L.F.C. Appoints CommChairmen, Drafts Weekend

Inter-Fraternity Council appointed several committee chairmen at its regular Spring Meeting last Friday. President Glenn D. Jackson '54, President-elect James K. Baldwin '54, and newly-elected Vice President Leonard W. Besinger '57, were all present. In addition, several committee chairmen were drafted, including: Assistant Treasurer, Henry K. Heberle '54; Pre-Buffalo, Vice President, David L. Radom '53; Choral Review, James J. O'Malley '50; and Publications Committee, Donald W. Peck '53.

It was mentioned at the meeting that the Greater Boston Chapter of Committees is working toward having the annual Inter-Fraternity Council conference held in Boston in 1956. Previous conferences held in New York City have attracted hundreds of delegates from colleges all over the U.S., and with the expansion of the chapter, it would make sense to have the conference in Boston.

I. F. C. Weekend

Further details of the upcoming weekend of April 22 and 23 were discussed during the meeting. Social activities on this weekend will include a dance, a barbeque, and the annual Spring Ball, which will be held at Walker Hall. The formal dance will be held at the Boudin Ballroom from 9:00 p.m. until 1:00 a.m. and will feature a dance band. The barbeque will be held in the Baker Memorial Foundation, and those who attend will be able to play the famous "Rocky" song. The Spring Ball will be held at Walker Hall, and the Lincolns Project in Lexington.

Public Relations chairman, Robin J. Holden '53, said that the details of the weekend will be announced at a later date.

M.E. Department to Offer Special Summer Program

A special summer program will be offered by the M.E. Department to re-emphasize the importance of technology. The program will be held at the campus during the summer, and will include lectures, seminars, and demonstrations. Students will be able to earn credit for their participation in the program, and will be able to study topics associated with all phases of the technology.

The program will be offered during the summer, and will be open to all students who are interested. The program will begin on June 22, and will continue through July 22.

For more information, contact the M.E. Department at 617-428-2222.

Dorm JudComm Announces Policy For Coming Year

In compliance with a request made by representatives of the Student Council, the Dormitory Judicial Committee has proposed a new policy for dormitory residents. The new policy will be in effect for the coming year.

The Dormitory Judicial Committee has proposed a new policy for dormitory residents. The new policy will be in effect for the coming year.

For the first time in many weeks Senator McCarthy was displaced from the front page of the newspaper. McCarthy's position was taken by a report on the trial of two men accused of murder in the Boston area.

The report was based on information gathered by the Boston Police Department and the District Attorney's Office. The two men, both of whom are from the Boston area, were charged with murder after a shooting incident in the outskirts of the city.

The trial, which is expected to last several weeks, will be held in the Supreme Court of Massachusetts. The court has jurisdiction over all crimes committed in the state.

Weekly News Summary

For the last time in many weeks Senator McCarthy was displaced from the front page of the newspaper. McCarthy's position was taken by a report on the trial of two men accused of murder in the Boston area.

The report was based on information gathered by the Boston Police Department and the District Attorney's Office. The two men, both of whom are from the Boston area, were charged with murder after a shooting incident in the outskirts of the city.

The trial, which is expected to last several weeks, will be held in the Supreme Court of Massachusetts. The court has jurisdiction over all crimes committed in the state.

Calendar of Events

from March 24 through April 7, 1954

WEDNESDAY, MARCH 24

Mechanical Engineering Department. Seminar: 2:00 p.m. Lecture: "How a Power Plant is Controlled," by W. William P. Sauter, Project Manager, Jackson and Merriam. Room 3-270, 11:00 a.m.

Food Technology and Department. Seminar: "Processes and Products of the Marine Fisheries Industry." Mr. M. B. Pike, Holme Packer. Room 16-310, 2:00 p.m.

Physics and Mathematics Department. Operations Research Seminar: "High-Way Traffic Analysis." Mr. Lewis W. Crump, Room 6-219, 5:00-6:00 p.m.

Inter-Varsity Christian Fellowship. Discussion and informal talk: "Faith," Dr. J. W. Erskine, President of the College of the Bible, Wytheville, Virginia, Room 2-102.

THURSDAY, MARCH 25

Aeronautical Engineering Department. Seminar: "Some Aerodynamic and Propulsion Problems," Dr. J. A. Mitchell, Professor of Aerodynamics, The University of Michigan, Room 2-102. Room 16-310, 4:00 p.m. Room 10-250, 5:15, 7:15, and 9:15 p.m. Admission: 50 cents.

