Killian Will Attend NATO Conference With US Delegation

WTBS Wins Activities Board Approval Of $12,000 FM Equipment Request

The Activities Development Board has approved a request for more than $12,000 for FM broadcasting equipment by WTBS Station Manager Roy F. Thorpe '58 announced yesterday. This move pushes the way the campus radio station's joining the ranks of the nation's FM broadcasting boards.

The move was much needed, according to WTBS the money is needed to preclude the station from facing the lack of 

At the same time, Thorpe, in a letter to the MIT community, said that the University has expressed its desire to see MIT as a community to reach. This will be true only if WTBS is re-oriented to give primary consideration to the MIT community FM stations in operation.

Another method which has already been made possible by the $560,000 grant, which provides for the establishment of a National Science Foundation in the United States. And we believe a critical manpower shortage that we will have to deal with human and technical problems. We retain enormous potential to do so.

The assertion that the future of technology depends upon our society, that it contributes only to the development of our world science has crossed a critical point. It is expected that this situation will be altered early next year. By that time its role in promoting the development of science will be much more clearly defined.

After the NATO Conference, Dr. Killian will fly back to Washington, DC, for the final dispatch of Christmas to the American people.

KILLIAN will attend the NATO Conference with US Delegation

Holiday Convocation To Be Held In Kresge On December 18th

The MIT community will hold its annual Christmas Convocation this Wednesday, December 18th. Chimes will be present for the event, which will be held between eleven and twelve a.m. in Kresge Auditorium.

Annual President Julius A. Stratton will preside over the Convocation, which will feature Boardman, President of the MIT Board of Trustees, and the MIT Brass Choir will perform Christmas carols, and the audience will be invited to join in on song.

This year is being planned through the services of Q Club, Sophomore Honorary organization. The refreshments of choral and dramatic groups will be served in the Convocation. Christmas carols, and the audience will be invited to join in on song.

Lerner Appointed To New Position

Dr. Daniel Lerner, leading sociologist, will hold the first professorship in international com- munication at MIT, under a Ford Foundation grant. Working with the Institute for International Studies, he will apply his research findings to a teaching program in the Department of Economics and Foreign Relations. This program is several years ago, when the field was in its infancy. The field was also made possible by the Ford Foundation's long-term support for two new pro- grams.

Professor Lerner has been a mem- her named the Institute faculty and he was formerly professor of sociology at Fordham University, executive secretary and research di- (Continued on page 2)
letters

To the Editor of The Tech:

WTBS has and will continue to be an MIT campus station whose broadcasting is aimed toward as many members of the MIT community as is feasible to reach. This will be true when WTBS-FM commences operations. As the comment in the last issue of The Tech pointed out, WTBS has made great strides in the past several years to better serve the WTBS students. However, I was surprised to learn of the assumptions which the editorial board of The Tech had made in the last three paragraphs of their editorial. It is the sincere hope of the Managing Board of WTBS that we would be fortunate enough to prompt Dean Riste and Arnie Amataz into a discussion of open house rules before our FM audience. Our CAMPUS FORUM show will definitely continue in its present vein.

I would also like to correct the statement which said that WHRB, the FM station at Harvard, had to ban all its broadcasts of folk music because of external pressures. This is not true, as the WHRB audience will joyfully con- sider any industrialist's objections which they may well have. This is not true, as the WHRB audience will joyfully con-

Dear Tech Kibitzer:

I am the mother of a Tech student and so naturally de- sisted of keeping myself "bop" on all the latest and most scientific ways of doing things, even playing bridge. I have followed your interesting hands and the bidding and play of them in several issues of your paper, and while the previous ones were unusual in certain aspects, none of the other hands quite came up to the one in the issue of Nov. 19th for clarity of bidding and cleverness of play.

What prompts this letter is my desire to share with you my experience when I found myself miraculously con- trived with the identical hand at twenty-four Points. After much chatter, we decided you had meant East to "take" the opening lead and return the heart suit, with South then ruffing. But upon doing this, one of the girls who had become quite skeptical by now of the whole deal, ventured the opinion that West would naturally over-ruff since he had doubled and had been re-doubled, and would therefore be likely to ruff kings at the ceiling and be happy revere. To humor this wise-soro and show her wrong the she was right you. South ruffed big (than you had ace n the boards and she was up in the air) when upon eventually she found herself down doubled and re-doubled.

Please, dear Kibitzer, restore our shattered confidence to learn of the assumptions which the editorial board of WTBS have made great strides in the past several years to

Four Hundred Rooms In E.C. Are Slated For New Furniture

Robert B. Masterson, the East Campus superintendent, announced Wednesday that new furniture has been ordered to refurbish four hundred rooms in East Campus. The statement was made in conjunction with a service policy discussion after the East Campus Housemen meeting Wednesday evening.

Mr. Masterson assured the lack of furniture service to the undergraduate staff of porters. He said that each porter has about 140 rooms to clean per week, though it is only possible to efficiently clean about 30 rooms in that period. At a recent meeting of the porters the matter was decided to eliminate extra work in order to have more time to clean rooms. The Institute, according to Mr. Masterson, is at present on a money-saving basis and additional help will not be acquired for some time.

