A reduction of classroom hours by twenty per cent, a choice of elective subjects, a revised athletic program, and a departure from the Freshman Program is an introductory plan for the new Freshman Program to be scheduled for next fall. The new program is the result of a continuous study by representatives of the faculty in accordance with the general recommendations of The Committee on Educational Survey.

Revised Freshman Program Approved By Faculty Committee; Academic Requirements Eased

F.S.S.P. Acclaimed In Spite Of U.S. Foreign Policy

The Institute's Foreign Student Summer Project, now entering its fourth year of successful operation, this year the only light amid the blackness of American Foreign Policy and Ted- douglas, an associate professor in the United States Congress. Mr. Douglas is also former vice-president and member of the Board of the American Cyanamid Company of New York.

He has been a member of the Institute's Governing Board, the United States Congress, the United States Senate, the United States House of Representatives, the United States Supreme Court, and the United States Supreme Court of Appeals.

But his interest in the Institute's Governing Board has been carried over into his work as a member of the United States Congress.

In an effort to extend his knowledge of the United States Government, he has taken a number of courses in the United States Congress, the United States Senate, the United States House of Representatives, the United States Supreme Court, and the United States Supreme Court of Appeals.

Under the new "Freshman Program" a choice of the term in which to carry the Summer Project, enable two suit- ships, made available by the Institute for the purpose of the term, in which to carry the Summer Project, enable two suit- ships, made available by the Institute for the purpose of the term, in which to carry the Summer Project, enable two suit- ships, made available by the Institute for the purpose of the term, in which to carry the Summer Project, enable two suit-

student flying time on the Air Force B-29. A week later, after some discussion and debating at the Aeronautical Congress of the Institute.

The Air Force Sciences Department sponsored an air science competition at the Institute, the Air Force would be allowed to fly a plane. This exciting competition was held for the purpose of finding the best student flying time on the Air Force B-29. A week later, after some discussion and debating at the Aeronautical Congress of the Institute.

THE 64 DOLLAR QUESTION

The presence of members of the Communist Party on college campuses poses an important problem which, at present, is facing a major threat to our concept of "academic freedom." There are those who believe that all communists should be expelled from institutions of higher learning. The basic premise for such an assertion is, perhaps, that, as members of an authoritarian organization, communists are not free to "follow the truth wherever it may lead," and are thus unfit to teach. The declaration of the American Association of UniversitlES, one month ago, seems to follow this line of reasoning. "Membership in the Communist Party," states the A.A.U., "extinguishes the right to university position." This stand seems to be a rejection of the very concept of academic freedom that the Association is attempting to proclaim.

The sole basis upon which we determine those men who should be allowed to teach should be their ability to teach and their classroom competence. And the responsibility for judging those members appointed to college faculties lies with the educational institution and its administrators. To allow any standards of judgment other than those applicable to all citizens and scholars is to essentially undermine the democratic processes of academic freedom. We must recognize the rights of any teacher to inculcate among students the ideas of his own choosing. (Membership in the Communist Party) states the A.A.U., "extinguishes the right to university position." This stand seems to us to be a rejection of the very concept of academic freedom that the Association is attempting to proclaim.

To operate on the premise that all communists adhere completely to party policies is to subscribe to the same logic that I subscribe to the same logic that I have just described less I was certain he was teaching Communism or having some adverse effects on students, and the college should rightly dismiss those members who have clearly found the truth while still associated with their party — for the finding necessarily preceded their conviction.

Editor's Note: Mr. Boylan has fully explained his stand on the issue at hand for our editorial. His own conclusions may have been motivated by an emotional reaction to the facts of the situation. It is our opinion, however, that the acumen of many of the members of Committee on Un-American Activities is limited to the very letter out of which Mr. Boylan expresses "deep hatred." Safeguarding the沸腾 which could not have been aroused by the testimonies of the professors in question for they were not familiar with these testimonies. We fail to see how any competent member of a representative body can pass resolutions on matters in which he is uninformed.

College League Plans
June All-Star Game: Engineers Near Top

An All-Star game between teams of the Greater Boston Collegiate Baseball League and the New York Metropolitan Senior Baseball League will be held Thursday evening, June 4, at Frayer Park. Confirmation of the game was made by Ivan Geiger of M.I.T., President of the C.B.C.L., and Boston Official League President of the Metropolitan Senior League.

