Students Initiate Mloore Baker Memorial
Matthews Is Elected Councilman at Large
On October 29, 1950 the Everett Mloore Baker Memorial Committee was formed to establish a memorial for the late Dean Everett Baker.

In the days immediately after Dr. Baker's death in late August, a great number of the students expressed a desire to do something to memorialize his memory, his love and his dedication for the students.

The meeting was called on October 5th of students who were insane to have organized themselves in some kind of society under the name of M.I.T. Students, Undergraduates. At this meeting and at three subsequent weekly meetings, a total of fifteen members of the committee was selected to be the present. All of the committee members recognized the validity of the discussion. Many others expressed interest, but, for the time being, were unable to participate in the discussion.

At the sixth and last meeting, it was decided to ask for volunteers to work to some extent of the people of all M.I.T. to establish a separate memorial. From the list of those who volunteered the following were selected:

Warren Delano, '70, now doing graduate work here, and formerly'Connor of the Faculty and Administration Council.

W.M.C. Threatens Denial of Rights To Rule Violators
Warnings were announced today that all activities which do not conform to the present regulations of the Institute Committee and which do not do so before next Friday, November 17, will be denied all rights and privileges granted them as undergraduates. These include such activities as

Activities which have not met these necessary requirements, activities heads must check with the Institute Rules Committee. These Head members will be able to list a number of classes, in addition to those classes, described in the regulations, which are in effect today. A list of classes will be made public by activities.

For the first time in the history of the South Korean people, the elections for the new National Assembly were held. The elections were made in the order of the Korean people, and the candidates were elected to the Legislative Assembly. The candidates ran for the first time in the history of the country. The candidates were elected to the Legislative Assembly.

We were stopped short a couple of days ago when we realized that although the newspaper headlines had screamed "Crisis" when the Chinese Reds entered the war in Korea, we had not heard a simple comment about the development from any fellow student. We started thinking again about the Techman's traditional apathy toward his environment, and we decided that we would have to change our opinion of that, because it is sometimes amazing indifference, characteristic of so many students here. We had always assumed that two factors were primarily responsible: (1) Techmen don't have much time to spare from studies, and (2) they reject to bother with things which do not directly affect them. The first of these is of minor significance, for the second is the one which places the ultimate limitation on a man's social consciousness. The second factor is the one which we did not fully understand, for Techmen refuse to fight, with things that do not affect them but also with a great many things which actually do directly concern them.

The Techman extends his indifference from those things which do not concern him to those things which he cannot change even if they do have a serious effect upon him. The motto is "You can't fight City Hall." If you can't fight City Hall, what's the use of finding out what's going on at City Hall? This certainly is a reasonable attitude. No sense attempting the impossible. Don't joust with windmills. All this is very understandable.

But this very line until a touch of cynicism causes us to include the difficult or barely possible among things which are not worth attempting, and then we have made the fatal mistake. If we are not careful we are swept by a wave of pessimism. We are threatened about any improvement in our environment, then we are forever stuck with what we've got. "City Hall is rotten," say many men, "and you can't fight City Hall." City Hall will never get any better through anything that these men do.

The whole thing is made to sound paradoxical in a little syllogism preached by the late, great Irishman. "Reasonable men" means satisfied with "political," but he doesn't bother to try to improve them because he feels that his personal efforts will accomplish nothing. He is reasonable enough, as an engineer, to leave a problem alone unless it is capable of solution. He is just cynical enough to think that "social problems" cannot be solved.

The truth is, the greater part of the much-touted lack of social consciousness of a great many scientists and engineers, all very "reasonable" men, and the same attitude is responsible for the indifference of many scientists here toward what goes on around them. They are uninformed in what happens in Red China, and they don't care who was elected this week. We propose, and in matters of this sort, we all become just unreasonable enough to be interested.

Letters to the Editor

To the Editor

Dear Sir:

On November 15 and 16, the Technology Christian Association, in behalf of the American Red Cross, is conducting a blood-donation drive in the M.I.T. community. P. D. says that this blood-donation program will have the sympathetic support and participation of all who feel that they can properly make a blood donation. It is especially important at this junction because of the need for plasma and whole blood in Korea, and to replenish supplies greatly depleted by the demands of the Korean campaign.

