5 Man Group To Study Fund Drive Problem

Institute Committee has appointed a five man group, headed by Edward Margulies '52, to study the problem of non-student benefit fund drives. Last April a resolution was passed which denied Inst. Comm. support to non-student benefit drives. The move was made in an effort to relieve the student of the many collections previously made by organizations of various sorts.

The new five man group was appointed at the last meeting when it was announced that the Red Feather Drive Committee had asked the Committee's support in its 1952 campaign.

A possible solution, which among others will be studied by the group, is the establishment of an annual spring general fund drive which would provide funds, at the discretion of Inst. Comm. to go to the various groups which seek financial aid from the students, thus eliminating a series of bothersome collections while not refusing to aid worthy causes.

Other members of the group are: Joseph Eisenberg, '52; Robert Oliver, '52; Stanley Buchin, '52 and Mark Shupack, '53.

Bowditch To Speak At NSA's Smoker

Dean Bowditch will speak at the National Student Association Smoker this Thursday, October 18, at 5:00 p.m. in Tyler Lounge. The new dean will discuss the importance of the student's role in his relations to his school, in relations between schools in the United States, and in relations between students of the United States and those of other countries.

Plans for Coming Year

NSA programs for the coming year will also be presented and discussed at the smoker. The Association announces a need for Sophomores and Juniors as well as freshmen to work on and help administer some of the new programs.

Projects to be undertaken this year include FSSP, the International Association for the Exchange of Students with Technical Experience, the M.I.T.-Delhi Polytechnic Affiliation Program, Work Study and Travel Abroad, Technical Information Bulletin to the Far East Colleges, and other services.

5:15's Will Hold Dance

Featuring the orchestra of Brad Kent, the annual 5:15 Club Halloween Ball will be held in Morss Hall on Saturday evening, October 20, from 8:00 to 12:00 p.m. Tickets to the stag affair, to which over four hundred girls have been invited, are \$1.20 per person and may be obtained this week in the lobby of Building 10 or from any member of the 5:15 Club. The usual refreshments will be served.

Service Officials Announce Exam

The Selective Service System has announced that arrangements have been made to conduct the second nation-wide series of the Selective Service College Qualification Tests to provide Local Boards with evidence of the relative qualifications of students who may be considered eligible for deferment in Class 2-A (S) to continue their college study.

These tests will be given on Thursday a.m., December 13, 1951, and on Thursday a.m., April 24, 1952, by the Educational Testing Service, Princeton, N. J., at twenty-six different locations throughout Massachusetts, including the Institute, and at over a thousand centers in the country.

All eligible registrants who wish to take the test should apply immediately to the nearest local board. Deadline for filing applications for the first test, November 5.

Details as to time, place and adjustment of class schedules for the examination to be conducted at M.I.T. on December 13, will be announced prior to the examination.

Who is Eligible?

To be eligible to take the Selective Service College Qualification Test, an applicant:

1. Must be a Selective Service registrant who intends to request deferment as a student.
2. Must be satisfactorily pursuing a full-time course, undergraduate or graduate, leading to a degree.
3. Must not previously have taken the test.

Mahoney History Class To Be Aired Over FM Station

Professor Thomas H. D. Mahoney's classes on the U. S. and world history will be broadcast over the new Lowell Institute, Station WGBH, 89.7 Mcs. every Tuesday and Thursday at 3:30 p.m. The programs will consist of tape recordings of Professor Mahoney's classes, recorded on tape in their entirety. Two microphones will be used in the recordings; one for Professor Mahoney, and another one, backed by a parabolic reflector to catch the students questions.

Professor Mahoney has appeared many times on the Lowell Institute program "America at the Crossroads," and thus has experience in roundtable discussions.

Professor Mahoney authored, in co-operation with Professor John B. Ray, the text book, "United States and World History," published by the McGraw-Hill Book Company. This book has been on the market for two years and is now used by more than thirty colleges and universities across the country. Among these are Hunter College in New York, University of Southern California, University of Kansas, and Georgia University.

"Town and Country" Theme To Include Formal At Statler

Freddy Martin and his orchestra will be the featured band at this year's Junior Prom Weekend, it was announced today by the Junior Prom Committee. The weekend, which will be known as "Town and Country," will consist of a formal dance on Friday night, November 16, at the Hotel Statler, and an informal the following night at Walker Memorial.

