The MIT Hillel Society has elected its new officers for 1960-61. The officers are as follows: George M. Tropp, '63, president; Fred Heiberger, '63, vice president; Phil Rabinovitz, '62, treasurer; and Jeffrey Steinert, '63, secretary.

Committee chairmen have also been selected, and are at work on their various projects. These include the Religious Committee, which is directing this. Howie Pielet, '63; Yoram Goldstein, '63, and Dave Bleich, '60, are directing the reliability and integrity of the organization to the Activities Council to deny to EPIC the use of any MIT facilities, such as Boots Building 10, bulletin boards, etc.

Other programs include an Oneg Shabbat, which will be on Monday, May 26, at 8:30 P.M. in the Rotunda. This will be followed by a musical performance. It will take place in the Harvard University Concert Hall at 8:30 P.M. on Saturday, June 14, at 8 P.M. in Kresge Auditorium.

Tickets for the performance are now available by reservation at the Kresge Auditorium ticket office, ext. 250.

The order of events for the various evenings of Senior Week is as follows:

1. Welcome to Senior Week. An informal open house for freshmen interested in becoming better acquainted with the program will include a tour and opportunity to meet members of the staff.
2. The program will include a tour of the hospital and presentation of the program to students by preceptors, including Dr. J. K. Faulkner, Medical Director and Professor.
3. A guest of provisional Class B is invited to give a personal recital of the activities which may become fully Class B by next year or one year in the provisional status.

Senior Week '60 Plans Announced

"Oriental Art — A Blast from the Past" has been chosen as the theme for the Thursday night of Senior Week, with the purpose of events to aid the class of 1960 in living up to this prophetic theme. This is the theme for the special events. The meeting will give students an opportunity to meet members of the medical profession and to become better acquainted with the program and activities of the Department.

Congressman Robert P. Griffin, Melvin B. Laird, and Clifford G. McElrath will be the three congressmen to hold an open forum. The Young Republican Club is sponsoring the forum which will be held in the 10th floor of the MIT Student Union.

Two Clubs Given Class B Status

Two organizations were granted provisional Class B status at last Tuesday's meeting of the Activities Council of the Organization. These two organizations are the Young Women's Club and the Medical Students Club. The order of events for the various evenings of Senior Week is as follows:

1. Welcome to Senior Week. An informal open house for freshmen interested in becoming better acquainted with the program will include a tour and opportunity to meet members of the staff.
2. The program will include a tour of the hospital and presentation of the program to students by preceptors, including Dr. J. K. Faulkner, Medical Director and Professor.

Pyschologist

With the publication of the living groups' scholastic averages, the freshman grades' distribution of period and soon-scouting began. The problem of scholarship which confronts the fraternities is one which is not exclusively theirs on the campus. And as far as the individual MIT undergraduate's approach to his academic work.

There is an attitude very prevalent among MIT under-

graduates of facing scholarship as a sort of necessity, bur-

denome evil. Back to school after vacation is a return to

just something to be done because college is the place to be

Columbus discovers the Winston Hemisphere

“Flavor, Ho!” The Admiral Shouted

As He Sighted

[Filter-Blend]

From the Captain’s Log...

One Day Out. Weighed anchor and set sail in search of a filter cigarette that really tastes like a cigarette. Crew thinks this is wild goose chase.

One Week Out. Have sighted many filter cigarettes and smoked some. Crew still thinks the world is flat.

One Month Out. Discovered New World of smoking pleasure:

Winston! It is the only cigarette with a modern filter plus Filter-Blend—rich, golden tobaccos not only specially selected, but also specially processed for filter smoking. It’s a pleasure cruise.

One Year Out. Crew has mutinied. Refuses to go back to the Old World (non-Winston Hemisphere). I agree. Therefore, I am founding a colony called Filter-Blend. The world will be Filter-Blend rich, golden tobaccos, plus a modern filter. The journey will be a pleasure cruise.

