Formation Of MIT School For Advanced Study Announced; Institute Professor Martin Buerger Named First Director

Three MIT Schools Will Share Faculty, Use Same Facilities

MIT's new School for Advanced Study will not bring about any radical changes. It will, rather, serve to encourage the existing situation, pointed out by President Professor Jerome Wiesner, the first director of the new school. The Institute School differs from Princeton's graduate school of the same name, in that it will not be incorporated into the usual academic structure, sharing the same faculty and facilities as the undergraduate and graduate schools.

In the past, post-doctoral students were kept busy by teaching or by taking over research with the professors. Although most professors welcomed the change, sharing the same faculty and facilities with the undergraduate and graduate schools. The School for Advanced Study will help to relieve this burden. As a reward, the students will be allowed to pursue their studies in a more independent manner, in order to provide doctoral work on a more suitable level. The students will be able to contribute to the academic community, sharing the same faculty and facilities as the undergraduate and graduate schools.

Dr. Killian Announces New School At Corporation New York Banquet

Establishment of a School for Advanced Study at the Institute was announced last Wednesday by President Professor Jerome Wiesner. The new school will provide means by which post-doctoral scholars from all over the world can join with the faculty in high level theoretical studies and research. Dr. Martin J. Buerger, professor of theoretical physics, has been appointed director.

The Institute School for Advanced Study was made at a dinner at the Waldorf-Astoria given by President Professor Jerome Wiesner to the 50 students, including many alumni. Tribute was paid to the late Karl T. Compton, chairman of the Institute of Science and Research, and to the present chairman of the Institute of Science, Dr. Killian, and the other speakers, Robert Cutler, associate chairman of the National Science Foundation, and Dr. Compton, chairman of the Standard Oil Foundation, and Dr. Killian, pointed out that the school is open to all students, whether they are members of the Institute or not. The school is open to all students, whether they are members of the Institute or not. The school is open to all students, whether they are members of the Institute or not. The school is open to all students, whether they are members of the Institute or not.

A picture of Miss Maffucci appears on page 3.

Dr. Buerger, who was present at the dinner, said that he was not a visiting scholar, but a member of the Institute. He was not present at the dinner, said that he was not a visiting scholar, but a member of the Institute. He was not present at the dinner, said that he was not a visiting scholar, but a member of the Institute.
