EDITORIAL

TOO WHOLE MEN

We are constantly belabored by administrative declarations: "We want to produce the whole man, the man who can hold a position of responsibility in society. A well-rounded man, who reads, who participates extracurricularly or co-curricularly, as the fashions now wind. We don't need just plain engineers and scientists—what we need produces the whole man, the man who can hold a position of responsibility in society."

We've heard it. We're getting them. But our whole men have holes. The Institute is turning out "whole men." They aren't very good engineers or scientists.

The Institute cannot claim any Nobel Prize winners. The Institute does not put a premium on thought, understanding, originality. Here success is measured in the number of formulae and equations memorized. He who does sheets of problems goes through with a 4.5 and organizes. He who does problems, finals of problems. He gets behind, needs help. We are "the gray factory on the Charles," but not because of inefficiency, but because of the emphasis on the theoretical, on the "gray factory." The "whole man" idea is a red herring. The real problem is the lack of understanding, the lack of critical thinking. The "whole man" is a euphemism for a lack of depth, a lack of insight.

We don't need just plain engineers and scientists—what we need are men with broad training.

When your courses are set
And a dream-girl you've met...
Have a real cigarette—have a CAMEL!

—Man, that's pure pleasure!

It's a psychological fact: Pleasure helps your disposition.
If you’re a smoker, remember — more people get more pure pleasure from Camel than from any other cigarette.
No other cigarette is so rich-lasting, yet so mild!
Cross Country Team To Open Season

After a great season last year the Beaver Cross Country team will open defense of its New England Championship this afternoon at 3:00 p.m. in Franklin Park, Dartmouth and Boston University will provide the opposition for Captain Bay Smith '56 and co-captain with Smith, Pete Carberry '57, Bob Schulenberg '57, and Dave Vaughn '57 returning from last year's squad.

Inscrim (Continued from page 1)

The administration of Field Day is centered in shape, and the appoint-ee is deemed "outstanding" by the new director, with the possible exception of the students. The field day system is a vital and important factor in the overall field day program at Tech. McAlister has been a great success and in an equal plane with other schools due to the extreme lack of time on the part of the students. The field day system is deemed "outstanding" by the new director, with the possible exception of the fact that under student coaching the football team may not be perfect in shape, and the appointment of an overall field day football coach may be in the offing.

Convocation (Continued from page 1)

Mr. Howe has received honorary degrees from a number of U.S. and Canadian universities, and other honors include the United States Medal for the Arts, the Award of Merit of the American Institute of Consulting Engineers, the Hoover Medal of the American Society of Civil Engineers, and the Daniel Guggenheim Medal awarded jointly by the Society of Aeronautical Engineers, and the Institute of Consulting Engineers. Honors include the United States Medal for Merit, the Award of the American Institute of Consulting Engineers, the Hoover Medal of the American Society of Civil Engineers, and the Daniel Guggenheim Medal of the American Society of Aeronautical Engineers. Honors include the United States Medal for Merit, the Award of the American Institute of Consulting Engineers, the Hoover Medal of the American Society of Civil Engineers, and the Daniel Guggenheim Medal of the American Society of Aeronautical Engineers.

The Model Railroad Club will hold an open house today, Friday, September 30, in Room 20-E216 from 4:00 to 6:00 p.m. and from 7:00 to 9:00 p.m.

The Tech Symphony Orchestra still maintains the so-called "carry-over" athletics, or sports which can still be enjoyed during later life. Concerning interscholastic football, Mr. Rabbi strongly believes that the program at Tech cannot bring football in and provide competition on an equal plane with other schools due to the extreme lack of time on the part of the students. The field day system is deemed "outstanding" by the new director, with the possible exception of the fact that under student coaching the tackle football squads may not be perfectly in shape, and the appointment of an overall field day football coach may be in the offing.

SYMPHONY ORCHESTRA OPENINGS

The MIT Symphony Orchestra has opened for string players. All those interested should attend the next rehearsal on Tuesday at 7:30. The rehearsal will be held on the stage of Kresge Auditorium.