FREDDY MARTIN

Members of all classes are invited to come out "on the Town" Friday and dance to the music of Freddy Martin and his orchestra, featuring Merv Griffith and the Martin Men. One of the leading orchestras in the country for more than ten years, Freddy Martin and his band now have a television show emanating from New York.

On Saturday night the scene will shift to Walker Memorial and a taste of "the Old Country." The Vienna-like setting will feature soft lights, sweet music, and Jakey's dark brew. Approximately 350 couples are expected to attend and dance to the music of George Graham, with a string ensemble.

Options Sales October 22

Options for the weekend tickets will go on sale on October 22 in the lobby of Building 10. Options will cost \$3.00, and constitute a guarantee of a weekend ticket. On November 5, regular tickets will go on sale in Building 10. Weekend prices will be \$8.80, and there will also be split tickets available in limited quantities. Friday night alone will be \$7.00, and tickets for the informal will be \$3.00.

Although the exact seating arrangement for the formal cannot be determined until the total number of couples in attendance is known, tickets will be sold in groups of five couples to a table on an assumed seating plan as soon as

Treasurer's Report Cites Need For More Endowment

Need for increased endowment, that bogeyman of college presidents' nightmares throughout the country, now faces the Institute, according to Treasurer Joseph J. Snyder in his financial report for the last fiscal year. Tuition and investment income, the traditional sources of revenue, now make up only one-half of the operating income of the Institute.

Thus current operations are depending more and more upon gifts for immediate use, industrial grants, and the like. To counteract this state of unbalance, which is particularly dangerous in time of inflation, the Administration has announced that the increase of endowment funds will be next step in its long-range development program. Proportionately less of the funds will be sunk into new buildings.

Total gifts, grants, and bequests to the Institute for the year were \$9,145,000, a large portion of which

came from the Development Program. The end of the year found \$3,100,000 unexpended and available for buildings as against \$1,652,000 a year ago. \$1,500,000 of unrestricted development funds were used to complete buildings during the year.

Total Operations

Under the impetus of increased research activity, total operations for the fiscal year increased from \$21,470,000 in 1949-50 to \$23,469,000 in 1950-51. The figure for 1941 was \$5,964,000. Research contracts increased from \$12,858,000 to \$15,020,000. Tuition income dropped as enrollment decreased, but income

Chermayeff Visits Architecture Dept.

By JOE KOZOL

Professor Serge Chermayeff, one of the ten foremost architects in the U. S., has come to the Institute for three months to teach fifth year students in the Department of Architecture. Professor Chermayeff is one of a number of temporary teachers coming to the Institute to further enrich fifth year students' curricula and to give them the benefit of studying under some of the leading architects in the country.

Born in Russia in 1900 and educated in England, Professor Chermayeff practiced architecture in England from 1928 until 1940, when he came to the U. S. Soon after, in 1942, he became a professor at Brooklyn College. Five years later Professor Chermayeff settled in Chicago, where he has since been director of the Chicago Institute of Design, a school of advanced modern ideas in design and education. The Institute of Design was founded and directed by Lazlo

(Continued on Page 4)

Fiedler Speaks Of Men And Music

Arthur Fiedler, conductor of the Boston Pops, and writer on subjects related to music, was reticent neither about his past activities nor his plans for the future and preferred his valuable views on sundry questions related to his special field during an interview with THE TECH on Sunday night.

Mr. Fiedler returned to Boston recently after a trip to the West Coast, where he conducted nine concerts including one in the Hollywood Bowl. He is now considering a journey to Palestine, or to the Argentine, or to both countries but, he tells us, no definite arrangements have yet been made. The conductor will go to New York shortly in order to make some records.

Questioned on the success of the last Esplanade Concert, Mr. Fiedler intimated that the venture was

marked by popular success rather than financial, due to frequent rain rather than to noise from the new four-lane highway.

Concerts a la Pops did not originate in the U. S., according to the conductor. The idea of playing music to informally seated audiences was already practiced in Europe in the days of Strauss and Wagner.

Mr. Fiedler's views on "pocket editions" of well known classical pieces couple disapproval of this commercial trick of selling more records with emphasis on subsequent advantages to be gained from pieces of good music reaching a wider public.

