Margulies and Newcomber Run For President Of ’52
Headings Opposing Tickets

Two groups of sophomores have drawn up tentative slates of candidates for the election Edward J. Margulies and Waido (Ba) Newcomber have announced their candidacy, which will open on March 15 in its junior year.

Margulies heads a slate composed of Harold R. Lawrence and James L. Strothers, candidates for Institute Committee and Stanley I. Buchin for Secretary-Treasurer of the slate. Margulies, senior and a member of Delta Pa, Gilberi H. Lewis of Pi Lambda Phi and Lawrence W. Newcomber of the Tip Tonion, candidates for Institute Committee and Kenneth E. MacMullin for Alpha Delta Upsilon for Secretary-Treasurer.

The Newcomber slate will serve as Institute Committee representative of their class and on the executive council of the Sophomore Council during the past year. Newcomber has also served as a graduate of the “Q Club, student Chairman of the Sophomore Council, and has played football and baseball.

Margulies has been active on the executive council of the T.I.A., the Sophomore Field Day football team, and is serving as chairman of the Soph Comm Committee, Secretary-Treasurer of the Newcomber slate, and a member of the Activities Ball Committee.

Newcomber's slate is composed of the members drawn up in caucuses held recently.

Free Series Of Four Cinema Masterpieces Will Begin Tuesday

Beginning Tuesday, the Dramatic Society of the Humanities Division has scheduled a series of motion pictures for Technology audiences. The films have been selected to include the masterpieces of the cinema in the various periods and foreign countries. Besides giving the students a glimpse of the movies that the world's camera's have turned out in the last twenty years, the series offers a variety of entertainment ranging from the Keystone comedy to the psychological thriller. In addition to the feature presentation, there will also be a preview of the latest illustrating novel film technologies.

Movies in Huntington Hall

The movies will be shown in Huntington Hall at the following dates. There is NO charge for admission:

Tuesday, March 29—“The Thirtiest Nine Steps,” an early Hitchcock work of suspense that was made in England.

New England Swim Meet Here Today

THE FOCUS

RIVERSIDE TO BE USED AS DORM

Some Rooms Available May 1
As Housing Program Develops

Riverside Apartments on Memorial Drive are soon to become an Institute Dormitory, President James R. Killian, Jr., announced Wednesday night in a dinner opening the Institute's $20 million Development Fund Drive. The purchase of the apartments was disclosed in an address to more than one thousand Technology alumni.

Said President Killian: “New student housing is one of the primary objectives of the M.I.T. development program. We can be more effective with our educational program if we can provide an stimulating environment that provides for the student a meaningful community.”

Rooms Available May 1

Plans for student occupancy of the hotel are being studied by the committee on Xining and Housing Facilities. Although a definite program has not yet been decided upon, it is expected that a few rooms will be available shortly after May 1 of this year.

A larger number of rooms should be available by the end of this year, and there is the possibility that a number of rooms will be made available to Riverside all to themselves. During the summer, the hotel will be converted into an apartment hotel to a student dormitory, the building will remain unoccupied during the year and be used by independent real estate agency.

Room for Six Hundred

It is not expected that large scale remodeling will be necessary, but the student housing committee will probably be removed before students occupy the rooms.

The building will eventually provide living space for over six hundred of Tech students. This will expand dormitory facilities to a capacity for 2100 students. This will provide living space for over six hundred of the student body more than half of the student body in dormitories or fraternities.

MUGS FOR SALE

Senior Mug List Committee has announced due to demand for extra mugs, orders may be taken through the list committee Tuesday, March 29 through the list committee on Tuesday, March 16.

Philip J. Eves 3rd, Jacob G. Bruce, and Harvey R. Nickerson.

Servo Lab Develops Radio Tube

Reduce Memory Work In Computers

At the annual convention of the Institute of Radio Engineers, a new tube was announced which will greatly improve the efficiency of electronic computers. Stephen B. Winfield, Jr., Dr. Hans Kepler, and Patrick Young, all of the Institute's Microwave Laboratory, made the report.

Using a glass automatic muffler with an extra pipe coming out of the end, the new tube is listed as having a much longer life for members. It will hold its efficiency as long as its metal parts do not overheat. In addition, a particular number of tubes to the design of the radio tube, the designers said, will be repeated useful because it can be rehandled several times. Storage tubes of the type mentioned at the convention are an important because they can be used in "telephone in which the machine keeps track of problems, instructions, and partial answers in the course of computation. A computer that is to be built will have a storage capacity of 1000 tubes.

The new tubes operate by storing a number of numbers in a round storage surface. Each tube will hold a choice of only two digits—0 to 9, or '0' or '1.' In any of the 405 different positions, the numbers '0' and '1' are represented in the binary calculations of two of these. The computer can read an 8-bit number or a 3-bit number, by remembering the number in the 4-bit memory and the "1" in another location.
Associated Tutors Provide
Boost To Many Frosh, Sophs

After nearly eighteen years of continuous service to the M.I.T. student body, the Associated Tutors has added many new members from this year's incoming class. We had a number of additions to our staff, and have been able to put the question off for the same reason.

The Associated Tutors is the oldest student-run organization on campus, and has been able to improve the academic performance of students for over a century. The group was founded in 1890, and has been in operation ever since.

We share the almost universal opinion that sometimes it is better to be wrong than to be ignorant of the truth. If we are wrong, it is possible to correct our mistake; if we are ignorant, it is impossible to do so.

We are working to improve the quality of education on campus, and we hope that our efforts will be successful. We believe that education is a fundamental right, and we will continue to work towards this goal.

We appreciate the support of our communities, and we look forward to working with them to achieve our goals.

