Students May Seek Statutory Deferments

Any student, undergraduate or graduate, receiving orders to report for induction should do so immediately to his Local Board and ask for a "statutory deferment" according to the instructions previously given. The board is required to grant the statutory deferment to all students who are in good standing and not otherwise excluded from the military service, and to the mailing of the induction notice, except those who were granted postponement of induction during the last academic year.

All freshmen who reach 18 years of age will be sent a questionnaire by their Local Board. They will subsequently be processed for induction (that is they will be classified 1-A, and then ordered to report for a physical examination).

Students receiving a questionnaire from their Local Board should go to Room 7-102, the office of the Developmental Committee on Military Service, and request a letter stating that they are registering and are awaiting classification at the Institute; so that the board may be served to notify them of the decision which was authorized by Congress.

Dean Bowditch will be given an opportunity to take a Selective Service Qualification Examination in the next few days. Freshmen or sophomore standing will determine if they will continue in college training.

Freshmen who have been on active induction are to take the Selective Service Qualification Examination also. Freshmen who are in academic classes will continue in college training.

Mr. Lutz, of the Advisory Committee of the Developmental Board and ask for a "statutory deferment" from the Local Board immediately to his Local Board.

"My office is always open to the students." This statement by Dr. Franklin E. Helen, president of the senior class and Dean Bowditch was at the Freshman Dinner Thursday, where he stressed the need for speakers who are interested in the advancement of the foundation of the campus and in the establishment of the student body as a whole.

Dean Bowditch is right at home in the Massachusetts Institute of Technology. He was born in Massachusetts and attended Harvard University and received his degree in 1985. That same year he married and now has two sons and a daughter. While still attending Harvard, he taught physics and science at Shady Hill School here in Cambridge.

From Lake Forest to M.I.T.

After his graduation from Harvard, Dean Bowditch took a teaching position at Amherst College. He high school alma mater. In 1912 he was appointed headmaster of Park School in Indianapolis. He assumed the post then, again, after four years and in 1941. He remained headmaster for the next five years. During that time he worked to strengthen the tradition of excellence. He was said to be a true leader in the teaching field.

Since arriving here on July 10, Dean Bowditch has been familiarizing himself with the various aspects of student life. He has met and talked to the members of the administration and faculty, and has acquainted himself with the general policies of the Institute. He has been working with the parents of all entering freshmen in order to obtain a true picture of the students, Row and has

President Killian Highlights Freshman Weekend Program

On June 10, President Killian announced the death of Dr. Edward L. Moreland, former executive vice president of the Institute. The announcement was made by the Developmental Board of the Massachusetts Institute of Technology.

Dr. Moreland served as head of the Department of Chemical Engineering from 1913 to 1858. In 1859 he was named executive vice president of the Institute.

On June 12, President Killian announced the death of Professor David G. Jackson. He served as head of the Department of Electrical Engineering. Dr. Jackson joined the Institute staff as professor and head of his department in 1897.

Dr. Moreland's death was announced on July 10, and the announcement was made in a press release. It stated that Dr. Moreland was the first president of the Institute and the first president of the Massachusetts Institute of Technology.

"Old traditions never die, they just grow bigger.

H. L. Thompson, an alumnus of the Massachusetts Institute of Technology, died Friday afternoon in his home in Boston. He was 94 years old.

Thompson was a member of the class of 1897 and a former member of the Massachusetts Institute of Technology. He was also a member of the Massachusetts Institute of Technology alumni association.

Thompson was a member of the Massachusetts Institute of Technology alumni association. He was also a member of the Massachusetts Institute of Technology alumni association. He was also a member of the Massachusetts Institute of Technology alumni association.

"Old traditions never die, they just grow bigger."

A high-spirited freshman class greetedly received this sign of welcome displayed by Mr. Vogel, president of the Sophomore class. "This sign of welcome is a sign of support for our college," the president declared. "It is very interesting to the students, but until he studies the general policies of the student work, he will not be able to make decisions that will benefit the community. "Essentially a college is a place where people can have their own way of doing things, and to the effectiveness of this community depends upon the quality of the people in it and their development."
Substitute. "I want the students to perpetuate the ideals of the Institute, and graduate students, and faculty members should not be the sole guide in the formulation of school policies. The actual drawing of its true value. Taken together with the opinions of these two groups should not be the sole guide in all major policy making, while the opinions of the administration must be taken with the coordination of investigations, climaxing with an address by Dr. Karl T. Compton, chairman of the corporation, on Saturday, and the Sunday afternoon lUNCHEON PROGRAM. The conference includes the unveiling of a plaque in memory of Dean Burton, and the presentation of a souvenir scarf to Justice Burton.

The Tech Freshmen Supplement

Most Likely Groups Have Some Vacancies for Frosh

Although Rush Week has ended, there are still some vacancies in fraternities. Many are taking more members than they planned for this year, and rushing during the school term is expected to be heavier than before. Of the approximately 450 freshmen here for Rush Week, an estimated 270 have pledged in the 26 houses. Although this is the usual number of Rush Week pledges, the fact that fraternities are taking in more men gives them a good opportunity for anyone interested. It is recommended by Larry Mayer, '52 chairman of I.F.C., that those interested in any particular house make themselves manifest, rather than wait for the fraternity to search them out.

In general, those are some vacancies remaining in both the dormitories and fraternities, but their number is small, and they probably will not last long. However, anyone desiring to live in either the dormitories or fraternity should consider a change from one to the other, still has time to put in his bid.

A view of last year's Freshmen Acquaintance Dance. This year's P.A.D. is scheduled for October 11.

With myriads of posters beaming down on his life, the freshman of 1951 will soon be surprised at the intensity of the social pace so early in the semester. While all pre-matriculation literature matter was important, freshman freshmen are surrounded by individuals through taking classes, sitting in restaurants, and getting acquainted. These previews do little to indicate the rich, varied, and moving mixture in which these adventures present.