SaturDAY, MARCH 27

Lecture Series Committee. Film: "King Kong." Room 10-250, 5:10, 7:00, and 9:00 p.m. Admission: 50 cents.

School of Architecture and Planning. Lecture Series: "Energetic and Symmetrical Geometry," Mr. Buschmiller Faller, visiting Professor, Department of Architecture. Room 7-327, 8:00 p.m.

FRIDAY, MARCH 26

Mechanical Engineering Department. Seminar: "Problems in Gas Turbine Design," Dr. J. A. Ackerman, Professor of Mechanical Engineering, Federal Institute of Technology, Zrich, Switzerland. Room 3-470, 4:00 p.m. Admission: 50 cents.

Saturday, March 27—Sunday, April 4

Spring Vacation

FRIDAY, MARCH 5

Biological Department. Colloquium: "Quantitative Biochemical Studies on the Adrenal," Room 16-310, 4:00 p.m.

MONDAY, APRIL 6

Acoustics Laboratory. Colloquium: "Scattering from an Array of Sources," Prof. Philip M. Morse. Room 4-313, 12:00 noon.

TUESDAY, APRIL 7

School of Architecture and Planning. Lecture Series. Film: "Evolution of the Skyscraper." Room 7-427, 4:00 p.m.

Christian Science Organization. Subject: "Essenials." Tyler Lounge, Memorial Building, 5:15 p.m.

Associated General Contractors of America—Student Chapter. Panel Discussion: "Contemporary vs. Classical Schools." Moderator: Mr. Anthony R. Roome, President, Student Chapter. Room 7-405, 7:30 p.m.

WEDNESDAY, APRIL 8

Food Technology Department. Food Industry Seminar: "Nutrition Applications in the Food Industry." Dr. Frederick J. Stuntz, School of Public Health, Harvard University, Room 16-310, 2:00 p.m.

Electric Power Engineering. Seminar: "Katterman Communications." Prof. Jerome B. Wiener. Room 6-120, 4:30 p.m.

EXHIBITIONS

In the period of paintings, photographs, engravings, and advertising designs by George Kerpe will be an exhibit in the New Gallery of the Charles Hayden Memorial Library through March 27. The exhibition is sponsored by the Institute of Fine Arts. Hours: Mondays through Fridays, 9:00 a.m.-5:00 p.m.; Saturdays: 2:00-5:00 p.m.

Tuesdays and Wednesdays will be the theme of an exhibition to be held in the lobby of the Charles Hayden Memorial Library from April 2 to 5. Twenty-five hand-painted fabrics will be on display.

An exhibition of photographs representing the modern Italian movement in architecture and design will be shown in the Lobby of Building 7 through March 27.
The Ivory Tower

By Berndt Lipps '46

What you are about to read is known as a column. No newspaper is complete without one. Behind the columns is a man known as the columnist. He is animated by the powerful drive to communicate to the public at large his opinions on politics, or by becoming professors. The supreme joy, only granted to the fortunate, is the vantage of being blessed with literary qualifications and good connections in the newspaper field, and hence has the opportunity to refract his image of the world, its people and events through the medium of print. This column is known as the columnist. He is animated by the powerful drive to communicate his opinions on politics, or by going into the public at large. His opinions on politics are animated by the supreme joy, only granted to the fortunate. His vantage of being blessed with literary qualifications and good connections in the newspaper field is the supreme joy, only granted to the fortunate. His vantage of being blessed with literary qualifications and good connections in the newspaper field is the supreme joy, only granted to the fortunate.

Scherwood Speaks On Great Need for Sea-Water Supply

Dr. Thomas K. Sherwood, professor of chemical engineering at the Institute, delivered an address on the possibilities of obtaining Fresh Water from the Sea last Sunday afternoon. The lecture was the last in this year's series of Popular Science Lectures sponsored by the Society of Arts at M.I.T.

Dr. Sherwood noted that the idea that there could be a serious water shortage may come to a close. The problem, he said, is in distribution—having the needed water in the right place at the right time. The average utilization of the water provided by rain-fall is 20 per cent, and causes frequent actual water shortages in certain areas.

