Undergraduate Body Will Choose New Class Officers on Tuesday; Students To Vote On Referendum

All undergraduates will have the opportunity next Tuesday to express their views for class officers. Forty-seven candidates filed petitions before the deadline, as compared with the 1952-53 election, when 39 candidates filed for the same positions.

Students will also vote on a proposal that the president of the Institute Committee should be elected by the entire student body. If elected by his own class only, it is automatically president of Institute Committee. The proposal would separate the two offices.

Voting ballots will be given to the student upon presentation of his registration card.

One ballot will be in the lobby of Building 10 and at the intersection of Buildings 2, 4, and 6 to facilitate voting. All ballots cast will be counted beginning at 8:00 a.m. and 3:15 p.m.

President, vice president, secretary-treasurer, and two representatives to the Institute Committee will be elected for the classes of 1954 and 1956. In 1955 there will be a permanent president, a permanent secretary-treasurer, and three additional class representatives.

Names of all candidates with their academic records follow. Statements of candidates for president of classes 1953, 1954, and 1956.

Professor Greene Speaks At Smoker As 'The Tech' Guest

Professor William C. Greene of the English and History departments, one of the members of the Institute faculty, discussed the problem of serious lack of cohesion among the student body, and the need to bridge the gap between the student body and the faculty. He said that he had been invited to the "THE TECH" Smoker, to give a short talk on "The Problems of the Student of Today."

Green's talk was an excellent one, and he used many examples to illustrate his point. He began by describing the problems of the student of today, and then went on to explain how these problems can be solved. He said that the student of today is faced with many problems, such as the lack of money, the lack of time, and the lack of knowledge. He said that these problems can be solved by the student himself, but also by the faculty and the administration.

Green ended his talk by saying that he hoped that the student of today would take his problems seriously, and that he would work hard to solve them. He said that he believed that the student of today is capable of solving these problems, and that he had no doubt that he would do so.
The Tech

through the mail

According to the present under-graduate-accreditation the president of the Senior Class also acts as president of Institute Committees. We feel that the opinions of the candidates for this office, concerning Student Government, are of interest to all students. The Tech, therefore, has asked the three candidates for president of the Class of 1953 to present their views on several campus issues. I have had the good fortune to be an Institute Committee representative for the Class of 1954 last year. Though it was a great experience, I feel that Institute Committee's large size is inefficient, that the presence of representatives of all elected members, and that it would be more receptive to ideas and student opinion if it were composed of elected members.

BOYLAN

To the Editor of THE TECH:

With so few available candidates for President of the Class of 1954 to express their views, I want to thank the editors of THE TECH for this chance to present my position on several campus issues.

I feel that Institute Committee's large size is inefficient, that the presence of representatives of all elected members, and that it would be more receptive to ideas and student opinion if it were composed of elected members. Accordingly, I propose the following changes designed to improve the situation of Institute. These are to be accomplished by legislation if possible, by referendum if necessary.

(1) Separation of the offices of Senior Class President from Institute Committee Chairman, and election of the Chairman and Vice-Chairman of Institute by vote of the entire student body. This issue will be voted on at the time of the class elections.

(2) Removal of "Class A" activities from Institute Committee.

(3) Election in addition to the head of living group government, of one fusion representative, and one elect.

The formation of a cabinet consisting of the head of each activity system is functioning smoothly. Therefore, I will make a special effort to help make the switch in activity system as smooth as possible.

To the Editors of THE TECH: 

How can one of the authors of the petition be confident that the election will be free of irregularities? Is it not a fact that many seniors, they should give careful consideration to the matter of military service. Since these activities bears this out. And candidates for office are following the footsteps of a recent presidential contender and are trying to "hail some" as an argument. Their willingness to carry out the opinions and their ability to arrive at new ideas dispels any argument of the proposals have suggested— namely that direct election would be an inefficient method of selection because it would not be composed of representatives of all elected members.

(Continued on Page 6)

JACOBY

To the Editor of THE TECH:

With a view to the coming election, which is to elect the Institute President to state definitely what my policies and principles are, I have taken the liberty of writing you, to define my position.