The freshmen are by necessity suited with regard to sources of feminine companionship. Their Boston University residence halls, and the life at large and college colleges, are all points of interest to these fresh faces.

As its first freshman class registers for the year, the Institute likes most other colleges is finding few if any changes brought about by last summer's world conditions. The class has had very little chance to make any inroads. Last spring it was revealed that the number of applications for admission into the freshman class had risen over that of previous years. At that time, B. Aiden Thresher, director of admissions, announced that there would be no ordering diets for this year, so the class of 1956 has been chosen on the same basis as its predecessors.

The class, like all recent classes of the Institute, represents many varied backgrounds. Its members come from every State of the Union, many of them from the District of Columbia. Ten per cent come from foreign countries. Public schools have sent about three-quarters of the class with the other quarter coming from private institutions of many descriptions. In all, 446 schools are represented.

Atmosphere, Quality Mark Boston's Varied Ban neanies

Brown offers a wide variety of eating places to satisfy the most discriminating gourmets. For the uninitiated, we offer the following list of dormitory-proven establishments as well as a few of the places featuring entertainments and dancing.

The Graduate House-Excellent food and reputation for plain, bookish manners. Famous for its Harvard influence and repulsion for plain, bookish men, although a cursory glance reveals that they are not all the same. Here's Welllesley with its classics, less, and spring hoop assemblies and the ballroom dancing. There's Simmons with its professional court and extracurricular. In the same, there's Mabel with its household secretarial students: there's I.A.E., Blackins, Regis, Emmanuel, Emerson, Bodleian, Wellesley, and Wheelock. None of these large colleges is probable and probably good many more.

Meals: Freshmen and Sophomores are urged to attend. All interested freshmen and Sophomores are urged to attend. All interested candidates are invited. Plans for the Fall Acquaintance Dance on October 5 are on the agenda.

An all-staff meeting of THE TECH will be held at 5:00 p.m. on Thursday, September 20, in Linfield Lounge.

Enrollment Drop

Total enrollment at the Institute has dropped by about 10 per cent as the outgoing class of 1953 reflected the usual total of the incoming freshmen. The decrease is in line with a policy of stabilizing the enrollment of each class at about the 750 level.

Freshmen to be registered for the fall semester will be welcomed at a reception in the President's dining room at 8:30 p.m. on Sunday, September 20, at the President's home.

Freshmen to be registered for the fall semester will be welcomed at a reception in the President's dining room at 8:30 p.m. on Sunday, September 20, at the President's home.

The brief picture of Institute life contained in Freshmen Supplement is aimed primarily at the class of 1955; but the "General Review" of THE TECH hopes it may prove of some value afterwards.

**Lectures, Classes, Dates, Field Day**

**All Freshmen Face 5 Rugged Courses**

One of the unexplained facts of nature is that most students come to Technology to study. To help the freshmen along in this direction, we submit the following list of wisdom, penned by the voice of bitter experience, overrunning the freshmen curriculum.

**Silts rules are important weapons at Tech in the battle for survival. A fancy one is not necessarily the first year—a pocket edition will serve—but in the years ahead, the courses become more hostile, so it does no harm to get a good slide rule early. Any freshman with doubts regarding his future need for slip sticks can easily be cured by reference to Schuman’s outline of these subjects:**

1. *Mathematics:* Many are the freshmen smitten by this monster. A new and well-presented text, such as *Engineering Mathematics*, can sometimes be caved by reference to Schuman’s outline of these subjects.

2. *Physics:* A good text and lecture help considerably. Doing a few of the unassigned problems, thorough absorption of the course, and spending too much time on reading are bad habits that are very helpful, since this is only the second year that the present text has been used. These tests gather dust in Room 2-270.

3. *Drawing:* Anyone who can visualize three-dimensional objects from two-dimensional drawings, and who can draw straight lines with the aid of a T-square, will have little trouble with Engineering Drawing. Neatness is important, but this is with the freshman course, and spending too much time on one drawing is bad policy. Drawing sets come in various prices, but the most expensive is not necessarily the best.

4. *Stipends:* Varieties are the featured attraction of this course. Sociology, anthropology, and English composition are a few of the angles from which human society is attacked. The ability to write legibly and understandably is a must. Also helps pass time in class.

5. *Studies:* Or Shady, was in bad shape—everybody lambasted him about his messy hair! “You’ll get no sheepskin,” the Dean said. “Somebody’s pulled the wool over your eyes. Better comb it back with Wildroot. Phillips has specialized in COLLEGE BOOKS USED and NEW for over thirty-five years. Larger buyer of used college books in Greater Boston.

...The Class of 1955 Takes A Look Around

The Freshmen took Field Day last year and it's a fact that no one who won it in the Freshman year has ever lost in the Sophomore year. It's up to you, the class of '56, to try and break this tradition. However the Sophomores have their own show.

It is going to be rough going for '56 with all the hazing, the shoving of ties, and the learning of songs but out of all of this foraging good will comes. When it's all over, no matter who the winner, both sides will profit by the coordination and practice of working together they will have received.

Just to show that the Sophomores are real sports they want to pass on this remark: "May the best team win."

For the benefit of the Freshmen and Sophomores who plan to participate in the events on that great day, listed below are the sports, their coaches, and practice times and place.

Freshmen:

Field Hockey: Coach--500 Maple. Practice will be given.

Track: See Oscar Leedlun at any time. Practice--Tuesdays, Thursdays.

Softball: Practice will be given. (Note: for those who plan to compete this year)

The Freshmen are urged to attend the 1949 renewal of the Army v. Navy game at Briggs Field. This year's game was an exciting one.