The water problem is already with us, according to Dr. Sherwood, and is almost everywhere the shortage has been due not to reduced supply but to increased demand. And no appreciable increase in the country's water supply is in sight. He urged some means of alleviating the situation, but no simple solutions. More reforestation, cloud-seeding, industrial re-use, and re-apportionment of irrigation water will all aid in reducing the quantity as well as its utilization. The measures are not sufficient, but they can be used.

We can get the needed water from the sea, he said, by desalting the water in certain areas.

Summer Program

(Continued from page 1)

under the direction of Professor J. Francis Reitjens, Director of the Instrumentation Laboratory.

Informal Afternoons

Morning sessions of this two week program, according to Professor Reitjens, will be devoted to studies of systems and components. There will also be less formal afternoon sessions devoted to programming techniques, using the numerically controlled milling machine developed in this laboratory under U.S. Air Force Sponsorship. Tuition for this program will be $150.

Further information and application blanks for either program may be obtained from the Summer Session Office, Room 7-135.

WHT

(Continued from page 1)

necessary, which will bring WHT up to its past technical standards. WHT expects to have its Burton House transmitter, which serves Baker House and both wings of Burton House, in operation as soon as it receives a few key parts. Director Council contributed $450 toward the $600 cost of the transmitter. The station agreed to pay $90 per year for five years to Darmstadt Council, at the end of which time WHT will officially take title to the transmitter.

Conference Delegates

After this C. Harry Schreiber, Jr. '57 will select the official delegates to intercollegiate conferences. It is hoped that representation at the conferences will be as broad as possible and students who are not members of Institute Committees, and therefore any student who wishes to attend such conferences will be able to attend and receive any information or news that is announced.

As for the first time, the meeting will be posted in all dormitories and fraternity halls.

Placement News

The following companies are interested in gaining from qualified students who are interested in possible employment, although they have not set dates for interviews here. For further information inquire at the Student Placement Bureau, Room 7-128.

Davco Corp.
Hansen-Vin Dippel-Manning Co.
Gulf Research & Development Co.
M.I.T. Instrumentation Lab.
City of Wood River, Ill.
Technicolor Motion Picture Corp.
Polaroid Corp.
U.S. Navy Underwater Sound Lab.
American National Bank of Springfield
E. L. LeBaron Foundry Co.
Smith-Roper Manufacturing Corp.
Ray-O-Vac Co.
Closed Manufacturing Co., Inc.

The following companies will have representatives at the Institute this week to interview those students interested in joining their organizations.

20 New York Authority
21 Taylor Instrument Co.
22 International Harvester
23 Otis Elevator Co.
24 General Manufacturing Corp.
25 Sod Co.
26 Lee C. Moore Corp.
27 International Harvester Co.
28 Bobs & Mass Co.
29 Rockwell Aircraft Corp.
30 Western Union Telegraph Co.

When you come right down to it, you smoke for one simple reason—enjoyment. And smoking enjoyment is a matter of taste. Yes, taste, is what counts in a cigarette. And Luckies taste better.

Two facts explain why Luckies taste better. First, L.S., M.F.T.—Luckies Strike means fine tobacco...light, mild, good-tasting tobacco. Second, Luckies are actually made better to taste better...always round, firm, fully packed to draw freely and smoke evenly.

So, for the enjoyment you get from better taste, and only from better taste, Be Happy—Go Lucky. Get a pack or a carton of better-tasting Luckies today.

Lucky Strike is a cigarette that always please, but you must be sure to ask for Luckies! So don't mix brands in taste delight.
The Tech basketball squad held its annual banquet last week at the Quadrangle Club in Boston. Highlights of the dinner were the presentations of awards and the nomination of the captians for next year's team.

Curt Hilde, '56, six-foot guard from Chicago, Illinois was named captain of the 1955 edition of the Beaver quintet. Hilde, a valuable back-court performer all season, turned in 158 points in Eastern games. He was especially noted for his free-throwing and driving lay-ups. AA INJURY

By the way, every occurrence pertaining to the intramural basketball player is mentioned, be it a hit on ATO, Graduate House, and East Campus, all tied for first place. The opinion circulating around campus is that ATO will defeat neither E.C. or G.H., and, therefore, is willing to active for the tie and 49 points against the Atlantic-Sports Trophy. Certainly the Athletic Association realizes the importance of having only one winner in each sport if such a trophy is to be awarded. Either they are too „businesslike" to do anything about it, don't give a damn, or are bowing down to the pressure of the fans. A.A. must know it can't divide the basketball trophy into three parts. Let's wait for the ball, boys, and see what happens.