Lowered Price, Novel Gloves At Field Day Dance

Field Day on October 27 will end with the traditional dance held that evening. At that time the first official announcement of the victor will be made, along with the presentation of the Field Day cup.

The dance will be held in Morss Hall, Walker Memorial, and will be limited to about 350 couples. Couples only will be allowed. Dancing will be from 8:00 p.m. 'til midnight, to the music of George Graham. The price of tickets has been lowered from the customary \$2.40 to \$1.50.

Decorative Scheme

The decorations will be in keeping with Field Day. A few novel touches, such as two giant gloves painted with luminescent substance and lighted with ultraviolet light, will be added. The tickets, too, will have a touch of novelty, as they will resemble the freshman tie in pattern and colors.

Ticket sales will start next Tuesday. A booth will be located in the lobby of building 10. Dorm hall chairmen will also have tickets for the benefit of those who cannot find time to go to the booth. The fraternities will also have tickets available.

CALENDAR OF EVENTS

OCTOBER 17 TO OCTOBER 23, 1951

WEDNESDAY, OCTOBER 17

MIT Women's Association. White Elephant Sale. Emma Rogers Room, 10:30 a.m. to 6:30 p.m.
 Faculty Club. Luncheon meeting. "The M.I.T. of Finance." Mr. Merrill Griswold, Chairman of the Board, Massachusetts Investors Trust. Campus Room, Graduate House, 12 noon.
 Faculty Meeting. Huntington Hall, Room 10-250, 3:00 p.m.
 Electrical Engineering Department. Colloquium: "Whirlwind at Work." Mr. C. W. Adams. Room 6-120, 4:30 p.m.
 Catholic Club. Meeting and lecture: "The Civil Law and the Moral Law." Mr. Mark Dalton, lawyer. Room 2-190, 5:00 p.m.
 Inter-Varsity Christian Fellowship. "A More Effective Bible Study." Jane Hollingsworth. Room 7-103, 5:00 p.m.
 Lecture Series Committee. Lecture: "Psychiatry and the Student — Some causes of success and failure." Dr. Dana L. Farnsworth. Huntington Hall, Room 10-250, 5:00 p.m.
 Pershing Rifles. Meeting. Room 12-182, 5:00 p.m. All members must attend.
 Chemistry Department. Harvard-M.I.T. Physical Chemistry Colloquium: "Crystal Structures of Intermetallic Compounds." Professor David P. Shoemaker. Harvard University, Mallinckrodt B23, 8:00 p.m.

THURSDAY, OCTOBER 18

Lowell Institute Cooperative Broadcasting Council. "United States in World History." Professor Thomas H. D. Mahoney. WGRH (89.7 mc), 3:30 p.m.
 Lecture Series Committee. Film: "The Razor's Edge." Room 10-250, 4:00 p.m.; Room 6-120, 7:00 and 9:30 p.m. Admission 30¢.
 Physics Department. Colloquium: "Nuclear Shell Structures." Professor Victor F. Weisskopf. Room 6-120, 4:15 p.m.
 Hillel Society. Discussion. Rabbi Maurice L. Zigmond. Crafts Lounge, East Campus, 5:00 p.m.

FRIDAY, OCTOBER 19

Undergraduate Engineering Laboratory. Seminar: "Undergraduate Laboratories in Aeronautical Engineering." Professor Shatswell Ober. Room 1-151, 2:00 p.m.
 Mechanical Engineering Department. Seminar: "Application of Strain Gauges to Testing Machines." Professor Peter K. Stein. Room 3-370, 4:00 p.m. Coffee from 3:30-4:00 p.m. in Room 3-174.
 Hillel Society. Services. Litchfield Lounge, 6:30 p.m.

SATURDAY, OCTOBER 20

Lowell Institute Cooperative Broadcasting Council. Broadcast of Boston Symphony Orchestra may be heard in the Charles Hayden Memorial Music Library at 8:30 p.m.

SUNDAY, OCTOBER 21

Hillel Society. Brunch, Lox-Bagels-Dancing. Moore Room, 6-321, 10:30 a.m. to 1:00 p.m.

