Rule's Report Provides Better Desk Service, Same House Hours

A final statement on Parietal Rules was given to Dormitory Council last Tuesday night by Dean Rule. Rule's statement agrees in essential points with the recommendations in Dormcomm's Open House Report. Open House hours will not be cut, except for the noon to four p.m. period on weekdays. Friday and Saturday nights, including holidays, will have a one a.m. time limit.

A second major decision will have a sign-in sign-out system for dates begun in the dormitories. To facilitate this system, the dorm desks will remain open the full length of Open House hours, and will be staffed by regular Institute personnel. This is an extension ranging to forty-four hours of extra service on week-ends.

Satisfaction Is Widespread

Jerry Stephenson '59, Secretary of Dormcomm and author of the original Open House report, said, "I am pleased that the Dormcomm report was as well received as it was. This is a good sign—student government

ate Association President, felt that the students are glad that the administration received the Dormcomm report so well, and that they will receive Dean Rule's report just as well. He said that all the arguments on both sides were backed up by good, rational arguments.

When asked about final determination of vacation and holiday hours, Amstutz said that it has been almost completely decided that holiday hours during term-time would be covered by the regular times. Vacation nights would be kept at one a.m. except for the night immediately prior to resumption of classes, when the ten p.m. limit would be in effect. This would probably mean that New Year's Eve would have a one o'clock limit too.

Commenting on the relevance of these developments to Inscomm's own problems, Amstutz said: "This is a step in the right direction. Dormcomm and the deans, who had a mutual problem, have come to a mutually satisfactory solution."

COMPLETE TEXT OF RULE'S STATEMENT

The text of Dean Rule's Report to Dormitory Council concerning Parietal Rules will be found on page three.

and the Administration are capable of co-operating and arriving at a compromise on problems that affect both of them."

Dean of Housing F. G. Fassett, when questioned last Wednesday night concerning the report, made the following points:

1. the date sign-up lists will be destroyed very shortly after they are recorded.

2. after a year's trial period, the sign-up system will be evaluated by student government and the deans in joint deliberations.

3. more staff will be hired to man the desks during the extra hours.

Dramashop's Second Set Of One-Act Plays Billed For Tonight

The second in its series of Evenings of One Act Plays will be presented at 8:30 tonight in the Little Theatre by the Dramashop. After the plays there will be a critique and refreshments. As has been the practice, no admission will be charged and everyone is welcome to come.

For the third in this series of one acts, to be presented in March, two original plays will be presented. All who wish to submit any one act plays they have written should submit them by March 1, to Professor Everingham at Kresge Auditorium.

At its general meeting the Dramashop elected Stephen Lorch '59 as General Manager to replace Michael Meeker '58. Others elected were Paul Schroeder '59—Secretary, Gerald Schroyer '59—Treasurer, and Donald Silverman '60—Publicity Chairman. Joseph Ronsenshein was appointed to the temporary position of Representative to TV and Radio.

One of the plays to be presented tonight is *The Drunken Sisters*, a satire play written by Thornton Wilder, first published in the 100th Anniversary issue of the Atlantic magazine. Basing his play on the Alkestis legend, Wilder sought to revive the Greek tragedian's practice of presenting a play, or a satire, immediately after their main tragedy, which satire lampooned the serious work.

Need For Strengthened Housecomms Cited By McGovern And Stephenson

UAP candidates Jerry Stephenson '59 and Pat McGovern '59 discuss their campaign issues with Gus Pettit '60, THE TECH City Editor.

"How would you run Inscomm?", and "What do you think of the new, smaller Inscomm?" are two of the questions put to the candidates for President of the Undergraduate Association (Patrick J. McGovern '59, and Jerome Stephenson '59) by members of *The Tech* staff in an informal interview Wednesday night.

To the question "What is your view of current efforts to cut down the size of Inscomm?", McGovern said he objected to the idea of an established body of "elders"—Seniors who make the "right" decisions for students. However, he stated that he

Why Vote?

This year student government at MIT, particularly Inscomm, has been the object of much criticism for its action, or lack of same, on certain pertinent questions. Where the fault lies is a point of controversy, but the root of the trouble can largely be traced to the student body in general for their disinterest in the problems. For instance, less than one-third of the students voted in the UAP-UAVP elections last year. The non-voters are, nevertheless, the ones who are complaining most loudly. Effective leadership cannot be had without the full support of the student body; the elections next Tuesday are just the first step towards a better Inscomm.

News Director

would be in favor of decreasing Inscomm's size if the end result is to "put more decision making power in the hands of the individual housecommittees."

