Rating Questionnaires To Test Instructor's Teaching Abilities

A revision of the Faculty Rating System has been completed by the Combined Professional Societies and questionnaires will be issued to institute undergraduates sometime in January. There have been several major changes made in the last rating revision. The students are asked to check the phrase that applies to a specific instructor, and submit comprehensive comments.

Letters will be distributed for students to grade the instructor in each category on a blackboard. The grades will be assigned by the student, and a copy of the questionnaire will be given to the instructor. The student will be asked to give comprehensive comments.

Written Evaluation

The revision was brought on by the fact that instructors have submitted questionnaires. The former was used to judge the work of the instructor. On this questionnaire the student has the option of answering as many or as few questions as possible.

Rating Questionnaires will be circulated sometime in January but instructors will not receive the report.

STAFF MEETING

The Tech will hold a staff meeting at 2:00 p.m. today in room 9, at their office in Walker Memorial. The objective is to combat the latest in documentation.

European Librarians to Study Documentation Practices Here

A corps of European specialists in the field of documentation, the preservation of history and records, will center a three-day meeting at the Institute starting Tuesday, December 13, and continuing to Thursday, December 14. The group will be the second of foreign scientists and technical experts studying American practices and techniques under the sponsorship of the National Technical Information Service.

Twenty of the leading scientists will convene in the Library Lounge of the Hayden Memorial Library at 2:00 p.m., on Tuesday, Thursday and Wednesday, they will examine the latest in documentation equipment in the Boston area; on Thursday the visit will conclude with an all-day symposium in the Library Lounge.

The Thursday morning meeting will begin at 10:00 a.m., with a study of the microtechniques of documentary reproduction, a field in which the Institute Library is particularly well-equipped. The afternoon session starting at 2:00 p.m. will include a discussion of European and American practices in documentation.

Most of the delegates are librarians in their countries.

Social Finishing and Poise

Gibb's Girls

If you're looking for a girl who's as much for her education as she is for a pretty face, you'll find one at one of the girls who know how to make a cocktail party look good. If you're pretty sharp yourself, try Common Washington, 4-6799, the Katharine Gibb's School.

One of the chief aims of secretarial schools scattered throughout the nation, the Boston Gibbs’ School located at 15 Common-wealth Avenue, about seventy cents of a mile from Walker, is to provide students with the training to become successful and secretaries. What is the present status of the School? What is the future of the School? A discussion of both will be held in the Library Lounge at 2:00 p.m., on Tuesday, Thursday and Wednesday, they will examine the latest in documentation equipment in the Boston area; on Thursday the visit will conclude with an all-day symposium in the Library Lounge.

The Thursday morning meeting will begin at 10:00 a.m., with a study of the microtechniques of documentary reproduction, a field in which the Institute Library is particularly well-equipped. The afternoon session starting at 2:00 p.m. will include a discussion of European and American practices in documentation.

Foundation Plans Are Discussed By Baker Committee

In an answer to many questions concerning the goals and future of the Baker Memorial Library, the Steering Committee presents here a discussion of the possible courses of action and thinking envisaged by the founding group. The details of the plan are to be expected to work with the student Committee that will be formed in January. After this Committee is formed in accordance with the procedure outlined in the by-laws of the Foundation, its first task will be to study the activities of previous committees, a wide selection of papers written by Dr. Baker, and also books and articles which have been written since his death.

Once the Committee has a clear picture of Dr. Baker and his work, it will

M.I.T. Glee Club

Hajay’s oratorio “The Creation” will be presented in Jordan Hall tonight by the M.I.T. Mixed Clubs. In the choral numbers the Glee Club and Choral Society, with the Symphony Orchestra, will be conducted by Klaus Eiseleman.

Overall Blue Boys

There are two courses at the school—a one-year strictly secretarial course, and a two-year general education and secretarial course. In both courses there are courses available for those who wish to study the courses for two years.

Ed. Note: This is the second in a series of articles attempting to improve the secretarial schools on a relative basis. We wish to publish the following conclusion: The students will then be asked to check the phrase that applies to a specific instructor, and submit comprehensive comments.

The Tech Basketball Team Defeats Boston University By 1 Point In Spirited Last Minute Surge

A scrapping, fighting, never-say-die Engineer basketball team topped a power-packed B.U. quintet, 62-61, in a tension-edged game, held in Walker Memorial last Wednesday night. Notching the victory in the Tech crew pulled the upset by dint of sheer drive and spirit.

Although the game’s top scorer was the Terriers’ 6’6” Bob Reisner, the Engineers rushed the B.U. team nearly off their feet in their drive for their season’s first victory. Captain Leon Hong stole the ball from the Terriers again and again, while center Hank Hohorst and forward Larry Garboe shone on rebounds.