TUESDAY, OCTOBER 23

Catholic Club. Apologetics Class: "Principles of Man in Society." Reverend Paul Murphy, S.J. Room 2-139, 4:00 p.m.
 Metallurgy Department. Colloquium: "Industrial Applications of Radioactive Methods." Professor John W. Irvine, Jr. Room 6-120, 4:00 p.m.
 Staff Players of M.I.T. Supper and Play Reading. Emma Rogers Room, 6:15 p.m.

EXHIBITIONS

An exhibition of photographs by Samuel Chamberlain is on display in the Lobby of Building 7 through October 29.
 Photographic Salon prints by Thomas J. Newett of Park Ridge, Illinois, are being shown in the Photographic Service Gallery, Basement of Building 11, through October 29.

CALENDAR OF EVENTS

The Calendar of Events appears in THE TECH on Tuesdays with announcements for the following week. Notices, typewritten and signed, must be in the Office of the Editor, Room 7-204, not later than noon on Thursday prior to the date of publication. Material for the Calendar of October 24 - October 30 is due October 18.

Gilliland Tackles New Job As Head Of Department

By NORMAN G. KULGEIN

Professor Edwin Richard Gilliland was appointed head of the chemical engineering department when Walter Whitman was called to Washington to serve as chairman of the Research and Development Board. Under present conditions Mr. Gilliland will serve as head of the department for only one year. With very little hesitation he will tell you that he would rather be doing some other job. It seems that there's just too much red tape involved in the running of the fourth largest department in the Institute.

Professor Gilliland came to the Institute by a rather indirect route. He received his bachelor degree from the University of Illinois; a master's degree from Penn State, and finally a doctor's degree from M.I.T. In 1934, upon the urging of Professor Warren Kendall Lewis, he accepted an assistant professorship in the Chemical Engineering Department.

Deputy Dean of Engineering

During the last war many of the Institute's more important people were summoned to Washington to aid in the war effort. Professor Gilliland's contribution consisted of two years service as adviser to the government's synthetic rubber program and one year as a member of the National Defense Research Committee. After the war he returned to Tech in the capacity of

deputy Dean of Engineering. Since the education of students was his primary interest Professor Gilliland returned to teaching chemical engineering at his first available opportunity.

Professor Gilliland, in addition to his regular duties as head of the department is an active member of the Institute's Undergraduate Policy Committee. At meetings of this organization he expresses the view that the Institute should adopt a more flexible humanities program. By this he means that students should be allowed to choose courses in which they have a genuine interest. Mr. Gilliland is afraid that, under the present humanities program, all students are being pressed into the same educational mold. An example of this is the uniform humanities program for the first two years. His opinion is, of course, only one of the many competent views that have been expressed on this subject.

Many of us have wondered how it is possible for Tech, or any other
 (Continued on Page 3)

By ED EIGEL

Eleven days from now the Sophomores and the frosh will fight their annual battle to the death on Briggs Field, the Charles River and other arenas of competition. The Sophomores usually have the advantage in this sort of thing due to the existence of the Q Club and similar organizations, whose main functions at this time of the year are to incite class spirit among the freshmen.

Looking over the situation this year, however, one gets the idea that the frosh have quite a bit of spirit on their own. They have even had the audacity to organize a sub-rosa group to act as a sort of freshman Q Club. They call their organization the P Club, and have, we are told, about 250 members, or about ten times the membership of the recognized Q Club. Their activities are controlled by a "brain" who slinks about under the name of Uncle P. Uncle P calls

M.I.T.

M.I.T. is America's "arsenal of brains"—where even some of the machines can think—says this week's Post. It was largely responsible for our radar, guided missiles, and many other super-inventions that considerably shortened the last war. And today, even more astounding jobs are being tackled and mastered. Here is the whole M.I.T. story—its Boston beginning with 15 students, its many famous grads, its present world leadership, its plans for the future. Get your copy of the Post today and read Robert M. Yoder's Buck Rogers Would Love it Here.

Gilliland (Continued from Page 2)

top grade technological institution, to maintain professional departments staffed by the best men in their fields. To the casual observer it would seem that these men could obtain more lucrative positions in industry. Why, then, do such men stay on as teachers? Professor Gilliland explains this by saying that most of our staff hold positions as consultants to industry in addition to their regular teaching duties. In this way they make a sum equal to what they would earn in industry. Professor Gilliland is himself a consultant to The Merck Co., a large chemical concern.