Stephenson stated his belief that "A small committee is always more effective." He favors an Inscomm which is aimed at "less governing and more coordination between living groups and activities." "Class representation has been artificial in the past," according to Stephenson, due to the fact that most activities have been represented by upperclassmen, leaving the frosh and soph class rep-

(Continued on page 4)

"MIT: A Professional School?", Title Of Panel In Kresge Tonight

Five major questions will be asked of the panel in the program which the Student Committee on Educational Policy is sponsoring in Kresge Auditorium tonight. The questions are: (1) What are the natures of science and engineering as professions?; (2) What responsibilities, if any, do the scientist and the engineer hold to society?; (3) Do the responsibilities of the scientist and the engineer differ from one another?; (4) How does MIT attempt to convey these responsibilities to its undergraduates?; (5) How might it improve its present methods of conveying these responsibilities?

Erwin D. Canham, editor of the Christian Science Monitor and moderator of tonight's panel in Kresge Auditorium.

Regional Conference Will Hear Speeches By Killian, Stratton

Dr. James R. Killian, Jr., President Eisenhower's Special Assistant for Science and Technology, and Dr. Julius A. Stratton, acting president of MIT, will be the principal speakers at the concluding dinner of the MIT Regional Conference, to be held at the Shoreham Hotel in Washington, D. C. on March 1, 1958.

Other speeches at this one-day meeting will include an address by Dr. George R. Harrison, Dean of the School of Science, entitled "What's Ahead for Science?"; a speech on "New Frontiers in Molecular Biology", by Dr. Francis O. Schmitt, biology professor, and "Twentieth Century Physics in the High School", an address by Dr. Elbert P. Little, executive director of the Physical Science Study Committee, who is helping to develop a new high school physics program stressing "do-it-yourself" techniques.

WTBS To Broadcast Campus Affairs Show

Beginning soon, WTBS, as an addition to its program of increased coverage of campus affairs, will inaugurate a new series of newscasts devoted entirely to campus news. Every Monday, Wednesday and Friday at ten p.m. a ten-minute newscast will be presented by the WTBS Campus Affairs Department.

These broadcasts will feature an increased use of recorded telephone interviews and complete coverage of news from campuses in Boston and the surrounding area.

The WTBS Campus Forum will be continued this term with its presentations of pertinent issues in the news. A new feature of this program will be several "bullsessions"—personal interviews with various members of the administration and faculty.

T.C.A. Places Sykes, Hoskins, Weitzel And Alker In Top Posts

The Technology Community Association's roster of officers will carry new names due to last Wednesday's election, held in the TCA office, Walker Memorial. Lynn Sykes '59 of Phi Sigma Kappa was elected president, replacing R. Travis Amis, III '58.

The men chosen for Vice Presidents were Hartley Hoskins '59, General Vice President of the entire organization and specifically connected with the Service division, who replaces Lawrence H. Leonard '58; William B. Weitzel '60, Vice-President of Social Services, who replaces Harvey J. Notarius '58, and Hayward B. Alker, Jr. '59, Vice-President of Religious Action division, replacing Spencer S. Swinton '59.

The remaining two officers are Craig D. Sawyer '60, Treasurer, and David L. Camenga '60, Secretary.

Hoopsters Win Over Tufts 61:56 Polutchko, Hasseltine Pace Upset

SPECIAL TO THE TECH
Cambridge, Mass., February 19, 1958. Sparked by the deadly one-handed push shots of Bob Polutchko '59, the MIT basketball team scored a clean cut 61-55 victory over Tufts tonight in the MIT gym. Playing probably their best game of the year, the Burkemen outmaneuvered a Tufts man-to-man defense and matched the taller Jumbos in rebounds for the victory. Hitting for 41% from the field, the hoopsters recorded their fourth win of the season, and second since the return of Polutchko from co-op. The victory was all the sweeter, for Tufts boasts a formidable record including a win over Harvard.

Tech started slowly with Dick Bradt '60, Lee Cooper '59 and Eric Hasseltine '59 adding the first three baskets as Tech trailed 9-6. Then Polutchko got hot, added the first two of his 28 points on a short jump shot, and then alternated baskets with Hasseltine as Tech broke ahead to a 16-11 margin. Tufts added 9 points in a row at this point, but Norm Howard '58 sank a free throw followed by baskets by Polutchko and Hugh Morrow '60. Tufts maintained a slim margin practically to the end of the half, leading 24-21,

26-23, 28-25 and 30-27, until with two minutes to go Polutchko tipped in a rebound and following a missed layup, Hasseltine put MIT ahead 31-30. Finally, with six seconds to go, Captain Mac Jordan '58 added a long one-hander to make it 33-30.

