SCARBARD AND BLADE MILITARY DRESS

Many people who attended the Scarboard and Blade Military Dues, held last Friday evening in Mims Hall, have hailed the military formal as one of the best dances held on the campus this year. This is not surprising, for the entire student population turned out to witness the grand celebration of the Civil Engineering Department.

The formal was held in the main room of the department, where the Scarboard and Blade Society has its headquarters. The room was decorated with flowers and streamers, and the air was filled with the sounds of music and conversation.

A conference room was used primarily by the Civil Engineering Department for meetings and social gatherings. The Civil Engineering Department has been dedicated to the development of new technologies and methods for the betterment of society.

Tour Of Europe's Industries Planned For Course Fifteen

The Eighth Industrial Tour of Europe sponsored by Course XV will have the following itinerary: England—13 days, Norway—3 days, Sweden—8 days, Denmark—3 days, Germany—4 days, Holland—3 days, Switzerland—2 days, and France—13 days, making a total of 60 days abroad.

Tour of Europe's Industries Planned For Course Fifteen

The Eighth Industrial Tour of Europe sponsored by Course XV will have the following itinerary: England—13 days, Norway—3 days, Sweden—8 days, Denmark—3 days, Germany—4 days, Holland—3 days, Switzerland—2 days, and France—13 days, making a total of 60 days abroad.

The group of approximately sixty students will sail on June 6th. The return trip will be made in August by plane or by boat. Tentative plans call for the use of two station wagons for European transportation.

Trety Plant Visits

Over thirty industrial plants will be visited including plants in the food, chemical, petroleum, metalworking, mining, machinery, and automotive industries. Tours are being arranged with such plants as Alcoa, General Motors, Union Carbide, and Ford.

Dr. B. E. Proctor Affirmed Head Of Course XX

Dr. Barron B. Proctor has been appointed Head of the Department of Food Technology at the Institute by Dr. George R. Harrison, Dean of the Graduate School. Proctor is a Professor of Food Technology and Director of the Chemical Laboratories of Food Technology, having been Head of the department since January 1953.

Proctor has done valuable research in food preservation, food technology, and microbiology, and is a member of the Institute of Food Technologists. He became a member and was a founding member, and is a member of the U. S. Public Health Service.

Chandler's Girls Rate Techmen Socially-
State Suggestions For Future

By GEORGE A. BARTOLONI

With this issue, THE TECH'S "Roving Reporter" begins the first in a series of articles on the various girls' schools in the Boston area. The Chandler School, whose campus is located near the corner of Beacon Street and Boylston Street, is the first school to be featured.

The Chandler School is well known for its academic excellence and its beautiful campus. It is located in a residential area, which provides a quiet and peaceful environment for its students.

One of the most notable features of the Chandler School is its athletics program. The school has a long tradition of success in various sports, including basketball, tennis, and track.

In addition to its athletic achievements, the Chandler School is also recognized for its rigorous academic curriculum. The school provides a challenging education to its students, preparing them for success at the college level.

The Chandler School is also known for its committed faculty. The teachers at Chandler are passionate about their work and dedicated to the success of their students.

The Chandler School's location near downtown Boston provides students with easy access to a wide range of cultural and entertainment options. The city's museums, theaters, and restaurants are all within a short distance.

Overall, the Chandler School offers a unique and enriching educational experience for its students. It is a place where students are challenged and supported to reach their full potential.
Brahms’s Requiem
To Be Performed
By Choral Society

On Wednesday, April 23 at 8:30 p.m., the M.I.T. Choral Society, under the direction of Klaus Liepmann, will perform Brahms’ German Requiem in Sanders Theatre, Cambridge. Soloists will be Helen Boushnight, soprano, and Paul Markovitch, baritone. The chamber orchestra will consist of forty members of the Boston Symphony including the Tanglewood Shadetown. Tickets for this performance, at $1.50, are available at Briggs & Briggs, Harvard Square, or by mail order from Room 14-M206. Checks should be made out to the M.I.T. Choral Society.

Brahms gave his work the title A German Requiem to distinguish it from the liturgical Mass for the dead. Unlike liturgical compositions, Brahms’ Requiem offers up no prayer for the dead, and its text, which Brahms selected from the Bible, is sung in German (or English, as the present performance rather than in Latin.

---

Third Movement Poorly Received

The first public hearing of any part of the Requiem occurred December 1, 1867, when the first three movements were performed at a concert of the Gesellschaft der Musikfreunde in Vienna. The second two movements were poorly received, the third was followed by a burst of hissing, due partly to an overheated orchestra drummer who lost control over the orchestra and chorus.

what had been done to his announcement went the student one better, and promptly called the "I combine..."

The theory of limits often requires intuitive explanation. The following is a simplified version of such an explanation. Just imagine that you and a beautiful girl are sitting on a couch; you on one end and she on the other, "Move a little closer," says the beautiful young thing. You comply by moving half way across the couch. Again she asks you to move closer and again you decrease the distance by one half. If this system continues you will theoretically never reach the set but for all practical purposes you will soon be close enough.