I have always held that the functions of the current Institute Committee was to consider problems of a political nature. I believe that the problem of the future now. That is, many of the items are being discussed by the group who could and should be accomplished by the sub-committees of the Institute Committee. Instead of these "limited scopes" and "limited interests of the group debate policy questions which are the proper concern of the entire Institute Committee. In all, the group debate policy questions which are the proper concern of the entire Institute Committee. In all, the student body as a whole, is the fact that seems such problems must be directly responsive to student opinion. And candidates for office are following the footsteps of the candidates for President of the Class of 1954. I have always held that the functions of the current Institute Committee was to consider problems of a political nature. I believe that the problem of the future now. That is, many of the items are being discussed by the group who could and should be accomplished by the sub-committees of the Institute Committee. Instead of these "limited scopes" and "limited interests of the group debate policy questions which are the proper concern of the entire Institute Committee. In all, the group debate policy questions which are the proper concern of the entire Institute Committee. In all, the student body as a whole, is the fact that seems such problems must be directly responsive to student opinion.

I am one of the authors of the petition on the coming Institute President presently circulating. I would like to make it perfectly clear that the petition do not feel that this is the best, and only reinforcement against the coming election. Nor is it that it is a step in the right direction. And one can express his dissatisfaction with the coming election in the Institute Committee to help determine the policies which will determine its improvement.

I realize that most of the objectives can be realized with the whole activity system is functioning smoothly. Therefore, I want to thank the editors of THE TECH for this chance to present my position on several campus issues. I have had the good fortune to be an Institute Committee representative for the Class of 1954 last year. Though it was a great experience, I feel that Institute Committee's large size is inefficient, that the presence of representatives of all elected members, and that it would be more receptive to ideas and student opinion if it were composed of elected members.

THE RESPONSIBILITY WE FACE

Institute Committee is very far from being perfect. Its inadequacy as an efficiently functioning student government can most readily be seen in the ubiquitous motions for its reconstitution. We may even be led, sometimes, to question the value of its existence when we are faced with some of its policies and proposals. But perhaps the fault of student government lie not in its organization but in a certain amount of disinterest of its constituents. Too many of us perhaps hide this indifference under a guise of confusion and dissatisfaction: abstraction, we claim, clearly expresses our opinion. But why must we resort to mere complaint (by silence or by other means) when we are given the opportunity to reach our diversities? A democratic system by definition must create the type of government requested by the people it is to govern; and under such a system we should expect the same from the students. There are many of us too, who may attribute little value to Institute Committees or the benefits which are derived from student government, and therefore excuse ourselves from becoming acquainted with its operation. We have, however, set up a government and we must make sure that it adequately performs the function for which it was designed WHATEVER OR HOW FEW THEY MAY BE. Voting, and election of officers and representatives fulfills that duty. Disagreement with student government policy and dissatisfaction with its set-up is best and most concisely indicated by adverse public opinion expressed on the floor of its deliberative sessions or in the choice of new representatives. It is not expressed by refrain from voting. This action indicates rather a "Let John do it" attitude and accomplishes little.

AN AWAKENING

This year it is most gratifying to see that many of the candidates for class office are becoming more aware of the responsibilities of Institute Committees. They have recognized some of the problems facing the student body in regard to government, human relations, morale, and educational policies. They have expressed their opinions on these fields and have offered suggestions and policies with which to face them. It is needless to say that we cannot find ourselves in agreement with them all but we note the fact that this willingness to critically appraise the issues, and campaign on what may prove to be highly controversial questions. This is a happy deviation from past campaigns. Because of this, we look forward to a more enlightened student body choosing its representatives on the basis of capability and sound thinking.

REFERENDUM—VOTE YES

Members of the Institute community have, during the past few weeks been made aware of several proposals to change student government. Such proposals are by no means unusual, for they are quite frequently discussed at great length in Institute Committees. However, while the main discussion of interest to the undergraduate student body as a whole, is the fact that the students are being directly presented with the proposals in the form of a student referendum. The motion which is to be voted upon essentially calls for the separation of the offices of Senior Class president and president of Institute Committee. It provides for a general student election of the Institute Committee president. (Previously only Senior Class members voted.) In doing so, the proposal indicates a faith in democratic procedure by placing a responsibility directly in the hands of the students; and the students are living up to that responsibility.