Another situation which the A.A. is in a dilemma over, is the question of next year's team. The 300 yard run was the roost. INDOOR INTERCOLLEGIATE MEET

Two events to help his class capture second place. Klein won the .50 yard dash and Williams caught a first把手 early in the season for his scoring and rebounding. His outstanding accomplishments were 42 points against Tufts. Captain Wells, next year's captain, although he was out of action most of the season with a foot injury, was the team 'soul" with a total of 460 points to his credit. Center Stan Shiskovsky, '55 received the Most Improved Player award.

In the intramural track meet held last Saturday in Rackwell cage, the class of '56 emerged victorious with a total of 47 points. They were followed by classes of '55, '56, and '54 respectively.

The 200 yard run was the most thrilling race of the afternoon and ended in a "dead heat" between Ian Williams, '54 and Sid Klein, '55 in the fast time of 23.2 seconds. There were four double events winners in the meet. Warren Lattof, '56, ICDA. high hurdler, won both the long and low hurdles, Jack Pasquariello, '56, varsity long distance star, handily won the mile and 1600 yard events to help his class capture second place. Williams won the 80 yard dash and Williams captured a first place in the 440 yard run, the champion ship being split evenly between classes of '54, '55, and '56. There will be no attempt to upset East Campus. They will once again dominate the scene. East Campus has lost very little of the 1955 edition of the Beaver.
Brandeis quintet was playing heads up John Stelling. '56 made up for the loss. Meliere, in particular, played fine Albtyne and Bill Missimer; but clutch performances by Ken Meliere '56 and Brandeis five'. Burst, the all-stars - had found the going heavy against the taller, rougher tackle, was extremely effective on his Ermin and barrelling in for short tip-ball as he hit on four of five shots and rebounded well.

The alllstars were greatly handicapped by injuries to starters Paul Van Cost him —

New York Downs
Beaver Rugbyites
Trip Is Cancelled

On Saturday, March 20, the Beaver rugby club was defeated by the New York City Rugby Club, 5-0, on the New York 1 home grounds.

Tech's Clerk Johnson broke the scoring ice in the contest as he scored a try to take up three points for the beavers. However, the attempt at conversion failed. Shortly afterward, New York scored a penalty kick to take the score at 3-3. Here the score remained for most of the game.

New York Scores

With one minute left in the game, New York coughed over for a try and another three point to ice the game. The beavers'; attempt failed, leaving the final score 3-3.

According to announcements by the Beaver club officials, the next contest will be played against the Westminster Rugby Club of Montreal, Canada, at MILT. This game is to be followed by a trip to Canada for a match with the Westminster Rugby Club, to be played on April 16. This contest is to be followed by matches with the New York City rugby club, at the New York's home grounds, and the University of Princeton on the Beaver's domain.

Trip Cancelled

Also, according to representatives of the rugby club, the trip to Mon- treal which the club had planned for this spring has been canceled.
Calendar of Events

(Continued from page 8)

Twenty-nine photographs selected from the Ninth Open Exhibit of Technical Photography held in Los Angeles will be shown in the Photo Service Gallery, Baseament of Building 11, through March 30. The photographs are a part of the Photographic Society of America's 1953 International Exhibition of Photography.

Calendar of Events

Due to spring vacation, THE TECH will not be published on March 30. Calendar notices for the week of April 7-14 are due in the office of the editor, Room 7-204, not later than noon, Thursday, March 25.

Sherwood

(Continued from page 2)

new, but only at a price. This limitation will be lessened as the demand for water grows over the years, however. Dr. Sherwood observed that the Second Law of Thermodynamics puts an impassable barrier upon efficient utilization of this resource—a barrier which we do not presently approach even by half. The problem if present methods are to be used, is for the engineers.

Many processes for the recovery of fresh water have been proposed or employed. Among these are multiple-effect distillation, solar distillation, which are already widely used. Chemical and electrolytic methods are possible, but expensive. The most promising today are the interest-change rates and vapor-compression distillation.

The lack of good ideas which is presently obstructing progress in this field is being removed with the aid of government grants under the Suits Water Conversion Program of the Department of the Interior. The solution of the water shortage dilemma will have wide application in industrial processes if research in this field is accelerated.
