5 CENTS

## IFC And Dormitory Weekends To Coincide; Full Program Planned

Three solid days of wine, women and song are scheduled for the hard-working MIT man this spring. Whether he resides in a dormitory or a fraternity house, he has more than adequate facilities at his disposal.

The weekend of May 3rd is the date that both the IFC Weekend and the Dormitory Weekends will be held. This is the first time in many years that both functions have fallen on the same weekend.

Dorm Weekend will begin Friday night, May 3rd, with a semi-formal dance held in the Baker House dining hall, announced Roy Greenfield '58, Chairman of the Dormitory Weekend Committee. The music will be by Herby Wayne and his Band. The dance will last from 9 to 12.

More entertainment is in store for the Tech man and his date Saturday.

Beginning at 3 o'clock in the afternoon, a Jazz Concert will be in swing at Baker House. Jerry Davis and his Band will present the history of Jazz and Dixieland.

After dinner, the formal dance will be held in the Baker dining hall. Jerry Davis will play from 8:30 to 12:30. About 120 couples are expected to attend.

The ticket prices haven't been decided yet but Dormitory Committee is expected to announce them next week. Tickets may be purchased next week in the lobby of Building 10 or from the individual Dormitory Social Chairmen.

The IFC Weekend will kick off with a formal dance at the Hotel Statler, Friday night. Pat Dorn and his Orchestra will play from 9 to 1. Intermission entertainment will be provided by the "Raunch Hands."

For the afternoon party-goer, Phi Mu Delta and Chi Phi fraternities are holding cocktail parties from 3:00 to 5:00.

Saturday night will be the time for the informal parties. Delta Kappa Epsilon, Theta Delta Chi, Sigma Alpha Mu, and Phi Lambda Pi fraternities will be the hosts.

Theta Delta Chi is throwing an "Outhouse Orgy." A band and free beer will be available to all guests.

Delta Kappa Epsilon is having a "Gay Nineties" party. Music will be provided by the Dartmouth Indian Chiefs. A Jazz Concert will be presented Sunday. Tickets will be \$2.00 a couple. Twenty kegs of beer will be on hand for the parties.

Sigma Alpha Mu and Phi Lambda Pi plan to hold a square dance in the Armory on Saturday night. A western band will provide old style square dance music. The square dance is not definite as yet due to the fact that the Armory has not as yet been obtained.

The boat ride which had been tentatively scheduled for Saturday night has been dropped. The reason for this being that a boat large enough could not be obtained until late May. A boat ride is planned for next year's IFC Weekend.

Ron Zolkiewicz '58, Chairman of IFC Weekend Committee, said that he hopes to break even on the ticket sales.

## Science-Humanities Victors Over Engineering-Administration, 39-5

by Pat J. McGovern '59

An estimated nine hundred and fifty people crowded the specially erected stands in the Cambridge Armory, Saturday, to witness the First Annual All-Tech Basketball Game sponsored by *The Tech*.

At the final tick of Dean Rule's timer, the score of the first game found the administration and engineering netmen trounced by the science and humanities team by a 39-5 count. A fighting squad of Intramural All-Stars defeated the MIT varsity team in the second tilt by a narrow 35-34 margin.

The initial contest, staged as a benefit for TCA Boys Work, caused the bleachers to rock more than once with cheers, laughter, and excitement.

The administration and engineering hoopsters were the first to troup onto the court, amply equipped by one of their own players, John "Stilt" Murphy, with everything from football pants and knee pads to yellow "Dutch Boy" wigs. Lead by Capt. Gene "Red" Chamberlain, the team put on a hilarious warm-up show of two handed lay-ups, four step dribbles, and piggy-back dunk shots.

The science and humanities squad, wearing the grays of baseball uniforms and track suits, then made their appearance on the court, directed from beneath a bolshevik cap by Capt. "Rocky Stocky" Stockmayer.

The players on both sides were given globetrotter style introductions by the student announcer, Mel Ginsburg '57, amidst claps, shouts, and Q Club lead cheers from the overflowing stands.

(Continued on page 3)

This is basketball? Members of the opposing faculty team's scramble for the ball during last Saturday night's action.

## Cambridge Realtor Buys River Bottom

John B. Sullivan, a Cambridge realtor, has paid \$5000 for an option on 36 acres of Charles River bottom running from the Longfellow bridge to just past Electronics Corp. of America. The land, assessed at \$100, is held by the trustees of the estate of Joseph F. White, a former Cambridge resident.

Sullivan, who terms himself a "public-minded citizen", would not say what use he had in mind for the land but emphasized that he has "got to conform with MIT." His project, he said, would give the river frontage "more dignity than it's got now."

A newspaper article of March 30 held that the land extended as far up Memorial Drive as Ames Street and would be used for a building project rivaling that of the Prudential Insurance Company in Back Bay. Sullivan denied this, but refused to comment on his plans until releasing a formal statement Thursday through his agent, L. T. Maloney.

## Student Leaders, Faculty Discuss Problems At Leadership Meeting

The Institute Committee looked long and hard at itself, Saturday, and wondered what it saw. The occasion was the annual Leadership Conference at Endicott House, Dedham.