The Tech from West Campus

SIT Memorial Drive is the heart of this week’s Techretary, Joan Cunningham. Joan is the private secretary of Father Nugeot and has worked at MIT since last July.

Twenty-three years old, Joan hails from Milton, has brown hair and green eyes. Five feet four, Joan loves to skate and swim. Joan is a graduate of Mary Wool College in Scranton, Pa., and came to MIT after talking with an alumna at MIT. “They’re very individualistic.”

The following letter was received by The Tech over vacation:

“We have been following the Techretary series which is currently being featured in The Tech. Although we think this is a good idea, we do not feel that the poses of the girls are representative of MIT secretaries in general.

We appreciate the interest shown by the secretaries but why not picture them in a more appropriate atmosphere.

We think you will find more secretaries sitting behind their desks than on top.” Signed: Some Interested Secretaries.
Men who face wind and weather
choose the protection of...

Old Spice
AFTER SHAVE
LOTION

Skin protection, that is. Old Spice refreshes and stimulates, guards against the loss of vital skin moisture. Feels great, too. Brisk, bracing, with that tangy Old Spice scent. It does seem to attract female admirers, but what would-hooded man needs protection against girls? 1.00

**Engineering and Science Majors:**

Step right into the SPACE AGE with one of the Great Names in Industry

Space age division of Ford Motor Company has unique opportunities for exceptional engineering and science graduates at new research and engineering center in Newport Beach, Southern California.

HERE IS WHY OPPORTUNITIES AT AERONUTRONIC ARE SO UNIQUE FOR YOUNG MEN—This is the first time in history that ground floor opportunities, together with such outstanding benefits, are open with one of the largest and most respected business enterprises in the world—Ford Motor Company. Aeronutronic, itself a young and growing organization, has definite need for young men with new ideas and a fresh approach to share in research and development work for the space age. Rapid and accelerating growth of Aeronutronic, the dynamic new division of Ford Motor Company, is creating unequalled opportunities for young men who have chosen to specialize in one of the vital and challenging areas of space sciences, tactical weapon systems, ballistics range systems, advanced electronics and communications, data processing and computer technology.

Here are some straight answers to questions you may have about Aeronutronic:

**Who is Aeronutronic?**

AERONUTRONIC was established in 1956 by Ford Motor Company to engage in research, development, and manufacturing of advanced systems and products for military and commercial purposes.

**What are the major areas of research?**

Aeronutronic consists of five main technical groups: Advanced Research Operations; Space Technology Operations; Tactical Weapon Systems Operations; Computer Operations; and Range Systems Operations.

**What business does Aeronutronic have?**

Aeronutronic operates five major facilities: the new research and engineering center in Newport Beach, Southern California; the Space age Division of Ford Motor Company in Detroit, Michigan; the Electronic Operations at Ford Motor Company in Dearborn, Michigan; the Systems and Equipment Operations at Ford Motor Company in Los Angeles, California; and the Advanced Development Operations at Ford Motor Company in Dearborn, Michigan.

**What kind of backing does Aeronutronic have?**

Ford Motor Company resources provide the most advanced facilities and equipment for carrying out complete research, development, and manufacturing operations—plus additional unlimited production support when needed.

**What kind of facilities do they have?**

Ultra-modern $22 million Engineering and Research Center is now under construction and already partially occupied. When completed in 1962, the new complex will have over 200 acres of land, 100 acres of water, and 100 acres of office and laboratory space, all under one million square feet.

**Is individual capability recognized?**

Yes. Aeronutronic looks for and recognizes the capabilities and potentials of its people. Match the capabilities of men with the jobs to be done in a continuous process at Aeronutronic.

**What kind of assignments can I expect?**

Research, design, engineering and development functions are open to exceptional graduates in space sciences, tactical weapon systems, advanced electronics and communications, computer and data processing technology. Specific openings are described in new career opportunities booklet offered below.