The game started with a highly tuned B.U. team poised for a victory in their first game of the season, while the Engineers, on the basis of their T.P. showing against Harvard, were viewed with a dubious eye by many.

A streak of fast breaks from Reisner put the visitors ahead, but a flurry of stolen balls and intercepted passes by Technology evened the game again in the early moments of the first half. Another fast break by Reisner and another by Tech balanced each other as conventional as the ball remained until the final 20-20.

Tech Checks Reisner

As expected, the Terriers quickly picked up several of their two beautiful long tosses by O’Leary, the Terriers’ star, however, the Engineers

Baker Memorial

Certainly there could be no more fitting tribute to the late Dean Baker, who devoted so much of his energy to the welfare of Technology, than the establishment of a student movement to establish the Baker Memorial Foundation. The magnitude of the plan and the enthusiasm with which it has been received make it quite certain that anything else to illustrate the great sense of loss felt by so many of Technology's students.

We must not forget for a moment that this loss is a very real one. Dean Baker's tireless efforts constituted a most vital one. Dean Baker's tireless efforts constituted a most vital one. The misunderstanding of the purpose of the foundation is brought out when people express the opinion that the committee should be more specific about what's to be done with the money, when they ask for a "list of projects." The people who ask these questions must feel that the Memorial is to be a kind of special endowment fund established for the purpose of providing funds for beautifying the campus and providing additional recreational and cultural facilities. When viewed in this light, it is possible to make many criticisms of the plan.

The Baker Memorial Foundation, as conceived by the Social Committee, now seems the more unfeasible and risky. The New Dorm could not hold the new expected 1250 couples, the 12-generation orchestras, and the larger order of refreshments in its downtown area. The Baker House is not a night club, at least not yet.

There has been much talk in Interscience circles of breaking the Dormitories down into permanent units for sports. It is glaringly obvious that this move has been brought forth not by the students but by the administration at the standing of the clubs recently. We of the Dormitories have enjoyed the freedom thus far of playing with the men in our House with whom we wish to play. Good clean fun is the result of the currents from our sports and we hesitate to think of the consequences of "floor" ball clubs.

The Interscience Council attributes this move to the recent upsurge of power of Dormitory teams. It is aware of the selection by many intercolleges of incoming high school letterman, thus of their consequent class integration and enthusiasm for interscience games. They have long been at the top with regard to athletics.

THE TECH

Letters to the Editor

Dear Sir:

Apologies are in order to Social Chairman Mark L. Asoke, '94, and the Baker House for my prediction of 60 couples for the New Dance of December 2. The Baker House now draws the more feasible and risky. The New Dorm could not hold the new expected 1250 couples, the 12-generation orchestras, and the larger order of refreshments in its downtown area. The Baker House is not a night club, at least not yet.

There has been much talk in Interscience circles of breaking the Dormitories down into permanent units for sports. It is glaringly obvious that this move has been brought forth not by the students but by the administration at the standing of the clubs recently. We of the Dormitories have enjoyed the freedom thus far of playing with the men in our House with whom we wish to play. Good clean fun is the result of the currents from our sports and we hesitate to think of the consequences of "floor" ball clubs.

The Interscience Council attributes this move to the recent upsurge of power of Dormitory teams. It is aware of the selection by many intercolleges of incoming high school letterman, thus of their consequent class integration and enthusiasm for interscience games. They have long been at the top with regard to athletics.

The misapprehension usually has an overwhelming majority in the Council and this year's no exception. It is too bad to have to bring this up just when we started winning.

The Dormitories are solidly against any breakup of the order contemplated by this Council. Dormitory Committees passed the motion that it "refuse to permit the Houses to be divided into permanent units for the purposes of competition in the Interscience athletic program."

We of the Dormitories have enjoyed the freedom thus far of playing with the men in our House with whom we wish to play. Good clean fun is the result of the currents from our sports and we hesitate to think of the consequences of "floor" ball clubs.

The Interscience Council attributes this move to the recent upsurge of power of Dormitory teams. It is aware of the selection by many intercolleges of incoming high school letterman, thus of their consequent class integration and enthusiasm for interscience games. They have long been at the top with regard to athletics.

Of course he was enthusiastic! It is no wonder he was by making Old Fashions without enough Astorians!"
Basketball

(Continued from Page 1)

Hench returned to only four points for the entire half. Center Hank Roberson came alive with some scoring shooting, loo, as the Tech quieted slowly began pulling up on the Terriers. In the final two minutes, a long shot by Mike Nesby split the net to tie the game at 16—all, but an even longer one by McDonald of the Terriers, coupled with a free pool, edged the visitors ahead. A charity loss by Nesby brought the Technology total to 66, but the time seemed too short for further action, as the Terriers took over the ball.