The opening minutes of the second half saw Tech exhibit some of its best ball of the season as they opened up a 10-point lead with ease. Polutchko added two one-handers, Bradt a rebound, Jordan a layup, and then Polutchko again with a beautiful back-handed layup. Hasseltine and Polutchko continued to dominate the scoring with Bob adding two long push shots to open the margin to 49-37 midway through the half. At this time the team of Polutchko, Jordan, Hasseltine, Morrow and Bradt was working together beautifully although Bradt has not yet worked into the pattern completely and was somewhat wasted on the post.

Tufts slowly began to eat away the lead as time began to run out. To counter this Coach Burke substituted frequently so as to always have a fresh team. Polutchko continued to carry the burden, hitting on two jumps, followed by a layup by Herm

college world

Anybody unhappy with the education he's getting here at good old MIT? If you haven't heard, there's a fellow down at Columbia who decided that the four years he spent at that institution were not worth the seven thousand dollars he claims he paid for them, so he's suing the school for the full amount. It might be wise to be sure of your position before you start your suit, or the Institute might do as Columbia did, and sue you in turn for the one thousand dollars tuition you still owe.

The Army has decided to dispose of a number of Sherman tanks which they find lying around unused, and they have found a willing customer in the Delta Sigma Pi's at Wisconsin, who have placed a bid for one of the things. They want it for blind dates, or else maybe for a big smash of a party. Now I wonder just what a Sherman Tank brings on the open market? If they go according to some of the government sales I've seen, you should be able to pick one up for a couple of hundred dollars, which is "just a fraction of the original cost—one hundred thousand dollars plus. Lordy—can you imagine being picked up for a rush week engagement in "Old Shermie"? Or perhaps being introduced to the house mother, Mrs. Zilch, "who lives out back in the Sherman Room?" Neat!

The people down at Johns Hopkins invited Al Capp to appear at some function, and, according to the University of Pennsylvania *The Daily Pennsylvanian*, received the following reply: "Dear Sirs: Thank you for asking me to Johns Hopkins. As I recall, when I was there last year or two years ago, I went for fun. I have, I regret to tell you, become avaricious since then. I now charge \$500 plus expenses to turn up as far away from Boston as Baltimore.

"I hope this is too expensive for your student council.

Al Capp"

Nice mans!! Just the type person you love to do business with.

Occasionally, while reading through a pile of college newspapers, one can find an editorial which for some reason or another seems to just want to be reprinted. Such an article was found in the *Technique of Georgia Tech*, by *The Duke Chronicle*, and I in turn pass it on to you: ". . . Frankly, I hope Elvis gets inducted soon, because I am sick of hearing about him. Of course we'll all soon be subjected to photos of his first haircut, his illfitting uniform, or perhaps a homey shot of 'our boy' digging a latrine.

"And now that Prince Charles has entered school, we are continually bored with stories of his report cards, the hardness of his bed, his favorite games, and who picks him up to take him home.

"Mike Todd's claptrap clambake in Madison Square Garden not only bored readers but televiewers as well.

"And of course we can't forget other front-page bores such as the Duke and Duchess, Rita, Erroll, Grace, Porfirio, the Dionnes, Farouk, Aly Khan, Doris Duke, and the rest.

"Perhaps newspapers shouldn't be criticized for printing so many column inches about these personalities. After all, they are only trying to meet the demands of their readers."

Dix Browder '59

review

Liepman Group Plays "Facade" "Concertino"

Last Sunday, February 16, the MIT Humanities Series presented a program of chamber music. Professor Klaus Liepmann of the Music Department conducted a chamber orchestra consisting of members of the Boston Symphony. Two works were played: the Edith Sitwell-William Walton Entertainment "Facade", and Gregory Tucker's "Concertino for Chamber Orchestra." This was the premiere performance of the "Concertino."

Mr. Tucker, who is also a member of the Music Department, finished the score of his "Concertino" last month in Rome where he has been on leave as a Guggenheim Fellow. The "Concertino" is in three movements, Allegro moderato, Andante sostenuto, and Finale Allegretto. Mr. Tucker writes about the work:

"The instruments are all used in a chamber style, the group seldom sounding orchestral. My general aim as regards the sonorities is to create an impression of improvisation by individuals. There are few chordal progressions, and all depends on the precision of each player. The first movement is in the nature of a sonata allegro. The development consists of two sections, the first being a free treatment of the original materials, and the second a fugato with the subject shared by all instruments.

"The second movement is an Andante Sostenuto "Waltz", made out of the same material as the Coda of the first movement. Its texture is again that of chamber music with only two short spots for the tutti.

"The third movement is less somber than the first two. It is a sort of Rondo on lively melodies, full of solos for everybody. It is actually a set of continuous variations leading to a broad and simple coda."

