THE OFFICIAL NEWSPAPER OF THE M.I.T. UNDERGRADUATES

Ninety Burton Freshmen Eat At Graduate House To Remove Baker Congestion

Provisions for ninety students to take common meals in the Baker House have been completed, Dean Bowlden has announced. However, the overcrowded conditions of the Baker House will not have been corrected until the new residents have moved in. Some students who made this shift yesterday are those freshmen living at Walker House, who have been temporarily housed at the Baker during the early part of the year.

College Leaders In Combined Plan Will Convene Here

Representatives of the fifteen colleges participating in "combined plan" for professional education will attend a conference here at the Institute tomorrow, Thursday, and Friday. The theme of the conference will be "Professional Education and the Whole Man" and discussion will center around the mutual problems of the Institution and liberal arts schools taking part in the plan.

Dr. Compton Will Be The Guest Of Honor At Stein Club Dinner

Dean T. C. Compton, Chairman of the Corporation of the Institute, will be the guest of honor at a dinner tonight at the Stein Club in Baker. Feature of the dinner will be the presentation to Dr. Compton of a large, framed photograph which he has been working on for all the students of the Baker House. The Eugene A. Bachle Photograph Society may conduct a campaign for funds to present an automobile to Dr. Compton.

5'50s Offer Travel News, Intellectual Companionship

At Tech, a large freshman class has been organized, and the seniors hold it in high regard. With the advent of a large class, the freshmen are looked upon as potential leaders in the future. This class has been selected for leadership because of the vast number of potential leaders in the school. The seniors are looking forward to the freshmen assuming the leadership role.

Dean Burchard Is Aide For Australian National Library

Dean John Burchard, head of the School of Humanities, is in Australia at the request of the Australian government. A new National Library is being built in Canberra, and Mr. Burchard has been appointed to the post of librarian. He is expected to arrive in Canberra shortly.

Mad Female Ends Frosh Rally

Field Day rallies got off with a bang last Thursday when the freshmen held their first in room 6-109. At 10:00 a.m. "53, and "54, "54, "55, and "56, were in charge of the rally, and started the ball rolling about 11:30 p.m. Not more than African colors and songs, however, keep the air of the rally. But the rally did not last long, and the freshmen were soon in the thick of the fray.

House ELECTIONS

Elections for House Committee members are being held today in the individual Houses. A representative from each unit of Burton House, two from each of Baker and Widener, and one from each of East Campus and West Campus will be chosen.

The elections are being held as a part of the series of Dormitory Committee elections at 10:00 a.m. and ends at 9:00 p.m. today.

'55 Coeds Offer Travel News, Intellectual Companionship

by ANN HALPIN '53

With the advent of autumn, colleges and universities all over the country are welcoming incoming freshmen, and are introducing them to higher education. M.I.T., like other halls of residence, has opened its doors to aspiring engineers, chemists and the like included in the class of '55 are fourteen co-eds.

Surprisingly enough, girls on this floor are not all classed as "Typical Tech co-eds." While above average in intelligence, they are all very good looking, have well rounded personalities, and have diversified interests and hobbies. Not as many are anti-alcohol, anti-smokers, anti-drinkers. Among the girls are school stars, nurses, and artists. And one has even been said to be "good looking, have well rounded personalities, and have diversified interests and hobbies." Among the girls are school stars, nurses, and artists. And one has even been said to be "good looking, have well rounded personalities, and have diversified interests and hobbies.

In the midst of many members of the class, one will notice a girl from California to Massachusetts, from Florida and Georgia to New York, from New York to Virginia, from Tennessee to Alabama, from Atlanta, to Tampa, and from any other point in any other direction should you wish to visit the dormitory or dormitory.

Travel notices will be posted in Building 10.

Courses of study are varied, ranging from nuclear physics to architecture, from electrical engineering to math. At the moment, the mathematics course is being offered to the freshmen. Some of the other classes offered include: architecture, art, and math. This year's freshman co-eds have been offered a wide variety of classes to choose from.

Stephan Carney Goldberg and Abraham E. Steir, Jr., New York, and the students of M.I.T., among the alumni, the faculty and staff, should make a good teacher. He will draw his assisting knowledge of modern industrial management and manufacturing procedures, but what is in actual importance, a basic understanding of the relationships of a human being within the organization of the new school along lines which will be more effective in training young engineers for careers in business and industry."

INSTITUTE GRADUATE

Mr. Brooks, Class of '53, was a member of the first class to be graduated by the Department of Business and Engineering Administration "after thirty years, he has returned to help in its expansion and development. Having served as a temporary employee of the corporation from 1949 to 1950, he is thoroughly familiar with the educational and extracurricular objectives of Technology."

Mr. Brooks will not rush into the organization of the new management school but much and act little this term so as to obtain the most comprehensive plan that can be done. He will draw his assistant staff from the wealth of talent and experience available on the M.I.T. faculty, from the alumni, and from industry.

Mr. Brooks' long and rich experience in manufacturing and production qualifies him to organize the curriculum of the new school along lines which will be more effective in training young engineers for careers in business and industry.

