## Dormcon To Hold Elections For Important Voting Posts

by Herbert Amster '56

The Dormitory Council has announced that elections for the voting positions of Dormitory Judicial Chairman, Dormitory Treasurer, Dormitory Secretary, and Dormitory Social Chairman will be held on Monday, March 7, 1955, at 7:30 p.m. in the Everett Moore Baker Lounge in Baker House. All those who are interested in these positions should contact either me in Baker 339, or John Seiler in Wood 515, East Campus, and should go to the Dormitory Council Meeting on Monday night in Baker House.

As the newly elected Dormitory Council chairman, I cannot emphasize the importance of these four positions. The judicial chairman is perhaps the most influential and powerful person on the Dormitory Council. His responsibility to his fellow dormitory resident is the challenge to do a good job. The treasurer is in charge of all Dormitory funds, and has the responsibilities of a typical company comptroller. The secretary is a member of the Dormitory Executive Committee, and besides performing normal secretarial functions is custodian of all records. This is a good position for an efficient innovator.

The Dormitory Committee Social Chairman runs Dormitory Week-end, the Dormitory Christmas Formal and two acquaintance dances each year. He handles a social budget of approximately \$1,000, and is in charge of the Dormitory Social Committee. The Dormitory system needs a good social chairman. We have the facilities, money, and demand for good social affairs. What we need is a good co-ordinator to put these all together. Experience for these positions is not necessary; however, a willingness to work is essential. We plan to get a lot of things done this year in Dorm Council and we need energetic leaders.

## Orchestra Giving Concert Saturday

This Saturday evening, March 5, at 8:00 p.m., the Winter Concert of the MIT Symphony Orchestra will be presented in the Kresge Auditorium. The Smith College Symphony, under the direction of Mr. Alvin Etler, will join the sixty-piece MIT Orchestra, under the direction of Professor Klaus Liepmann, Head of the Department of Music at the Institute.

Included on the program will be Beethoven's "Coriolanus Overture", Haydn's "Clock Symphony", "Trauermusik" (Music of Mourning) by Hindemith, and "Louisiana Story" by Virgil Thomson. The viola solo in the Hindemith will be played by Aaron Temkin, a graduate student at the Institute. Tickets at \$.75 each will be available in Building 10 and at the door.

Coming events for the MIT Symphony include a joint concert with the Wesley College Orchestra in the Kresge Auditorium on April 17, and a concert with the combined glee clubs of MIT and Mount Holyoke on April 20. The dedication of the Kresge Auditorium on May 8 will feature the performance by the Orchestra of a piece written by Aaron Copland especially for the occasion.

### FRESHMAN BASEBALL

There will be a meeting of all Freshman Baseball candidates in Briggs Field House at 5:00 p.m. on Thursday, March 3.

## Debating Team Participates In Dartmouth Meet

Last week the MIT Debate Team journeyed to Hanover, N.H., to participate in the Dartmouth Invitational Debate Tournament. Debating the question "Resolved, That the United States extend Diplomatic Recognition to the Communist Government of China", our entries won five out of six affirmative rounds and two out of six negative.

The two teams representing the Institute were Ed Roberts '57 and Oliver Johns '56 who split 3-3, and Lowell Wilson '57 and Ralph Moore '58 who won four while losing two.

Of the sixteen schools attending, the top four were Harvard and Dartmouth with 10-2 records, and MIT 7 and Vermont, with 7-5 scores.

On the week-end of March 11 and 12 the team will travel to Brooklyn College to defend its title at the Brooklyn College Debate Invitational (Continued on page 6)

## InsComm Studies Ethical Questions At Next Meeting

A special meeting of Inscomm will be held in the Burton House Lounge at 5:00 p.m. on Wednesday, March 2. This is the first time Inscomm has ever met in a dormitory. Although discussion will take up most of the meeting, motions can be passed at this time, making this the first combined discussion-business meeting.

The main topic under discussion will be the question of morals and ethics in student government. This question has been raised mainly in connection with the Senior Ring, Junior Prom and Senior Week Committees.

A new system of bonding members of such committees will be considered. One proposal provides that each member of a committee handling large sums of money has to post an amount of money equal to the value of the benefits this member will receive from his post. For instance a member of Junior Prom committee, who expects to receive tickets valued at \$15, must post a fifteen dollar bond. If his committee loses money on this affair, then this bond goes to meet the expense of his ticket. If the affair is a success and makes money, then the member has his money returned, and goes to the Junior Prom free.

Such a system has been in limited use in the past. However, under the new method, all committees handling \$500 or more will be required to post such a bond, with the minimum bond set at ten dollars.

Another topic to be discussed is the remuneration of elected officials, including the president of the Undergraduate Association, the president of the Senior Class, and the committees mentioned above.

The third point is titled "The Conduct of Students with the Business World." Under this heading come such things as the opening of bids. One suggestion on this subject is that contract bids are to be opened simultaneously, with 2/3 of the committee present.

In the interest of efficiency, it is planned to limit discussion to the above-mentioned topics.

### TECH ORTHODOX FELLOWSHIP

Orthodox Christian students, faculty, and employees of the Institute are invited to meet in the Library Lounge, 14-E-310, at 5:15 p.m. on Tuesday, March 1. Bishop Athenagoras Kokkinakis of the Greek Orthodox New England Diocese will speak on "Some Aspects of the Relation of Faith and Knowledge." Organization will commence for the proposed Tech Orthodox Fellowship.

## Amster To Head Dormcon; House Comm Voting Today

Herbert S. Amster '56 was elected chairman of the Dormitory Council in last Friday's elections. He received 539 votes while his opponent, Herbert W. Katz '56, received 306. The balloting took place all day Friday, the ballot box closing at 8:00 p.m. The results were known by 11:15 a.m. Saturday. Fifty-six percent of the dormitory population voted, Baker House turning in the largest percentage.