For the twenty-odd student leaders who participated, the Conference offered a chance to phrase the tantalizing question, "What is the fairest student government?"

In the morning the group parried purposes and goals for a while, then came to grips with the question of delineation of authority "between us and the Administration."

Institute Committee was placed

"between the students and the Administration", and the probability of its avoiding the cynically-spiked peals of laughter of "the students" was made a function of its ability to take for itself the proper sphere of jurisdiction from "the Administration." Incomm and the student body were both chastised, the latter for believing that Incomm action in the fields of ROTC and Parking were more than advisory (this belief leading to disillusionment, and giggles of ridicule), and the former for acting as though the action was . . . more than advisory.

In response, Dean Fassett said, "We sell ourselves short. Those who laugh number only five per cent." Robert Briber, a former student body president, summarized: "Since the ideal of student government is to make this school a better place, the laughter is unimportant."

Thomas A. Cook '59 protested that "the Administration is our Executive Branch" and called for a delegation of powers to student government "in black-and-white", in a form like the American Constitution. Within the sphere of its delegated powers, he argued, student government actions "should not be subject to any Administration approval whatsoever."

In the afternoon, Cook looked for, but could not find, strong support for his views. Several persons questioned whether an educational institution could or should be run like a government. The "right of disapproval", as opposed to the "right of approval", was pointed out as the existing and the desirable Administration prerogative—this right being an after-the-fact censorship.

## Jam-Free Missile Guidance System Developed; Wide Application Seen

A program for the development of a revolutionary inertial guidance system, which has been underway since 1939, was recently completed at the MIT Instrumentation Lab.

Tomorrow at a press conference, Charles S. Draper, Director of the Instrumentation Lab, will officially release the details of the jam-proof system to the press in layman's terms, in order to clarify a highly-technical report which was presented by Walter Wrigley early this year. The work was classified until that time.

Inertial guidance is defined as guidance without the use of any radiation, either natural or man-made. It is a process describable by the laws of mechanics, and as such it involves the measurements of time, gravitation, acceleration, and angular velocity. Self-contained measurements of these quantities are obtained with respect to inertial space, generally associated with "fixed stars," rather than relative to the earth. Because of this, the new system has been referred to as "astronomy in a box."

The process depends on the fact that a spinning gyroscope continues to point in the same direction no matter what the orientation of its environment. The basic elements of the system are three gyros and three accelerometers, pendulum-like devices which maintain a vertical direction. From the angles between the components, latitude and longitude can be determined accurately. A special timing device allows for the rotation of the earth. Since allowances are made for roll, pitch, and yaw, the apparatus is equally useful for airplanes, missiles, or submarines. Unlike earlier gyroscopic installations, the new apparatus not only stabilizes the vehicle, but also navigates it. The device can be pre-set at the launching site for any point on earth—and, theoretically, for any point in outer space. The system introduces a new era in control since a missile, piloted by such a device, can resist all jamming techniques, continuing unerringly to its prescribed destination.

During the course of the development of the complete inertial guidance system, several intermediate results were incorporated into actual missiles, notably the Mark XIV, which was amazingly accurate.

The laboratory, which employs a staff of 700, has its principal offices in Cambridge, and facilities at Bedford Air Force Base for experimental work.

## Wagner Convicted; To Serve Six Years

John Wagner, a former MIT student, will begin a two week visit with his parents before going to prison to serve a six year term on bank robbery charges. He was convicted, despite pleas from character witnesses that a youth of such caliber should not go to jail.

Wagner admitted the holdup of a Richmond, Illinois state bank last August. He claimed he had pulled the lone-wolf bank robbery, because his parents wanted him to go to MIT, and he said "they couldn't afford it."

A federal judge sentenced 18 year old Wagner to prison, but he can be released at any time within the next 4 years, since he was placed under federal custody for "correctional treatment."

## Summer Session To Include Professional Programs And Labs

More than 2000 scientists, engineers, executives, and other professional people are expected to attend a series of thirty-three professional programs, ranging from missile aerodynamics to the psychology of man-machine systems, which will be offered during the 1957 summer session.

The series, which is especially designed for personnel not regularly associated with MIT, seeks to help these people refresh and enlarge their knowledge in fields in which the Institute is pre-eminent.

Extensive laboratory work, including the use of advanced facilities at the Institute, will be a feature of most of the programs, which will be supervised by members of the MIT faculty. Visiting lecturers from other schools and industry will also participate.

Phosphorous pregnant. Editorial misjudgment?

## one small voice

Until he became First Baron Conesford of Chelsea, Henry George Strauss, was a longtime Tory M.P. whose dry, legalistic speeches often had the unhappy effect of emptying the House of Commons of all but its most conscientious members. But recently his lordship was the center of a controversy that gave him the biggest audience of his career. In effect he had raised a delicate question: Who is responsible for corrupting the English language?