Fellowship From Ford Foundation For Furthering Foreign Fellowship

Gordon Gray, Chairman of the Ford Foundation Board on Overseas Training and Research, recently announced the establishment of a new fellowship program designed to stimulate greater understanding about Asia and the Near and Middle East. The funds appropriated for this program are adequate to provide 100 fellowships of various kinds during the next academic year.

The program has a threefold purpose. It is intended to aid young American citizens who will ordinarily become the teachers and leaders of the peoples of these areas and who will thereby increase the number of competent Americans who have achieved sympathetic insight into the cultures, histories, institutions, aspirations, and current problems of peoples and governments of vital regions of the world. The conditions of the fellowships are: "1) Candidates must be United States citizens who will ordinarily not have reached their 30th birthday, Subject to this general age limitation, fellowships are available to candidates of any age; 2) Awards will be made for periods of from one to three years, and in amounts that will be determined by reference to the applicant's academic qualifications and experience, and the program for his individual training and research."

Passover "Seder" To Be Presented Tomorrow By Hillel

Tomorrow night, at six-thirty, the M.I.T. Hillel Foundation will hold its annual Passover "Seder." The celebration of Passover commemorates the freeing of the Israelites from slavery under the Pharaohs of ancient Egypt. The Passover religious service is more a story of this event than anything else. The seder is unfolded through songs, chants and blessings in which the entire congregation takes part. Through a series of questions and answers, the story of the tale of Joseph into slavery in the land of Egypt, and the subsequent delivery of the Israelites from Egypt under the leadership of Moses into the land of Canaan, Passover, known in Hebrew as Pesach, recalls the last night in Egypt and the hour of deliverance.

The best known food of the Passover is the unleavened bread, matzoh. Matzoh is the bread eaten by the Jews on their forty-year trip across the desert after fleeing from ancient Egypt. During the eight days of Pesach, Jewish people are forbidden to eat any leavened bread, and all foods eaten during that time are supposed to be new and specially prepared for Passover.

This Wednesday night in the Hillel Lounge, Rex Harrison, the British actor who recently turned down the role of Rhett in Gone With the Wind, will lead the service which comes to an end with the breaking of the matzoh and the liberation of the Passover from the bondage of slavering Egypt. Tech Cindermen Deep In All Track Events;
Season 2 Weeks Away

By Bob Burditt

With the first meet of the outdoor season, a trianglet meet between North, Bowdoin and Vermont at Brunswick, Maine, less than two weeks off, to enable big names to compete in the main in the Technology track squad. Included in the outdoor schedule are two meets, Northeastern and New Hampshire, which topped the Beaver squad during the indoor season.

Oscar Hedlund's runners are fairly deep in all the track events and should do well in both the javelin and the pole vault. This year's captain and three-time experience.

New England champion, Ed Olney, large group of quarter-milers. In the event.

The weakest points in the field are not deep in any event. In both the pole vault, although the Engineers have the strongest contenders for the Freshman squad last year. The Beavers lost one of the most capable hurdlers. Captain Ken Childs and Mike Alexander, all except the hurdles. Captain Ken Nicholson, George Grenier, and transfer student, along with Russ Chihoski, Bill Sepp has not come out, which cuts quite a few seconds and thirds in the broad jump. Ben Coe, former Bowdoin last year. During the indoor season he was second to Vickers in the New England two-mile last year, after running the half mile, 1500, 3000 and 5000 in a single race. In the broad jump, Jack Price's record of 6.22 is the best seen in the group.

New England in the javelin and the pole vault. Experience is again the key factor. The Beavers have had a remarkably promising pole vaulters in New England when Freshman record holder Budge Thomas turned to last fall return. Graduation cleaned out the vacuum for pole vaulters, and the freshman team backed strength in the event.

New England champion, Ed Olney, large group of quarter-milers. In the event.

In the broad jump, Jack Price's record of 6.22 is the best seen in the group.
**Calendar of Events (Continued from Page 2)**

An exhibition entitled RENAISSANCE is now on display in the New Gallery, Charles Hayden Memorial Library, Mondays through Fridays, 10:00 a.m. - 5:00 p.m., through April 26. An exhibition of the work of Morris Rosenfeld, marine photographer, is being shown in the Lobby of Building 1, through April 26.

Photographic slides printed by Mr. J. F. Wahlman of Chicago, III., and on display in the Photographic Service Gallery, Basement of Building 21, through April 9.

Photographic slides printed by Mr. and Mrs. L. Whitney Standish of Boston, are being exhibited in the Photographic Service Gallery, Basement of Building 11, from April 10 through April 25.

**CALENDAR OF EVENTS**

The Calendar of Events appears in THE TECH on Tuesdays with comprehensive statement of the application forms proposed place of work and study, including his purposes, the institution or group with which he hopes to be associated, his travel requirements, and similar information. To this statement should be attached an estimate of the funds required to undertake his project.

(3) In a limited number of exceptional cases the Foundation will not consider the immediate family of the applicant to accompany him.

(4) Application forms may be obtained from the Board on Overseas Training and Research. The Ford Foundation, 975 Madison Avenue, New York 28, New York. Applications must be completed and returned on or before May 15, 1952. The awards will be announced on or before July 15, 1952.