The separate elections for each of the housing groups, East Campus, Baker House, and Burton House, will be held today. The ballot boxes will be open from 8:00 a.m. to 8:00 p.m.

In Baker House, the candidates for house chairman are Morton D. Cohan '56, Irwin C. Gross '56, and Laurence I. Moss '56. Running for Baker House representative to Inscomm are Ger-

### TECH LITERARY SUPPLEMENT

"Neither a borrower nor a lender be..."

Shakespeare, Hamlet 1, 3

Be a contributor! The Tech Literary Supplement is interested in your achievements in both the fields of writing and art. Send your contributions or contact the offices of The Tech, Room 020, Walker Memorial, before March 25.

A section of the MIT Glee Club, performing at Bradford Junior College last Friday. A group of selections by the Bradford Choir and two finale numbers by the combined organizations rounded out the program. This was the first formal concert of the spring term, with the Glee Club's next performance scheduled at Lasell Junior College this Friday.

## Glee Club Sings At Bradford; To Perform With Lasell Friday

The MIT Glee Club, under the direction of Professor Klaus Liepmann, head of the Department of Music at the Institute, performed at Bradford Junior College on Friday evening, in the second of a series of three joint concerts with neighboring schools.

The first of the three concerts was an informal affair with a chorus from the Radcliffe Choral Society in the Little Theater on February 11. This concert marked the first use of the Kresge Auditorium by a group outside the Institute, and also the first MIT-Radcliffe get-together in many years.

Last Friday's formal concert at Bradford featured the combined glee clubs in Randall Thompson's "Alleluia" and Haydn's "The Heavens Are Telling," from "The Creation." In the groups performed by each club separately Alan Storms '58, tenor, and Bill Roberts '58, baritone, were featured as soloists. A party followed the concert.

This Friday the sixty voice MIT group will travel to Lasell Junior College for their annual joint concert. The MIT singers will be forced to use their full power in the combined numbers, since the Lasell Orpheum Society includes more than one hundred fifty voices. Among the numbers to be performed by the MIT Glee Club at this concert will be "Oh, What Delight," a chorus from "Fidelio" by Beethoven, "Thy Life, a Brooklet" by Schubert, and the Soldiers and Students' Chorus from "The Damnation of Faust" by Berlioz.

## Hillel Meets

Dr. Abraham Duker, outstanding authority on Jewish communal affairs, will speak under the auspices of the B'nai B'rith Hillel Foundation at MIT on Thursday evening, March 3, at 8:00 p.m. in the Hayden Library Lounge, and on Friday evening March 4, again in the Hayden Library Lounge, following Sabbath Services scheduled for 7:15 p.m.

The general theme of the two lectures by Dr. Duker will be "The Cultural and Religious Development of the American Jewish Community." His first lecture, on Thursday, March 3, will deal with "The Colonial Period to the Civil War," while the second lecture, on March 4, will concern itself with "The Civil War to the Present Day."

This is a second in a series of educational programs held in connection with the American Jewish Tercenary, the observance of the 300th anniversary of the first Jewish settlement in this country. Everyone is cordially invited to attend.

## Hi-Fi Recordings Of Concert Band Start Sales Wed.

The first in a series of high fidelity recordings by the MIT Concert Band will go on sale in Building 2, Wednesday, March 2. The records, which are available only in limited supply, were made last April when the band was at its highest peak of performance in its five year history.

The MIT Band is probably the only college musical organization in the country that restricts itself to the performance of original compositions written for band only. This policy is in harmony with the musical trend of the last half century which has been to expose the public ear to good, modern, band music.

The new recording, entitled "Five Twentieth Century Compositions for Symphonic Band", is a successful attempt at capturing the tone color that only a symphonic band playing custom-written music can produce.

The five compositions on the recording are: "Suite in E# for Military Band", by Holst; "Suite Francaise," by Milhaud; "March," Opus 99, by Prokofiev; "Suite of Old American Dances," by Bennett, and "Marche Baroque," by Kazdin. The extremely well written suite by Gustav Holst captures the character of each instrument, and has the property of growing in appeal with each listening. "Suite Francaise," the most difficult (Continued on page 6)

# Calendar of Events

## WEDNESDAY, MARCH 2

- Biology Department. Colloquium: "Electrophysiological Studies of Flight Muscles." Dr. Kenneth D. Roeder, Tufts College. Room 16-310, 4:00 p.m. Tea will be served in Room 16-711 at 3:30 p.m.
- Civil and Sanitary Engineering Departments. Hydromechanics Seminar: "Hydraulic Model Performance of Peligre Dam Spillway and Outlet Works." Mr. Robert S. Gooch, Room 48-208, 4:00 p.m. Refreshments in Room 48-208 at 3:45 p.m.
- Electrical Engineering Department. Colloquium: "How to Send Information Over Noisy Channels Without Making Mistakes." Prof. Peter Elias. Room 10-275, 4:00 p.m. Refreshments in Room 10-280 at 4:30 p.m.
- Electrical Engineering Department—Cooperative Course VI-A. Sophomore Orientation Lecture by engineers of the General Radio Company. Room 10-250, 4:00 p.m. Freshmen welcome as part of freshman orientation program.
- Mathematics Department. Lecture Series—III: "Morse Theory with Applications." Prof. Raoul Bott, University of Michigan. Room 2-242, 4:00 p.m. Open to public.
- Architecture and Civil and Sanitary Engineering Departments. Lecture Series—I: "Thin Shell Construction in Mexico." Mr. Felix Candela, Mexico City. Room 1-390, 4:00 p.m.
- Hillel Foundation. Business meeting. Crafts Lounge, East Campus, 5:00 p.m.
- Lecture Series Committee. Lecture: "Turkey, Russia, and the United States." Hon. Kasim Gulek, Turkish statesman and diplomat. Little Theatre, Kresge Auditorium, 5:00 p.m. Admission free.
- Inter-Varsity Christian Fellowship. Lecture: "In Prayer and Meditation." Dr. Peter Haile. Jackson Lounge (10-280), 7:00 p.m.
- Varsity Hockey Team. Game with Tufts College. M.I.T. Hockey Rink, 7:30 p.m.