In a speech before the Author's Club of London, his lordship charged that America must take the blame for much of the poor current English. American slang is often "virile and admirable," and his lordship gave his blessings to such terms as "bulldozer, blurb, debunk." But he was appalled by the U. S. use of "face up to" for "face, meet up with" for "meet, check up on" for "check." "Those atrocities are probably due to the influence of German immigrants who did not learn English."

Then there was that horrid word, "underprivileged." "The Americans use it because of their fashion for using long words they don't understand and rejecting short words like 'poor,' which they consider mildly improper." It was, in short, just one more example of American "pretentious illiteracy." Added Lord Conesford: "How would it have been if Sir Winston Churchill, instead of saying, 'Give us the tools and we will finish the job,' had said, 'Donate us the implements and we shall finalize the assignment?'"

The U.S. press quickly picked up the story. U.P. Staff Correspondent H. D. Quigg wondered whether his lordship would prefer to have the Gettysburg Address begin: "Eighty-seven years ago our fathers founded here a new nation." And what about the "about", asked Quigg, in the Biblical phrase, "And the glory of the Lord shone round about them?" But Lord Conesford stuck to his guns. Invited to appear on CBS-TV's "The Last Word," he landed in the U.S. to continue the attack.

One Americanism that irritates him, he told reporters, is the word "hospitalized." "If a man is 'hospitalized,' what is he when he is cured? 'De hospitalized?' 'Homeized?'" He deplored the tendency to substitute "alibi" for "excuse", called the phrase "bi-partisan foreign policy" absurd because it could only mean "doubly partisan." And what, he added, do Americans mean by "inspirational"—inspired or inspiring?

On TV, his lordship found himself on the defensive. Is it not true, asked M.C. Bergen Evans, that "you in England refer to what we call 'slums' as 'depressed areas'?" Do you refer to 'unemployed people' as 'a redundancy of workers'?" Do you refer to a 'moving van' as a 'pantehnicon'?" All too true, said his lordship, and added sadly that Britain's ratcatchers—"a most admirable set of men"—have decided it would be more dignified to be called "rodent operators."

—Chris Newman '60

## calendar of events

### WEDNESDAY, APRIL 17

Operations Research. Seminar. Waiting Lines—Part VII: "The Solution for Non-exponential Servicing Times." Dr. Herbert P. Galliher, of the Operations Research Project. ROOM 2-333, 3:00 p.m.

Civil and Sanitary Engineering Department. Hydro-mechanics Seminar: "Hydrodynamics of the Earth's Core." Professor Gordon MacDonald, Geology and Geophysics Department. Coffee will be served at 3:45 p.m. ROOM 48-208, 4:00-5:00 p.m.

Mechanical Engineering Department. Heat Transfer Seminar: "Hydraulic Analogy for Steady State and Transient Heat Exchangers." Dr. Stephen Juhasz, Executive Editor, "Applied Mechanics Reviews," Southwest Research Institute, San Antonio, Texas. ROOM 3-370, 4:00 p.m.

Electrical Engineering Department—Cooperative Course. Pre-interview talk by representatives of Bell Laboratories regarding cooperative program opportunities for Course VI sophomores. Freshmen invited. Bring your questions. ROOM 10-250, 5:00 p.m.

Technology Community Association. Sceptic's Seminar: "Value in Art." Lecture, illustrated with slides, followed by discussion. Professor Albert Bush-Brown, of the Department of Architecture. ROOM 6-120, 5:00 p.m.

Chemistry Department. Harvard-MIT Physical Chemistry Colloquium: "The Influence of Electrostatic Interaction on Hydrogen Ion Dissociation in Proteins and Other Organic Acids." Professor Charles Tanford, Yale University. MALLINCKRODT MB-23, HARVARD, 8 p.m.

### THURSDAY, APRIL 18

Selective Service System. College Qualification Test. Students having Tickets of Admission should take them to the Information Office for room assignments. 8:30 a.m.

Civil and Sanitary Engineering Department. Sanitary Engineering Seminar: "The Case of Remodeling and Expansion of The Leominster Sewage Treatment Plant." W. Pellar (G); "Effect of Synthetic Detergents on Stream Reaeration," P. C. Reist (G). ROOM 1-132, 10:00 a.m.

Nuclear Engineering. Seminar. Paul Klein (G). ROOM 8-119, 1:00-2:00 p.m.

Varsity Lacrosse Team. Game with Stevens Institute. BRIGGS FIELD, 2:00 p.m.

Varsity Golf Team. Match with Babson Institute. OAKLEY COUNTRY CLUB, 2:30 p.m.

Mechanical Engineering Department. Seminar: "Study of Atomization of Liquid Drops." Mr. N. I. Masugi, of the Department of Mechanical Engineering. Coffee will be served in Room 3-174 from 3:00-3:30 p.m. ROOM 3-270, 3:30 p.m.

American Society of Civil Engineers—MIT Student Chapter. Speech contest. ROOM 1-390, 4:00 p.m.

Physics Department. Colloquium: "Absorption, Emission, Storage and Transport of Excitation Energy in Photoconducting Sulfide Phosphors." Professor I. Broser, Fritz Haber Institute, Berlin, Germany. ROOM 6-120, 4:00 p.m.

