi Gamma Delta both with records of 3-1 in finals play and 5-0 in regular season activity. These two fraternities will play their final round robin contest against one another for the second place berth.

The final Volleyball league standings follow:

	W	L	Ave.
League A			
Sigma Chi	5	0	1.000
Grad. House A	3	2	.600
New Dorms A	3	2	.600
Delta Tau Delta	2	3	.400
Phi Kappa	2	3	.400
League B			
Phi Delta Theta	5	0	1.000
Alpha Club	3	2	.600
Delta Upsilon	3	2	.600
New Dorm B	2	3	.400
Lenox Club	1	4	.200
Goodale	1	4	.200
League C			
Theta Chi	5	0	1.000
Theta Xi	4	1	.800
Phi Sigma Kappa	3	2	.600
New Dorm C	2	3	.400
Theta Delta Chi	1	4	.200
Barracks B	0	5	.000
League D			
Phi Kappa Sigma	5	0	1.000
Alpha Tau Omega	4	1	.800
Sigma Nu	3	2	.600
Senior House	2	3	.400
Bemis	1	4	.200
Pegis Club	0	5	.000
League E			
Sigma Alpha Epsilon	5	0	1.000
New Dorms D	4	1	.800
Grad House B	3	2	.600
Student House	2	3	.400
Phi Beta Epsilon	1	4	.200
Walcott	0	5	.000
League F			
Phi Gamma Delta	5	0	1.000
Delta Kappa Epsilon	4	1	.800
Chi Phi	3	2	.600
Barracks A	2	3	.400
Phi Mu Delta	2	3	.400
Lambda Chi Alpha	0	5	.000

Hal Winkler walked, and Sheehan lifted a high fly which was misjudged by Barney Byrne and went for two bases, scoring Winkler.

B. U. Files Up Lead

Mike Celatano then bobbled Ike Bevins' grounder, and B.U. proceeded to take advantage of the break. Before the dust had cleared, two hits, a walk, a hit batsman and a double steal brought in five more runs to make the score 6-0. That was the ballgame.

B.U. got two more runs off Dixon in the sixth inning on two hits and a walk, and finished their scoring with three unearned runs against Cliff Rounds in the seventh. The lone Engineer tally came in the sixth on singles by Pete Philliou and Warren Fenster, and Gene Lubarsky's long fly. Philliou, continuing his sensational hitting, had a perfect day at the plate with three singles and a walk in four tries.

Once again it was poor fielding which proved to be the Engineers' downfall, as five errors contributed to eight unearned enemy runs. The Terriers, on the other hand, backed their pitchers with errorless support, and turned in some outstanding defensive plays.

Freshmen Lose

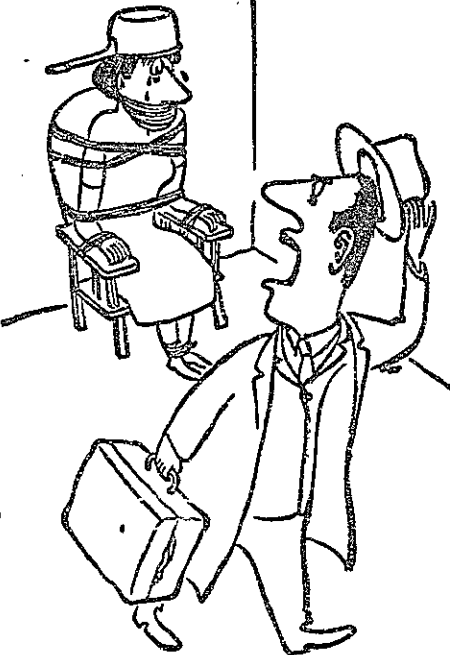

In the Frosh game at Harvard the score was 10-2. Roland Plante pitched six impressive innings, giving up seven hits and four runs before being relieved by Bill Teeple, who finished the game. M.I.T.'s three hits were collected by Stan Lenard, Adrian Ainger, and Al Beal.

The box score of varsity game.