## THURSDAY, MARCH 3

- Architecture and Civil and Sanitary Engineering Departments. Lecture Series—II: "Thin Shell Construction in Mexico." Mr. Felix Candela, Mexico City. Room 1-390, 4:00 p.m.
- Physics Department. Colloquium: "Knowledge of Man-made Diseases of Interest to Research Workers." Dr. Harriet L. Hardy. Room 6-120, 4:15 p.m.
- Food Technology Department. Acquaintance Smoker for Class of 1958. Lecture on "Opportunities in the Food Industry"; tour of department laboratories; New England Clam Chowder Supper. Room 16-310, 4:30-7:30 p.m.
- Lecture Series Committee. Film: "The Black Rose" (Technicolor) with Tyrone Power and Orson Welles. Room 10-250, 5:05, 7:30, and 9:45 p.m. Admission: 30 cents.
- Hillel Foundation. Lecture Series—I: "The Cultural and Religious Development of the American Jewish Community—The Colonial to the Civil War Period." Mr. Abraham G. Duker. Hayden Library Lounge, 8:00 p.m.

## FRIDAY, MARCH 4

- Mechanical Engineering Department. Seminar: "Recent Advances in Combustion, Experiment and Theory." Prof. Howard W. Emmons, Harvard University. Room 3-370, 3:30 p.m. Coffee will be served in Room 3-174 from 3:00-3:30 p.m.
- Hillel Foundation. Lecture Series—II: "The Cultural and Religious Development of the American Jewish Community—The Civil War to the Present Day." Mr. Abraham G. Duker. Hayden Library Lounge, 7:15 p.m.

## SATURDAY, MARCH 5

- M.I.T. Bridge Club. Master Point Championships. Baker House Cafeteria, 1:30 p.m.
- Smith College and M.I.T. Symphony Orchestras. Joint concert: Beethoven, Haydn, Hindemith, and Thomson. Kresge Auditorium, 8:00 p.m. Tickets (75c) may be purchased by mail from Room 301, Walker Memorial, or at the door.
- Informal Dance Committee. Dance—"Five Leagues under the Charles." Walker Memorial, 8:30 p.m.-12:00 midnight. Admission: \$1.00 per couple.

## EXHIBITS

An exhibition of paintings by Josef Albers, painter, teacher, and head of the Painting Department at Yale University, will be held in the New Gallery of the Charles Hayden Memorial Library from March 6-27. Hours: Monday through Friday, 9:00 a.m.-5:00 p.m.; Saturday and Sunday, 2:00-5:00 p.m.

Photographic Salon prints by Clarence T. Arai of Seattle, Washington, will be on display in the Photo Service Gallery, Basement of Building 11, through March 13. Included are several prints accepted for hanging in various International Salons, as well as top prize-winners in American and international competition.

An exhibition of ceramic sculpture by Prof. Frederick H. Norton will be shown in the Faculty Club Gallery through March 14.

## CALENDAR OF EVENTS

The Calendar of Events appears in THE TECH on Tuesday with announcements for the following eight days (Wednesday through Wednesday). Notices, typewritten and signed, must be in the office of the editor, Room 7-204, not later than noon on Thursday prior to the date of publication. Material for the Calendar of March 9-16 is due March 3.

## through the mail

To the Editor of The Tech.

Dear Sir:

I'm sure we are all aware of MIT's over abundance of buildings and lack of "campus".

I think most of us will agree that something should be done. I also think that this "mostest for the cheapest" would be the rolling and planting (of grass) on Briggs Field.

Sincerely,  
 Philip Presser '57

## APO Elects Weinstein President; Will Have Smoker On Thursday

Alpha Chi Chapter of Alpha Phi Omega, the National Scouting Service Fraternity, installed its new officers for the coming year at a formal ceremony Wednesday, February 23. To serve as president is Harris Weinstein '56, last year's vice-president. The three vice-presidents for this year are: George Borrmann '57,

membership; Don Norman '57, service; and Bernard Levy '57, fellowship. Among the other officers are Bob Berg '57, treasurer; Richard Glanz and Phil Banks, both '58, as recording and corresponding secretary respectively, and Michael Hall '58, as historian.

A meeting will be held this evening in the Burton Radio Room to lay final plans for a proposed swim instruction program which will give some one hundred Cambridge Boy Scouts training in swimming and water safety. A Smoker for those interested in the work of Alpha Chi Chapter, which is only one of over two hundred and fifty chapters, will be held in Tyler Lounge, Walker Memorial, on Thursday, March 3, at 5:00 p.m. APO men will be on hand to answer any questions about the fraternity and its work. All men previously connected with the boy scout movement are eligible for membership regardless of rank attained or other fraternity affiliations. Refreshments will be served.

## the college world

by Everett H. Trop '57

The tide flows and ebbs, yet ever ebbing lower than it returns; the infant term has begun her relentless draining—our blood pales.

Not only our blood is diminishing, but also the life of our friends at Troy, for Rensselaer has announced a \$200 tuition increase, to \$1000. And in baleful dread of a similar disaster here we furtively glance about.

From one college arrives a learned dissertation upon the use of BeBop terminology by the Bard:

Hector was gone but Helen was not (*Troilus and Cressida*).

... And I ... will dig thee ... (*Timon of Athens*).

Is he gone? ... most certain ... (*Anthony and Cleopatra*).

He is more and more the cat ... (*All's Well That Ends Well*).

... The most ... we indeed least are ... (*Taming of the Shrew*).

Maria ... what a deal ... (*Romeo and Juliet*).

