Outlook For Student Aid

Fund Sponsors 25 Scholarships

Twenty-two new four-year Alumni Fund National Scholarships will be awarded this year to Freshmen, Thomas P. Pitre, Director of Student Aid, announced Wednesday. He cited the new scholarships as part of the $700,000 recently allocated to student aid by the Alumni Fund for the four-year period beginning Oct. 1. In addition, 50 Alumni Scholarships will be awarded for at least ten years, barring changes in the scholarship program. The three-year program in the six-month program but would not be included in the tally for the entire period. For at least ten years, barring changes in the scholarship program.

President E. L. Drexel, announced Wednesday. He cited the new scholarships as part of the $700,000 recently allocated to student aid by the Alumni Fund for the four-year period beginning Oct. 1. In addition, 50 Alumni Scholarships will be awarded for at least ten years, barring changes in the scholarship program. The three-year program in the six-month program but would not be included in the tally for the entire period. For at least ten years, barring changes in the scholarship program.

Annual Beer-Ball Game to Be Played This Sunday On Briggs

From the wisest stories of an Evening With Bill Starr to the literal muttations of the Encyclopedia of Sports, positivity no one has heard, seen or told of a contest like the one to be staged this weekend, Sunday to be specific, between the arch-rivals, the Tech and the Vets, at a special set of rules. The headline, virile, number members of The Tech squad will move on to the scene of the engagement at 2:30 p.m., the site being good old Mr. Briggs' Wrist.

Lowell Exercises To Be Held On May 22; Argue Will Address

The 53rd graduation of the Lowell Institute School will be at 8:30 p.m., Thursday, May 23. The Lowell School is the night school and founded and con- tinued to MIT.

Speaking at the exercises will be Arthur A. Spitzer, Jr., President of the Science and Mathematics department of the University of Chicago, and.ED. Vice President of Stamps and Web- ster Engineering Corporation. Also included will be a talk by Dr. J. P. Durante, Head of the Math- ematics department.

Dr. Robert Lowell, the trustees of the Lowell Institute, will be present to address the graduates. Dr. Arthur L. Towne, President of the Lowell Institute, will address the graduates in the Lowell Theatre, High St.

Physics Project: In Frosh Course Is Held Possible

Professor Karl Uno Ingard, in charge of the Freshman physics pro- gram, is writing a textbook on ex- actly this topic. The book will probably be completed this summer, prior to the in- coming class of 1961.

A tentative change in the first year physics curriculum is also being con- sidered, in connection with the new text. With the time of making 8:01 and 8:02 more stimulating, Professor Ingard would like to introduce a "project", "...a long range effort that would replace something elses". Several engineering students will be asked to accommodate the project, which would bring about the solution of a particular problem or two students into a special topic.

Involves making implicit the "MASSACHUSETTS INSTITUTE OF TECHNOLOGY".
editorial

Punishment Fits Crime?

Among one of the decisions which came out of the riot case was one which will prevent a senior from receiving his degree. The results of four years of hard work and approximately $10,000 are to be thrown away. There are exceptions, however, it gratified me to realize that here at last the criticism had little or no basis. In spite of the exaggeration, however, it gratified me to realize that here at last was someone who was concerned enough with the welfare of the undergraduate welfare to question certain conditions which seem to be a part of the sacred status quo. After being fed statements of official policy and similar oversimplification of MIT's problems very refreshing indeed. To anyone who is sufficiently naive to read the glib, self-satisfied, superabundance of sweetness and light, as far as administration to change our diapers for us, as Mrs. Chalfant suggested; all we ask is that we be treated like the students who have met him or been to his lectures. Certainly there were actions on the student's part which warranted punishment, but it is felt that they were not bad enough to have the rewards of four years work taken away.

letters

To the Editorial Chairman, The Tech:

After reading the letter of criticism submitted to The Tech by a father of one of the freshmen here at the Institute, and then reading the reply of Mrs. R. W. Chalfant, I could not restrain myself from adding my comments to the discussion.

First, I would like to comment on the original letter. I think that it was apparent to almost everyone that some of the criticisms, however, it gratified me to realize that here at last was someone who was concerned enough with the welfare of the undergraduate welfare to question certain conditions which seem to be a part of the sacred status quo. After being fed statements of official policy and similar oversimplification of MIT's problems very refreshing indeed. To anyone who is sufficiently naive to read the glib, self-satisfied, superabundance of sweetness and light, as far as administration to change our diapers for us, as Mrs. Chalfant suggested; all we ask is that we be treated like the students who have met him or been to his lectures. Certainly there were actions on the student's part which warranted punishment, but it is felt that they were not bad enough to have the rewards of four years work taken away.

Just like on the surface of that super sphere—used to model the Accurately Lab in studies of turbulence—a tiny P.M. from the Professor. This reporter for one regrets the fact that Dr. Ingard ran for Sweden if he had attended school at any other time. During World War II when the Olympics were not held. Probably Ingard would have participated in the Olympics for Sweden if he had attended school at any other time. When asked if he got enough sleep for his training the Professor said, "Oh yes, I got to bed early and got plenty of sleep." He smiled and added, "I didn't have too much trouble with school." In collaboration with Professor Kraushaar, Dr. Ingard has just completed a new physics book which will be used for next year's freshman physics. The main com

profile

Professor K. Uno Ingard

Professor K. Uno Ingard presents himself as one of the most fascinating men at the Institute. After coming to Sweden in 1940, Dr. Ingard has become involved in complex research work at MIT, teaching and revising freshman physics, and being a member of a physical science group which studies high school science. Everywhere the undergraduate student body is certain, "Context" Ingard's (named such because of his mispronunciation of course) is an impertinent person who will be long remembered by his students for his indefatigable spirit and determination to teach and form.

