InconnuDebatesFinances Of Activities, Junior Prom; Discusses H.S. Open House

Major topics covered at the Inconnu discussion meeting this week were "Innannu: Relations and Responsibilities to the Undergraduate Activities." The meeting began with a report from the Student Council that Interconnu would be in charge of the finances of the activities. The major part of last week's meeting, with respect to the Interconnu financial activities, was the selection of the financial officer for the activities. At the present time all activities are required to submit financial reports to the Interconnu Committee; Class A activities submit such reports once a month. Class B once a term. Interconnu's major worry was their own responsibility for the activities, and therefore the group concluded that the present system be continued as Interconnu shall be in close contact with the finances of these activities.

The officers of Interconnu were that a special course be taught on the finances and the procedures of financial activities in the art and science of keeping books legible and balanced. Professors in courses XIV and XV are expected to give such a course for those who handle money on the undergraduate level. The final decisions on such a course are to be made. Earlier in the meeting reports were made on the progress of the High School Open House this weekend and on the plans of the Local Government Council. The new members of the Liaison Committee, John Watta, Robert Master, and John Watts, have a decision on the "money" for the liaison committee. The meeting of the Campus and President Council is Tuesday. The purpose of the President's Commission is to study the development of West Campus and possible future arrangements of the living groups.

Top 58 Athlete

The Quandrangle Club, honorary society, announced Sunday that the 1955 recipient of its top 58 athlete award was John Irvin who 58 had been elected as freshman athlete of the year. The Quandrangle Club honored "all-around athletic ability and superior sportsmanship," and "outstanding contributions to the institution and the community." He was selected by Q-Club president Hal Birnbaum and Robert R. Batchelder. "In addition to his academic achievements, John Irvin has demonstrated a strong commitment to his community through his involvement in various clubs and organizations." He has been a member of the Quandrangle Club since his freshman year and continues to serve as an officer. His contributions to the institution and the community have been recognized through various honors and awards, including the top 58 athlete award. This achievement is a testament to his dedication to both academic excellence and athletic performance.

TIMES CHANGE

We must agree with our neighbors upstairs that the old spirit is no longer with us. The generations of professional pranksters which have furnished us with such a rich folklore are probably not to be found any more amongst the student body.

The change is a subtle one, and not completely ungratifying, for it is producing some very constructive results, granted at the expense of what we whimsically call good "collegiate" fun.

The annual luncheon for representatives of the students and Institute administration, and officials of Cambridge and Boston was held this Monday in the Faculty Club. This meeting wandered far afield of its original intent, initiated as it was to better relations between ourselves and our neighbors and to repair the battle-scared feelings between the students and the local constabulary and fire departments.

Instead, these men were concerned with the totally unrelated question of how best to apply the resources of an educational institution and the men who attend the Institute to the betterment of the community at-large, through assistance in the hospitals and the settlement houses, through furnishing some guidance to boys who are potential contributors to the problems of juvenile delinquency. It was a thought-provoking experience to hear how great a good can be performed by students willing to spend just a little time and effort in giving unfortunate youth the little help which their homes do not always furnish.

It was thought-provoking, and it was pleasant, to see how far we have come in a couple of years. Yet, times do change—

but we think for the better.

AID FOR THE COMMUTERS?

The sudden appearance of all this bridgework on the front of Walker Memorial leads us to speculate as to the reason for its sudden appearance.

We think that all that pipe must certainly serve some functional purpose—our guess is spanning new coat racks for the faculty club.

The sudden appearance of all this bridgework on the front of Walker Memorial leads us to speculate as to the reason for its sudden appearance.

Would you kindly let Eldon Reiley

through the mail

From the dainty drawing room of Radcliffe, softly lit by gracious living and the chemical reflections of the Harvard uniform, comes forth the voice of wisdom. Nan Barkin, fresh from professional and civic experience, last issue disposed her pen in the lovely heark of satire and invi- covered meshes, and let these barbarian MIT "supermen" have it right between their integral-shaped eyebrows. Futility, thy name may be woman, but oh satire, thy name is not Radcliffe! With much eustonic wit and sophisti-

cated metaphors, Nan cast her eye on the new Chapei, and the Chapel was found easily reading.

I feel strangely unaffected by this burst of architectural criticism, as M.I.T. Staff Players. Monthly Supper Meeting. Faculty Club, 6:15 p.m.

Wednesday, May 4

American Society of Mechanical Engineers—Student Chapter. Annual banquet and lecture: "The Dynamics of an Engineer." Mr. Alan Howard, General Electric Company. Room 407A, 7:00 p.m. $1.50.

Christian Science Organization. Lecture. Mr. Ralph, C.S., President of the Board, Lecturer, Mother Church, The First Church of Christ, Scientist, Cambridge Library. 5:15 p.m.

