I. Industrial History Study By Morison

Exploration in industrial history is experiencing a significant wave of technological changes which will soon be undertaken at the School of Humanities and Social Studies. Professor Schell has been appointed to study the institutional problems of industrial management and will hold a position under the direction of Professor John R. Commons, who was recently appointed as associate professor of industrial management.

II. Freshman Elects New Managing Board

Under the auspices of the Lectureship Committee, Captain Jacques Cousteau has been selected as the new president of the Marine Corps. Cousteau, a former oceanographer, will serve in his new capacity for the upcoming Congress at San Juan, Puerto Rico.

III. Beaver Wrestlers Take 3rd Victory As Williams Bows

The Beaver wrestling team took their third victory of the season against the Engineers, winning 8-0. Jack Graef '54, the team's captain, was honored for his efforts.

IV. Freshmen Lose Only 5.2% Of Class For Record Low

Forty-nine freshmen, comprising 5.2 percent of the class of 1956, failed to meet the required standards for admission. This compares favorably with the records of last year's freshmen, who lost 8 percent of their class.

V. Work of the Student-Faculty Committee

The Student-Faculty Committee has been busy making improvements in various parts of the campus. One of their projects is the installation of new lighting facilities to improve visibility in the lecture halls.

VI. New Blood Donor System Developed

The demonstration of Dr. Elke Z. Schell, medical director of the hospital, was described in last Friday's THE TECH. The new system will be its first public showing.

VII. Job News Will Be Carried Each Week

The TECH will continue its policy of publishing the schedule of available positions which will be of interest to students and faculty.

VIII. WMIT Elects New Managing Board

At a meeting of the WMIT Board of Trustees, Robert D. Strickland '55 was elected as the new managing director of WMIT. Strickland replaces William H. Kochevar '54, who resigned from his position due to his duties as a student.
TREMORS BY BAIRO

To the unequilibrated, the clump of time cans on the Institute's marble floors during the past week was not due to construction of another research lab. Similar shenanigans by speech makers in sandly saloon in Boston and in front of the Old Howard were results of the same thing. The wavy design of bows of string along a rail probably would be considered the same source.

Many people must have been amused by the heat generated at the expense of the pledges to fraternity, involved in these situations. That is a recognized form of humor (laughing at the expense of another) but some people do not laugh; they only smile. In this case it was at the expense of fraternity, but just the fraternity or fraternities represented by the pledges. These fraternities probably would regard the restriction of conversational activity to the admission of particular walls as an infringement of their rights.

They would claim that the pledges had the right to fill all those requirements and that the strictness in wide-open spaces was one of the requirements. It seems legitimate and right that fraternity should set its own eligibility rules, yet other fraternities should see such activity outside their houses as completely unnecessary. The only open spaces those other houses use are the lecture halls and the recitation rooms which the pledges must stand according to their schedules. This just gives the instructors the added job of coping with students who sleep before, during and after class. This is counterbalanced by the number of pledges making unannounced stops at the dorm room of a friend. A quick inspection of the room or dorm room before making a scheduled stop at the dorm room of a friend is not the same source.

Peach in a fraternity limiting the extent of their initiation are at a disadvantage. This lack of 'experience' exposes itself in talk (talk?) sessions. Who has a story to tell?
Meet Captain Russ Kidder
Engineer Basketball Star

Russell Clinton Kidder, a 6'11", senior from Brattleboro, Vt., is one of M.I.T.'s top winter season athletes. Playing guard on the Engineer basketball team, of which he is captain, Russ scored 135 points in the first 10 of 10 of T.E.C.'s-F game schedule and holds the T.E.C. record for points scored in a single game, with 36 markers against American International Col-

The quiet, two-headed Kidder takes his mental exercise in Courses XVIII.

Remember, you'll feel better when you change to PHILIP MORRIS in this case easier, coughs due to smoking disappear...paralyzed throat clears up...that stale, "smoked-out" feeling vanishes!

So take your choice, but make your choice PHILIP MORRIS—America's Most Enjoyable Cigarette!

KING-SIZE or REGULAR
you cannot buy any other cigarette of equal quality!
Gumpertz Receives Post In A. S. C. E.

Professor Werner H. Gumpertz of the Department of Building Engineering and Construction at the Institute has been appointed chairman of the Program Committee of the American Society of Civil Engineers. The appointment was announced by Mr. Howard M. Turner, President of this section, who was elected on January 26.

Placement

(Continued from Page 8) which professions are most in demand. We are told by freshmen admission officers that these lists do not provide an accurate forecast of future job opportunities and consequently should not be the basis for choosing one course over another.

Date

1918-19

Mathematics Society will meet in room 4-270 at 2:30 p.m. Wednesday, February 18. The speaker will be Dr. Joseph Sampson. The topic has not been announced.

STATION WGBH
PROGRAM SCHEDULE

TUESDAY, FEBRUARY 17, P.M.

12:35—Steele, Weather, Righting.