Mathematics Department. Harvard-MIT Joint Mathematics Colloquium: "The Use of Cohomology Operations in Studying the Problem of Constructing Continuous Functions." Professor Norman E. Steenrod of Princeton University. Tea will be served at 4:00 p.m. RM. 18, 2 DIVINITY AVE., HARVARD, 4:30 p.m.

American Foundrymen's Society—Student Chapter. April Election Meeting and buffet dinner. Lecture: "Alloy Castings," Mr. E. Bishop, Engineering Section Manager of Alloy and Material Manufacture, Westinghouse. ROOM 35-225, 5:15 p.m.

Lecture Series Committee. Film: "1984," from George Orwell's novel of the police state. Admission: 30 cents. ROOM 10-250, 5:30, 7:30 and 9:45 p.m.

Technology Community Association. Egg-coloring party. Open to all. TCA OFFICE, WALKER, 7:30 p.m.

### FRIDAY, APRIL 19

Patriots' Day. Holiday.

### SATURDAY, APRIL 20

Varsity Sailing Team. Boston Dinghy Cup—I. SAILING PAVILION, 10:00 a.m.

Technology Community Association. Easter egg hunt. GREAT COURT, 11:00 a.m.

Freshman Lacrosse Team. Game with Nichols Junior College. BRIGGS FIELD, 2:00 p.m.

Varsity and Freshman Tennis Teams. Match with Brown University. BURTON HOUSE COURTS, 2:00 p.m.

Freshman Baseball Team. Game with Middlesex Academy. BRIGGS FIELD, 2:30 p.m.

Lightweight Crew. Race with Harvard University. CHARLES RIVER, 5:00 p.m.

MIT Musical Clubs. The Wellesley College Choir and the MIT Glee Club present Brahms' A German Requiem, directed by Klaus Liepmann. Soloists: Leslie Meyer, Soprano, and Paul Matthen, Baritone. Organist: David C. Johnson. Admission free. KRESGE AUDITORIUM, 8:00 p.m.

### CALENDAR OF EVENTS

Material for the Calendar of April 24-May 1 is due in the office of the editor, Miss Dorothy Knox, Room 3-339, not later than noon on Wednesday, April 17.

jack's a B.M.O.C. with his new SONIC Capri

Ever since Jack bought his new Sonic CAPRI phonograph at the local college store — he's become the biggest B.M.O.C. ever. You can join him and be the biggest ever, too, for you can buy a CAPRI phonograph for as little as \$19.95.

This month's special is the CAPRI 550 — a twin speaker high fidelity portable with 4-speed Webcor automatic changer, hi-fi amplifier in attractive two-tone Forest Green. only \$59.95 at your local dealer.

SONIC INDUSTRIES, INC. 19 Wilbur Street, Lynbrook, N. Y.

### IT'S FOR REAL! by Chester Field

#### TOE DANCER CY\*

At campus hops, Cy guards the wall. Why, he doesn't know at all. Cy thinks he's really quite a prancer — In point of fact, a real toe dancer. But, as every wise girl knows, He doesn't dance on his own toes!

**MORAL:** Stay on your toes! Take your pleasure BIG with Chesterfield King! Big length—big flavor . . . and the smoothest natural tobacco filter. Chesterfield King gives you more of what you're smoking for.

Like your pleasure BIG? Chesterfield King has Everything!

\*\$50 goes to John R. Hendrickson, Florida State University, for his Chester Field poem. \$50 for every philosophical verse accepted for publication. Chesterfield, P.O. Box 21, New York 46, N. Y.

### FREE! INVISIBLE SHIRTS!

It is a little known fact that Van Heusen, in addition to its regular merchandise, also makes a grand line of invisible shirts. Alas, they have never proved very popular. People lose them easily. Laundries are confused by them. And people wearing these invisible shirts are not just walked over, they're sometimes walked through.

So, we're stuck with thousands of them, and we've just decided to give them away. To you! Just write Van Heusen. We will send you free a complete wardrobe of invisible shirts. Not just one or two! Not us. We'll send you hun-

dreds of them. In every style! Every size! Every collar fashion! All handsome. All invisible. Probably the finest you've never seen.

As for visible shirts—and shorts, sport shirts, sweaters, pajamas, handkerchiefs and ties—well, you know Van Heusen. We have most of the new styles before anybody else. And we handle traditional favorites in a way that explains why certain styles last a long, long time. Your local haberdasher carries a large Van Heusen selection. See him soon.

Phillips-Jones Corp., 417 Fifth Ave., New York 16, N.Y.

# MIT Lacrosse Men Lose Close Battle To U. Of Mass. Team

# All-Stars Drop Varsity 35-34 In Second Contest

The MIT lacrosse team moved into its competition with New England schools Saturday, coming out on the short end of a 3-2 score against the University of Massachusetts. The game was played on the winner's field, during New England's first sunny spring day.