Still Teaches
The Institute encourages this practice, for it feels that the staff members will always become acquainted with new methods of in-

dustry and will pass these new methods on to the students. It also feels that most men like the freedom that goes with being a professor, and the opportunity to be with students. Although head of a department, Professor Gilliland still finds time to teach his classes.

Many students come to discuss their choice of course with Professor Gilliland. He usually offers this bit of sage advice to them.

"Pick the course in which you have a real interest. Do not fear that any course will hold you back—keep you from becoming president of a large concern—if that's what you want. In about twenty years only 30 per cent of Tech graduates will be in their original professional field. Choose your course without any mental apprehensions."

Ex-Celtic Ace To Coach Tech Basketball Team

As a replacement for Cleo O'Donnell, Beaver basketball coach last year, the M.I.T. Athletic Association has announced that Edward Leede, former star of the Celtics and All-American from Dartmouth, will mentor the five this year.

Now a graduate student at Harvard, where he is majoring in Business Administration, Leede will coach evenings while attending classes during the day.

Attended Dartmouth
While at Dartmouth College, Ed was quite active in inter-collegiate athletics, getting his letter in tennis and track and throwing the javelin for the phenomenal distance of 180 feet, besides breaking all basketball scoring records at Dartmouth.

In a stint in the Marines for one-and-a-half years, Ed played on the Northeastern Championship service team from Quonset Naval Station.

Starred for Celtics
After graduating Dartmouth, Leede played with the Celtics for two years as first string guard.

Born in New York City 24 years ago, Ed attended Bayside High School, playing varsity ball there, and graduated when but 16 years old.

The entire student body welcomes Coach Leede to the M.I.T. family and hopes that his stay will be a happy one.

Harriers Crush Tufts With Six Of First Eight Men; Jumbos Trample Frosh

With Captain Cruck Vickers and Bill Nicholson leading all the way, the Technology Cross Country team routed the Tufts College Harriers by a 17-41 margin. Vickers and Nicholson, who captained the Techmen last year, coasted to the finish hand in hand in the time of 22 minutes 42.4 seconds. Jack Farquhar of the Beavers ran an excellent race to finish third, a good seventy-five yards ahead of Tom O'Hearn, first Tufts runner to finish. John Avery and Jerry Tiemann of Tech came in close behind O'Hearn, just nipping Joe Griecci of the Jumbos. Clyde Baker followed Griecci across the finish line to give Oscar Hedlund's runners six places out of the first eight.

Freshmen Fall
In the Freshman meet, inexperience told heavily against the Beaver Frosh, as they bowed to the Jumbo yearlings by a 16 to 46 count. Alan Price and Dick Bowering of Tufts showed great promise, finishing almost side by side to cop the first two places. Martin Givar was the first of the Beaver yearlings to finish, placing fifth.

This Friday the Tech varsity harriers will face Holy Cross at Franklin Park in an attempt to extend their dual meet winning streak to five in a row.

The summary:
Varsity: 1. (tie) Nicholson and Vickers, M.I.T.; 3. Farquhar, M.I.T.; 4. O'Hearn, T.; 5. Avery, M.I.T.; 6. Tiemann, M.I.T.; 7. Griecci, T.; 8. Baker, M.I.T.; 9. Christopher, T.; 10. Coren, T.; 11. McCann, T.; 12. Vinton, T. Time: 22:42.4

NOTICES

WMIT Programs

WMIT announces two new programs on its schedule. On Tuesday and Thursday from 9:45 p.m. to 10:00 p.m., Debby Cohen of Emerson College will do a program patterned after the "Lonesome Gal" series.

From 2:00 a.m. to 7:00 a.m., the station will present "Music from Heaven" six mornings a week.

Maugham Movie

On Thursday, Oct. 18, the Lecture Series Committee will present "The Razor's Edge." The first showing of the movie will be at 4:00 (not 5:00) p.m. in Room 10-250; two other shows, one at 7:00 and one at 9:30, will be held in Room 6-120. Admission will be 30 cents.

Farnsworth Lecture

Dr. Dana L. Farnsworth, Medical Director of the Institute will give a lecture entitled "Psychiatry and the Student, Some Causes of Success and Failure" on Wednesday, October 17, at 5:00 p.m. in Room 10-250. The lecture is sponsored by the Lecture Series Committee.

