All Students Will Ballot Tuesday For Head Of Undergraduate Body; Candidates To Speak On WMIT

Candidates Named For Presidency Of Dorm Council

For the first time, all four classes will participate in the election of a President of the Undergraduate Association, as one of the most interesting campaigns in the history of the Institute. Tuesday’s balloting will decide who is to occupy the highest office in the Undergraduate Association. Originally, only the junior class chose the individual who performed the dual function of President and Vice-President of the Institute Committee. Under the new plan, the juniors will elect a separate class president for their senior year.

The winner of Tuesday’s election will provide the nucleus for the new Undergraduate Council. The Undergraduate Association, the president and a representative-at-large from each of the four classes, four dormitory representatives, three delegations from the I.F.C., two representatives from the Association of Women Students, and a member of the Activities Council make up the Undergraduate Council.

Candidate Speaks On WMIT

Harry Schreiber, and John J. Seiler, all of the Class of 1955, are candidates for the office. Profiles and statements of the candidates appear elsewhere in this issue.

Balloting will be conducted in the lobbies of Buildings 19 and 2 between the hours of 9:00 a.m. and 1:00 p.m. Institute registration cards will be required as identification for all voters.

The four candidates will appear on a half-hour broadcast of WMIT, on Monday night at 7:00 p.m. They will discuss, without preparation, questions submitted by their fellow classmates.

The Candidates For President

GERALD PERLOFF ‘55

The basic aim of Institute Committee is to fulfill student government's obligation to the people who support it, you, the students.

First, let’s look at student government. In reality, the role of student government is necessarily a divided one. Student government must reflect the long-term results of its action as they affect the M.I.T. community. Student government must represent each and every student. Institute Committee's responsibility lies in choosing the path that offers the greatest individual freedom as is consistent with the maximum good of M.I.T.

Some of the issues that have been lately discussed are fraternity crises, open house rules, administration and Field Day. Let’s discuss these further.

I feel that it is possible to preserve 'p军人' in what he wants, but you have not changed how he feels, feeling has been accomplished. Basically, you cannot legislate public opinion. Actual action must come from the individual student. Then...

(Continued on page 7)

ELDON H. REILEY ‘55

After more than two years of developing its role in recognising itself, student government has just won up to find itself in a position where it must actually justify its existence to the student body. We have had two years of theorizing, wonderful thinking, and good intentions. Now it’s time we had a little action.

There is just one issue before you in Tuesday's election. Nearly everyone agrees on what's wrong with student government. The question is what are we going to do about it, and HOW?

We all agree that student government should be more responsive to student opinion. The problem is HOW to make it so. This is no time for a detached talk about something we all agree on--this is a time for concrete action.

Here’s how I would solve the problem:

1. We would form a Liaison Committee to keep student government informed of student opinion. This group would keep abreast of student sentiment by having its membership drawn (Continued on page 8)

HARRY SCHREIBER ’55

A rapid view of the election picture this year is a fast look at student sentiment, reveal that there are no concrete issues on which this campaign for the presidency of the Undergraduate Association should be won or lost. It should be fought rather on a principle and our willingness and ability to try to uphold this principle. This principle is to make student government meaningful for the students, to make it speak for the student! What the president would have is a program that will follow a set plan throughout the year, but a flexible attitude toward student rights, and some sort of feeling for student opinion. This year, with the impending reorganization of the LeCope Institute Committee, one of more representative lines, the challenge facing us is to truly reorganize the student body, in its actions, to the public, and to the Institute.

This is a beautiful objective, but how are we going to effect it? What is needed to make student government a voice of the students, and not an echo of administration policy? This (Continued on page 23)

J O H N J. SEILER ’55

Student Government and the Administration

The basic difference between student and administrative viewpoint is a varying emphasis on short-range and long-range policies. For example, students find it difficult to understand the value of a five-year construction program in terms of their needs as students. This is for student government to represent and explain the student needs to the Administration, and to fight for policies which will alleviate present needs while still providing for a better educational environment in the future.

Education

1. The Freshman Advisory Program of the FOC will be strengthened both in scope and finances. Important advisors will be asked to attend discussions this spring with members of the Freshman Advisory Council and the faculty in the various departments.

2. I would recommend to the Institute Committee to (Continued on page 7)

Editorial

ELECTIONS TUESDAY — SO WHAT?

Each year, every undergraduate contributes approximately fourteen dollars towards the support of Institute Committee. This is accomplished without the knowledge of the student in the following manner. Fifty dollars of the 850-tuition fees is allotted by the Institute for expenditures on student affairs. This sum amounts to $200,000 per year. Of this money, some $41,000 is given to Institute Committee face in running student government and supporting such activities as the Athletic Association, the Lecture Series Committee, and the Combined Music Clubs.