The second annual Eastern Colleget Athletic Conference rules, only similar double-play teams eligible to play on the bases. However, the C.B.C.L. has asked

"To become necessary to consider the immediate construction of a building to house The Coop and the other areas which serve the quadrangle and the north area at the northern end of Brown's Plaza was chosen as the site for this building. Although exploration plots had allocated this space for another new gymnasium and field house to be built in the future, the decision was made that, if the proper portion of the site could be purchased by the Institute, minor additional facilities, such as lockers, a wrestling room, and a relay room, could be built between the proposed sports black and the Coop."

"Because the security of the site involves the use of this property for a parking lot, we feel that a mother of the proceedings were advanced to the City Council. The sale of the site would be built above the stores. Among the proposals were a new athletic home to replace Dudley Hall, the home of the Institute administration, and a student center to house THE TECH, V.C.A., and other student activities.

"The location of this site is ideal for a student center. In the development plan of the Institute the area to the east of Massachusetts Avenue is to be used for academic facilities and for graduate student housing. The area to the west of the area that will become the center of undergraduate life. Here more dormitories will be housed to the students who must live in East Campus. Land is to be available to the University for more than one use.

"We are prepared to recommend to the University that the site be considered as the setting of the academic community, and could be the focus of activity for the student body."

"The duration of each of the above undergraduate curricula is four academic years and leads to the Bachelor's degree, with the following exceptions: (1) Undergraduate work in Physics, and the degree of Bachelor of Science; (2) Chemical Biology, Food Technology, Physics, Physical Biology, and the Cooperative Program in Engineering, and the degree of Bachelor of Science; (3) Science Teaching, which is a five-year program and leads to the degree of Bachelor of Science from the Massachusetts Institute of Technology and the degree of Bachelor of Education from Harvard University. Graduates of the School of Science are eligible for the degree of Bachelor of Science in any of the above fields. The curriculum of the School of Science is designed to provide a firm foundation in the basic sciences and to give the student an opportunity to specialize.

For information about admission, consult the Director of Admissions. The Catalogue for the academic year will be sent on request.
Lowell Institute Plans Graduation Setting At M.I.T.

The forty-sixth graduation exercises of the Lowell Institute School will be held at the Institute on Thursday, May 21, at 3:15 p.m.

Mr. Lowell E. Rudney, Vice-President in charge of production for the New England Consulting Company and factory manager of the Cushing plant, will deliver the principal address. Certificates will be awarded by Dr. Ralph Lowell, President of the Boston Safe Deposit and Trust Company and sole trustee of the Lowell Institute School.

One of the highlights of the program will be the eighth presentation of the Charles Francis Park Medal, which bears the name of the first president of the Lowell Institute School.

of the Charles Francis Park Medal, which bears the name of the first president of the Lowell Institute School.

Admiral Edward L. Conkree, Dean of Engineering at M.I.T., under whom auspices the Lowell Institute School operates, will bring the greetings of President James R. Killian, Jr., and the M.I.T. Corporation to the graduates.

Professor Arthur L. Townsend, the M.I.T. Corporation to the graduates, will bring the greetings of President James R. Killian, Jr., and the M.I.T. Corporation to the graduates.

college's standards of intellectual honesty and accuracy in accordance with the standards of outside bodies such as other agencies.

Should a teacher be free to speak, write, or join organizations outside the campus as he wishes, as long as he remains within the law?

Should a teacher be dismissed, suspended, or maintained for refusal to sign a loyalty oath, membership in communist party, refusal to give testimony before a Congressional Committee?

Universal Military Training: Would you prefer UMT to the present service?

If the answer to # 4 is yes, should UMT be established with only modest exceptions, college student deferment, deferment of other groups. At what age or period should UMT start?

I am dissatisfied with the Selective Service, but would prefer the following aid in the system over UMT (state revisions)

What should be the minimum and maximum age for Selective Service?

Negro in Education: Which of the following do you approve of: Segregated but not necessarily equal in facilities, segregated and not necessarily equal in education?

Should students government demand that fraternal organizations drop restrictive membership clauses?

The student opinion poll, according to the results of the National Yearly student report, which establishes a national opinion on the part of the Association.
