Trackmen to Face Powerful BC Team

By Steve Riegal '56

Boston College is the M.I.T. "invad-er" in the third annual M.I.T. Track- ers' Invitational Meet to be held in the Kresge Auditorium on Friday, March 21.

The M.I.T. Trackmen, who are coming off a 3-1-1 season last year, are looking for their first league championship this year. Their only loss last year came from Brown, the eventual league champions.

In a meet which features three events, the 200-yard dash, the 440-yard relay, and the mile, M.I.T. will be up against several strong teams, including Boston College, Harvard, and Dartmouth.

Sophomore Dance Tonight In Baker

Dance for Sophomores will be held tonight in the Baker Dinner house in the second floor dining room. The dance is open to all students, and the music will be provided by the M.I.T. Jazz Band. Admission is $1 per couple.

All Tech Sing Along Dance On Sat.

Forty women including the group "Fouriers," nine fraternities and five sororities will compete in the "All Tech Sing Along" dance contest at 9:30 p.m. tomorrow night in the Kresge Auditorium. The dance will be sponsored by the "Voice" magazine, and the winners will be announced at the end of the competition. The entry fee is $3.50 per party, and the grand prize is $50.

Dr. James R. Killian, President of the Institute, has issued an official statement in which he explains the Institute's role with respect to the "Voice." He stated that the "Voice" is a student publication and that the Institute will not interfere with its operation. However, he emphasized that the "Voice" must be responsible for its own actions and that the Institute will not be held responsible for the views expressed by the "Voice."
as we like it

Stagai 41, finally in Boston after a very successful run in New York, is a rather old blend of humor and surrealism which makes for a most enjoyable evening at the theatre. It is under the personal influence of its producer-director, Joe Ferro, and a good deal along the road to drama success for the director and his troupe. Herve and Edmond Trehofski.

The so-called "demerit system" being employed by the Air Force reserves is another feather in the cap of its. It is another example of the growing trend to shirk military science is only one part of the general training of officers who have completed the voluntary advanced course, and should be developed it should not be stressed to the point where it gives an impression of its permanence. Without attempting, therefore, to wet the pros and cons of these particular arguments we look to another page of the picture where there is a consensus of opinion on the part of observers.

The point has also been raised, and properly so, that the strict application of military law and courtesy tends toward an authoritarianism which conflicts with the democratic aims of education and self-discipline, Although a humility and respect for authority should be developed it should not be stressed to the point where civilian discipline is replaced by the military. It must be remembered that the fruits of the R.O.T.C. program are the reservists who have completed the voluntary advanced course, and even here military students are only a PART of the general training of an officer. The basic course of compulsory participation itself serves the Army or Air Force no great purpose. Military rigidity must therefore be relegated to the service.

Crew Readies For 1st Meet Season Starts On April 25

Since early in February Tech's varsity and Freshman crews have been working indoors to achieve some degree of conditioning before the beginning of outdoor practice. A little over a week ago, however, they "hit" the cold and wintry Charles for the first time this season. This marked the beginning of many greeting novices which will lead to the first race against Harvard and Boston University on Saturday, April 26.

Prospects

Spirits are high among Coach Jim McMillan's heavy and light varsity crews. Many returning lettermen fill the Augie roles which have come within reach of being first in the nation two years ago. Third year letterman Richard S. Lindstrom '53 and a newcomer, George G. Covney '54, are also adding their spark to the battles for varsity seats. The 150-pounders, under the leadership of Captains Nicholas W. Fast, '52, are presently scientifically challenging their heavier rivals.

Nothing no nothing beats a better taste
and LUCKY TASTE BETTER!
Cleaner, Fresher, Smoother!

Ask yourself this question: Why do I smoke?
Smokes the way you want it, the way you smoke, and get something unusual from a taste of a cigarette.

Lucky taste better-cleaner, fresher, smoother! Why? Lucky Strike is made to taste better. And what's more, Lucky Strike is made of fine tobaccos with a flavor that is the envy of all other cigarettes, L.S./M.F.F. - Lucky Strike Means Fine Tobacco.

Be Happy-GO LUCKY!

Cigarettes Doctors do not recommend—best left for those who must smoke. He who stops by living can conquer the habit.