IN INDUSTRY AND PUBLIC LIFE

After holding positions with a number of companies, Mr. Brooks joined the staff of Shaw, Rockefeller Co. in 1979, where, until he left to come to the Institute, he served in various positions, among them general factory manager, vice-president in charge of factories, and then in 1941 member of the board of directors. Mr. Brooks is also a member of the board of the Erie Railroad Co.

During World War II, Mr. Brooks, serving as first lieutenant in the United States Army, was awarded the Distinguished Service Cross. During the last war, he organized the Committee on Equipment and Materials of the National Research and Development Board, of which he himself was chairman.

Breaks at the Institute

Mr. Brooks' interest and ability in the field of business and management was evident even while he was a student at the Institute. As a freshman, his first thesis was entitled "The Administration of a Tobacco Factory." Later he organized the Committee for Undergraduate Dining, a group which obtained financial support for undergraduate activities. Previously each organization was forced to spend most of its time attempting to finance its own projects. With permission, the Committee for Undergraduate Dining collected funds from each student, parceled out with tuition. When tuition was raised later, this fee, along with some others, was incorporated into the increased costs.

Mr. Brooks considers the Institute a much more "human" institution now, as compared to his undergraduate years when all but a few students came here only for an academic purpose. The change he attributes to the greater emphasis now placed on the human and extracurricular activities—sports, societies, organizations. "There were recreational facilities available then, but only a few really realized their value. The administration, though not inhabiting did not emphasize the importance of extracurricular activities," he added.

The Sloan Foundation. In announcing the opening of the new management school, he attributes to the greater emphasis now placed on the human and extracurricular activities—sports, societies, organizations. "There were recreational facilities available then, but only a few really realized their value. The administration, though not inhabiting did not emphasize the importance of extracurricular activities," he added.

Sophomore Football Squad Organizes For Field Day

As field day is rapidly approaching, the big problem confronting Coach Howard Anderson of the Sophomore football team is lack of depth. The squad is entering its second week of practice in preparation for the contest to be held on October 27, as a feature event in the 51st annual Field Day celebration.

The 24-man squad is sparked by the co-captains of last year's freshman squad, fullback Rich Wilson and halfback Bob White, and by holdovers Jerry Golden, "Jarring Jack" Orglanizes For Field Day from 4-6 in the afternoon with halfback John Likely, and John Jackson.

Practice
Practice is being held every week day from 4-6 in the afternoon with two games scheduled as warm-up encounters. On Saturday, October 13, the Sophomores play Lawrence Academy at Briggs Field and a week later tangle with Tabor Academy at their own grounds.

An enormous, yet justified, warning was given by Athletic Director Ivan J. Geiger when he suggested that Field Day football would be called off unless the class of '54 can send more men out to practice regularly especially since it has been reported that the freshman squad numbers close to 45 men.

Practice
There is no question that the Sophomores must rally to the challenge and increase its representation on the football field. All able-bodied Sophomores interested in upholding the honor of their class should contact Howard Anderson at Circle 7-7717 as soon as possible. A sit-down meeting will be held here at Tech on Monday, October 15.

THE TECH

Engineer Sailors Get Under Way; Take 2nd In Coast Guard Regatta

The New England Intercollegiate Sailing Association regattas have gotten under way this season with Tech meeting Boston College, Coast Guard, and Harvard, at Coast Guard.

Last year the Engineer sailors came out on top in this event. Last Sunday, however, Harvard took first, Tech 2nd, Coast Guard 3rd, and B.C. 4th. This year a virtually new crew of engineers will carry Tech's hopes due to the departure of Bob Nickerson and Howie Fawcett. Bob Woods, Tech's only veteran skipper is the new captain.

Other skippers this season will be Ed Medalia, John McDonnell, and Justin Kerwin.

Water Polo Start Set For Oct. 2

For the first time in quite a few years, a new sport will be introduced here at Tech. Some swimmers, feeling that plain competitive swimming did not offer enough thrills and excitement, have been instrumental in trying to form a water polo team.

Water polo is played by two opposing teams each having a goal at the ends of the pool. The object of the game is to pass or swim with a ball and place it within the opponents goal.

All those interested in forming a team are urged to attend a water polo rally to be held on Tuesday, October 2, in Room 5-204.

For the first time in quite a few years, a new sport will be introduced here at Tech. Some swimmers, feeling that plain competitive swimming did not offer enough thrills and excitement, have been instrumental in trying to form a water polo team.

Technique Announces 1952 Senior Portraits

These will be taken during October. Make your appointments now in Lobby of Building 10.

Photography by Lincoln Studio, Malden. A sitting fee of $3.00 will be collected to cover initial work and to insure the inclusion of your picture in TECHNIQUE.

The entire $3.00 will be credited to your purchase of finished personal portraits. These are available in a variety of sizes at prices starting at $10/dozen and some special package offers.

A complete set of samples including special combinations is on display in Building 10.
Frosh Rally (Continued from Page 1) official appearance.

When it comes to more concrete plans for Field Day, the Sophomores seem to be behind schedule. So far, only two have shown up for crew, and not many more for football. The freshmen, on the other hand, are well along in practice. Is this Field Day going to be another rout by the freshmen?