Even thus he rates the babe ... (*Timon of Athens*).

Go, trumpet ... (*Henry VI*).

... Too too solid ... (*Hamlet*).

You kill me ... (*Much Ado About Nothing*).

... George for us ... (*Henry VI*).

... That square ... (*All's Well That Ends Well*).

I could endure anything before but a cat, and now he's a cat ...

(*All's Well That Ends Well*).

Lest any of you shrank in fear of your purse when I ventured to suggest that Tech adopt a blazer, as every leading college and university either has done or is in the process of doing, I gleefully (O JOY) repeat that the cost is far beneath that of the ordinary sport jacket. Total cost to Caltech men—\$12.

A new idea for professors hard up for cash—A professor at the University of Turin, Italy, sold 1800 copies of the questions he was planning to use on his next examination. (Caution: he was arrested).

An extremely beneficial course has recently been instituted at Uconn. Our friends on this nearby campus are now privileged to have a course in "Fly tying and fishing techniques." All right, we'll bite.

In direct contrast to the recent action at RPI (O WALLET) it has been suggested at the University of Louisville that the first two years of college be offered "free of cost to high school graduates." The big problem: where would the money come from?

URGENT!!!! TO ALL WHO WANT TO GET THROUGH COLLEGE WITHOUT TRYING!!!! According to a professor at a leading college it is quite easy, if one follows the eight simple rules which he promulgates.

1. Bring the professor newspaper clippings dealing with his subject. If you don't find clippings dealing with his subject, bring in clippings at random. He thinks everything deals with his subject.

2. Look alert. Take notes eagerly. If you look at your watch, don't stare at it unbelievably and shake it.

3. Nod frequently and murmur, "How true". To you this seems exaggerated. To him it is quite objective.

4. Sit in front, near him. (Applies only if you intend to stay awake).

5. Laugh at his jokes. You can tell (if it's a joke, that is). If he looks up from his notes and smiles expectantly, he has told a joke.

6. Ask for outside reading. You don't have to read it. Just ask.

7. If you must sleep, arrange to be called at the end of the hour. It creates an unfavorable impression if the rest of the class has left and you sit there alone, dozing.

8. Call attention to his writing (ability). Produces an exquisitely pleasant experience connected with you. If you know he's written a book or an article ask in class if he wrote it himself.

It is unfortunate that I have found two instances of infringement of academic freedom. First, the banning "on moral grounds" of "The Moon is (Continued on page 6)

On Campus with Max Shulman  
 (Author of "Barefoot Boy With Cheek," etc.)

## SCIENCE MADE SIMPLE: NO. 2

Though this column is intended solely as a vehicle for well-tempered drollery, the makers of Philip Morris have agreed to let me use this space from time to time for a short lesson in science. They are the most decent and obliging of men, the makers of Philip Morris, as one would guess from sampling their product. Only from bounteous hearts could come such a pleasurable cigarette—so felicitously blended, so gratifying to the taste, so soothing to the psyche. And, as though bringing you the most agreeable cigarette on the market were not enough, the makers of Philip Morris have enclosed their wares in the Snap-Open Pack, an ingeniously contrived wrapping that yields up its treasure without loss of time or cuticle. And, finally, this paragon of cigarettes, wrapped in the paragon of packages, can be had in king-size or regular, as your taste dictates. Who can resist such a winning combination? Not I.

A few weeks ago in this column we had a brief lesson in chemistry. Today we take up another attractive science—medicine.

Medicine was invented in 1066 by a Greek named Hippocrates. He soon attracted around him a group of devoted disciples whom he called "doctors". The reason he called them "doctors" was that they sat around a dock all day. Some fished, some just dozed in the noonday sun. In truth, there was little else for them to do, because disease was not invented until 1492.

After that doctors became very busy, but, it must be reported, their knowledge of medicine was lamentably meagre. They knew only one treatment—a change of climate. For example, a French doctor would send all his patients to Switzerland; a Swiss doctor, on the other hand, would send all his patients to France. By 1789 the entire population of France was living in Switzerland, and vice versa. This later became known as the Black Tom Explosion.

Not until 1924 did medicine, as we know it, come into being. In that year in the little Bavarian village of Pago-Pago an elderly physician named Winko Sigafos discovered the hot water bottle. He was, of course, burned as a witch, but his son Lydia, disguised as a linotype, smuggled the hot water bottle out of the country. He called on Florence Nightingale in London but was told by her housekeeper, with some asperity, that Miss Nightingale had died in 1910. Lydia muttered something and, disguised as a feather boa, made his way to America, where he invented the blood stream.

Medicine, as it is taught at your very own college, can be divided roughly into two classifications. There is internal medicine, which is the treatment of internes, and external medicine, which is the treatment of externes.

Diseases also fall into two broad categories—chronic and acute. Chronic disease, is of course, inflammation of the colon, which can be mighty painful, believe you me! Last summer my cousin Haskell was stricken with a chron attack while out picking up tinfoil, and it was months before the wretched boy could straighten up. In fact, even after he was cured, Haskell continued to walk around bent over double. This went on for some weeks before Dr. Caligari, the lovable old country practitioner who treats Haskell, discovered that Haskell had his pants buttoned to his vest.

Two years ago Haskell had Addison's disease. (Addison, curiously enough, had Haskell's.) Poor Haskell catches everything that comes along. Lovable old Dr. Caligari once said to him, "Son, I guess you are what they call a natural born caterer."

"The joke is on you, Doc," replied Haskell. "I am a third baseman." He thereupon fell into such a fit of giggling that the doctor had to put him under sedation, where he is to this day.

But I digress. We were discussing medicine. I have now told you all I can; the rest is up to you. Go over to your medical school and poke around. Bring popcorn and watch an operation. Fiddle with the X-ray machines. Contribute to the bone bank ... And, remember, medicine can be fun!