**Do they have company leadership?**

Aeronutronic is a business-oriented organization, headed by Ford Motor Company Vice-President, Gerald J. Lynch, and other VPs. Their scientific and production managers experienced in the application of sound management principles.

**Where does Aeronutronic stand in R & D work?**

By the end of June, 1958, as an example, Aeronutronic moved from 35th to 40th place among prime sources for government R & D contracts.

**What other benefits can I expect?**

Ford Motor Company employee benefits are considered the finest in the industry—Ford savings programs, conventional insurance and hospitalization plans, paid vacations and sick leave, regular salary increases, and many other benefits equal to or better than the industry standards.

**Small Fire Hits Polaroid Building**

Small fire hit the Polaroid building near East Campus. The small fire which the campus fire alarm announced was quickly put out by campus firemen.

**NOTICE TO SENIOR MEN STUDENTS**

If you have not already done so, make arrangements to meet this week with your school engineering placement bureau for an interview. 

**AERONUTRONIC**

AERONUTRONIC is a business-oriented organization, headed by Ford Motor Company Vice-President, Gerald J. Lynch, and other VPs. Their scientific and production managers experienced in the application of sound management principles. For more information, send for free booklet "Career Opportunities for Engineers and Scientists." Write to: Aeronutronic, a division of Ford Motor Company, Ford Road, Newport Beach, California, Attention: Graduate Placement Dept. B5.
BAND LEADS IN MUSICAL FIELD

This for eleven years the MIT Concert Band has been a musical organization of high caliber and is not accidental. According to John Corley, the Band's director since its inception, minds capable of scientific analysis are equally needed. All replies will be held in the strictest confidence.

Quite often the MIT Band premieres works or gives their first Boston performances. An example of such an instance will take place at the Band's spring Concert at Kresge, April 9, at 8:30 P.M. At that time, we'll be heard to oligy from "The Social Letter" written by a former band member and an assistant, Andrew Kazden. The piece was originally recorded by the Band in 1956 for public performing the artistic, moral, and other activities of Tech, as to be heard on Saturday are works by Bahnct, Seeger, Schmitt, Milhaud, and Persichetti. The Band goes the American premiere of the Seeger, Concerto Grosso for Brass Quartet and Wind Orchestra, in a concert of educational T. V. which may be seen on WGBH-TV on April 25, April 28, and May 3 at 9:15 A.M., 1:15 P.M., and 7:30 P.M. respectively. Since December 1954 the Band's fifty to sixty members have used their best to play music written solely for concert band. Such an organization is not an accident. According to John Corley, the Band's director since its inception, minds capable of scientific analysis are equally needed. Hence the band does not play watered down music from standards and instrumentation, and differentiating a musical arrangement of high caliber is not an accident. According to John Corley, the Band's director since its inception, minds capable of scientific analysis are equally needed. All replies will be held in the strictest confidence.

The Tech
Rain Besets Sluggers

On its venture into the South during spring vacation, the varsity baseball team ran into foul weather which forced cancellation of two of the four scheduled games and caused a third to be called at the end of four and one-half innings. Randolph Macon overwhelmed the Engineer diamondmen 11-2 in the team's first outing, and Howard University added to Tech's woes by downing the varsity baseball team 6-1 in Tech's first appearance in the nation's capital.

An encouraging aspect of the Randolph Macon game was the spirited battle between Tech's number one man Raul Karman, '60, and his opponent Wayne Jackson, winner of the 1966 Virginia State Amateur Championship. Karman was 1 up at the end of 17 holes of play, but lost the final hole to tie.

Coach John Merriman indicated that he thought the southern trip was very beneficial to his linksmen and that Tech's showing was creditable in light of the fact that it was the first time the golfers had been able to play outdoors this spring.

Golfers Win One Meet

The varsity golf team overpowered Randolph Macon College 6½ to ½ in the first match of its recent southern trip, but lost successive contests to North Carolina State, Hampden-Sidney, and the University of Maryland.

