and University President Nath-

righthand right, commanding the

hundred thousand-dollar

$200,000 program of grants to

American institutions of

high

Harvard and MIT are to receive

each over a five-year period.

grants for completely un-

used under the United

States Steel Foundation's pro-

gram.

Festivities will begin tonight at nine on the Shansi Hotel, where the formally-dressed couples arrive an evening of dancing and entertainment. Freddy Burchard, and the Harvard

March Hands will perform during the intermission.

As part of the festivities, the IFC Dance Committee will sponsor a cotillion, chosen from a larger group, by the men as they enter the door. The Queen, who will open the evening, will light an "Olympic torch", which will be carried from the room by a
ten.

The Olympic Games and the cycle contest, which will be held on Saturday, are "first" at the Insti-
tute, and are intended to provide greater incentive for participation in the weekend's activities. Affairs made Starty earlier than twenty years ago, each riding in a chariot pulled by "six gallant

steeds", up onto Briggs Field for the trial heats of the cycle races, which will not en-

dure. At the same time, elimination rounds will be held for the bicycle races.

**Dorm Dwellers Will Holiday Away From Campus Pillars**

"Holiday Trio" gets underway at 8:30 this evening when Herb Reynolds gives the downbeat to the start of the semi-formal dance. This will signal the beginning of a full round of festivities which will mark the 1958 Dormitory Weekend—a weekend during which the com-

muting students have also been invited.

The Bay State Ballroom of the Statler Hotel will be something like a Junior Prom from Without, but with all the extra trimmings.

Filippi predicts that "Holiday Trio" will be the most enjoyable Dormitory Weekend yet.

letters

To The Editors:

Your publication has established a policy of misrepresentation of facts, distortion of news and badly biased reporting, that, I think, has done severe harm, not only to the victims of your misguided efforts, but to readers of your newspaper. Your handling of the Freshman Study is a case in point.

In her letter to the Editors, April 25, Dr. Sussman makes several valid points regarding your frightening lack of newspaper ethics. Instead of checking references, which is a standard editorial procedure, or even quoting to Dr. Sussman, and also to your readers, on whom you editorial policy, I feel that you owe a very sincere apology following Dr. Sussman's letter is another indication of your ing attitude toward the study and Dr. Sussman personally.

The advisibility of stopping nuclear weapons tests is one of the hottest issues, and it has divided people more or less into two camps. The tests can be stopped, but not by a Shelley Storay Living指纹 definitely is a non-starter. When the National Committee for a Sane Nuclear Policy's full page advertisement appeared in the New York Times about two weeks ago, my name was on it along with an impressive list of others: Bertrand Russell, Norman Cousins, David Rockefeller, Calvin's Linear Cell Pauling, to name a few. And the words couldn't have been less clear. We MUST POSTPONE OUR COMING TESTS. 

Nobel prize winning geneticist H. J. Muller stated the basic premise for the abandonment of the tests pretty clearly when he said that the tests are "curtailed or injured throughout the world in future generations as a result of tests already held, is in all probability in the hundreds of thousands of millions." Add to this the equally provocative view of Bertrand Russell that nuclear disarmament will probably bring Communist domination but that domination would be preferable to nuclear war.

The lot of the nuclear crusaders is not particularly heightened by the fact that the Russians have approximately 250 divisions in the field while NATO has some dozen. We can discriminate tests, but limiting the means of their production looks impossible with this in mind that many of the tests scheduled for May are to have twelve. Perhaps Humphrey knows the meaning of eliminating H-bombs from lapsed equation, which is not diminished by the desirability of nuclear weapons. 

Nuclear tests, in scientist Teller tells us, are necessary for the development of a clean bomb. And it is probably with this in mind that the tests scheduled to begin soon at Eniwetok in the Marshall Islands will be performed. Along this line a recent poem in The Swarthmore Phoenix: "I consider the H-bomb clean, Makes sound and sense divorceless. Unless it is meant to rocket, The Ultimate Deterrent. And the Marshall Islanders ask, "Why doesn't the United States test bombs in Nevada?""

Very truly yours, Tony Deutsch, '58

BOSTON AMERICAN LEAGUE BASEBALL COMPANY

Mr. Jack Driscoll
c/o The Tech

Dear Mr. Driscoll:

Congratulations on your letter of March 10 to me.

I am afraid there may be a few ball games, even here at Tech Field this season that will so confuse our fans I cannot add to this possibility by having your ball game here.

In the idea and the rules intrigue me no end, and I should like to attend the "game" wherever it may be held. Please advise.

Sincerely,
Joe McKenney (Public Relations Director)

Mr. McKenney writes in response to a letter from The Tech asking about use of Turkey Bowl for the annual The Tech-Voo Duo baseball contest. Ed.

The Ultimate Detergents

The next food for thought in MIT's current diet of World affairs comes Monday, May 5 when Senator Hub- bert Humphrey of Minnesota is to speak in Kresge Auditorium on the disarmament and control of the outer space.

It is little more than a week since professors Chand- lers, Livingston, Lerner, Lichterman, and Lasser were urging to determine the "Marxist Race" in a Skyscraper's Seminar in Hayden Library Lounge. And only last Wednesday Professor Deutsch and Rootie, Walter Whitman, and others detailed the suggestion, "Is there a peaceful solution to the cold war?" Dr. Saltz, who is currently participating in discus- sions and activities at MIT's Peace Movement, further expressed the belief that no one can get rid of the burden. It is reasonable to see Senator Humphrey interpret disarmament tests, but limiting the means of their production looks like an almost impossible feat. It will be interesting to see Senator Humphrey interpret disarmament tests, but limiting the means of their production looks like an almost impossible feat. It is reasonable to see Senator Humphrey interpret disarmament tests, but limiting the means of their production looks like an almost impossible feat. Batterman Is Varsity Swimming Coach; All Sports in Action

Diving Champ Takes Over; Smith to Phys Ed Post

Charles Batterman, former diving star at Ohio State University, announced yesterday as the new MIT swimming coach. Richard Welch, Athletic Director, announced that Batterman will replace Gordon Smith who held the post since 1956. Smith is to be director of the extensive and comprehensive swimming program.

Batterman first attained coaching fame here when he took over the empty stool last fall. The men won only one of the seven meets and finished seventh in the MIT history. But he is now coaching the swimming team as a Senior in 1944. He won the high and low backstroke titles at NCAA and NAAU competition.

At Ohio State, the agile, wiry diver swept the diving competition in 1949. He travelled to Harvard, where he served as a fielder's choice, and he has been the varsity swimming coach.

Here in Boston, Batterman first attained coaching fame in 1955 after receiving a Master's degree. He was assistant swimming and diving coach at Harvard. He has been the varsity swimming coach and varsity swimming director since 1948.

After receiving a Master's degree at Columbia, he started his coaching career at Sampson College in New York, where he held the positions of assistant coach and swimming director.

Welch, Athletic Director, announced that Batterman will replace Gordon Smith who held the post since 1956. Smith is to be director of the extensive and comprehensive swimming program.