©Max Shulman 1955

The makers of PHILIP MORRIS, who bring you this column, have nursed their flavorful tobaccos to bring you the most pleasurable smoke obtainable.

The bidding: N E S W  
North-South 1C 3H 3S P  
Vulnerable 4H P 5D P  
6S P P P

Opening lead: Six of hearts

Good bidding and excellent play gave the North-South pair a top score, Saturday at the MIT Bridge Club. East did his best to break up the bidding with a pre-emptive three heart bid but South would not be kept out of the bidding, which proceeded naturally to the slam.

The opening heart lead was taken by the ace, and declarer stopped to count the hand. Since East had shown seven hearts, it seemed probable that West had most, if not all, of the outstanding trump. Declarer noted that all of his trumps except the four were high and decided that a cross-ruff was the best attack. He cashed his king of diamonds, and ace-king of clubs. A small club was ruffed in his hand by the eight of trumps, the ace of diamonds was cashed, and declarer then ruffed diamonds on the board and clubs in his hand, using all high trumps. Finally he took his king of spades, and gave up the last trick to West's trump. In all, declarer took two diamonds, two clubs, one heart, six ruffs, and the king of spades for his slam. The hand was a nearly classic example of the cross-ruff. Note that seven can be made by another way of playing the hand, but it is nowhere near as foolproof as the way the hand was played.

This week's winners at the MIT Bridge Club were Al Hahn and Brad Barnes, playing North-South, and Dick Kain and Mal Fritz, playing East-West.

IMPORTANT NOTICE TO SENIORS

... regardless of military status ... who are graduating in:

- MECHANICAL ENGINEERING
- ELECTRICAL ENGINEERING
- AERONAUTICAL ENGINEERING
- METALLURGICAL ENGINEERING

Representatives of

HAMILTON STANDARD

Division of United Aircraft Corporation  
will be here for

INTERVIEWS

THURSDAY MARCH 3, 1955

For 35 years the name Hamilton Standard has symbolized the world's finest aircraft propellers for both piston and turbine engines. Now it stands, too, for the finest in a growing line of jet aircraft equipment such as:

- JET FUEL CONTROLS (electronic and hydro-mechanical)
- JET TURBINE STARTERS (pneumatic and combustion)
- HYDRAULIC PUMPS (variable displacement)
- AIRCRAFT AIR CONDITIONING SYSTEMS

Many Hamilton Standard engineers have won international recognition for their contributions to aeronautical science. The same opportunities await young engineers who join our growing organization today. After a brief training and orientation program at high starting salary, you can advance steadily in one of our many fields of engineering activity—the one most suited to your desires and talents.

Our modern plant is ideally located at Bradley Field, the main air terminal, only 15 miles from both Hartford, Conn. and Springfield, Mass.

For appointment and additional information see your placement officer.

DIVISION OF UNITED AIRCRAFT CORP.  
WINDSOR LOCKS, CONNECTICUT

Among the engineers now building rewarding careers for themselves at Hamilton Standard are THESE M. I. T. GRADUATES

- Richard A. Allen, '49  
Assistant Project Engineer
- Harry M. Arnold, '32  
General Supervisor — Spare Parts
- Carl F. Baker, '31  
Quality Manager
- Charles E. K. Carlson, '48  
Designer
- Donald W. Cookley, '52  
Sales Engineer
- Charles B. Conwell, '31  
Supervisor — Tools & Methods
- Courtenay Crocker, Jr., '42  
Project Engineer
- Thomas E. Doherty, '29, MS  
Senior Project Engineer
- George L. Estes, '39  
Assistant Sales Manager
- Ermanno Garaventa, '35  
Chief Development Engineer
- Robert W. Jeffery, '52  
Senior Test Engineer
- Robert Johnson, '44  
Assistant Project Engineer
- Samuel J. Loring, '36  
Consulting Engineer
- John J. McCarthy, '51  
Senior Test Engineer
- Peter Meggie, '47  
Senior Analytical Engineer
- John W. Meier, '41  
Project Engineer

- E. Paul Moschella, '47  
Staff Assistant — Technical
- Edward Mosehauer, '37  
Chief Design Engineer
- Jerome Pickett, '52  
Metallurgist
- John M. Rand, '54  
Engineering Trainee
- John F. Raye, '47  
Senior Analytical Engineer
- Albrecht E. Reinhardt, '37, '35, '41, MS  
Project Engineer
- Thomas B. Rhines, '32  
Assistant Chief Engineer
- George Rosen, '37  
Chief Aerodynamicist
- Paul R. Rothery, Jr., '51  
Metallurgist
- Fred E. Scheidler, '51  
Analytical Engineer
- Wilford H. Shaw, '42  
Chief Inspector
- Lester W. Smith, '50  
Flight Vibration Engineer
- Ralph H. Thornton, '52  
Sales Engineer
- Harold L. Van Alstyne, '27, MS  
Designer
- John L. Warner, '52  
Design Analytical Engineer
- Roger D. Weatherbee, '51  
Assistant Project Engineer

reviews

"Battle Cry"

by Richard Teper '56

Battle Cry. Warner Brothers near perfect example of how to disembowel a good book, is now appearing at the Metropolitan Theater in downtown Boston. Anyone interested in an excellent recruiting mechanism might go down and see it. If you like to see good motion pictures, go elsewhere.

The story is taken from the novel of the same name by Leon P. Uris, who also wrote the screen version. The book tells an almost plausible story of a marine division from boot camp to Saipan and home again. There are enough sex scenes to keep the more frustrated leader interested, and not too many, nor in too great detail, to bore the more sophisticated reader. Several distinct personalities are created, and a good story is unraveled based on these personalities. The film, unfortunately, leaves a few things out, and they aren't those subjected to the censor's scissors. The film omits the personalities and story so perfectly that director Raoul Walsh has managed to create a run-of-the-mill series of abruptly ending sex scenes.