On Tuesday, the entire undergraduate body, the same persons who contribute the fourteen dollars mentioned above, will choose a man to head the organization that controls this large sum of money. One of these candidates will be elected President of the Undergraduate Association.

In every election that we have ever been acquainted with, it is usual for the candidates to offer some definite platform to the voters. At M.I.T., ostensibly a school with progressive ideas, the candidates for the most important elective office in student government have not even bothered to offer a specific platform, or, in fact, anything that even remotely resembles one, to the voters.

One candidate speaks at great length about communications. If by some miracle something significant should happen at an Institute meeting, he would have the news transmitted as quickly as possible to the student body. However, definite proposals for prompting such miracles, i.e., some constructive ideas about what he would have Institute Committee actually do, never appear. Another speaks in glittering generalities about student government being responsive to the needs, desires, and opinions of students. This is a fine thought—but just that we believe that a candidate should have some positive ideas on his own, at least in the beginning. The other two candidates have roughly the same point of view. They feel that the problems connected with the reorganization of Institute Committee are such that it will be a big enough task to conquer the intricacies of the new setup, let alone accomplish any positive beneficial action for the student body.

In contrast to this common lack of a platform, all of the candidates have something to say about what they consider to be "issues" in the forthcoming election. Some of these issues include discrimination in fraternity, student assessments, financing of a Student Union Building, house regulations, and the problems of Field Day and freshman hazing. It is doubtful true that the great deal of printed material distributed in the last few weeks containing the candidates' views on key issues has been either an overt evasion of these questions, or a neutral, middle-of-the-road approach. Nevertheless, the choice among the candidates will have to be based on the admittedly fimsy basis of what their views on the issues are.

All those who have participated in any M.I.T. election realize that the successful candidate was chosen on the basis of his looks, activity, reach for cumulative average, or merely by chance. The election for President of the Undergraduate Association offers an excellent chance to put an end to this sham. For the first time in recent Institute history, all four undergraduate classes will vote together to elect a single office for the future, even if unfortunately not next Tuesday, a successful candidate for the office of President of student government will have to offer some definite program to the undergraduate body. People will become interested in having something rather than someone to vote for.

In order to demonstrate to student government and to future candidates for office in student government that we, the undergraduate body, are more than a casual interest in our own government, it is imperative that everyone vote. A truly active student government can be obtained only through a truly active, voting student body.

The Tech

The first objective should be realized with the reorganization. Closer cooperation with the Dormitory Committee, and the U.A. club would help to reach this goal. I have had varied experiences in both inside and outside student government, and with this experience I would attempt to achieve this posi-

FLASH BROWN'S TWO-HEADED BROTHER

A certain sophomore named Brown acquired the reputation "Flash" was he beginning on the gridiron, but just because he was never without an answer.

"You'd pass him on the quad and say "How's it goin', Flash" He'd answer, "Air Express." Get the pitch?

Brown often referred to his "two-headed brother" in conversations. One day a few men in his fraternity were needing him.

"Your brother's two heads must possess quite a few problems.

"Not really. The only problem was his neatness," said Flash.

"No comment," said the fraternity man.

"Don't worry about it," smiled Flash. "He couldn't find a shirt that didn't wrinkle around the collar. You see, he was often looking in two directions at once, or eating and talking on the telephone."

"What did he do?" asked Flash.

"Simple. I got him the Van Heusen Century shirt with the exclusive collar that won't wrinkle even if I got him different colar styles and colors. I got what for the shirts and the super white you should have seen the great shape his face was when he saw how these collars stay next all day and night without starch or starch."

"I guess he can really hold his heads up now," said out.

"Yes. He figures he's got a few more years with you than from other shirts. Of course, he actually only got twice the wear. He just figures in both hands."

One of the men visited Brown at Christmas, and found it all true.

ANHEUSER-BUSCH, INC.
St. Louis, Mo. 
New York, N.Y.
points out that "the reduction from 18 to 16 members and a change to equal representation will enable the student body to act as a cohesive unit."

On the question of discriminatory clauses in fraternity constitutions, Perloff states that "Any action concerning these clauses should commen- 
tially from the fraternities."

He believes that the "place of Institu-
tionalism in the present moment is to
help individual fraternities in their 
 efforts to persuade their national or-
ganizations to remove the clauses in 
question," assuming good faith on the 
part of these fraternities. He divides all fraternities into four categories: 1. Those with no dis- 
criminatory clauses nor practices, 2. Those with practices but not really want to eliminate them, 3. Those who have clauses, but do not wish to act on them, 4. Those who have clauses, but wish to act on them.