Hitchins of Tech defeated in the final seconds, however, center Hank Roberson once again dropped a two-pointer through the net, and collected a foul as well. The foul, sunk by Roberson, put the Engineers ahead to take the final victory, as a BBU. delation defense. In an attempt to control the basket, backboard, and all, the Terriers combined for 25 points, and with Mike Nesby for top honors at the basket, backboard, and all.

Top scorer for the contest was Nesby, with 17 points. Following for Tech were Mike Nesby, with 12 points; Hitchins, 8 points; Holborg, 2 points; and Varney, 2 points. Nesby was also named MVP of the tournament.

In Section 1, Baker House handed the Alpha Club tie first loss, 24-10, to give them a second place finish. with Kappa Sigma who defeated Delta Upsilon 46-41. Delta Theta lost two games, one to Delta Kappa Epsilon 27-26 and the other to Delta Chi 45-28. Alpha Epsilon Phi finished first place. The Engineers overwhelmed the Colon Club 73-18 for their third consecutive victory, while the Chinese defeated Phi Delta Theta 52-15. Phi Delta Theta bested Beta Theta Delta 36-27.

Three More Wins

In Leagues 123, Hendry-Dalby lost two games by default, one to Beta Theta Pi and the other to Kappa Sigma. Sigma’s handed Walker his first defeat 50-35, the New Dorns “A” defeated Sigma Chi 25-16, and Walker overcome the 35-15 Class B.

In Leagues IV, Westgate won two games against Alpha Chi Omega 43-39 and the other from Monarch-Wood 66-12. Delta Epsilon defeated Monarch-Wood 55-43 and Sigma Mu edged one closer from Alpha Chi Omega 47-43. Two other games were played. In League V there is a three way tie between Phi Lambda Phi, Phi Beta Rho, and Alpha Chi Omega.

Swimmers Meet Brown

Tech’s men’s travel to Providence, Rhode Island, this Saturday to match their abilities against Brown. They will be trying for their first victory after dropping the opener to Amherst 45-37.

Teach's Mike Nesby shown above ready to hit the scale for two points. Mike Nesby along with Hank Roberson were high scorers for the Terriers in their victory over Terriers with 12 tallies.

The varsity game was broadcast over the facilities of WGC, who will bring all home games to the Technology listening audience.

Inasmuch as the Baker Committee is not confined to any field and the project which will best fulfill the student’s needs in the particular area, the student leadership would call for outside help to carry out the plan.

Baker Memorial

(Continued from Page 1)

The next problem will be to evaluate students at the Institute and see what opportunities would be available to them. For instance, the Baker Committee will study the project which will best fulfill the student’s needs in the particular area. The Baker Committee is not confined to any field and the project which will best fulfill the student’s needs in the particular area. The Baker Committee is not confined to any field and the project which will best fulfill the student’s needs in the particular area. The Baker Committee is not confined to any field and the project which will best fulfill the student’s needs in the particular area.

Sample Projects

Supposedly, the Committee found that the following three projects needed to be explored:

1. A great lecturer to provide additional cultural opportunities for the student body.
2. A student union building.
3. A student union building.

D. L. Rhind Elected President Of College Officers Association

Dorthei L. Rhind, B.S. of the Institute of Technology, has been elected President of the Eastern Association of College and University Business Officers, which held its thirty-first Annual Meeting in Toronto, Canada, recently. Mr. Rhind served as vice-president of the association in 1943.

He came to the institute in 1927 when he was appointed Assistant Bursar, and in 1934 he succeeded Horace S. Ford as Bursar. Mr. Ford having been elected Treasurer of the Corporation.

Katie Gibbs

(Continued from Page 1)

motions on Sundays. Limited two- ock permission is given to the girls.

Average Age High

The average age is somewhat higher than would be expected for college freshmen and sophomore. Many girl.s come to the school after one or more years in a finishing school or college. First year stud- ents range from eighteen to twenty.

What do the girls think of Technol- ogy men? In general a Tech man will have a hard time getting a date at the school because of the sparsity of contacts, and when he does, he'll have to prove himself. While there is no prejudice toward M.I.T. men, the Tech man will find himself being compared with Har- vard men, 2017 and that his mem- bers and speech will be carefully scrutinized. But in spite of the fact that they have an acute sense of social position, they are straight- forward, poised and interesting.

Guests invited for Supper

The school holds one acquaint- ance dance by invitation only, at the beginning of each school year. Many students have male guests for Sunday supper, however, and there is an informal dance in the spring.

suels until the second term. The questionnaires have not been entirely decided upon. The reason for putting off the final decision is the fact that Kappa Na, honorary Electrical Engineering Fraternity, has recently put out a ver- sion of the rating questionnaire. When the forms have been discon- nected and corrected, it will be given out to the whole school.