Aeronautical Engineering Department, Seminar: "Flight Safety and the Engineer." Mr. Jerome Lederer, Flight Safety Foundation, Inc. Room 55-225, 4:00 p.m. Coffee and cake in Dunn Room at 3:30 p.m.

Civil and Sanitary Engineering Department. Housing Seminar: "Water Foul on Piles." Mr. William C. Shapin. Room 48-208, 4:00 p.m.

M.I.T. Staff Players. Monthly Supper Meeting, Faculty Club, 6:15 p.m. Reading of the "Happy Journey from Trenton to Camden" by Thorton Wilder in the Petershouse 8:00 p.m.

Why do more college men and women smoke VICEROYS than any other filter cigarette? BECAUSE ONLY VICEROY GIVES YOU A PURE, NON-MINERAL, NON-TOXIC FILTER WITH 20,000 FILTER TRAPS IN EVERY FILTER TIP!

1. Yes, only Viceroys have this filter composed of 20,000 tiny filter traps. You cannot obtain the same filtering action in any other cigarette.
2. Besides being non-mineral and non-toxic, this filter is also a non-beeleeve filter never sheds or crumbles.
3. The Viceroys filter won't just whisp up and rushed to market to meet the new and skyrocketing demand for filtered cigarettes. Viceroys pioneered. Started research more than 20 years ago to create the pure and perfect filter.
4. Smokers en masse report that filtered Viceroys have a finer flavor even than cigarettes without filters. Rich, satisfying, yet pleasantly mild.
5. You know that you wouldn't have, without looking, that it even had a filter tip—

and Viceroys cost only a penny or two more than other cigarettes without filters!

That's why more and more college men and women smoke VICEROY than any other filter cigarette... that's why VICEROY is the largest-selling filter cigarette in the world!
Jerry Loucks asks:

What sort of work would I do on my first assignment with Du Pont?

There is a great variety of first assignments at Du Pont. Jerry, depending on a man’s field of training and the general area of work he has selected, may start out in a position where you have an opportunity to work in one of the many growing and developing fields of the company—research, development, production and sales. In the field of Research, for example, a young man interested in marketing opportunities may start in a sales capacity dealing with the products he has helped develop or in a position aimed at assisting the marketing department in developing new products or new uses for existing products. A young engineer interested in production may find himself working on a manufacturing line with new equipment to be designed and developed. There are many other opportunities in the area of new manufacturing processes. Some new fields are being developed so fast that a job may never be filled before the incumbent is ready to leave.

In general, Jerry, a man is chosen for a specific job within the scope of his major field of study. His first assignment is intended to help him make the best use of his abilities as promptly as possible.
TCA (Continued from page 1) The mail to and from these areas was scheduled to go with a company I'd worked for, but it was sold to a competitor. Instead, I went to work for another company and began to develop telephone equipment. This was a natural choice for me, given my background in electrical engineering.

Drama Shop (Continued from page 1) At the beginning of the academic year, I was offered a position as head of the Drama Shop, a community theater group. I accepted the position and worked closely with the students to produce high-quality productions. This experience taught me the importance of collaboration and teamwork in artistic endeavors.

Through The Mail (Continued from page 2) I continued to publish articles in the magazine, focusing on topics related to my work in the electrical industry.

Retirements (Continued from Page 1) Professor Znamensky was appointed instructor of Russian language and literature and President of the Russian Club at Harvard University in 1942 and 1943, and in 1946 received the degree of bachelor of divinity at the Imperial Theological Academy of Kiev.

Drama Shop (Continued from page 1) The Drama Shop is a volunteer organization that provides a platform for local artists to showcase their talents. I helped to organize and manage the group, which included both students and faculty members.

Milton Viorst (Continued from page 1) During the late 1930s, I was appointed to the faculty of the University of Georgia and continued to teach and conduct research in my field of interest. In 1940, I was appointed associate professor of inorganic chemistry at MIT.

Ed Chandler had a good job all lined up long before he graduated from Georgia Institute of Technology as an Industrial Engineer. But then he changed his mind...

A Campus-to-Career Case History

“..."When I got out of college in ‘39, I was all set to go with a company I'd worked for during a previous summer."

But then I got called up by the Army. During the next two years I heard a lot of good things from my Georgia Tech classmates who'd gone to work for the telephone company. As far as I was concerned this was the best recommendation any company could get.

So when I get out of the Army I stopped in to talk with the telephone people. When I saw an outline of their development program, I was sold.

“My first year took me through every stage of telephone equipment from warehouse to installation. I drew up plans for several projects, then went out in the field to see how they were carried out.

“Now I’m helping develop next year’s product. I’ve found it an interesting and rewarding job.”
