Dean Rule Suggests Eight-Period Tuition Payment Plan for Next Year

At a Burton House Eliegender last Saturday, Dean of Students John R. Rule spoke on the rise in tuition, the relations between dean and student, and specific concerns prevalent on campus. Burton House itself.

After giving an account of administrative relations, Dean outlined the plan he had proposed at the first seven weeks of school. This plan of the house that turn up by Leila Sussman and Gene Norman Levine is a study made for the Undergraduate. To gain a better understanding of "the development which the examination during four years at MIT." The report, based on answers to questionnaires sent to members of the Class of '61 last August, illustrates the growth of the students in several sections during the course of the freshman year, or those who choose to live in a dormitory, and lastly what factors influence the academic success of the student.

Among the findings included in the report are that future students are recruited disproportionately from families of low income, whereas the future industrial managers tend to come from the upper brackets.

Relative few students begin to consider an engineering career while they are under the age of ten. Twice as many consider a career in science at this early age. The report suggests that the image of science and engineering which should be conveyed to students at MIT is "vague and inaccurate."
The report concludes with the recommendation that future students who choose to live in a dormitory should be given a systematic course in dormitory living that will help them to make the best of their experience.

Parcials Rules, Housemasters Are Problems for Dormcon, Conner

Dormitory Council must do something, according to George Conner '59, newly elected dormcon president. This council of Burton House will be concentrating on meetings of the Council, established with the object of improving the regulations from each of the dormitories.

Conner does not agree with the view that Dormcon is an intrinsically selfish group. He thinks that Dormcon members, a lot of work which has not already been covered by other governmental organizations.

This Year's Programs

Two problems that Dormcon has always been concerned with are so

The loyalty of our alumni is one of our most priceless assets. The record they have made in the world of business and education has thus far been one without equal. MIT’s record is one of success, and it is one that we are proud to be associated with. As a result of our efforts the MIT Alumni Association has grown into a strong, well-organized group that is dedicated to the well-being of MIT and its graduates. The Alumni Association has been an active force in the development of MIT, and it is a source of pride for all of us who are associated with it.

The Alumni Association is controlled largely by Harvard graduates. During this century, to meet this challenge, a merger between Harvard and the MIT Corporation was proposed. At this time that President MacLaurin, the great reformer of the MIT Corporation, stepped in, revamping the corporation structure and providing a new direction for the entire future of the Institution. At this time that President MacLaurin, the great reformer of the MIT Corporation, stepped in, revamping the corporation structure and providing a new direction for the entire future of the Institution.

Rites of Spring Celebrated Without Interference as EChas BonfireRiot

The traditional MIT spring riot took place in the court between Parallel on East Campus last Sunday night. Demonstrations began at eleven p.m., with a firecracker tossed out a window. By the end of the evening, a collaborated bonfire had been set in the court, several dozen bombs were thrown, and many bottles of water had been thrown in anger. The riot continued until dawn, with the final firecracker being thrown around five a.m.

Almost as soon as the disturbances began, president members of the student government appeared. One of the first on the scene was DAP Manager, Steward, who was followed by Jud-\n\ncom candidate Gene Zola '59. Treasurer Mike Filk '56, outgoing officer Arnold Amatula '50 and Richie Cottrell '56, and East Campus Chairman Adul Pinsuana '59. These people wandered among the crowds of rioters, observing the developments, however, they made no move to stop the activities.

Even policemen from the MIT Security Bureau, who by that time, stood on the sidelines, also worked quietly, having not the riot. When three men from the force attempted to approach the rioters, they were drenched by a water bomb and were forced to retreat.

The riot quieted down an hour and a half after it started. By one a.m. one was left except a few dis-\n\nard tourists marauding around the campus of the bonfire.

May 1st is Date Set for Sel. Service Test

All male American citizens must register with the Selective Service within five days following their eight-\n\nteenth birthday, if they have not done so already. Failure to comply with this law will bring prosecution for draft dodging.

Mrs. Eleanor Lutz, in the Advisory Committee on Military Service, room 50-20, will be available to offer guidance and information on this problem to anyone who needs it. MIT students may register for the draft at Phillips Brooks House in Harvard Yard, and are not required to be at home in order to register.

Advertisements of all the 1958 series of Selective Service Qualifications Tests have come from Mr. Francis Nyblin, Massachusetts State Director of Selective Service. This year's tests will be held on May 3, 1958, and will not be scheduled for any other time.

The deadline for making applications for the test is April 11, 1958. The applications will be processed and mailed out by March 10. Applicants are also re-\n\qquired to supply their local draft boards with a completed copy of Form 109.