Poor Acting

Van Heflin, as Sam Huxley, does a creditable job of leading a cast of poor acting ability through the Guadalcanal and Tarawa Campaigns, but even he has a tough time when he has to beg his commanding general to let his "boys" storm a Saipan beachhead. No one else has a big enough part to do much damage by himself, but when they get together for a combined of-

sensive they manage to explain to the audience why some performances are considered good and others bad.

The triumph of mismanagement comes in the only big battle scene of the picture. The site is the beach on Saipan and Huxley's "boys" have finally spearheaded an invasion. This is some two hours after the picture begins, and the sudden appearance of stereophonic sound at this point is somewhat startling if not ridiculous. It is questionable as to whether they were trying to prove something to MGM or that the sound track was off, but doubtful that the effect was as anticipated.

The only other thing one could find wrong with the picture was some of the scenery. It seemed a bit odd that the trees in the jungle of Guadalcanal should have a spacing and alignment equalled only by those between the Hayden Library and Walker Memorial.

LSC Gives Oppenheimer Film; Gulek Will Speak Tomorrow

Today, March 1st, The Lecture Series Committee will present an hour-long filmed interview between Dr. J. Robert Oppenheimer and Edward R. Murrow. Filmed at Princeton's Institute for Advanced Study, where Dr. Oppenheimer presides as director, it is a digest of a 2½-hour interview, a portion of which appeared on "See it Now" last fall. The distribution of the film was made possible by a grant of the Ford Foundation's Fund for the Republic.

In the interview, Dr. Oppenheimer's impelling and sincere personality is evident as he states his ideas on security and secrecy as related to advanced scientific research. "There aren't any secrets about the world of nature. There are only secrets about the thoughts and intentions of men. There are sometimes secrets because a man doesn't like to know what he is up against if he can avoid it."

The showing will be in Huntington Hall, Room 10-150 at 5:00 p.m. There will be no admission charge.

Tomorrow, March 2, the Honorable Kasim Gulek, Turkish statesman and

diplomat, will give a talk in the Little Theater of the new auditorium on "Turkey, Russia, and the United States". The lecture, also sponsored by the Lecture Series Committee, is as usual, open to everyone and there is no admission charge.

Dr. Gulek was born in Adana, Turkey, in 1910. He has studied in Istanbul, at U. of Paris, Columbia U., King's College, Cambridge, England, and at the Universities of Hamburg and Berlin. He has earned degrees in commerce, economics, and law. Dr. Gulek has worked at the Chase National and Federal Reserve Banks in New York City and at the Bank of England. He has long been active in Turkish domestic and foreign affairs. He served three terms in the Turkish Parliament, and has held positions as Minister of Public Works, Minister of Communications, and Minister of State. He was elected chairman of the United Nations Commission on Korea. At present, Dr. Gulek is Secretary General of the Peoples' Republican Party, a position he has held for four years.

## Weightlifting Team Places; Meet Held In Walker Gym

The MIT weightlifting team was edged out for first by one point in the Eastern Intercollegiate Championship last Saturday as CCNY took the title. The meet, held in Walker gym was the first of its kind held in New England. CCNY compiled a total of 21 points while the engineers could manage only 20 with Boston College, Drexel Institute of Technology, Eastern Nazarene College, University of Massachusetts, and University of Pennsylvania following in that order.

In the 123 pound class Stu Mapes '58, took third with a total of 305 pounds. In the 132 pound class Ralph Wanger '55, took the initial first for the engineers as he totaled 530 pounds. In the same division Ray Roberts '55, was edged for third by five pounds. Tom Alexander took second in the 148 pound class and George Ploussious '55, was first in the 165 pound class. This was the crucial division of the meet as Eric Thompson '55, was edged for second by CCNY. In the 181 pound class Art Butz '55, not only took first easily, but smashed the records in the press, snatch,

and clean and jerk by a wide margin. Shugart of Drexel also broke the press record and tied the clean and jerk record in the heavyweight division.

The engineers were unable to place in either the 198 pound or the heavy-weight divisions but had a large lead over the third place team by this time.

This meet finished out the regular season for the musclemen. The national championships will be held in New York in a month and several team members will probably be entered in this event.

## Cantabs Top Wrestlers; Season Record Ends 4-3

A strong Harvard wrestling team edged out the Engineer grapplers in their final meet of the season by a 13-9 score. Two pins gave the crimson their victory by a five point margin. Both teams won four matches apiece. The meet was not decided till the last match of the day when Harvard's 240 pound heavyweight decisioned Tony Vertin.

MIT started surprisingly well, winning the first two matches easily. Leadoff man Jim Simmonds completely outclassed his opponent to take a 3-0 decision. Captain Jack Graef wrestled fast and hard to pick up another decision and put the Beavers in the lead 4-0. Harvard evened up the score when Dick Dangel was pinned in the third period.

Tech again regained the lead when Tom Callahan overpowered his man in the 147 lb. class. John Hirschi appeared certain to pick up an easy win at 157 pounds as he pushed the Crimson grappler all over the mat for the first two periods. Attempting an escape in the last period he hurt his ankle but after a break to tape it up elected to continue. His wrestling for the duration of the bout was not indicative of any injury as he reversed and rode out the match.

Hal Becker lost a close match at 167 pounds but MIT did not lose the lead until the next match when Mike Brenner was pinned. With the Cardinal and Gray one point in the hole Tony Vertin, competing in the unlimited class, tried hard but could not make up for a fifty pound weight differential.

The freshmen wound up their winless season by taking only one match from a powerful Harvard team. Ray Ortler finished an unbeaten season when he took the only match of the afternoon for the 58ers. The final score stood at 23-3.

This was the last meet of the season and the matmen have come up with a 4-3 record for the season. George Myerson was again coaching at Tech after an absence of four years and has done a good job with one of the teams generally considered weak in the NEIWA. The championships are to be held at Tufts March 4th and 5th.