Arthur Driscoll
Rutgers University

COLLEGE STUDENTS PREFER LUCKY STRIKE
SMOKERS

A nationwide survey based on actual student interviews in 60 leading colleges reveals more smokers prefer Lucky Strike than any other cigarette by a wide margin. No. 1 reason-Lucky Strike better taste. Survey also shows Lucky Strike gained 900,000 more smokers in these colleges than the nation's two other principal brands combined.

Bears Bark!!

The U. M. Bears had all the advantages in the game against Boston College, but they managed to triumph over the Beavers, 64-60. The Intrepid Engineers came close to winning against Bates, but were pinned by their opponents.

One of the team's biggest weaknesses all season long was a lack of control over its bounding strength. Despite the height of some of the squad, such as Shilensky and Hщение, this brought only a few inches over six feet center. Nevertheless, the team was of the most of the teams.

played a decided lack of teamwork. Two players on the team, and they looked good in practice, but once the ships were down, they seemed to forget that they were playing basketball. Ed. Kiddie, who showed flashes of brilliance against A. L. C. and Tufts, when he scored 24, was hampered by a leg injury during much of the season and often was far from his best form. Still, he led all scorers with 202 points, an average of just under 12 points a game. Perhaps the most consistent of all was senior Van Alstyne, second to Kiddie in scoring. Van Alstyne was the only other member of the team who averaged over 10 points a game, scoring 176 points. Despite a few poor performances early in the season, Van Alstyne played good ball during most of the season. Another who showed promise was forward Gifford A. Wabe '56, who hit for nine points a game. Waber picked up some good experience and should be one of the stars of next year's squad. Forward Ed. Allen Schatz '54, also showed good promise for next season, his last at the Institute.

Some of the reasons this year's schedule were simply too powerful for the Beavers to handle, each City, Cathy and Brandeis. Other losses came from poor playing. Next year City and Brandeis do not return to the schedule, and several other teams

have Sprn taken off. The only new opponent is Lowell Textile Institute in the opener of the 14-game schedule, which is considerably easier than this year's.

The only losses through graduation are the backcourt duo of Kiddie and Van Alstyne, and out guard Paulo, Marvin. Remaining on the team are five juniors and five sophomores. Star center Burt, Shilenski and Carl R. Here '54 are all sophomores, and Colos is a junior. The forward team will also supply a good player to the starting, the best of these being Larry Halley '54, who averaged better than 12 points a game for the yearlings, but they still can't stay in the good neighborhoods.

It's the size of the fight in the man!

That's right! In the U. S. Air Force, it's not the size of the man in the fight—it's the size of the man in the man! And Aviation Cadets must have plenty of it. For Cadet training is rugged. If you're not good enough... tough enough... smart enough... if you can't take what you're learning to dish it out, you can have one of the most fascinating careers in the world. You'll be equipped to fly the latest, finest planes. You'll be prepared to take your position as an executive, both in military and commercial aviation as well as in industry. And while you're helping yourself, you'll be helping your country.

WIN YOUR WINGS! It takes little over a year to win your wings as a Pilot or Aircraft Observer (Navigator, Bombardier, Radar Operator or Aircraft Performance Engineer). But at the end of your training you graduate as a 2nd Lieutenant in the Air Force, with pay of $6,300.00 a year.

ARE YOU Eligible? To qualify as an Aviation Cadet, you must have completed at least two years of college. This is a minimum requirement—it's best if you stay in school and graduate. In addition, you must be between 19 and 24 1/2 years, unmarried, and in good physical condition.

New Aviation Cadet Training Classes Begin Every Few Weeks!

HERE'S WHAT TO DO:

1. Take a transcript of your college credits and a copy of your birth certificate to your nearest Air Force Base or Recruiting Station. Fill out the application they give you.

2. If application is accepted, the Air Force will give you a physical examination.

3. Next, you take a written and manual aptitude test.

4. If you pass your physical and other tests, you will be scheduled for an Aviation Cadet training class. The Effective Reporting Date for the next class is four-month deferral while awaiting class assignment.

WHERE TO GET MORE DETAILS:

Write your nearest Air Force Airman Recruiting Office, or to any near you who will give you Aviation Cadet Headquarters, U. S. Air Force, Washington 11, D. C.

Tel. KR 8-7130