We shall not here attempt any evaluation of the piece, but leave that to more seasoned critics. An excellent performance of "Facade", with Norma Farber reciting, followed the intermission. In an attempt to muffle the orchestra somewhat, curtains were set up around the rear of the stage and the orchestra was placed in the right rear of the stage, on a rug (the stage was bare, save for the performers, in the "Concertino"). Miss Farber was placed at the left front. Quite often, though, Miss Farber was drowned out by the orchestra. The music of the words themselves always came through, but the words themselves became, at times, unintelligible. Perhaps a solution would be to follow a suggestion of Dame Sitwell's brother Osbert, who stage-managed the original production. He suggested that the reciter speak through a megaphone, and, lest this look a little peculiar, he suggested that the performance take place behind a curtain! Of course, the electronics industry has come some distance in the years since 1922, when "Facade" was written. There could have been a better balance between Miss Farber's microphone and that used by the orchestra. This is one time where Kresge's magnificent acoustics detract from rather than help a selection. Of course, the ideal solution would be to have everyone intimately acquainted with the text. Perhaps a copy of the text in the program notes would have been helpful.

The concert was a recording engineer's dream. Each note, from the lowest of the double bass to the highest of the piccolo, was clean and crisp. The percussion was "super hi fi". With a little electronic magic, the imbalance in "Facade" could have been ironed out. A recording of this concert would certainly have made an excellent addition to Unicorn's "Music at MIT" series of records.

The personnel of the orchestra were recruited from the Boston Symphony, except of course for Mr. Tucker, who was at the piano for his "Concertino". They were: Phillip Kaplan, flute and piccolo; Pasquale Cardillo, clarinet and bass clarinet; Felix Viscuglia, alto and baritone saxophone; Paul Keane, horn; Roger Voisin, trumpet; Josef Orosz, trombone; Everett Firth, percussion; Samuel Mayes and Martin Hoherman, cello; Georges Moleux, double bass.

The audience was remarkably large, considering the storm, and the facts that Yehudi Menuhin was at Symphony and that there was a concert sponsored by Pro Musica Antiqua at Jordan Hall. As the program commenced, the auditorium was perhaps a third full; Conductor Liepmann waved the audience down towards the front. At the conclusion, the auditorium was between half and two-thirds full. The audience, though small, was very enthusiastic, demanding several curtain calls from both Mr. Tucker and Miss Farber.

The next and final Humanities Series concert of the season will be Sunday, March 23. Ernst Levy, pianist, will play an all-Beethoven program.

Open House-Rule's

A truly successful community is based on the intelligent cooperation of all its members. It is the over-all responsibility of the Administration of the Institute to ensure that the conduct of student affairs be such as to maintain an orderly community life which merits the approval and meets the accepted canons of behavior of society while maintaining respect for the rights of the individual. Within this framework MIT students have freedom in managing their personal affairs because MIT believes such responsibility, if judiciously used, will make for growth in character and power.

Concern for these matters has led the Administration to inquire into the extent of visiting hours for women guests in the undergraduate Houses. Upon request, the student Dormitory Council has studied the question and has presented a thoughtful report. Among the factors cited by the Dormitory Council was the consonance of their recommended visiting hours with the parietal rules of women's colleges in the Boston area. The question of these hours is also made more acute by the shortage of lounge space in the dormitories and of off-campus facilities immediately surrounding the school to which a date may be taken.

In light of these considerations, I consider it necessary to make revisions in the existing parietal rules to assure the welfare of the students and maintain for the Institute accepted standards of conduct.

Visiting hours for women guests in the Undergraduate Houses, commencing with the Fall Semester, 1958, will be:

- Monday, Tuesday, Wednesday, Thursday 4 p.m. - 10 p.m.
- Friday 4 p.m. - 1 a.m.
- Saturday 12 noon - 1 a.m.
- Sunday 12 noon - 10 p.m.

These hours differ from student recommendations in that the hours from noon to 4 p.m. on weekdays and from 10 p.m. to midnight on Sundays are removed. Social events by common practice do not start prior to 4 p.m. on weekdays. Sunday night preceding a working day should be treated the same as other days preceding a working day.

The registering of women guests upon arrival and at departure will be required. The desks in the Houses will be open during visiting hours, staffed by regular MIT personnel, and a system of individual guest cards will be initiated. A trial period of one academic year is envisioned for this plan.

The administration of this system will be the responsibility of the Dean of Students in consultation with the appropriate student governing groups. I am certain that all students will cooperate in the observance of these rules.

John T. Rule
Dean of Students

Candidates Speak:

(Continued from page 1) representatives definitely in the minority.