## CONVAIR

(SAN DIEGO)

is coming to M.I.T., MARCH 10 and 11

TO INTERVIEW

ELECTRICAL, MECHANICAL, AERONAUTICAL  
ENGINEERS ABOUT TO GRADUATE

At Convair, in beautiful, smog-free San Diego, California, you will find the diversity of challenging, far-reaching projects that offers you the unlimited career opportunity you seek.

This is young country, beautiful, exciting country—the very heart of the busy, vital aircraft and missile industries. And good, young engineers are needed now to grow with new, long-range aircraft and missile programs.

You will find the Convair Engineering Department a genuine "engineer's" engineering department—imaginative, energetic, explorative. You will discover the very latest engineering equipment, excellent working conditions, salary, personal job advantages, and opportunities for continuing education.

Remember these facts about Convair: Convair was awarded the Nation's first production missile contract and the first production contract for supersonic all-weather interceptors.

Convair has the greatest diversity of aircraft engineering projects in the country, including high performance fighters, heavy bombers, large flying boats, transports, trainers, seaplane fighters, vertical take-off aircraft and guided missiles.

Convair has a completely integrated electronic development program devoted to advanced development and design on missile guidance, avionic projects, radar systems and special cathode ray tubes.

Now you are invited to get full information about your career at Convair. Talk it over with our Convair Engineers on your campus soon.

**GRADUATING CIVIL ENGINEERS** interested in the field of aircraft structure are also invited to apply.

Graduate degree candidates in Engineering, Mathematics or Physics are invited to discuss Convair opportunities in the general field of advanced engineering analysis and design.

CONVAIR ENGINEERS WILL INTERVIEW ON YOUR CAMPUS  
MARCH 10 and 11

arrange your personal interview through your Placement Bureau.

## CONVAIR

A Division of General Dynamics Corporation

Sunny, smog-free San Diego on the coast of Southern California offers you a way of life judged by most as the Nation's finest for year-round climate, beauty and indoor-outdoor living. Sailing, fishing, swimming, golf, skiing, mountain and desert resorts, Hollywood and Old Mexico are all within minutes.

## Pucksters Split; Beat Holy Cross, Lose To Huskies

The Beaver skaters split in two week-end contests, routing a Holy Cross sextet 12-4 while on the receiving end of Northeastern's 12-6 barrage. In both games the Engineers jumped out to commanding leads but the Huskies came back with five straight scores to take a 5-3 first period lead. The visitors outscored the Beavers 4-1 in the second period and 3-2 in the final period to gain their second decision of the year against the Engineers. In the Crusade game, the Martinmen had a 5-0 lead before Holy Cross scored. The Beavers led 7-1 at the end of the first period, 11-4 at the end of the second period and 12-4 at the final buzzer.

beat the goalie at 1.51. Sullie had another goal and two assists in this period and Captain Harold Wells had two goals and one assist. Gus Schwartz '56, Fletch Hosmer '56 and Bev Goodison '57 rounded out the scoring in the period. Hank Durivage '57, Schwartz, Goodison and Stu Patterson '57 gave the Beavers a 11-4 at the end of the second period. Wells completed his "hat trick" at 7:18 of the last period to make the final score 12-4. Wells and Sullivan each had six points to lead the Engineers to their fourth victory in the last five games.

### Huskies Score Nine Straight

The Northeastern team proved to be the best skating team that the Beavers had faced in a long time. Bev Goodison got the Beavers off to

an auspicious start with a score at 0:22 assisted by Sullivan. Two rapid goals by Patterson and Fred Culick '56 at the 5 minute mark gave the Beavers a 3-0 lead, much to the approval of the large crowd watching the contest. Here the Huskies took command and scored nine consecutive times before Sullivan scored at 18:53 of the second period making the tally 9-4. After two more Northeastern scores early in the last period, Sullie got his second score of the game. Harold Wells scored late in the period to make the final score 12-6.

Several fights broke out in the contest and two double penalties were given. The Huskies' outstanding center, Ritchie Cavanaugh had three goals and two assists followed by teammate Fred Vorderer with two goals and two assists.

### Sullivan, Wells Lead Scoring

John Sullivan '56 began the scoring in the Holy Cross contest as he

## Swimmers Drop Two, Frosh Win; Wilson Breaks Own 200 Record

Friday night Union College moved in and dropped the mermen to a 61-23 defeat. The engineers' only first of the meet came in the 400-yard freestyle relay as Union was disqualified.

Union started strong and MIT was unable to place above third until the diving as Ed Bryson '57, was barely edged out for first. In the 100 free Bob Jantzen '56, was inserted in place of Capt. Tom Hamilton '55, who had taken ill during the meet, and emerged with a second. Jantzen had been swimming the backstroke until this time but came through with the best time of any man on the team this year. In the 200-yard breaststroke Fred White '55, and Paul Cotter '57, took second and third respectively as the winner, Kim of Union, set a new Union record in the event.

Saturday afternoon the swimmers took on RPI and the story was very nearly the same. Bryson was in good form again and took the diving with 69 points. Jantzen improved his time as he hit a 5.8 in the 100 free and pulled down second. Mike Nauenberg '55, took over well for Jantzen in the

backstroke and was beaten out for first by a stroke. In the last event the engineer freestyle relay team led all the way until the last length and were edged out for first.

The freshmen fared better as they dumped Moses Brown Academy by a 51-15 count. The meet preceded the varsity meet Saturday and was highlighted by Dave Wilson's record-breaking performance in the 200-yard freestyle. Wilson hit a 2:04.6 to smash his own record by two seconds.