They have shown an increased interest in the affairs of student government and are becoming more aware of the responsibilities of Institute Committees. They have recognized some of the problems facing the student body in regard to government, human relations, morale, and educational policies. They have expressed their opinions on these fields and have offered suggestions and policies with which to face them. It is needless to say that we cannot find ourselves in agreement with them all but we note the fact that this willingness to critically appraise the issues, and campaign on what may prove to be highly controversial questions. This is a happy deviation from past campaigns. Because of this, we look forward to a more enlightened student body choosing its representatives on the basis of capability and sound thinking.

Elections

(Continued from Page 1)

Concerning the question of whether a freshman, with an interest in politics, could be elected as class president, the freshman candidates, with their age and inexperience, did not have much hope. The main hope of the freshman candidates was to make their voices heard throughout the administration in whatever ways possible.

Secretary-Treasurer

Raymond D'Arcy—Years two and three; building manager, treasurer, and circulation manager of the Tech. Years one and three; freshman, School of Arts and Sciences.

Walter P. Fiske—Years three; secretary at Leadership Conference, Freshman Council, and Senior Class Committee. Years one, two, and three; Public Relations Committee, Young Republican Club. Years one; Freshman Council, chairman of Freshman Class Activities Committee, and Freshman Class Executive Committee.

Ray Eldridge—Years three; Band and Baseball, Military Ball Committee, Stat Club. Years two and three; Varisty crew. Years one, two, and three; Catholic Club. Years two; Sophomore Council, Field Daypervisor, Sophomore Mug Lift, Year one; crew and Technique.

David H. Robbins—Years three; secretary of Phi Eta Kappa. Years two and three; treasurer, A. S. C. E; Years two; janitor—varisty crew. Year one; captain of freshman crew.

Institute Committee Representative

Larry Holmes—Years three; presi- dents of Bouyer Key. Years two and three; Public Relations Committee, Field Day and varsity crew. Years two, three, and two; head representative. Years two; assistant manager of Field Day, Student Government Investigating Committee. Years one and two; Institute Committee Representative. Years one; Freshman Council, and Freshman Dances Committee.

Robert E. Doody—Year two; J. F. C. member, Institute Committee Representative, and freshman, Stat Club. Years one, two, and three; Head representative.

Ralph T. Parker—Year three; Junior Class Committee, Rust Campus House Committee. Years two and three; track, crew, and baseball. Years two; head representative.

George L. Perry—Year three; house president, years one, two, and three; I. P. C. Representative. Years one; varsity crew, management assistant, and assistant personnel manager of The Tech. Years one; Tucker—Year three; Young Republican Club. Years two; Management Association, years one; Management Association, years one; and two; Stat Club. Year one; Freshman

man Counsel representative, and Dras Shop.

Class of 1965 President

Robert W. Morgan—Year two; Sophomore Council, Sophomore Dance Committee, Junior Prom Committee. Years one and two; Sophomore Council, Sophomore Dance Committee, and Freshman Council.

Statement: "The most pressing problem facing the next president of our class will be the reorganizing work of the student government, which is about to be demanded. I stress that the Institute Committee, as it is now operating, is extremely in- efficient and ineffective. I feel that the next president of our class should support any reorganization plan that will help the best interests of the class and the students of the Institute. If an acceptable plan is forth- coming, our class must spearhead the effort with a plan of its own."

David L. Ruda—Year two; Tech Show, Sophomore Council. Years one and two; Logosophy Club. Year one; Glee Club.

Statement: "Last year we of N.I. had a very successful Freshman Dance. This year we will Field Day but only after the class has been re- organized. The future of the class depends upon development of its potentials and can be a bright one if it has proper leadership. To help the class attain future suc- cess, we need men who are respon- sible men who are willing to do things better than their share. I feel that with these conditions, we are under the help a group that has no unorganized group at Tech."

"In short I promise to serve the class to the best of my ability."

Harry Skolnik—Year two; Sec- retariat, Junior Prom Committee, Sophomore Council, Sophomore Dance Committee. Years two and three; track, crew, county, student, and Walker Memorial. Year one; Freshman Council, and Freshman Dances Committee.

Statement: "During the last year and a half, I have seen much of the administration, but even more was good. I think that there is much that can be done to im- prove student government, in par- ticular, more participation by a greater number of students."