All of the scoring for both teams took place in the second and third periods. Dick Wade '57 tallied an unassisted goal in the 2nd period, but this was matched by White of UMass and the half ended with the score knotted at 1-1.

After an assist from Huber Warner '58, Edgar Hasselman '57 notched Tech's second and last goal. Chadwell, assisted by White, and White scored the final two goals for the home team.

The results of this game were especially disappointing for Coach Ben Martin for this is the first time that MIT has lost to the UMass in lacrosse. The play was dominated by the Beavers throughout most of the game, but the inability of cash in on the many opportunities coupled with White's effectiveness cost Tech the decision.

The lacrosse team makes its home debut tomorrow against Stevens Institute on Briggs Field at 2:00 p.m. The team is anxious to get the 1957 season off to a somewhat better start at home and will be gunning for its first win.

Action scenes from Saturday's basketball game.

## BASKETBALL

(Continued from page 1)

The distinguished referee, Dr. James R. Killian, appeared in the full tribal uniform of the Osage Tribe of Oklahoma, of which he was recently made honorary chieftain. Then the President, Dr. Julius A. Stratton ("the ump"), and Mr. Joseph Snyder ("the ball Tosser"), blew their whistles and started the action.

And action it was for the ensuing four periods of four minutes each. The science and humanities five took charge of the ball following the tap, and managed to pass it through the net the greater number of times, however neither team could be said to have control of the ball during the game. The spheroid bounced, jumped, rolled, and hopped all over the court as the participants, making up for whatever they may have lacked in experience with spirit and determination, fought, fouled, passed, and shot their way in a performance which was, to use the words of Dr. Stratton's teenage daughter "terrific."

Prof. Frisch drew first blood in the game with angular momentum shot, to be quickly followed by a carefully surveyed field goal by Prof. Chuck "The Killer" Miller for the administration and engineering quintet, their only field goal of the game. From there on it was "Rocky Sock's" team all the way for the 39-5 win. High scorer for the affair was former Incomm president, Bob Briber who collected ten points for his team, on a variety of shots.

The officials did an outstanding job in keeping the game going smoothly, and in separating pile-ups of players, especially when the ball was not in the vicinity.

The participators were ready to remark on the game, and their words followed the generally humorous nature of the entire event. Captain "Stocky" Stockmayer gave a detailed formula for random collisions on the court, the result of which was "I'm mighty sore!"

Placement director Joe Jefferson expressed general student body sentiment with his exclamation "Damn those physicists." "Sheer murder" was the quip of Course II's Fred McGarry. The fine sportsmanship and good nature of the contest was emphasized by Asst. Director of Admissions, Gene Chamberlain. The "ump", Dr. Stratton was quoted as saying that the evening was a "wonderful occasion" and "a huge success which did lots of good for MIT." One of the heftiest players, Rugby's Prof. Brown, said "It was a lot of fun, but I'm just glad that I didn't get killed by the science and humanities 'Juggernaut'."

Sentiment was unanimously in favor of making the game an annual event, with this year's stars cheerleading for the two quintets next season, or as Joe Jefferson suggested, the pallbearers.

The second game proved a real surprise. A spirited team of eleven intramural players managed to squeeze past the varsity team by one point in a very hard fought match.

Coach Scotty Whitelaw, who managed the Intramural All-Stars for the game employed the two platoon system to take maximum advantage of his bench strength, and to insure that he had a fresh quintet in operation most of the game.

High scorer in the contest was Marty Goldstein with ten points, while the star for the all-stars was Dick Bradt of Baker House who tallied on three jumpers and a foul for seven points.

## "What's it like to be A MANUFACTURING ENGINEER? AT IBM?"

Four years ago, Yale senior Lee Br'ter asked himself this question. Today, as a Product Control Engineer in IBM Manufacturing Engineering, Lee reviews his experience and gives some pointers that may be helpful to you in taking the first, most important step in your engineering career.

"It's tough," Lee sympathizes, "for a college senior to feel confident about choosing a job. For four years he's been trained to be critical and deliberate about making decisions. Now, faced with the biggest decision of all, he has only a few months in which to attend job interviews, separate the facts from the propaganda, and select a company—not to mention passing exams and graduating at the same time."

Lee, with a B.S. in Industrial Administration, came to IBM in 1953. Starting as a Technical Engineer in Production Control, he was immediately assigned to the General Manufacturing Education program—a

Designing a paperwork system

10-month course with rotating assignments in all phases of the work—manufacturing, purchasing, production. In addition to four weeks of formal classroom study, he also spent two in the Boston Sales Office, calling on accounts with the IBM salesmen.

Lee's career was temporarily interrupted by a two-year hitch with the Air Force in Korea. Back at IBM in 1955, he has since been promoted to Production Control Engineer. His present job is to design paperwork systems to insure a smooth flow of work through the plant where the famous IBM electronic computers are manufactured. "It takes creative engineering ability to design these systems," says Lee, "and it takes administrative ability to 'sell' a system to higher management and make it stick."

