First DeMolay College Chapter Established Here at Institute

The world's first university chapter of the Order of DeMolay has been instituted at the Institute.

The "Tech" Chapter, which becomes the only one in the world, is not geographically limited, draws from members at 29 States and includes past Master Masons of its membership.

Appropriately enough, the new Chapter is sponsored by the first University lodge of the Masonic Order, the Richard C. Macfarlin "Pand Lodge, which was instituted at the Institute in 1928.

Installation of officers for this historic chapter was held December 17 at the Cambridge Masonic Temple on Massachusetts Ave., in Porter Square. The installation was held jointly for both the "Tech" chapter and the University Masonic lodge.

Smith Master Counselor

Master Counselor of the "Tech" Chapter is Donald P. Smith, '56, of Saginaw, Michigan. He is a son of Mr. and Mrs. Harold Smith of his home chapter in Michigan. The other members of the Masonic Lodge are: Past Masters of their home chapter are, Philip R. Frost, '56, Junior Counselor, of Bridgeport, Connecticut, and Robert W. McMath, '55, Junior Counselor, of Santa Barbara, New York.

Offers from Massachusetts to be included in the charter are James H. Wall, Treasurer, of Brockton, John W. Blake, Almoner, of Quincy, and George W. Newton, Jr., Third Preceptor, of Concord.

E.D.P. Offers New Courses For Men Now In Industry

The long established Executive Development Program of the Institute, one of the nation's leading centers of study in industrial management at the Institute will be substantially expanded in 1953-54.

Dean E. P. Brooks of the M.I.T. School of Industrial Management last night announced plans for the 1953-54 program and for the Fall School which will be attended by its members. The Fellowship, he said, will be given to young industrial executives who have already demonstrated their ability to grow into senior management responsibilities and who are winners of opportunities for constructive leadership in their companies.

Competitions Bill Open

A competition, open only to graduates, fell due to the President, under a grant of funds from the Allen E. Shaw Foundation, Inc., will close February 21, 1953.

The 'year's bill in the Educational Development Program is devoted to fundamental problems of business enterprise. Despite their years of successful activity in special phases of industry, most young executives lack the task of familiarity with the wide front of economic issues foreign to their own experience. Professors of the various courses, he said, would be encouraged to open their programs to the companies. "They need to," he adds, "a sense of the overall relationships between seemingly unrelated activities, as in such areas as advertising and engineering."

The Calendar of Events appears in The Tech on Tuesday with the following week. Notices, typewritten and mailed under the Postal Act of March 31, 1879.
C'article Students Drinking Habits
Subject of Yale Investigation

Robert Sticca, research associate at Yale University's Laboratory of
applied Physiology has released pre-
liminary results of a few years study
into the drinking habits of the stu-
dents of American Universities and
colleges. He declared, "We hope the
study will help create a better under-
standing of student behavior on the
part of persons affected by such
activities, such as residents of the
college town, alumni, and parents."

The Yale survey covered 27 in-
stitutions of learning throughout the
country. Seventeen thousand students
were questioned as to their drinking
habits and their attitudes toward
drinking. Mr. Sticca found that the
probability of a college student at-
tacking the bottle with any undue
vigor depends greatly upon the
drinking practices of his parents.
Ninety per cent of the men and 89
percent of the women whose parents
drink are themselves imbros, whereas
only half of the men and a fifth of
the women whose parents abstain
do themselves drink. Of all the women
who drink, 45 per cent of them began
before they entered college.

Among college men beer was
proven to be the most frequently
used beverage. Seventy per cent of
those interviewed stated that the malt
beverage was that toward which they
took first place for Technology in this
event. Langendorf took second and third
place in the 200 yard free style when
record at one win and two defeats.

The diving event was spectacular
to see. Cryer, with only six weeks ex-
perience has attained a record of two
seconds above M.I.T. record.

Both teams went afloat at the Harvard
dock and Langendorf took second and third
place, respectively.

Time 1:52.3. 1st. Roberts, Goldman, Bader, Hamlet,
1:33.9. Bogan (back stroke);
(M.I.T.) 2nd. Winning points, 41.70.

straining is under way or being planned for the next few years. American educational leaders are particularly distressed at the financial plight of the colleges and universities. They see a strengthening of demands on the financial aid provided by the government and they believe that democracy needs the leadership found in higher education today more than ever. It is only with the continued help and support of the American people that this system of higher education will remain steady.