WITH SMOKERS WHO KNOW... IT'S

Camels for Mildness

Yes, Camels are SO MILD that in a coast-to-coast test of hundreds of men and women who smoked Camels—and only Camels—for 30 consecutive days, noted throat specialists, making weekly examinations, reported

NOT ONE SINGLE CASE OF THROAT IRRITATION due to smoking CAMELS!

OFFICIAL DORMITORY POLICY

Dormitory Accommodations
 September, 1950 to February, 1951
 The general policy governing Student Housing (Catalogue Issue June, 1949, Appendix C) will be in effect as indicated on this notice. Present residents of the housing system who wish to apply for accommodations for the fall term of the academic year 1950-51 are requested to read the portion of the Catalogue dealing with government, equipment, applications, and reservations, allotment of rooms, fraternity affiliation and regulations.

Your attention is called to a change in policy, effective as of the Fall Term 1950, regarding Equipment and Service, which will be applicable to all housing accommodations both graduate and undergraduate. Since the erection of the first housing unit in 1910, the Institute has maintained its policy of providing accommodations fully equipped for occupancy, and has in this respect been unique among men's colleges in this area. Unfortunately, the increased cost of service and of all supplies and equipment, including replacements, has made it necessary either to abandon this policy or to increase the rents proportionately. After a careful survey of all the factors involved the Committee on Housing has unanimously agreed that to abandon this policy is preferable to an increase in rate.

There will, therefore, be no increase in rentals for 1950-51 but as of the Fall Term, 1950, the Institute will be unable to furnish blankets, bed linen (sheets and pillow cases), towels, soap, or laundry service for bed linen and towels. Residents may, however, make arrangements through the Housing Office to purchase at reduced rates, the supply of those items on hand at the opening of the term if they so desire.

The Graduate House
 The Graduate House will be available for occupancy with priority to present residents. No rooms will be assigned to graduate students in the permanent undergraduate houses, including the New Dormitory. Undergraduates who expect to be listed as graduate students, Fall 1950, should apply to Mr. Dow, Manager of the Graduate House. (See Section on Riverside Dormitory.)

Priorities
 For the Fall Term 1950, rooms will be assigned to six different priority groups in the following order:
 (1) Members of the 1st year class in the Fall 1950 for all accommodations in Munroe, Hayden and Wood and the 3rd, 4th, and 5th floors of Walcott, Bemis and Goodale.
 (2) All present residents of the housing system (including Building 22) who wish to retain their present accommo-

dations except those in Munroe, Hayden, and Wood and the 3rd, 4th, and 5th floors of Walcott, Bemis, and Goodale.
 (3) All present residents of Munroe, Hayden and Wood and the 3rd, 4th, and 5th floors of Walcott, Bemis, and Goodale.
 (4) Members of the Class of '51 regardless of present residence on or off campus.
 (5) All other present residents of the housing system except Building 22 who wish to change location of their rooms.
 (6) All remaining residents of Building 22 or off-campus students of the Class of '52 and '53.
 Students living off-campus may pick up applications at any dormitory office.
 Distribution will be at the discretion of the managers of the various units, subject to the approval of the Director of Housing if applications from the present residents of the housing system cause unforeseen complications.

Rental and Occupancy
 The rentals for the present term except in the New Dormitory expire Tuesday, June 6. Rentals in the New Dormitory expire Saturday, June 10. Fall occupancy begins on September 13, the Wednesday preceding Registration Day.

The New Dormitory
 Contract meals are provided at rates as published in the Catalogue, 1949. Service in the Dining Hall, 3 meals each day, five days a week, Monday through Friday, regardless of legal holidays, will begin on Registration Day, September 18. The dining hall will be closed for the Christmas recess after the evening meal, December 20 through Tuesday, January 2. Similarly it will be closed from Friday, January 26, the end of the examination period, through the following week, which is scheduled as a vacation.

Ware, Atkinson, Kunkle, Holman, Nichols, Crafts, Munroe, Hayden, Wood, Walcott, Bemis, Goodale
 All the accommodations in Munroe, Hayden and Wood and the 3rd, 4th, and 5th floors of Walcott, Bemis, and Goodale will be reserved for members of the first year class (Fall 1950). All other rooms will be available in accordance with the priority list.