### How to select an employer

To the college senior faced with a job decision, Lee has this to say: "Pick your employer by this simple test: 'Is the company expanding fast enough to provide adequate scope for your talents and ambitions? Is it interested in your long-range management development? Will it treat

"Selling" the system

you as an individual and match your abilities with the most challenging assignments?"

For his part, Lee feels IBM has met this test. Since 1953, he has seen new plants open, dozens of new products evolve, hundreds of new management positions created. Greater authority, responsibility and reward have come his way. And he knows they will continue, for IBM sales

Recognition of individual merit

have been doubling on the average every five years since 1930. He likes the "small-team" engineering system that assures ready recognition of individual merit. And he appreciates the fact that IBM hired him despite his impending service hitch.

### What's "life" like at IBM?

At IBM, Poughkeepsie, Lee lives a "full life." He belongs to a local sports car group, drives an Austin Healy. He skis at Bromley. He is a member of the IBM Footlighters and a local drama workshop. At present, he shares an apartment with two other engineers and a "medium-fi" set, but plans to marry "the girl next door" (in hometown Hamburg, Conn.), in the very near future. In this connection, Lee advises seniors to pay special attention to company benefits. "They may seem like a yawning matter when you're single, but they mean a lot when you assume responsibilities. IBM's are the best I know."

Lee lives a full life

IBM hopes that this message will help to give you some idea of what it's like to work in Manufacturing Engineering at IBM. There are equal opportunities for E.E.'s, M.E.'s, physicists, mathematicians and Liberal Arts majors in IBM's many divisions—Research, Product Development, Sales and Technical Services. Why not drop in and discuss IBM with your Placement Director? He can supply our latest brochure and tell you when IBM will next interview on your campus. Meanwhile, our Manager of Engineering Recruitment, Mr. R. A. Whitechorne, will be happy to answer your questions. Just write him at IBM, Room 9201, 590 Madison Avenue, New York 22, N. Y.

# Sticklers!

WHAT IS A LUCKY AT LUNCH TIME?

(SEE PARAGRAPH AT RIGHT)

**WHAT A MENU!** A dank frank, an ol' roll, a pallid salad, and a dry pie. Let's face it, friend—your lunch-time fare needs brightening! Recipe: light up a Lucky! It won't make a filet out of that frank, but it's a *Noon Boon* nevertheless. A Lucky, you see, is all cigarette—all great smoking, all the way through. It's made of fine tobacco—mild, good-tasting tobacco that's **TOASTED** to taste even better. But why wait till noon to try one? Right now, you'll say Luckies are the best-tasting cigarette you ever smoked!

WHAT WAS HELEN OF TROY?

### STUDENTS! MAKE \$25

Do you like to shirk work? Here's some *easy* money—start Stickling! We'll pay \$25 for every Stickler we print—and for hundreds more that never get used. Sticklers are simple riddles with two-word rhyming answers. Both words must have the same number of syllables. (Don't do drawings.) Send your Sticklers with your name, address, college and class to Happy-Joe-Lucky, Box 67A, Mount Vernon, N. Y.

## AS NAVIGATOR OR PILOT

The flying U. S. Air Force is a team of men who command the aircraft and men who plan the attack. These are the pilots and navigators, both equally important to the defense of America.

**GET ON  
THE TEAM  
THAT DEFENDS  
AMERICA**

You, as a young man of intelligence and sound physical health, may join this select group in the world's most exciting and rewarding adventure. **Your** training will stand you in good stead, whatever your future plans may be—and you'll be earning over \$6,000 a year 18 months after training.\*

If you are between 19 and 26½ years of age, investigate your opportunities as an Aviation Cadet in the U. S. Air force. Priority consideration is now being given to college graduates. For details, write: Aviation Cadet Information, P. O. Box 7608, Washington 4, D. C.

\*Based on pay of married 1st Lieutenant on flight status with 2 years' service or more.

Graduate—Then Fly... **U. S. AIR FORCE AVIATION CADET PROGRAM**

# Softball Competition Dominates Intramural Athletic Program

After extensive spring training the MIT Intramural Softball Teams entered into league competition, despite the objections of Mother Nature. Battling fantastically strong winds and soggy playing fields, the softballers were still able to complete a good one-third of their league play to date.

Top seeded Grad House A team won its only game to maintain a first place tie with Pi Lambda Chi in League I. Sigma Phi Epsilon, seeded second, rolled over its opposition in two straight games to hold the top position in League II. Phi Beta Epsilon trails with a 1-0 record. Third ranked TEP club heads League III with a 2-0 ledger, while Lambda Chi Alpha and 5:15 Club remain in contention with 1-0 marks. Murray Muraskin pitched a no-hitter for TEP's first win against a weak Burton C team. League IV produced the first dethroning of a 56 playoff team as the Chem. Eng.

Department suffered a loss and a tie in its first two games. The Sig Ep B team and Theta Chi currently led at 1-0 apiece.

Burton House B Team became the second competitor to fall as the Phi Gams moved into first place in League V by virtue of two wins and no losses. Chi Phi follows the leaders with a 1-0 mark. SAE tops competition in League VI at 2-0, but Baker A, the ranked team, has its single loss under protest.

