All-Technology Acquaintance Dance Friday

Four hundred girls, freshmen, sophomores, juniors, seniors, and guests, are being imported from nearly every college in New England for the All-Technology Acquaintance Dance. The dance is sponsored by the Tech College Club, but girls of all faiths have been invited. This dance, the second of its kind this fall, is different in that it will be purely an acquaintance dance and the ladies will be accompanied by their dates.

The dance will begin at 8:30 p.m. and continue until 12:30 a.m. with refreshments being served throughout the evening.

All-Technology Acquaintance Dance will be given to the parking committee.

R. Callahan '51, Dance Chairman, and Richard J. Powell '50 will be in charge of the dance. The music will be provided by a variety of dance exhibitions, and a trip from the origin of
to New England.

Girls have been invited from Amherst, Radcliffe, Smith, Tufts, Teachers College, Lehigh, Harvard, Penn, and Yale. The Tech is prepared to buy tickets for the entire week.

Vacant Dorm Rooms Offer Barracks Men Better Conditions

There are at present fifty-two vacant rooms in the undergraduate dormitories, twelve in the Everett Moore, Baker House, and forty in Rice House. Because of the vacancy, all students in Building 22 are being asked to move to permanent dormitories.

The unusual number of vacancies is accounted for by the large number of men taken in by the freshmen this term and by the transfer of faculty members of some departments. In the near future, probably ten dormitories will be made available. The number of unused spaces, will make it impossible for many commuters, so the situation is not so tensely crowded. In order that the full realization of a college education, in schools throughout the country dormitories are needed. The main reasons for supplying living quarters for students are: How does the situation in Tech compare with that at other schools? Here at the Institute the dormitories are new and adequate. The new Everett Moore House Baker and the Riverside Dormitories, added to the older dormitories, provide enough space for everyone who desires one. Most of the rooms are single with a few doubles and triples.

At Northeastern University, too, a house of another color. They have a dormitory building, brand new, for women. The men are just plain out of luck. Of course the rest of the students are commuters, so the situation is not so tensely crowded. Harvey University has recently renovated two dormitories completely.

Good Facilities at B.U. An entirely different set-up is in operation at Boston University. Again many students are commuters. For those desiring rooms, however, there are plenty. Most of the dormitory space is divided into three-room apartments for five students. These apartments have their kitchenettes.

So much for facilities. Now for the bars in dollars and cents. At Tech, the rents range from $100 to $150 per month. At Northeastern, the rate is $120. Harvey University, $120.

Institute Dormitories Are Among Best In Local Area

As college students know, good living quarters are of prime importance. From the full realization of a college education. In schools throughout the country dormitories are needed. **Letters to the Editor**

**Dear Editor:**

Even at the risk of stating at the heart of Stan Benjamin's colorful literary style, I feel that he misses the point entirely. The very vigor with which he imparts his quandary to the reader is the very sum of his argument, (The Tech, Sept. 25).

The last line of his essay serves as an apt summary of his overall approach. His statements, both in the essay and in the letter, are delivered with such a vigor that they actually serve to obscure the core of his argument. The reader is left with the impression that the essay is about his passion for the subject, rather than about the subject itself.

In the end, Benjamin's essay is a missed opportunity. His ideas are certainly worth exploring, but they are buried under a mountain of his own enthusiasm. Benjamin should consider revising his approach, perhaps by focusing on his core argument rather than on his delivery. This would allow his readers to more fully engage with his ideas and appreciate the depth of his thinking.

**Provisional Comment**

 Benjamin's essay is undoubtedly passionate and engaging, but it suffers from a lack of clarity. His points are not always well-supported or clearly articulated, which makes it difficult for the reader to follow his argument. Benjamin should consider revising his essay to make it more accessible to a wider audience.

**In The Spotlight**

**Professor Earl B. Millard**

Professor Earl B. Millard is not the right type to lead us into any ordinary spotlight. He brings with him a much wider scope to include the achievements of so diversified a man as this Professor of Physical Chemistry. Dr. Millard deplores the former lack of student life and staff relationships. In what he claims is much more than loyalty to the school, Dr. Millard states his belief that the Institute is one of, if not the finest engineering school in the world.

No other engineering college excels in so many separate fields, states the Professor.

---

**CALENDAR OF EVENTS**

**October 4 to October 10, 1950**

**WEDNESDAY, October 4**

Chemistry Department. Seminar: "The Separation of Oxides Important in High Temperature Ceramics" by R. C. Young. Room 6-109, 4:10 p.m.