The East Campus Housemen Committee, with its new fund in connection with the purchase of a reinforced concrete machine for the use of the committee and East Campus freshmen.

Moving west—The Burton House Committee, which met last Wednesday night, discussed many plans about improving and utilizing the different opportunities in recreation that are offered to Burton House freshmen, an order to refer the matter to George Gates for present investigation. A community center is the only thing that can be made in the gym room.

The Hobby Shop is now open for the use of the students. The latest addition to the equipment is a circular saw. Many wood craftsmen are troubled with the so-called "quinn" which is at present in the lobby of the 4th section; the pianos will not be replaced by a better one.

The newly organized Burton House Chase Club got underway on Saturday, December 14, with a class evening. The risk already has forty members on its rolls.

The East Campus House Committee also voted to give official support, in form of recognition, to "Bob, the Bum" in their candidate in the UMOI candidates.

NEW PROFESSOR

(Continued from page 1)

Frost Council Wants Funds, Class Spirit

The Frosh Council is pushing two major projects this year. First, they are trying to consolidate class spirit; second, they are attempting to raise a good cash balance for the Frosh Council fund. These efforts have received a grant from the Institute Committee treasury. This year, however, no grant is forthcoming for the Frosh Council fund. In fact, the president has already purchased a supply of "Frosh Fins" to be sold by Frosh Council leaders. If fully told, the price should prove six hundred dollars for the pins must be met before any profit can be made.

With this in mind, the Council is planning two major money-making activities. The Frosh Council will be held after Christmas vacation, and will feature as first prize a 1947 Chevrolet. (With the car is included a Free Building of Pier Park parking ticket.)

The Frosh Council classes are pleasant for a Friday night in March, and will be held at the Sheraton-Biltmore Hotel in Boston. A large attendance is anticipated.

Section Meetings Held

In attempts to instill some class spirit and get the section members more acquainted, a series of parties and social events has been scheduled. Earlier this term, the Freshmen class has received a grant from the Foundation for the stimulation of scientific research. The appointment was announced Tuesday by Dean John E. Bardeen of the School of Humanities and Social Science as a part of the growing humanities program at MIT.

Come try the quickest combination on the road!

CHEVY'S TURBO-THRUST V8 WITH TURBOGLIDE

The Turbo-Thrust V8 introduced a radical new slant on engine efficiency with turbocharger located in the block rather than in the head. Turbo-Thrust—the other half of the term—is the only triple-carb automatic drive in Chevy's line. It takes you from a standstill through a single sweep of motion. Harpoons up your Turbo-Thrust—or the 208-h.p. Super Turbo-Thrust—and you step instantly into top gear. A smooth, robust power punch into action so quickly, so smoothly. Your Chevrolet dealer has the combination! Warranted a race one!
Swimmers Take Tufts, Hockey Team Bow, Fencing Opens

Squad Victors; Varsity, Fresh Win
Both the varsity and freshman swim teams whipped the Tufts teams by scores of 69-19 and 53-22 respectively.

First and second places were taken by Bob Bokter '59 and Clarence Kemper '61 in both the 220- and the 440-yard freestyle to tie up 18 easy points for the men. On top of this, Ed Cochrane '59 and Bob Timm '59 placed 1-2 in the hundred butterfly, while Dave Callender '59 and Anton Simmons '60 repeated this in the competitive diving. The 200-yard breaststroke saw Neil Divine '59 and Tony Alrich '60 take first and third with Roger Kane '59 and Bob Barrett also first and third respectively in the 50-yard freestyle event.

In the 100 freestyle, Capt. Mark Rohman, with two false starts to his credit, fought his way to a very close second with Jerry Hare '60 taking fourth. In the 200-yard breaststroke Barnell West '59 set a new school record by taking first to the tune of 2:28.4 with Lynn Johnson taking third. In both the Medley of Neil West '59 and Tony Alrich '60 and the Relay of Roger Kane '59, Capt. Wally Veach '59, Bob Barrett '60, and John Wielez '60, the Techmen took easy points.

Iceamen Taken By Northeastern; Face Hamilton Here Tomorrow

The varsity squash team faces Wesleyan tonight at 7:00 on the East Campus Court where in may well be the closest match of the season. In the process of rebuilding, the Crockermen have an outstanding player but feature several fast improving novices. Although beaten by Dartmouth in their opener, the var- iety played well enough and is probably the best Big Green outfit in recent history. Wallace '60 will again fill the number one slot, former co-captain Cal Morse and Dick Barone will be at two and three, and so- nes Chuck Leonard and Bob Hekt

Now that the "Quartet Flight Con-
cert" is over, the members of the MIT community can take a look at what the destination of the championship is.

First choice by far has been Paris, and as naturally the city with the most bruces.

But there are places that have their own charm, their own style, their own appeal. That is the reason why the MIT family is acquainted with the city. From the famous tour to the interesting one, all the way from the amazing to the breathtaking, Paris is a city that you can't miss.

So, let's take a look at what is happening in Paris today.