On the issue of discriminatory clauses in fraternity constitutions, Seller "cannot foresee any motion de-
signing what the administration is trying to do in the fraternities in question being pushed by Citizenship Committee this year.

IT'S BEAUTIFUL! IT'S PRACTICAL! IT'S ALL VINYL!
IT'S CHEVROLET'S DELRAY CLUB COUPE
with the year's brightest new idea in interiors!

This Delray Club Coupe combines all the colorful
sensations of a sport model with an interior that’s
designed for everyday family use. Seats, sidewalls, even the
headlining, are all of soft, luminous vinyl in color treatments
that harmonize with the exterior color of your choice.
And this new interior is just as durable and practical as it is
beautiful. The vinyl is easily washable and amazingly resis-
tant to scuffing and wear. You don’t have to worry about
little feet on the seats or the things that little hands might
spill. And for grown-ups, here at last is a coupe that pro-
vides all thebravest-want late-room of a 2-door sedan!
The Delray Club Coupe is only one of the wonderful new
Chevrolet models that make up the lowest-priced line in the
low-price field. Come in and look them over.

Zone Defense A Feature of Tech Cage Win Streak

It looks as if Tech cage fans finally have something to cheer about. The varsity cage team has swept its past four games to bring its season’s record to the .600 level.

Coach Bruce Whitehill cited improved shooting, better condition and defense from the eight-man team as the reasons for the sweep. The latest victory was over Shilensky, and most of the past four wins were at least partially a result of the alert defense.

Tech won 54-45 over Shilensky, whose great improvement was a feature of the Tech win streak. We need only point out that there is a world of difference between the almost lachrymogenic play of the Shilensky of yesteryear and the improved Shilensky of today.

Carl Hess ’56 has been playing a consistent game with a jump shot that looks to be potentially a great ball player, excellent in every department, as well as consistently the top defensive ballplayer on the club. He looked especially impressive in the second half of the Bowdoin game.

Two matches are scheduled, with approximately four more before the final game of the Bowdoin streak.

The Three-Way

As unheralded Tech freshman, Howard Cohen, came through with a series of stunning shots against the Holyoke’s Class ‘D’ state chamgs in the final round of the tournament. The team, which has won state championships every year since 1950, has a unique tradition of producing high-quality athletes.

Cohen’s second seconded Endicott of the Union Boat Club in the semi-finals, 4-1, and continued his success by defeating thirrtieth-seeded Jack Kozol of the Bowdoin Club 3-1 in the finals.

The freshman squash team lost two matches against Massachusetts and New Bedford and Bowdoin games.

Yarvis Baseball

There was a lively crowd of 1000 for the last of the Varsity Cager’s season on February 26, at 8:30 pm in Briggs Hall Field.

VARSITY BASEBALL

The third quarter was Tech’s best. The team turned the game into a rout by shooting for a 90% shooting average. Shilensky scored two field goals and a foul, and Hess finished the half seven points.

Shilensky, Weber, and Hess were the all-star selections in the East. With only two players, it helps to have a top-flight aggregation featuring height, good ball-handling, and rebounding ability. The all-stars’ big problem will be stepping Shilensky, Weber, and Hess and finding centering and has the advantages of playing an entire season together.

The game was a three-point win over Shilensky. Weber, and Hess with six points and Larry Hallee with five were the big guns. Two minutes after the beginning of the second half, the game was over when the aggregations went up slightly to just 10.

James A. Knowles, Jr., B.S.C.E., North Carolina State University, was the 1957 recipient of the D.C.E. Thomas Prize of $500. The prize is awarded annually for the best thesis in chemical engineering.

Intramural Stars To Vie March 8

Four Straight For Beavers, Down Bowdoin By 79–58

Led by the high-scoring trio of Carl Hess ’56, Stan Shilensky ’55, and Giff Ford Weber ’55, 79-58 was the most lopsided win of the season. The complete game was the most lopsided win of the season.

The first night of the tournament was the first of the final day. The Tech varsity as an entire team and the entire team turned in its finest performance of the year to take top honors. The Peabody Tech defeated Shilensky, Weber, and Hess, and won the game 79-58.

Two other top-flight intramural cagers (another transfer), Shilensky, Weber, and Hess were the all-star selections in the East. With only two players, it helps to have a top-flight aggregation featuring height, good ball-handling, and rebounding ability. The all-stars’ big problem will be stepping Shilensky, Weber, and Hess and finding centering and has the advantages of playing an entire season together.