Stephenson states that the new smaller Inscomm will "hopefully result as much as possible in giving as much power as is possible to the individual house committees, leaving Inscomm to lobby with the Administration in areas where student interests are not well represented."

The candidates did not reach such accord in their answers to the question, "What are your views on the current open house hours situation?"

Stephenson is "pleased that the report was well received. It presented to concerned persons the position which Dormcomm arrived at and the reasons for its position."

Mr. McGovern objected to the lopsidedness of the report which "presented most strongly those points which favored the student point of view."

"Had the report been more effectively made, it is likely that the status quo would have been maintained," stated Mr. McGovern.

Some differences of opinion arose in discussing the question, "How would you handle Inscomm?"

Stephenson pointed out that "This would depend on the size and type of Inscomm . . . To make Inscomm effective, the Executive Committee must be prepared to present clearly whatever issues might require a standby or ruling of Institute Committee." In answer to the question of who has the ultimate authority in making rules—Inscomm or the Dean's office, Stephenson pointed out that the authority must ultimately reside with the Dean's office. He said that "Making rules (by Inscomm) and hoping they will stick is ridiculous."

As for the question of Voo Doo—"Should it have been 'censored' as it was?" Stephenson stated that, insofar as the Dean's office felt that the magazine represented the whole MIT community, and not just the students, he was perhaps justified in taking matters directly into his own hands.

McGovern suggested, however, that a precedent could have been taken from a situation which had arisen last year concerning The Tech. Said McGovern, "At that time it was decided that in disagreements about policy of the newspaper and its role, the final decision should be made by a committee composed of students from the paper, student government officials, members of the administration and people in the publications section of MIT."

REQUIRED READING...

This interesting, fact-filled book is certain to be informative for all college engineering students looking forward to their future careers.

Send today for your copy of this 16-page brochure about the career opportunities which can be yours at one of the nation's leading electric and gas utility companies, Public Service Electric and Gas Company.

Write Public Service, 80 Park Place, Newark 1, N. J. for your free copy.

The electric and gas industry is a growth industry, vibrant, full of promise with excellent chances for you to advance.

Be sure to see the Public Service man the next time he is on your campus.

"We've Put a Speedometer on the Stars!" Advertisement for Viceroy cigarettes. The ad features a professor in a suit pointing to a speedometer on a star, with various speech bubbles and panels. One panel shows a spectroscope, another shows a filter on a cigarette. The main text says "Light One! Discover... VICEROY GIVES YOU MORE OF WHAT YOU CHANGE TO A FILTER FOR!" and shows a pack of Viceroy Filter Cigarettes.

MY CLOSEST SHAVE by Bill Bridgeman
Douglas Test Pilot

"My closest shave was during the first try at a speed record in the fantastic Douglas Skyrocket," says Test Pilot Bill Bridgeman, author of *The Lonely Sky*. "A special B-29 dropped me like a bomb at 30,000 feet. . . I turned on my rockets and climbed to 40,000. . . when suddenly all power failed. Rocket power, cabin pressure, heat—everything went—and the window frosted over so I couldn't see. Finally I got the radio going on an emergency battery. . . and a pilot in a chase plane talked me down to a blind landing!"

Two Records Set By Swimmers As They Bow To Brown 54-25

Although setting two new records, the varsity and freshman swimming teams met defeat Wednesday night at the hands of the powerful Brown team; 54-25 and 56-21.

Outclassed and outswum, MIT managed to take a surprising number of first and second places against the highly-rated Brown team. Highlight of the evening was a first place by Burnell West '60 in the 200-yard breaststroke event, which set both a new school and pool record for the event. Captain Murray Kohlman took first in the 440-yard freestyle while Roger Kane '59, Charlie Rook '60, and James Simpson '59 took second places in the 50-yard freestyle, 100-yard free, and the dive respectively.

Handicapped by the loss of ace-freestyler Bruce Marshall, the frosh suffered their first defeat of the season. Tom Ising again broke the freshman record for the 100-yard butterfly while also winning the 50-yard freestyle.

Other noteworthy performances were turned in by Bill Watson, with a first in the diving competition, and by Mitch Brodwin, who scored third in the same event in spite of a bad back.

Both teams will again see action on the night of Feb. 26 at the Alumni pool.

MIT Fencers Downed By Strong Cantabs

MIT's Varsity fencing team met its second defeat of the season, at Harvard last Tuesday. The absence of Barrie Shabel '59, sidelined with an ankle injury, and Bill Hudson '60, who has retired from the Institute, led to a catastrophic score of 20-7 in favor of the Cantabs. The only winner for the Beavers was Joe Pedlosky who was 2-1 in epee.