Dancing Lessons

Dormitory Committee is sponsoring dancing lessons to begin this week. Intermediate lessons will be held on Monday and Wednesday nights; advanced lessons will be given on Thursday night. For more complete information, see Dormitory bulletin boards.

Faculty Rifle Club

The M.I.T. Faculty Pistol Club of-

fers an opportunity for any M.I.T. Faculty, D.I.C. Staff, or employee to join a group with the following aims: learning proficiency with handguns, qualifying for nationally recognized classifications, engaging in competitive target shooting.

If seriously interested contact H. Hodgdon on ext. 2459. At present, the club does not have guns available for training use, so it will be necessary for prospective applicants to provide their own firearms. Only .22 caliber guns may be used at the M.I.T. Range.

Lounger (Continued from Page 2)

mass meetings in the Great Court, offers rewards to Sophs who will "rat" on their frosh-annoying buddies, and generally tries to make life miserable for the second-year men.

Uncle P's identity is known, and he has not escaped unscathed, but he and his organization show that this year's freshman class is not taking Field Day lightly. In fact, from the poor turnouts for some of the Sophomore teams, one might decide that the frosh could win this year's battle. Unless the Sophs begin to look a little more alive, they are ripe to become one of the very few classes since the first Field Day to win as freshman only to lose the next year.

In the current issue of Life, there is an article describing the first

Financial Report

(Continued from Page 1)

from gifts and investments were used for current expenses to offset this reduction.

Total salaries and wages of \$14,875,000 made up 63% of all expenses. Lower plant expenses reflected a decrease in special charges for alterations and maintenance, but the cost of normal plant operations increased over that of the previous year.

Endowment funds were moving in the right direction as they increased by \$1,660,000 during the year. Total invested and other funds came up to \$56,817,000 from the \$52,682,000 figure of June, 1950. The Institute's plant was worth \$28,577,539, and construction in progress will bring the value of the educational plant to well over \$30,000,000.

NEW STUDENTS

The Medical Department reminds all new students including graduate students that they must have a physical examination at the infirmary before the sixth week of the term. So far only about half of those required to take the exam have complied with this ruling.

two weeks of the college life of a Wellesley freshman. One of the reasons this young lady chose Wellesley as her school, we are told, is because of its location—near Boston and several men's colleges. After reading the rest of the article, however, one can easily see that the word "several" must have been a mis-print.

Selective Service

(Continued from Page 1)

Administrative officials at the Institute feel that all students 18 years and over who wish to seek deferment as students and have not already done so should take advantage of the opportunity to take the examination even if they are members of the R.O.T.C. and the A.F.R.O.T.C., and regardless of their class standing.

It is requested that eligible students take the early test—Thursday, December 13, 1951. Students who become 18 and register for Selective Service between November 5 and March 10 should take the later examination. Veterans and married men with a child need not

take this test as they have lower classifications than 2-A (S).

Congress provided in the recent amendments to the draft law that any registrant who was in a deferred classification on June 19, 1951, or who after that date received a deferment, shall remain liable for training and service until he reached the age of 35. Therefore, students who are 26 years of age and over to whom the above applies should take the examination if they wish to continue their education.

How to Apply

Obtain an Information Bulletin, an application card (SSS Form No. 106 and attached SSS Form No. 107), and a mailing envelope from any Selective Service local board.

Fill out the application in exact accordance with instructions and mail it immediately in the envelope provided, but you must fill in your own name and return address in the upper left-hand corner and affix a stamp. It might be advisable to send it by registered mail. Do not mail more than one application, as a Ticket of Admission to the test will not be issued to any student filing more than one application.

When you report for the test, you must bring with you an official document showing your Selective Service number and the exact designation, number, and address of the Selective Service local board having jurisdiction over you. Apply to your own local board now if you do not have this information.

Chermayeff

(Continued from Page 1)

Moholy-Nagy until his death in 1946, when Professor Chermayeff became director.

Professor Chermayeff's realizations include such well-known works as a chemical research laboratory at Blackley, Manchester, England, and a country house at Halland, Sussex, England. Professor Chermayeff did this country house of wood, which, in England, is quite unusual.

He is a fellow of the Royal Institute of British Architects, a member of the International Congress of Modern Architects, the American Institute of Architects and the American Society of Planners and Architects. He serves on the editorial board of the Magazine of Art and Arts and Architecture.