**THURSDAY, October 5**

Civil and Sanitary Engineering Department. Seminar: "A Report on Your Department's Progress in Recent Years." Room 2-190, 5:05 p.m.

**Friday, October 6**

American Meteorological Society. Student Branch. "Sunspots and Weather Trends." Dr. Hurd C. Willett, Room 12-182, 4:00 p.m.

**SATURDAY, October 7**

Choral Club. Meeting. Tyler Lounge, Walker Memorial, 5:30 p.m.

**SUNDAY, October 8**

Aeronautical Engineering Department. Seminar: "Recent European Developments in Jet Power Plants." Professor Edward S. Taylor. Room 1-106, 4:30 p.m. Term papers due in department by 5:30 p.m. for Graduates in Science and Engineering.

**MARCH Calendar**

**LETTERS TO THE EDITOR**

**ATTENTION! Activity Leaders**

Each leader is reminded of his responsibility to submit the letter of resignation of all out-of-date present leaders to the Office of Industrial Cooperation and the History of Industry. (The Tech, Oct. 11)

**Open**

11:00 A.M. - 1:00 A.M.

495 BEACON, AT MASS. AVE.

**CHRISTIAN SCIENCE ORGANIZATION AT M.I.T.**

Frosh football team is rapidly whipping itself into shape for the big game with the more experienced Sophs.

Heavy Backfield
The Class of '54 operates from the conventional "T" formation, quartered by John Zoraco, a smooth passer, and a good blocker. The backfield and line averaged twenty pounds heavier than the light but handiwork-linemen. The backfield has shown that such players as Robert Wilson and the halfbacks Beardon, Cumba and John Heath can be counted on in heavy competition. On the forward wall the standout is Jack Jackson, whose name is synonymous with "Backfield," and who has scored touchdowns as well as throwing passes.

Unique Globe Turns In Stein Club Room
Gift of H. H. Young

Have you seen the new globe in the Boston Stein Club room of the Hayden Library? There’s no other one exactly like it in the world. It is a reproduction of the instrument traditionally used by astronomers of old, and it is quite similar to one of the two globes that are mounted in the Hayden Library. It has been presented to the Institute by the Charles Hayden Memorial Library.

A few years ago, the late Mr. Harry H. Young, Class of ’40, and student in the College of Agriculture, donated the globe to the Institute. The globe was a gift of the Charles Hayden Memorial Library, and it is now on exhibit in the Stein Club room. The globe was presented to Mr. Young on his 50th birthday, and it was presented to the Institute on his 60th birthday. The globe is mounted in the Stein Club room, and it is visible from every angle.

The globe is a beautiful piece of craftsmanship, and it is a wonderful addition to the Stein Club room. It is a reminder of the importance of education and the value of learning from the past.

NOTICES

Freshmen

Freshmen who are interested in debating or in participating in the management of the Debating Society are invited to attend its smoker at 9:00 p.m. on Wednesday, October 4, at the Stuarts, Mr. H. H. Young, Class of ’40, and chairman of the debate committee. Interested but unable to attend, men are welcome also. If you are interested, contact Richard Carlson in Room 409.

All Students

On Wednesday, October 4, 1950, at 5:00 p.m., the International Association will hold a smoker to which all students are invited. The purpose of the International Association is to enable Technology students to get together in informal meetings, dances, and outings with fellow students of the sixty-six nationalities represented at the Institute. The meeting will be held in the Fife & Drum Room, and the music will be provided by the Duke of Brougham, who frequents the Fife & Drum Room.

Football

The intramural football season is starting this weekend. To compete, students must pass a medical examination. Those exams may be taken at Homberg Infirmary during the week at no charge.

Beaver Barks

(Continued from Page 1)

Cross under its new mentor Ed Anderson is going to cause a lot of trouble this year or that the Big Green just didn't take the Crusaders seriously enough.

Oklahoma Strong

Yale showed this past weekend that it is a tougher ball club than most people had thought, by whipping Brown by a 38-12 count in another eye-opener, while Oklahoma lived up to its season expectations with a comparatively easy victory over Boston College by a 28-0 score. It looks as though the Sooners, last year's Sugar Bowl Champs, will have another great season and we won’t be too surprised if they are called the country's top team in the near future.

Frosh Rally

(Continued from Page 1)

Symbol of the rivalry between the Sophs and the Frosh, the shaft was brought into the hall on a velvet cushion, a traditional proclamation of merriment. These exams may be taken at Homberg Infirmary during the week at no charge.