The Freshmen met the Crimson team and lost a well fought meet by the score of 14-13. The score in foil was 9-9; while the epee team was 4-5. Coach Vitale was optimistic about the promise shown by the yearlings in their first intercollegiate meet.

The next match will be against the strong Cornell team at Walker Memorial next Saturday, when it is expected that Barrie Shabel will be back to pace the foilers.

John Lawlor, B.S. in E.E., Brown, '52, answers some questions about

An engineering career with the Bell Telephone Companies

John Lawlor is a Transmission Engineer with New England Telephone and Telegraph Company in Boston. His answers reflect his experiences during five years in the telephone business.

Q How did you begin as an engineer in the Bell Telephone Companies?

A My first fifteen months were spent in "on-the-job" training—changing assignments every three months or so. These assignments gave me a broad, over-all background in telephone engineering. And they were accompanied by plenty of responsibility. They progressed in importance with my ability to handle them.

Q What is the attitude of older engineers and supervisors toward young men?

A I've found a strong team spirit in the telephone company. You're encouraged to contribute your ideas, and they're received with an open mind. Young men and new ideas are regarded as vital to the continuing growth of the company.

Q How about opportunities for advancement?

A I'd say they depend on the man. Opportunities to demonstrate your ability come with each new

job you're given. The size and importance of your assignments grow with your ability to handle them. All promotions are made from within, and the growth of the business is creating new openings all the time. One more thing. Most telephone engineering locations are convenient to colleges. You can aid your advancement by keeping on with your studies.

Q How does the telephone company stack up where pay is concerned?

A Starting salaries are competitive with those offered by most large companies. Raises are based on merit, with several increases during your first two years with the company. What's more, your performance is reviewed regularly to make sure that your pay keeps up with your progress. All things considered, I think a Bell Telephone career is second to none in rewards and opportunities.

Find out about career opportunities for you in the Bell Telephone Companies. Talk with the Bell interviewer when he visits your campus. And read the Bell Telephone booklet on file in your Placement Office, or write for "Challenge and Opportunity" to: College Employment Supervisor, American Telephone and Telegraph Company, 195 Broadway, New York 7, N. Y.

**THE PLEDGE YOU SAVE
 MAY BE YOUR OWN**

Today's column is directed at those young female undergraduates who have recently pledged sororities and are worried, poor lambs, that they won't make good. Following is a list of simple instructions which, if faithfully observed, will positively guarantee that you will be a mad success as a sorority girl.

First, let us take up the matter of housemothers. The housemother is your friend, your guide, your mentor. You must treat her with respect. When you wish to speak to her, address her as "Mother Sigafos" or "Ma'am." In no circumstances must you say, "Hey, fat lady."

Second, let us discuss laundry. Never hang your wash on the front porch of the sorority house. This is unsightly and shows a want of breeding. Use the Chapter Room.

Third, meals. Always remember that planning and preparing meals for a houseful of healthy girls is no simple task. Your cook goes to a great deal of trouble to make your menu varied and nourishing. The least you can do is show your appreciation. Don't just devour your food; praise it. Exclaim with delight, "What delicious pork jowls!" or "What a yummy soupbone!" or "What scrumptious fish heads!" or "What clear water!"

Fourth, clothing. Never forget that your appearance reflects not just on yourself but on the whole house. It was well enough before you joined a sorority to lounge around campus in your old middy blouse and gym bloomers, but now you must take great pains to dress in a manner which excites admiring comments from all who observe you. A few years ago, for example, there was a Chi Omega named Camille Ataturk at the University of Iowa who brought gobs of glory to all her sorors.

Camille hit on the ingenious notion...

Camille hit on the ingenious notion of suiting her garb to the class she was attending. For instance, to English Lit she wore a buskin and jerkin. To German she wore lederhosen and carried a stein of pilsener. To Econ she wore 120 yards of ticker tape. Her shiningest hour came one day when she dressed as a white mouse for Psych Lab. Not only her Chi Omega sisters, but the entire student body went into deep mourning when she was killed by the janitor's cat.

Finally, let us take up the most important topic of all. I refer, of course, to dating.

As we have seen, the way you dress reflects on your sorority, but the men you date reflect even more. Be absolutely certain that your date is an acceptable fellow. Don't beat about the bush; ask him point-blank, "Are you an acceptable fellow?" Unless he replies, "Yeah, hey," send him packing.

But don't just take his word that he is acceptable. Inspect him closely. Are his fingernails clean? Is his black leather jacket freshly oiled? Is his ukulele in tune? Does he carry public liability insurance? And, most significant of all, does he smoke Marlboros?