With the Betas not having played a game yet due to two postponements because of rain, Phi Delta Theta holds a questionable lead in League VII, since they boast a 2-0 record. In the last League both Phi Mu Delta and Burton, the seeded competitors, have lost throwing the loop into a three way tie. Sigma Nu, East Campus, and Grad. House B all hold 1-0 marks.

At present the leagues are operating on a full playing time basis, with days off only when the weather makes it necessary. A new system of two umpires per game has also been inaugurated, though it has been impossible to follow through with this program universally because of a slight shortage of umpires. (Note—Anyone interested and qualified to umpire contact Dave Berg or Herb Johnson at KE 6-1139).

# Tech Baseball Team Loses To Brandeis, Harvard In Openers

The MIT nine tasted defeat in the first two games of its official season in losses to Harvard and Brandeis. On Thursday afternoon, in a game characterized by poor pitching on both sides, the Techmen lost to the Crimson 13-7. Starting for Tech was its number one pitcher, Frank Henrick. He was replaced in the third by rookie Al Beard, a pitcher who is showing much promise. The weak Harvard bull pen had to furnish three pitchers after their starter dropped six walks in two innings. Henrick was charged with the loss, while Bernstein claimed the win for Harvard. Big gun in the Tech lineup was Pete Hohorst, who drove in three runs with a line drive single and also doubled.

In Friday's contest with Brandeis, the first home game of the year, the see-saw battle began with Engineer Ken Auer facing Brandy pitcher Stein. Again, weak pitching was indicated on both sides. Tech failed to capitalize on the six Brandeis errors. Relief pitcher Dick Lions, who came in after the fourth inning, was charged with the 8-7 Tech loss.

Batter Charlie Speer brought in two runs with a triple, and stole home in the fifth after reaching the third base on a three-base error.

# MIT Sailors Win Sharpe Trophy; Place Third In Navy Invitational

MIT captured Brown University's coveted Sharpe Memorial Trophy Sunday on the Seekonk River in Providence. Topping a fleet of seven schools including trophy defender Harvard, Tech skippers Dennis Posey and Gerry Slaweki, both sophomores, won the first major New England event of the spring season. The Seekonk River and Brown's Beverly Dingies provided unusually challenging conditions as the wind varied from dead calm to 20 knots during the regatta's seven races. Slaweki and crew Will Johnson sparked Tech to its win by turning in B division's high point performance. With 3 firsts,

2 seconds, 1 fourth, and 1 sixth, Slaweki totaled 46 points topping all other skippers in B division. Posey, and crew Bud Newbury, sailing in crack A division, got off to a cold, wet start by tipping over in the first race. On the down wind leg of the course, a stiff gust hit the fleet. John Quinn of Brown, directly astern of Posey, broke onto an uncontrollable plane and crashed over the stern of Posey's boat, causing both boats to broach to and flip over. Recovering from their early swim, Posey and Newbury went on to gain 1 first, 2 seconds, 2 thirds, and 1 fifth, for a total of 39 points. Combined total of A and B division scores gave MIT 85 points to top nearest competitor Brown by a six-point margin. Coast Guard Academy was third with 77 points and Terry Gloege of Coast Guard was high point skipper of the regatta.

SUMMARIES: 1. MIT 85; 2. Brown 79; 3. Coast Guard 77; 4. Harvard 75; 5. Dartmouth 60; 6. Trinity 54; 7. U. of Rhode Island 53.

Outside New England waters, MIT defeated nine other schools to place third in the Navy Spring Invitational Regatta. Sailing Tempest dingies in light to moderate winds on the Severn River at the Annapolis two-day regatta, senior Bill Stiles and Sophomore Bill Widnall failed to beat only defender Navy and U. of Michigan. Widnall with crew Steve Strong led the regatta with a sparkling performance in B division. With 4 firsts, 1 third, 2 fourths, and a breakdown (averaged as a second) Widnall totaled 95 out of a possible 104 points to win high point honors for the regatta. Stiles with crew Ralph Alter sailing in tough A division gained 66 points.

SUMMARIES: 1. Navy 180; 2. Michigan 162; 3. MIT 161; 4. Notre Dame 140; 5. Georgetown 125; 6. Haverford 119; 7. Brown 115; 8. Swarthmore 111; 9. Princeton 105; 10. George Washington 101; 11. Colgate 74; 12. Rutgers 28.

# Freshmen Win In Interclass Meet To Start Spring Track

The spring track season got under way last Saturday with the annual MIT outdoor interclass meet. The Class of '60 with outstanding contributors "Smockey" Babcock in the sprints, Bob Murrano in the distance runs, and Dick Rossman in the weight events amassed a total of 83 points to win the meet by a comfortable margin. The sophomore class aided by sprinter Fred Brown and jumpers Lynn Jacobson and John Maier, and weightman George Yerid, gathered in 59 points to win second place. The Class of '58 followed with 44½ points, several of which were gained through the efforts of Bob Cooper in the 880, Dick Murdock in the 440, and Larry Lassinger in the hurdles. Ed Hoyt and Ducky Dieselman picked up firsts for the seniors to help round out their 36½ point total.