Offensively, Weber teamed with ‘Stan Pfizer, of the Union Boat Club in making a sensational one hand shot. Weber shot 11 points for the Beavers in the game against Bowdoin.

In another case a customer wanted to reduce corrosion of steel in an acid solution. The technical service man suggested changing in cleaning procedures that lowered corrosion by 90 per cent. The new process also reduced metal loss during cleaning.

A major in ginseng and minor in solid state physics—who would have thought that Tech’s chemistry students would be doing research in chemical technology?

Today, the diverse applications of Du Pont’s 1,200 process and product lines create a need for trained sales personnel capable of understanding many different technical backgrounds.

These men must deal intelligently with problems in the design, engineering applied to such fields as plastics, ceramics, textiles, and many others.

EC, Grad House Five Wins Finale in Cage Playoffs

By Paul Jay Goldin

East Campus and Graduate House led the way into the third round of the intramural basketball playoffs by registering two victories apiece. Baker House and Alpha Tau Omega each scored one each. The latter five lost their last two. The former lost both games just failing to upset top-seeded East Campus.

The Baker five of Paul Jay Goldin, Lyle Krider, Russ Cox, and Marinas Gerakaris, the Baker five outside shooting of Larry Kaufman, and the Baker defenses for score after score after score were the sure of the rebounding of 6'7" Bill Baker, Russ Cox, and Marinas Gerakaris, the Baker five out-

The East Campus-Baker game was a thriller from start to finish. Led by Gerry Perloff, Russ Cox, and Marinas Gerakaris, the Baker five out-

When you come right down to it, you smoke for one simple reason...enjoyment. And smoking enjoyment is all a matter of taste. Yes, taste is what counts in a cigarette. And Luckies taste better.

Two facts explain why Luckies taste better. First, Luckies are actually made to taste better...always round, firm, fully packed to draw freely and smoke evenly.

So, for the enjoyment you get from better taste, and only from better taste, Be Happy—Go Lucky. Get a pack or a carton of better-tasting Luckies today.

Where's your jingle? It's easier than you think to make $25 or writing a Lucky Strike jingle like those you see in this ad. Yes, we need jingles—and we pay $25 for every one we use! So, write it like we do: happy—go lucky. P. O. Box 57, New York 6, N. Y.

If you have a kind of guy that likes to sing the running number, "Keep the jingles coming!"

Alphonse Danz
Cornell

If you need open house campaigns to cope with the problem of resettlement, the student body is a firm supporter of this belief. Concerning the present assessment, I believe that the major difficulty lies in the time difference between October, 1952 (date of occurrence) and January, 1954, (time of action). I firmly believe that concerning open house rules, we have a lot of plain campaigning to do. Mollify the problem is: Why open house rules? Let everybody know why open house rules and then most of our problem has been solved. Specifically, this can be accomplished by an informative bulletin put out by Dormitory Committee with past history and present feeling. A similar booklet put out by the administration and then if needed some open meetings of faculty, student government, and students should solve the problem. I feel that if this is followed by an informative student poll, some of the inconsistencies of present system will be taken care of as right to type of system for the M.I.T. dormitory system will develop.

Let everybody know why open house rules are needed and exchange, a constitution of the present system is solved. Let us try in every way to help each fraternity solve its particular problem.

The reason for the requirement that with the chapter presidents so that dormitory residents are sufficiently made better to taste better...always round, firm, fully packed to draw freely and smoke evenly.

I feel that if this is followed by an informative student poll, some of the inconsistencies of present system will be taken care of as right to type of system for the M.I.T. dormitory system will develop.

Let everybody know why open house rules are needed and exchange, a constitution of the present system is solved. Let us try in every way to help each fraternity solve its particular problem.

The reason for the requirement that with the chapter presidents so that dormitory residents are sufficiently made better to taste better...always round, firm, fully packed to draw freely and smoke evenly.

YOUNG AMERICA GOES
CHESTERFIELD
FOR THE FIFTH STRAIGHT YEAR
CHESTERFIELD
IS THE LARGEST SELLING CIGARETTE
IN AMERICA'S COLLEGES...
by a 1953 survey audit of actual sales in
more than 800 college co-ops and campus
stores from coast to coast. Yes, for the
fifth straight year Chesterfield is the
college favorite.

CHESTERFIELD IS THE ONLY
CIGARETTE EVER TO GIVE YOU PROOF
OF HIGHEST QUALITY—LOW NICOTINE
Change to Chesterfield today — get
smoking pleasure all the way!

CHESTERFIELD
BEST FOR YOU

At the colleges and wherever
we play, I find more and more young men and women going
for Chesterfield.