If he's a Marlboro man, you know he's a lot of man. You know he has taste and discernment, wit and wisdom, character and sapience, decency and warmth, presence and poise, talent and grit, filter and flavor. You will be proud of him, your sorority will be proud of him, the makers of Marlboro will be proud of him, and I will be paid for this column.

© 1958, Max Shulman

The makers of Marlboro wish to announce that Mr. Shulman has been paid for this column and will continue to be paid for bringing you his homely philosophy throughout the school year.

Product Development Engineer Gerald A. Maley, like many other engineers, mathematicians and physicists, came to IBM directly from college. Here he tells how he put his E.E. degree to work in the exciting new field of computer development.

What's it like to be with **IBM** ?

"What really sold me," says Gerald Maley, "was the way they approach engineering at IBM. I had expected rooms full of engineers at desks. Instead, I found all the friendly informality of my college lab."

An E.E., he came directly to IBM from the University of Buffalo in 1953. Starting as a Technical Engineer, he was immediately assigned to work, with two others, on designing a small calculator. Jerry Maley learned a great deal about computers in a very short time. Incidentally, this small calculator has gone in to production. "It makes an engineer feel good," he says, "to see his project reach the production stage—and to be able to follow it through."

Promoted to Associate Engineer after sixteen months, he became the leader of a nine-man team, assigning problems to his group for solution, approving their block diagrams and the models they built. A short while ago, he was again promoted—this time to

Assigning problem to group member

Project Engineer. "A particularly interesting aspect of my present job," Jerry Maley says, "is the further development of magnetic cores—new memory storage devices for electronic digital computers." His administrative details have been reduced to a minimum, freeing him for creative engineering work.

Perhaps an hour a day goes into paper work such as requisitioning equipment for his group and reviewing technical publications, in counseling members of his team, and preparing for trips to technical society meetings.

Why he chose IBM

Of course, there were many reasons why Jerry Maley selected IBM. He was vitally interested in computers, and IBM is a leader in computer technology. He comes from a scientific family (his brother is a mathematician), and is fascinated by these IBM mathematical marvels which are revolutionizing ways of doing things in so many fields. He enjoys working on large equipment . . . and on "pulses." "It's more logical," he says. "In computer work, you can actually see electronics at work. And it's not all solid math, either. What's more, this

field is so new, you're contributing along with everybody else in a short time." He endorses the IBM policy of promoting from within, with merit the sole criterion. The salary factor, although it was excellent, was not his first employment consideration, he recalls. The tremendous advancement potential was of greater importance.

Testing a new development

What about promotions?

When asked about advancement opportunities at IBM, he says, "You can hardly miss in this field and in this company. IBM sales have doubled, on the average, every five years. Company expansion at this rate—

Reviewing technical publications

in a dynamic industry—makes my future look bright indeed." Since Jerry Maley came with IBM in 1953, career opportunities at IBM are brighter than ever, as all business, industry, science and government turn increasingly to automation through electronic computers.

This profile is just one example of what it's like to be with IBM. There are many other excellent opportunities for well-qualified college men in Research, Development, Manufacturing, Sales and Applied Science. Why not ask your College Placement Director when IBM will next interview on your campus? Or, for information about how your degree will fit you for an IBM career, just write to:

Mr. R. A. Whitehorne

Raquetmen Tally 9-0 In Season's First Win; UConn Is The Victim

The Crockermen took their first win of the season last Tuesday evening as they trounced a surprised UConn team 9-0 in a decisive victory. In addition, eight of the nine men swept their opponents in three straight games. Cal Morse '58 at number one, squashed Lenny King '58, his husky opponent 15-10, 15-3, 16-17, and 15-10, to give Tech its first win of the season in the one spot. Dick Barone '58 had no trouble overcoming the number two man 15-10, 15-8, and 15-11.

Chuck Leonard '58 came through in improved form to win 15-6, 15-11, and 15-13, to add a well earned win to his record. Colin Clive '60, keeping up the good performance turned in last term, won easily in three 15-4, 15-5, and 15-8. Jim Pennypacker '60, one of the gunning sophomores on the team, played a fast game winning 15-6, 15-8, and 15-9. Bob Hecht '58, putting in a good showing in the number six position pulled out a 15-7, 15-8, and 15-11 win.

Bob Hodges '60, also showing his first win of the season, playing a hard game along the wall took the set 15-11, 15-11, and 15-7. John Priest '60 in the eight spot won quickly 15-6, 15-7, and 15-9. Giving Tech their ninth win and wrapping up the shutout, was Neil Haller '58 who romped to victory 15-7, 15-8 and 15-9.

This week-end the team will be going for its second win against Fordham at Fordham in New York City.