Emergency Housing, Building 22
 This housing unit will be available for the Fall Term 1950-51. However, the Director of Housing reserves the right to discontinue Building 22 as a housing unit when and if adequate housing is available in Riverside or the building program of the Institute requires this space for another purpose.
 It is the intention of the Director of Housing to utilize Building 22 as a receiving center for those on the waiting list and to transfer residents to the Riverside Dormitory as accommodations are available.

Riverside Dormitory
 It is expected that an adequate number of the suites and rooms will be available by the opening of the Fall Term to pre-

NOTICES

Tickets for admission to the Billy Graham revival meeting may be obtained in the Information Office after 10:00 a.m., Monday, April 17. Billy Graham is scheduled to speak in Rockwell Cage on April 21 from 5:00 to 6:00 p.m. As the State Department of Public Safety will permit no more than 5000 people to occupy the Cage at one time, tickets will be limited to one per person.

Lecture Series Committee will hold Freshman interviews during the week beginning April 24. Interested Freshmen are requested to drop a note in any Institute mailbox before April 20. The note should be addressed to the Lecture Series Committee office, Building 18.

Applications
 All applications should be filed in the office of the housing unit in which the applicant prefers accommodations on or before Tuesday, April 25, except for Riverside applicants who should file applications with the Manager of the New Dormitory. Definite assignments will be made as soon thereafter as is possible. Be sure and state your priority number on your application card. Applications must be accompanied by the \$5.00 deposit which is credited toward the rental or refunded in accordance with the statement in the Catalogue.

Frank M. Baldwin
 Director of Housing

Compton
 (Continued from Page 1)
 being gently eased out. I was enthusiastic about my work and associations at Princeton, but with a heavy heart set out for the visit to this other university.

Immediately upon my return, the department head called to ask how I had made out. I told him that I had received the offer of the position, at a very attractive salary. He said: "Do nothing about this until you hear from me again, for I must see the President about it at once." In a few hours he came back to say that the President had authorized my promotion to an associate professorship at a substantial increase in salary, and that he hoped I would stay in Princeton.

During the next fourteen years I did no more job hunting, and was only once seriously tempted by another position. I had been made a "research professor" and had succeeded my beloved chief to be head of the department of physics on his retirement, and had served two years as president of the American Physical Society. Then, one day in early 1930 I received a letter from Dr. Gerard Swope, then president of the General Electric Company, asking me to call on him in New York at my early convenience.

Since I had been a consultant for this company for nearly ten years in the field of electronics, and had made frequent visits to its research laboratories, I anticipated that Dr. Swope wished to discuss the company's research program. This proved to be the case. After being questioned very keenly about the conditions in the company's laboratories, as I evaluated them, I agreed to send Dr. Swope a written report, including some suggestions for the recruitment of younger research personnel.

Shortly after I had sent this document to him, Dr. Swope asked me to see him again. When I did so, he told me that he had submitted my suggestions to Dr. Whitney, who was the director of the G. E. Research Laboratories, but that what he really wanted to see me about was to ask whether I would become the president of the Massachusetts Institute of Technology!

In Tuesday's installment, Dr. Compton discusses the factors which he considered in deciding to give up his career as a physicist at Princeton to accept the Presidency of M.I.T.

EVERY DAY THOUSANDS ARE PROVING CHESTERFIELDS SMOKE Milder

BE YOUR OWN CIGARETTE EXPERT
 says
JAMES H. DARDEN, JR.,
 Prominent Tobacco Farmer,
 Farmville, N. C.

A YOU BUY A PACK OF CHESTERFIELDS AND OPEN IT UP LIKE THIS.

B YOU SMELL THAT MILD, PURE AROMA. NO OTHER CIGARETTE HAS IT.

C YOU LIGHT A CHESTERFIELD AND ENJOY THIS FACT... TOBACCOS THAT SMELL Milder SMOKE Milder.

The Aroma Tells You...

We tobacco farmers know that when tobaccos smell milder they smoke milder. That's how smokers can know that the mild, ripe tobaccos Chesterfield buys from me and hundreds of other farmers will taste better, smoke cooler and much milder.

That's why I've smoked Chesterfield for 15 years.