RIVERSIDE AND RUSHING

The Institute's purchase of the Riverside Apartments comes at a time when the present tenants who had expected a much

longer time interval between the completion of the New Dormitory

and any further significant improvement of the housing

situation had moved on. The purchase of the dwellings

and the alterations are completed, the building will provide living space for

900 students. This fact should provide food for thought for

anyone concerned with the proposed deferred fraternity rushing

program. We have argued the case for such a program on several

occasions during the past year. It is generally conceded

that the freshman will be aided in weighing the pros and cons

of fraternity life and he will be able to compare the various

houses on a more concrete basis if he spends some time on

campus before he is forced to come to a final decision on living

group affiliation. The addition of a dormitory, we believe, has

made the possibility of attaining a much more integrated and unified undergraduate

group affiliation. The administration appreciates the possibility

of attracting more bright students and integrated undergraduate

body by keeping the freshmen together for a term or two before

they split up into the various living groups. Fraternity officials

appreciate the possibilities involved in having a place where

many of the problems inherent in the present system and would permit

the fraternities to examine prospective members more carefully,

but the bequest to the Institute of the former dormitory is

as near as we can get to it at the present time.

Deferred rushing can be instituted only if the problems inherent in the "present system and would permit

the freshman class could be housed at Riverside. We hope that this

use as a dormitory. Excluding those entering students who are

under the Oct of M. arch 31, 1899.

gram, has been able to put the question off for the same reason.

Tech Grapplers To Compete in Intercollegiates

Although their record is only two losses in 14 dual meets, the Tech wrestlers are traveling to New London to compete in the New England Intercollegiate Wrestling Championships with high hopes of a reversal of the 13-7 defeat they suffered in the 2-15-52 New England meet at Tufts.

The intercollegiates are being held this weekend and will be wrestling both on Saturday and on an individual basis.

Both the Varsity and Freshman squads are entered in the Championships and will be wrestling against teams from Brown, Harvard, Wesleyan, W.F.L., Boston University, University of Connecticut, and Tufts.

Both the Freshman and Varsity teams have their hopes pinned on Morton, the 165-pound wrestler, who posted a time of 4:56 in this division last year and has accumulated nearly five hundred points during the season.

Although he is listed as a returning champion, Morton has been one of the most colorful and skillful members of the Brown University squad and is one of their most consistent performers.

Hagerty, this year's captain, was one of the most consistent wrestlers for the Tech throughout the season finishing with six wins against as many losses. Last year he placed third in the 128-pound class.

Hagerty took third place in the varsity class last year. Close behind in another of Tech's prospects, finished the season with a record of 8-1. With his time improved by a second last year, Hagerty is expected to do well.

Perry, who was injured at the beginning of the season, returned to strengthen the team with four consecutive victories. Last year in the 133-pound class, Perry took first place in the freshmen competition.

Frosh hopes in the tournament are in the ability of the 110-pounder, a brilliant captain, Chuck Seymore's record for the past season is 6-0, with four wins by both Morton and Hagerty have qualified for the New England Championship.

With the release of its official spring schedule, the NEISA announced the election of Howard Meyerson as their new president.

BRANDEIS UNIVERSITY — BACH FESTIVAL

MARCH 20 — JOHN HANCOCK HALL — MARCH 26

The six Brandeis Concerts Members of Boston Symphony Orchestra, Bruno Maderna Conducing March 23—Never; Newell Still, Brandeis University Chamber Music Series, will be presented by the Radio & Television.

Tickets available at Brandeis University, Waltham, Massachusetts.
Dancing will start at 8 p.m. on Friday evening, March 17, and continue until 1 a.m. Saturday morning. Classical wallows will be played for dancing or for pleasant listening during the intermission from 11:00 to 11:30 p.m. Requests will be welcome at all times.

Admission is $5.00 per couple. Tickets can be obtained at the desk in the lobby of the Graduate House and from the Dance Committee members. Sales will be limited to the capacity of the Ballroom.

Dr. and Mrs. James R. Killian, Dean and Mrs. John W. Bunker, Dean, and Mrs. George Harrison, Professor and Mrs. Lancaster F. Hamilson, Professor, and Mrs. Paul M. Chaloner and Mrs. and Mrs. Eleni Thresher will be entertained at a President's buffet supper during the evening.

Plans and arrangements for the dance have been under the direction of James Ham, Research Associate in the Electrical Engineering Department, assisted by Dick Rees, Kevin Lawren, Paul Thistlehan, John Finno, Rocky Zilling and Tom Wood.

Glee Club Sings Sun. Over N. E. Network

The M.I.T. Glee Club, under the direction of Professor Klaus Lagercrantz, will be featured by Monsanto Chemical Company in their weekly broadcasts of outstanding college glee clubs in the New England area. The broadcast will originate from Room 2-150 at 4:00 p.m., Sunday, March 19.

The half-hour program will be broadcast by the New England Regional network including stations WBEZ, WVOE, WJAR, WLIB, WJAC and WWHO.

A limited number of seats are available at no cost. If you plan to attend the broadcast, you must arrive no later than 4:30 p.m. as the doors will be closed at that time.

Wessen To Demonstrate Modern Communications

Professor Jerome B. Wiesner, Associate Director, Research Laboratories of Electronics at the Institute, will be the speaker at the final popular science lecture in the Society of Arts series. The lecture is scheduled for room 10-250 on Sunday afternoon, March 12, at 4:00 p.m.

Speaking on "Modern Communications," Professor Wiesner will present demonstrations of research designed to point up and illustrate the effectiveness of communications and stored information.

He will begin the lecture with a brief historical review of electrical communications, including developments during World War II.