'hot house' for growing crystals!

...from plum-size up to 8-in. diameter, largest ever grown

This, the world’s longest line of crystal “pullers,” is typical of advanced engineering-in-action in which you are invited to share at Texas Instruments...largest producer of silicon transistors and a major source for germanium transistors as well as silicon diodes and rectifiers...with many engineering "firsts" in semiconductors.

At TI, you will push out beyond existing limitations -- in research, development, design, and manufacture -- into new concepts and new products...into vital fields such as electronics, semiconductor behavior, infrared optics, microwave, magnetrons, radiation damage, high speed data reduction, etc.

openings

SEMICONDUCTORS AND OTHER COMPONENTS -- Transistors, diodes, rectifiers, resistors, and panel instruments.

ELECTRONIC AND ELECTROMECHANICAL APPARATUS -- Radar, sonar, infrared, navigation, magnetics, telemetering, communications, computers, transformers.

RESEARCH -- Semiconductor materials and devices, noise, surface, ferromagnetics, infrared optics, microwaves, magnetrons, radiation damage, high speed data reduction, etc.

MANUFACTURING -- Production, planning, purchasing, cost analysis, etc.

come and grow with us

Hitch your wagon to the Texas star...work at a plant within the city but away from downtown traffic...live within 15 minutes of your work or your play...year-around recreational, amusement and cultural activities. A Texas Instrument representative will be on the campus in a few days to give you more details. You may contact the placement office or write...

Fencers Win Epee Foil as MIT Takes Close 14-13 Mat

Paul by an extraordinary effort of the epee men, the Varsity fencers won a closely contested match against City College of New York, classified as one of the ranking teams in the East.

In foil, the margin was in favor of the Beavers as Professor Keny, took his last two bouts and his Saber ‘59, New England Champs, took his first two, leaving the 3-5 in a heavily protested dual. Both were 2-1 for the day and the Epee was 1-2 giving the team a narrow 5-4 victory.

In sabre, a 1-4 disaster resulted as Karl Koepke ‘59 gave organ of New England Champion, and

THE UNSILENT GENERATION

The Unsilent Generation, driven frank and anonymous autobiographies by college seniors, is the first self-portrait by today's students. These college seniors are making news through their answers to questions about happiness, success, security...about God, education, morals, marriage...about family and social background...about the glass for the future: their future and America's. LIFE ran excerpts from the book, "The New York Herald Tribune and The New York Times have featured it in their literary columns. This involves you. Read about yourself and your contemporaries in this provocative book.

Edited by Otto Buts
Rinehart & Co., Inc.

MAY WE MAKE AN IMPORTANT ANNOUNCEMENT?

This involves your education, environment, vocation, your future: specialty. You are about to launch on this exciting future. Now you can choose your role in this field with one of the nation's leading missile program.

Tech Thinclds Lose to UConn; Freshman Sets New Standard

Campus in their last dual meet of the winter season, MIT's track team was defeated by the University of Connecticut 114-46 on a frosty Saturday afternoon at Briggs Field. The Freshman closed their campaign with a 4-4 victory over the UConn youngsters. In the latter meet Dan McGovern set a new freshman indoor mark in the 100-yard dash.

Glenn Bennett '58 was the high scorer for Beaver Thinclads with a 4:1 victory in 2:25.7. Bob Williamson '59 took the former in 4:44.0 and the latter in 2:33.1. Bob Williamson '59 had second honors with 4:44.0, winning the 200-yard dash in 2:33.1, and taking second spot in the 50-yard low hurdles.

Matmen Take 4th In N. Englands; Weaver And Simmons Star

The MIT Varsity took 4th place in the New England Intercollegiate Wrestling Association Championships at the Coast gymnasium last Friday and Saturday. At the same time the Tech Frosh took 5th amongst the eleven teams in the league.

Finishing off three months of hard but relatively fruitless wrestling, the MIT matmen went down to New Haven.

Basket-Brawl Game Planned For Faculty Early This Spring

Last April over one thousand spectators crowded into the Armory to witness a rib-splitting faculty basketball game between a Science and Humanities team and an Engineering and Administration squad. The game was so well received that the Public Relations Committee announced yesterday it would sponsor the spectacle again this year.

Last year’s game, won by the Science-Administration five, featured such Tech notables as “Easy Uno” Miller, 47 Hubbard Ave., Cambridge 40, Mrs. Lorraine Miller, 47 Hubbard Ave., Cambridge 40, etc. Call Bob Parente, 528 Beacon Street.