Last week the Freshmen, lacking Karman, lost their first scholastic match to St. Pauls after having turned in some impressive victories. Only man to win was Faid Saas at number one. He took the set in good form 15-10, 15-11, 11-15, and 15-12. Countryman Loutfy El Sherbiny, unable to pull out the third game, lost 15-12, 15-11, and 18-14. Jack Klapper lost in four games 16-15, 11-15, 15-11, and 15-11. Leon Borstein and Mike Willingham both lost in three, 15-12, 15-8, 15-7, and 15-5, 15-9, and 15-6.

B-Ball: Tech Over Tufts

(Continued from page 1)

Burton '60. With MIT ahead 58-51 Tufts stole the ball but was unable to maneuver into position and proceeded to put on as good a freeze as Tech did. On a beautiful play reminiscent of the style exhibited in the early part of last season, Polutchko grabbed off a rebound and threw long to Jordan who was in the clear for the layup and the decisive two points. Play grew sloppy in the closing seconds with Tufts scoring on a layup and Polutchko adding a foul.

Polutchko's 28 points, high for Tech this year, were scored on 13 field goals out of 26 attempts and 2 for 4 from the foul line. Bob has regained the form exhibited last year and it is truly unfortunate that Tech was without his services in the early part of the year. Captain Mac Jordan has found the "touch" again, and in part it seems due to playing with Polutchko, Hasseltine, of course, has played dependably all year adding valuably when needed. Lee Cooper '59 is as dependable as ever in the back court though his scoring has fallen off some. In general the team is greatly improved from the early part of the season, not just in the return of Polutchko, but also in the overall ball handling and control.

YES, SIR —
I'm buying low-cost
SAVINGS BANK
LIFE INSURANCE

I knew I needed more life insurance—didn't think I could afford it. But a neighbor told me about Savings Bank Life Insurance—said I had to take the first step—go direct to my savings bank.

I did and the people there showed me the right policy for my needs which I can afford. This direct-to-buyer method lowered selling costs—saved me money.

Why don't you look into Savings Bank Life Insurance, including the new low-cost Family Package whereby Dad, Mother and all the children can be protected for little more than it costs for Dad alone?

WHAT TO WEAR ON THE SATELLITE

SCENE: It is almost zero hour at Los Bismuth. On stage are Capt. Carruthers, the man in charge of the launching of the satellite, and Manfred Faustus Sport, the man who will ride the satellite.

Carr: Well, Sport, this is it.

Sport: Real gas, Cap. I'm almost flying already. How do I look?

Carr: You could wear cat-gut and lemon-peels, and who would be the wiser?

Sport: Wake up, Cap. What about that crowd at Mt. Palomar with that big, spooky telescope? Got to look spiffy for them.

Carr: That shirt's a beaut. But, where's the rest of your luggage?

Sport: Who needs more? This shirt is a Van Heusen Vantage

shirt. It's one of those all cotton, drip-dry numbers that never needs ironing.

Carr: What a discovery! But how will you wash it up there?

Sport: In the rain, man, in the rain.

Carr: And how will you dry it?

Sport: In the sun, man, in the sun.

Carr: Well, it's zero minus one. Sport, you'll be gone forever. (SOUND OF WHOOSH-ING). He's gone.

EPILOGUE: The scene is the observatory at Mt. Palomar.

Scientist: Man, he's real gone. Just look at that Van Heusen Vantage shirt.

Yes, in outer space, or right here on terra firma, no drip-dry discovery ranks with Van Heusen Vantage shirts. The tariff? Only \$5.

AERONAUTICAL ENGINEERING

The Aeronautical Engineering Department will present an exhibit of aeronautical developments, featuring especially missiles and models of missiles, in the lobby of building 7 during the week of February 24.

Other highlights of the Course XVI program will include an orientation talk by Professor Raymond Bisplinghoff at 5 p.m. on Wednesday, Feb. 26, in room 10-250, and an open house at the Naval Supersonic Wind Tunnel on Memorial Drive at 4 p.m. on Wednesday, March 5. The wind tunnel open house will include a demonstration of the tunnel in action.

BIOLOGY ORIENTATION

Due to the Institute being closed Monday, February 17, the day of which the Biology Department was to hold its portion of the Freshman Orientation program, the Biology Department is rescheduling its program for Monday, February 24, 5:00-6:00 p.m., Loofbourow Lounge, room 18711, brief formal discussion of Biology, Course VII, followed by an informal one and refreshments. Departmental tour to be arranged.

AHRIMAN SOCIETY

Ahriman Society's first pledge meeting took place last Wednesday. Several pledges have already responded. For others interested in membership, there will be a second meeting on the coming Wednesday, Feb. 26, at 7:30 p.m. Prospective pledges are urged to attend and meet the present members.