For summer... our good-looking WASHABLE ODD JACKETS AND TROUSERS

We have a wide selection of good-looking lightweight Odd Jackets and trousers that are unusually comfortable and lightweight. (shown) Our attractive washable Dacron-and-acetate plaid jacket in navy or tan on white grounds, $3.50; Odd trousers of washable Dacron*, rayon and nylon in light grey, tan or brown, $1.75.

Lacrossemen Beaten At Tufts In Rain, 7-1. To Play Middlebury

With rain marred the second half of the game, the Beaver lacrosse team dropped a 7-1 decision to Tufts, on the victor's field Tuesday afternoon.

As has been the story in most of the contests played by Ben Martin's charges this season, the team just wasn't aggressive enough, consequently the defense was under pressure throughout the encounter. Outstanding for the Tuckers in holding back the driving Zuesch squad, were defenders, Joe Tiunaa '58 and Richo Johnson '59. In addition, goalie Sau-ral Marks '58 turned in quite a consistent performance considering the fact that he was under almost constant fire.

In the opening period, Tufts was held in check until the last few minutes when they outmanoeuvred the MIT defenders to register the game's first score. In the second session, the home squad tallied twice to increase their margin over the Beavers to 3-0. During the break between halves, the skies, which had been threatening all afternoon, finally released the expected rain. The change in the weather caused a marked change in the performance of the combatants, as sharp passing in the first half, disappeared in the second. The change was most marked in the weather caused a marked change in the performance of the combatants, as sharp passing in the first half, disappeared in the second. The change was most marked in the weather caused a marked change in the performance of the combatants, as sharp passing in the first half, disappeared in the second.

With the field in bad shape and glistening wet, neither team was able to score another pair of goals. However, the Elegants were not to be denied completely, and two minutes were gone in the third quarter, Dave Clunies '57 fired one past the Jumbo goalie to make the count 5-1. He was assisted in his score by Ed Johnson '58. In addition, goalie Darrell Marks '59 turned in quite a creditable performance considering the fact that he was under almost constant pressure throughout the encounter. Varsity Nine To Meet Northeastern, WPI

Tomorrow afternoon, the MIT varsity baseball squad tangles with the Northeastern Tech on Briggs Field at 2:45 p.m. In the fight of recent developments this looks to be quite a battle, and a good game to watch.

The heavy rain that fell Tuesday afternoon kept the Bruins from getting a crack at the Tufts squad on Briggs Field. Two weeks ago at Medford, the Jumbos tripped the Engineers 8-11, but last week-end’s display of fine pitching, nearly errorless defense, and head-up baserunning portended a radical change in outcome from the earlier encounter.

To recap, hurlers Jerry Welch ’59 and Marty Breender ’61 allowed the Coast Guard a total of only four runs in Saturday’s doubleheader. During that time, the Engineers were stealing bases constantly, and several close beats were deftly executed.

This afternoon, the Engineers take on Northeastern away. The Tuvaluans will be looking to wreak vengeance on the home squad for last season’s pair of defeats. If last Saturday’s performance was a turning point in the season, Wesleyan may come up with another of his surprises. To date these have included interrupting three infallers, and using catcher Warren Goodnow ’59 as a pitcher. In the latter experiment, his team gave up a 1-0 lead in two innings of relief against Wesleyan.

The Institute Committee convened today for its last meeting of the term. Several reports were passed, among them that of the Freshman Coordinating Committee.

The FCC report proposed a Freshman Week-end beginning on Thursday, September 20, with registration, a class welcome in Kresge and informal section smokers. Friday's program consists of individual meetings with the advisors, two tours, a Rally and Activities Midway, and a Freshman dance. A picnic for Saturday is tentative, and the traditional President's Reception will be Sunday.

**BASEBALL**

**Varsity**
- Friday, May 17 at Northeastern 5:00 p.m.
- Sat., May 18 W.P.I. Briggs 2:00 p.m.
- Fri., May 17 Northeastern Briggs 8:00 p.m.

**Freshman**
- June 18 EARC Finals at Princeton
- Sat., May 18 EARC Finals at Navy

**Prediction:** In the heavies race it should be Princeton as the team to beat, especially since they are rowing on home Carnegie Lake. Our boat could pull to a strong second or third with too much trouble, or possibly a bow length victory. The lights are again going against Navy, to which they recently lost, and some of the stronger competition on the Atlantic Coast. They are the underdogs to be sure, but anything can happen on an oarmen's holiday.

**RUGBY**
- Sat., May 18 New York Rugby Club Briggs

**Prediction:** The highly regarded rugbyers surprised us last week with their loss to Amherst, but we feel that they will be on the comeback trail and down New York in proper fashion. This one is the one to watch this week.

**ATTENTION**
- Working or Vacationing
- Atlantic City, N.J.
- Special Student Rates at Student-Run "CAMPUS" 505 Pacific Ave.
- Name School with request for information

**Spot Cash for Discarded Books**

(yes, even books discontinued at your college)