"With this in mind, I would like to offer myself for the position of president during our

girl, who was at once wistful, shy, and a half, I have seen much of respectability, and fishing in the waters off the coast of Brittany. The photog- raphy of country scenes was very good, but the author of the commen- tary must have thought his subjects rather dull and uninspired. Simple statement: "Camembert is a cheese made from cows' milk"; "champagne is a wine made from grape juice in a region of France called Cham- paige." This film was followed by a modest abstract color interpreta- tion of sound, to the strains of one of Lisz's Banalatopographies. Finally there was the recently made ERIU-the documentary "Men of Science." 

Freedoms Foundation Awards Medals To Institute Committee

Freedoms Foundation has awarded the Institute Committee its George Washington Honor Medal that was presented to the Second Annual Leadership Conference held this autumn, it was announced early this week.

The Foundation is a non-profit, non-political, non-sectarian agency orga- nization which was chartered in 1949 for the specific purpose of making awards to Americans who make outstanding contributions to a better understanding of freedom by the things which they write, do, or say.

Institute Wins Second Prize

The Institute won a Second Place Award in the College Campus Pro- gram of the Foundation. Other awards were made in the following categories: figures, magazine articles, cartoons, college programs, collections, essays, photographs with captions and public addresses.

The Leadership Conference, spon- sored by Institute Committee, covered topics under the heading "General Problems of Student Gover- nment." It was attended by mem- bers of Institute Committee and sec- ond-year officers of the faculty, and con- sisted of panel discussions, addresses, programs, and films.

girl, who was at once wistful, shy, and purposeful. The guitar which provided the only musical ac- companiment was used sparingly and with effect. The faithful acoustic re- production usually found in Freshman halls was not evident in this one. Use of the camera was straightforward, and unobtrusive. It was often lowered to the horizon-plane of a child. This served to emphasize the concept of the film: that of a cruel adult world seen through the eyes of children.

The feature film was preceded by a series of shorts. The first was French. It described the production of food and drink in the French coun- tryside, and fishing in the waters of the coast of Brittany. The photog- raphy of country scenes was very good, but the author of the commen- tary must have thought his subjects rather dull and uninspired. Simple statement: "Camembert is a cheese made from cows' milk"; "champagne is a wine made from grape juice in a region of France called Cham- paige." Beavers To Race Northeastern
Dual Meet Sat. At Briggs Field

By Russell Chikoski
Saturday the M.I.T. track team will meet with Northeastern in a dual meet at Briggs Field in one of the few meets held this winter on the boards.

It is history that our opponents often have outstanding stars in some events but always the 6-5 all-around. The Tech squad has been demonstrated in its preceding meets to be a formidable team. When they have not dropped the price. This is certainly the case in the all-around because of the excellent depth of the stages.

Weinstein '56 and Davis '55, the 110- and 220-yard hurdles respectively, will battle for positions with champion Shen and Johnson in the long jump and high jump respectively, and look forward to the day when they can compete in the all-around. Davis '55 set a new record in the 110- and 220-yard hurdles.

Davis '55, who has been in the all-around for several years, will win high jump and the remaining places will be fought for by the rest. The broad jump may be a toss up, but McGaw may help in this event. Our weight lifters are very consistent. McGaw, in particular, has improved his record in this event. McGaw, in particular, has improved his record in this event.

Davis '55 has been shrewd in utilizing his talents, and will probably throw in the hammer and the javelin to make a complete five-man team.

Davis '55 is one of the few men who can compete in the all-around and the sprints. He has been shrewd in utilizing his talents, and will probably throw in the hammer and the javelin to make a complete five-man team.

veyed his personal conviction that American principles are strong enough to withstand attacks by any subversive groups without restricting freedom of thought and opinion. He strongly emphasized that extreme rightist elements in our country represent a grave threat to our principles of tolerance to dissenters and non-conformists. He attacked both Senator McCarthy and the American Legion for what he called their attempts to stifle freedom of thought and academic freedom.

Attending the conference from M. I. T. were Gilbert Gardner '53, Michael Boylan '54, Sheldon Dick '54, William Neff '55, George Rubissow '55, John Seller '55, Donald Weiner '56, David Kaplan '56 and Warren Briggs '56.