The frosh also swept to every other first except the medley relay. Carter Smith and John McAvity were one-two in the 50 free and Joe Burval came up with an easy win in the 100-yard breaststroke. Al Johnson and Al Hortman were both clocked at 1:07.7 in the 100 back with Johnson getting the nod. Captain Will Veeck took the 100 free with an excellent time of 57.7, Dan Holland took his initial win of the year in the dives as Joe Timms took third. The relays were both an anti-climax as the engineers took the freestyle and dropped the medley.

## Amherst Quintet Tops Tech Team

The Engineer varsity cagers had the misfortune to run into an erratic Amherst quintet on its best night of the season. The Lord Jeffs, who had bowed to Bowdoin, an MIT victim earlier this season, matched a good Tech zone defense with a tighter one of their own and turned in a fast-breaking and torrid shooting performance that withered the perpetually strong Engineer defense. The Jeffs beat the zone the only way it could be beaten, with a fine fast break and some excellent outside shooting. Scott, Amherst guard, broke their gym record with 39 points. He had nineteen field goals, half on long set shots and the remainder on the fast breaks he led.

The game was close for the first few minutes. Tech trailed, 8-6, when Amherst started to move. Hotter than the proverbial firecracker, they amassed a 30-12 lead, and moved to a 43-21 half-time advantage. With both teams using all their players the game ended, 79-48. Dee Vergun led the Beavers with 24 points.

## Applications For Deferments Must Be Filed Soon

Students who wish to be deferred in Class 2-S by the Selective Service System over the Summer and the next academic year must fill out a set of SSS Forms 109 and a questionnaire at Headquarters of the MIT Advisory Committee on Military and Selective Service, Room 14-S136. This office has a supply of these forms and many students have already filled out the first six questions in preparation for filing with the Local Boards by the Registrar's Office in July. May we urge that students come in as soon as possible rather than put it off and cause a last minute rush which could result in delays.

In view of the fact that the above-mentioned forms do not constitute a request for deferment in Class 2-S (student), it will be necessary for this office to prepare and send to each Local Board a letter requesting deferment for the next academic year. In this connection, a questionnaire

has been prepared which when filled out will give the necessary information upon which to base such a letter. Letters and forms cannot be sent automatically to Local Boards. THIS MUST BE DONE AT THE INDIVIDUAL REQUEST OF EACH STUDENT.

General Hershey allows the colleges thirty days after the end of the academic year in which to file all of the Forms 109 with the Local Boards, and this procedure will be continued. These forms are sent annually to the Local Boards and show the students' scholastic standing for the previous academic year and are not based on cumulative rating as many students mistakenly believe.

Almost all Class 2-S deferments have an expiration date in June or July. However, students should not be surprised if they do not receive an extension of classification until later

on in the summer when the Boards have had a chance to make their determinations. In other words, the Boards are required to reconsider the classification of each student after receipt of Form 109 and a letter requesting continuation of Class 2-S deferment.

It should be emphasized that Headquarters of the Advisory Committee on Military and Selective Service will be open during the entire summer and any student who has a question or receives a communication from his Local Board during that time should feel free to write to Mrs. Lutz. This applies particularly to students who receive SSS Questionnaires.

Any change of classification test scores must be reported to this office by June 10.

## AEPi Has Top Rating

Alpha Epsilon Pi led all other fraternities in term ratings for this past semester, with a 3.61 average rating. Second and third in the interfraternity competition were Beta Theta Pi and Sigma Nu with average ratings of 3.59 and 3.53 respectively.

The average term rating for the Institute as a whole was 3.32, while the average for the fraternity system was 3.28. This is the smallest differential in eight years.

In the pledge division Sigma Phi Epsilon led with an average rating of 3.63. ATO was second with 3.60, and Phi Beta Epsilon third with 3.55.

## Band Record

(Continued from Page 1)

and dissonant of the five selections, displays a wide range of subtle emotions, while Prokofieff, in Opus 99, exhibits his unusual humor. Bennett, orchestrator of such plays as Oklahoma and South Pacific, arranges several American dances in the style of the Broadway Musical. The strange harmonies and irregular rhythms of Marche Baroque, by Andy Kazdin, the band's own talented tympanist, conclude the records.

The records will sell for four dollars.

## New Parking Lot Opened On Campus; Permits Not Needed

At the proposed site for the new Karl T. Compton Laboratory just east of Building No. 24, a parking lot will be available from approximately February 23 to April 1, 1955, at which time the excavating work should be underway for the new building.

The only entrance will be between Building 20 and 32 off Vassar Street. The parking lot will be available to all students and employees, twenty-four hours a day on a first come basis. All cars left in this lot must be in full operating condition and display proper license plates. Cars not parked in an orderly arrangement will be tagged.

It will not be necessary to register at the Superintendent's Office unless the demand far exceeds the capacity of the lot at which time necessary steps will be taken and you will be properly notified.

## Debate

(Continued from Page 1)

Tournament, against representatives of 55 schools east of the Mississippi.

The Debate Society will hold elections one week from today on March 14. The MIT Debate society is considering joining an honorary speech society, the final decision to come in the near future.

## College World

(Continued from page 2)

Blue" as the result of some high pressure by the campus Newman Club and a local priest. Yet in the highly Catholic Boston area the film was permitted to appear. Consistency???? Second and previously mentioned, the ban on Slipstick by the IIT administration on similar grounds. This was a joke column which contained spicy material, and was ordered eliminated. By accident last week, a completely unsexy article of humor was placed in the paper under the old name, and what happened?! The faculty demanded the resignation of the editor, and secured a formal apology, although the student government refused to accede to their demand for his resignation. What next?

Since my professors are too honest to sell me copies of their exams, and since I have two coming up very shortly, I slam shut the file and the typewriter case, and bid everyone a hasty farewell.

## PHOTO STAFF

There will be a meeting of all members of "The Tech's" photo staff in Room 218 Baker House today, March 1, at 5:00 p.m. Those interested in joining the staff are also invited to attend.