This is a way in which we can make a direct and personal contribution in behalf of the men who have been wounded in battle.

Yours sincerely,

J. B. MILLER, JR.
President
Tech Basketball Team Begins Practice; Five Varsity Veterans Back

Technology's basketballers have been working out for more than a week now under Coach Cleo O'Donnell, in preparation for their first games. This year's Tech team will take place December 1, during the Tech-Pipop weekend.

The Tech team is no slouch bunch to be sure. The first line veterans are headed by Captain Leon Hong, whose speed and shooting gave the Beaver fast-breaking attack a noticeable boost last year. Also returning with the second and third line veterans are Dick Jacques, Bob Barlow and Jack Kassig. Many sophomores are expected to play at least some home games with the varsity this year. The large number of games out includes last year's high scorer for the fresh, driving forward Russ Knider, and another scoring forward, southpaw Bob Barlow. Some height will be furnished by big Randy Manderson at center, another one of Hong's big scorers. Out of last year's crop of ball-handling guards three standouts will be back, Dick Manderson, Milt Wilson, and Stu Gallinane. Others included is Claude George Heggen and Bob Van Meter.

Sophomore Out

Guard Randy Thompson, who saw considerable service with the varsity during the latter half of last season will be unable to play at all this year, because of a broken hand, sustained while playing intramural football. The Freshman have been working out for several days under the direction of coach Bob Hardy, but it is still too early to expect any definite developments in that area.

First Game of Harvard

The opening game which differs from previous ones in one important respect. The Tech's-Pippin basketball game, usually played in the Armory to the players only, is planned for this year, up at Harvard. Some of the factors which influenced the A.A. to make the switch, were better lighting, better playing surface, and a promise of 1,000 seats reserved for Techmen.

Varsity home games are always preceded by either a Freshman or Junior varsity game at 6:30. Var- sity games are scheduled to start (Continued on Page 4).

Handicap Results

The following list contains the percentage standings of the leading men competitors in the Intramural Football Pool. Method for awarding the percentage points was based on the best four out of five handicap forms of each contestant; it must be remembered that this is not a final rating, but is dependent upon the result of the round-robin play-offs between the League Champions. The contestants and points are as follows:

1. Robert D. Brown, S.A.E., 296.5
2. Ray Lister, S.A.E., 244.6
3. Dave Boivin, S.A.E., 252.1
4. Nicholson Highly Rated

Close Race Expected Monday In N.E. Country Cross Title Meet

A wide open contest appears likely next Monday afternoon when the 1960 New England Cross Country season reaches its climax at the New England Championships at Franklin Field. Twenty teams are entered in the varsity race, with a total of 192 runners scheduled to start. In sharp contrast to last year, when Bob Black and his Hands Island teammates ran away with the race, half a dozen teams rate as strong contends and several others, including the Institute Harriers, could pull an upset. The University of Connecticut,

Soccermen Defeated By Brown Bears 4-0

Last Wednesday the soccer team traveled to Providence to tangle with Brown in a game which saw the Engineers go down to defeat by a score of four to nothing. In the first period neither squad was able to score and the same was true of the second frame when Tech made several attempts to score but could not seem to put the ball between the goal posts. In the second half Brown lost no time in getting started as they scored six (6) goals in the game in the first thirty seconds of play. Throughout the rest of the quarter the Beavers were able to hold the Bruins scoreless, but in the last frame Brown clinched the game with three more goals. The offensive star of the day for the Bruins was Verland with two of their three goals to his credit.

Rugby Team Plays McGill

After an encouraging first game against Harvard which ended in a scoreless tie, the Beaver Rugby Team will journey up to Montreal this weekend to take on the ruggers from McGill University.

Campus Interviews on Cigarette Tests

Number 5...THE GNU

"I gave the answers...but I wasn't talking!"

The debating team couldn't make much use of this non-talkative baby...but one look at his "literary leanings" tells you that tests don't buffalo him. 'Specially those tricky cigarette tests! As a smoker, you probably know, too, that one puff or snuff...or a mere one-inhale comparison can't prove very much about a cigarette!

Why not make the sensible test—the 30-Day Camel Mildness Test. You judge Camel mildness and flavor in your own "T-Zone" (T for Throut, T for Taste) ...for 30 days. Yes, test Camels as a steady smoke and you'll see why...