Squash Victory

(Continued from Page 1)

by overpowering Dick Stuart 3-0. Stuart, the night before, had extended national intercollegiate champion defeat, into a victory as he rallied to win in overtime with the aid of a service ace on the last point. With this victory under their belts, bringing their record to four wins and four defeats for the season. This put the burden of victory on Bob Warshawer, playing number nine. As his tense teammates cheered every point, Warshawer turned a certain defeat, into a victory as he rallied to win in overtime with the aid of a service ace on the last point. With this victory under their belts, bringing their record to four wins and four defeats for the season. The squashmen look forward to meeting a powerful Yale team on Friday at 5:00 p.m. Earlier in the evening, Walt Stahl and Dave Morse took the only freshmen matches of the day, as the freshmen suffered a 5-2 loss at the hands of the Trinity Yeomen.

P. N. DICKERMAN, A. E., Massachusetts Institute of Technology, Chief Engineer, Chance Vought Aircraft, will interview graduates of the class of '53 in the Placement Office, MARCH 12 and 13. Mr. Dickerman is looking forward to the opportunity of discussing with you...

Chance Vought Aircraft, a designer and builder of military aircraft for 35 years, offers the graduating engineer and scientist an opportunity to join in the design and manufacture of fighter aircraft and guided missiles.

The design of fighter aircraft is constantly being improved as new materials and more powerful engines become available. Guided missile design is in the pioneering stage and progress up to this point, in our opinion, can be compared to the period of development of piloted aircraft prior to World War I. Imaginative thinking as well as sound engineering is an important part of these programs. The young engineer through his creative thinking can rapidly assume a position of engineering responsibility in the Chance Vought organization.

Almost every type of academic specialization can be utilized in some phase of the design, development and test of a jet fighter or guided missile. Technical assignments are available in the design and analysis of specialized electronic components, structural and hydraulic testing, structural and mechanical design, applied aerodynamics, power plant analysis and testing, stress and vibration analysis and flight testing.

If you are receiving a degree in Aeronautical Engineering, Mechanical Engineering, Civil Engineering, Electrical Engineering, Mathematics or Physics, Chance Vought invites you to discuss your future in these fighter aircraft and guided missile programs. Contact your Placement Director for an appointment with the Chance Vought Aircraft representative.

Singing Competition Scheduled For March

Tickets for the 1953 All Tech Sing and Dance to be held Saturday, March 14, in Morse Hall, Walker Memorial, will go on sale Monday, March 2, in the lobby of Building 10. Tickets will be $1.20 per person for the Sing and Dance. A special price of $1.60 will apply to purchases of 18 tickets at one time.

Twelve entries have been received making this the largest Sing and Dance in recent years. The groups entered are Burton Student Staff, East Campus (2 groups), Phi Gamma Delta, Walker Student Staff, Sigma Nu, East Campus Student Staff, Women's Dorm, Sigma Alpha Nu, Alpha Tau Omega, Theta Chi and Delta Tau Delta. The entry from the Women's Dorm will give the students a chance to see some of the great talent.

As in past years a Trophy will be awarded for first place with certifi- cates for second and third places. EBERT will be awarded for the best presentation. The nature of EBERT will not be revealed until the award is made.

Dormcomm

(Continued From Page 1) selected by that body sometime within the next month. The house chairman, who are also members of Dormitory Committee, will be elected by the residents of their respective houses within the next month. In addition, Burton House and East Campus will elect two members each to Dormitory Committee and Baker House will select one.

Elections

(Continued from Page 1) President. 3:00 p.m., Wednesday evening, meeting of the Student-Faculty Committee.

Statement: "I have been active in class and student government for four years that I have been here at the Institute. I would be honored to have the opportunity to be active in the alumni organization of the class as the president. I feel that I can best represent the class in its business in the Alumni Association.

George D. Stevenson-Year four; manager of hockey team; years one, two, three and four; Hockey Shop Mastercraftsman. Year three; class president, Judicial Committee, Senior Week Committee Chairman, finances board.

Statement: "I have spent a great deal of my time here at Tech working for the school and the class. It has been a very enjoyable experience doing so. I would feel highly honored if I am given the opportunity to continue to work for and represent our class in the future."

Secretary-Treasurer

Vivian W. Brown, Jr.-President of Volunteers for Stevenson, general manager of Debating Society, membership chairman of Skabbard and S虐.

The Mother Churchfall, Norway and St. Paul, Streets, Boston

Two M.I.T. graduates are interested in buying from or forming services of various walks of life. 45 percent of this group have smoked Chesterfield for an average of over ten years.

After ten months, the medical specialist reports that he observed... no adverse effects on the nose, throat and sinuses of the group from smoking Chesterfield.