E. D. P. Courses
(Continued from Page 1)
ship of government and industry, domestic and international economies, and sociological developments.
Participation in the Executive Development Program is limited to recipients of Sloan Fellowships. Nomination by an employer is a prerequisite, since employers cooperate in the program by sponsoring these men and by providing successful candidates with a year's leave of absence and financial aid. Fellowships are drawn from both large and small companies in various types of industry. Candidates selected by The Institute. Candidates must be between the ages of 30 and 35 and they should have at least five to ten years of industrial experience, with part of this experience in a managerial capacity. Fellowship winners will be selected on a competitive basis by The Institute, after consideration of the applicants' records and references and after consultation with their employers.
Awards range up to $3,860 for married men. Fellowships will be in residence at the Institute in Cambridge from June 1953 to June 1954.
Begun in 1931 within the M.I.T. Department of Business and Engineering Administration, the Executive Development Program now has the increased resources and facilities for management education provided by the new School of Industrial Management. In this environment and with the increase by the Sloan Foundation, the funds available for the program, the Executive Development Program will in 1953-54 serve two groups of 15 to 18 fellowship recipients.

A Word of Caution
The work in the Executive Development Program is built upon a series of seminars dealing with theoretical problems of management, economics, governmental relations, and social and political implications. The general resources of the School of Industrial Management are supplemented by those of the Department of Economics and Social Sciences. In addition, a distinguished group of industrial, governmental, and labor leaders meet with the Sloan Fellows or receive them on field trips covering many different types of industrial operations.
In large part, the members of the Executive Development Program as a group follow identical courses of study; but there is also time for elective subjects to meet special interests within the group, to serve areas in which certain fellows develop a certain curiosity and to more effectively adjust to strengths and weaknesses of individual members.
Leads to Master's Degree
The program may be arranged to meet the requirements of the degree of Master of Science in Industrial Management with the addition of an individual study of a specific management problem and its presentation as a thesis.
Complete information on the Executive Development Program and application blanks for Sloan Fellowships may be obtained from the Director of the Executive Development Program, M.I.T. School of Industrial Management, 50 Memorial Drive, Cambridge 39, Massachusetts.

ARE YOU TOUGH ENOUGH FOR THIS JOB?

If you can make the grade, the U.S. Air Force will award you a commission, your wings and pay you over $5,000 a year!

CAN YOU "take it" 6 days a week? For 52 weeks? Can you meet the high standards required to be an Aviation Cadet? If you can — then here's a man-size opportunity! An opportunity to serve your country and build a personal career that will fit you for responsible positions both in military and commercial aviation.

It won't be easy! Training discipline for Aviation Cadets is rigid. You'll work hard, study hard, play hard — especially for the first few weeks. But when it's over, you'll be a pro — with a career ahead of you that will take you as far as you want to go. You graduate as a 2nd Lieutenant in the Air Force, with pay of $5,300.00 a year. And this is only the beginning — your opportunities for advancement are unlimited.

ARE YOU ELIGIBLE?
To qualify as an Aviation Cadet, you must have completed at least two years of college. This is a minimum requirement — it's best if you stay in school and graduate. In addition, you must be between 19 and 26 years of age, unmarried, and in good physical condition.

YOU CAN CHOOSE BETWEEN PILOT OR AIRCRAFT OBSERVER
If you choose to be an Aircraft Observer, your training will be in Navigation, Bombardment, Radar Operation or Aircraft Performance Engineering.

New Aviation Cadet Training Classes Begin Each Few Weeks!
HERE'S WHAT TO DO:
1. Take a transcript of your college credits and a copy of your birth certificate to your nearest Air Force Base or Recruiting Station. Fill out the application they give you.
2. If application is accepted, the Air Force will arrange for you to take a physical examination.
3. Next, you will be given a written and manual aptitude test.
4. If you pass your physical and other tests, you will be scheduled for an Aviation Cadet Training Class. The Selective Service Act allows you a four-month deferment while waiting class assignment.

Where to get more details: Visit your nearest Air Force Base or Air Force Recruiting Office.
OR WRITE TO: AVIATION CADET HEADQUARTERS, U. S. AIR FORCE, WASHINGTON 25, D. C.