The overall performance indicates that both freshman and varsity teams are in good condition and with their strong competitive spirit are ready for the season's competition.

# EX-UAP Jones States Views In Report; Seeks More Cooperation From Institute

Ending his tenure as UAP, Mal Jones '57, reviewed student activity during the past year in his President's report. At the very outset, the outgoing leader of the student body says of recent events, "In the four years I have been associated with student government at Tech I have never known a riot of this character . . . most of the students were rioting in defiance of the Institute itself." The report further criticizes the Institute for not informing, and asking for the aid of, Dormitory government. "Whenever possible, student government should be consulted on all problems judicial or otherwise, concerning the student body," he comments.

## MIT Rugby Players Lose To Dartmouth In First Home Game

The MIT Rugby team played its first home game of the 1957 season last Saturday against a very strong Dartmouth squad. The outcome was in doubt right up to the final seconds, but Dartmouth emerged the victor 5-0 in a very exciting and well played game. The lone goal of the game was scored in the first half, with Dartmouth's Bob Charman the author. The conversion was made by Al Krutch to complete the game tally for both sides.

MIT threatened often in the second half and kept the ball in Dartmouth territory most of the time. Once the Techmen managed to put the ball through the goal, but the score was disallowed.

After the spring trip to the West Coast where they lost to the University of California, Stanford, and the San Francisco Olympic Club, Tech put on its best showing of the season, and the best against Dartmouth in several years. They outplayed the Dartmouth forwards consistently in the scrum, and the play of Ken Jones '57 and grad Les Wilson was especially good. Tech has five remaining games with the toughest part of the season over. If they can continue the brand of ball they showed here on Saturday they should win more than half of these games. A highlight of the season should be the open house game against Washington, D. C. Rugby Club made up of former players from the Washington area.

**THE GEORGE**  
5th WEEK  
ALSO INTRODUCING THE COLOR AND HISTORY OF THE CINEMA

Commenting on the apathy toward student government, he says, ". . . I feel that considerable inroads have been made toward overcoming this problem . . . Where we have fallen down is at the lower levels of student government."

His feeling is, "the dormitory student must feel that he can go speak to his hall chairman and likewise the hall chairman must convey his sentiments to the House Committee, and from the House Committee to Dormitory Council, and then to the Institute Committee." At the level of the Institute Committee there has been increased publicity by the posting of the minutes of Inscomm and Excomm on bulletin boards, and through the pages of *The Tech*. However, "We cannot expect students to be interested in the deliberations of the Institute Committee if they cannot identify themselves with it through the lowest levels of student government, that is, their living group governing body. Thus the entire pyramidal-hierarchy of student government with the Institute Committee sitting at its pinnacle is challenged when there are grumblings and unrest at the levels of the house committee."

In connection with Inscomm itself, he says that while there were many "long and interesting discussions, . . . a great deal of time was wasted." He proposes changes of procedure to remedy this.

Jones surveyed the various actions of Inscomm and the situations which have come up before it, such as freshman orientation, parking, the Ryer Report, and the Student Union, as well as the reports of the following sub committees: the Secretariat, the Finance Committee, Freshman Coord-

inating Committee, National Student Association, the Judicial Committee, Student Committee on Educational Policy, Public Relations Committee, International Program Committee, the living groups, the Activities Council, the Finance Board, Liaison Council, Freshman Council, Baker Memorial Committee, and a brief account of the two special studies in progress: a study of undergraduate activities, and another of the present status of former prominent undergraduates.

The retiring President of Inscomm also offers a series of recommendations to the new Institute Committee. Most of these are that the new committee continue several of the practices and policies of the outgoing committee. These include the inclusion of members of the faculty and administration, the continuation of special subcommittees for the formation of a Student Union and for the formation of the ad hoc committee for establishing a daily newspaper, and the committee to consider the revision of the Freshman Orientation Program. He also suggests that active support be given to the proposal of WTBS to expand to commercial FM; and that the Institute Committee continue to seek the abolition of the cumulative system or at least the disappearance of the cumulative and term rating on the reports sent to students.

Who rates what for performance and smoother riding in the low-priced three? Chevrolet has laid the answer and the proof on the line!

First, Chevrolet won the Auto Decathlon over every car in its field, and over the higher priced cars that were tested, too. This rugged ten-way test (*right, below*) showed Chevrolet was the champ in handling ease, braking, acceleration, passing ability, smoothness of ride and other driving qualities you want in a car.

Then, Chevy won the Pure Oil Performance Trophy at Daytona (*left, below*) as "best performing U. S. automobile."

It's quite a feeling to know that you are driving a car that performs so well, responds so beautifully and is so finely built. You feel proud, of course. But you also enjoy a surer, smoother, steadier way of going, a keen cat-quick response of power, and the easiest handling you've ever experienced behind a wheel. Just try this Chevrolet (V8 or Six) and see!

*Chevy showed it's still the champ ... at Daytona ... and in the Decathlon!*