Highlighting the Randolph Macon meet was the spirited battle between Tech's number one man Raul Karman, '60, and his opponent Wayne Jackson, winner of the 1966 Virginia State Amateur Championship. Karman was 1 up at the end of 17 holes of play, but lost the final hole to tie.

Coach John Merriman indicated that he thought the southern trip was very beneficial to his linksmen and that Tech's showing was creditable in light of the fact that it was the first time the golfers had been able to play outdoors this spring.

KRACK THIS?

Are you KCIDL enough to take the KROSSWORD?

FRIDAY, APRIL 8, 1966

Kool, we're sure you're aware of the great Kool magic of Menthol Magic. It's the famous Kool's filter that makes Menthol Magic really real — smooth and cool like it should be — not the old stuff. And Kool's filter is new and improved — get the new Kool's filter! Change to Kool's today! Menthol Magic makes the difference.

It took four generations of family tradition to produce the matchless Ruppert Knickerbocker flavor. One swallow and you'll know why it took so long. Fine beer, like a fine family name, gains character with each generation. Ruppert Knickerbocker tastes the way other beers would like to taste if only they knew how.

Live a little! Have a Ruppert Knickerbocker!

Stylus Springing! Student Broad!
Varsity Lacrosse Team Twin Victor On Southern Trip

MIT's defending national class "C"-champion lacrosse team opened its season with a pair of victories over Spring vacation, defeating Stevens 12-1 and Adelphi 7-2 on a short road trip. Chuck Cons, '60, set the pace in the Harvard game, scoring four goals. Joe Skenderian, '61, and Al Bronsneck scored two goals apiece. Dan di Royer, '60, Dan Michals, '60, John Castle, '61, and Nate Florian, '60, each contributed a goal.

Paul Robinson, '61, was the key man against Adelphi, scoring four times. Skenderian, Florian and Cons added one goal apiece. Robinson fired in three in the first half of the Techm and added 4-2 lead at the break. In the second half the Engineers added three goals while holding Adelphi scoreless.

The varsity opens its home season Saturday against Yales at Reynold Field. Game time is 2 p.m. Only one other home game, against Ulmian at the 7th, is scheduled for April 1. In May the varsity will be host four times.

student. The eager foreign student may know very well what he wants to say, but because of the acquired accent and the rapid delivery in a low register Gilbert and Sullivan students, the message is apt to be unintelligible to his professor or advisor. By the same token, all the jazz which pours from some academic types is apt to be caught either. English, spoken slowly, is still a useful vehicle for all.

The office of the Foreign Student Advisor is, then, a place in which several kinds of activities may be carried on simultaneously. It can be the place to which, in a large institution, with international responsibilities, all inquiries and proposals from outside agencies which have to do with international educational exchange can be directed for coordination. This helps in establishing a workable policy to the benefit of the students and the institution. The office is a point through which foreign students with special problems can often be referred to other more expert people in the field — as an example — of counselling.

To this specialized office is alloted the responsibility for a fund of knowl-

ginen the upper Rhode Island College of Science and Palnistry is frankly embarrassed by all this wealth, but I am more modest. The Upper Rhode Island College of Science and Palnistry is frankly embarrassed by all this wealth, but I am

AN EMBARRASMENT OF RICHES

Twiddle, twaddle old Dr. Wayzillo Sigafoos, head of chemistry at the upper Rhode Island College of Science and Palnistry, cuts outhout for glory and wealth. All be cuts outhout to be work in his laboratory, to play Mozart quartets with a few friends, to smoke a good Marlboro, and to throw sticks for his faithful dog Trey (Fig. 1.).

So when, after years of patient research, Dr. Sigafoos discov-

erated Revanna, a shaving cream which whiskers to grow stuck instead of outward, thus enabling a man to take off his beard instead of shaving it, he never crossed his mind that he had come upon a key to fame and fortune he simply assigned all his royalties from Revanna to the college. In the age of what, and went on with his quiet life of writing in the laboratory, playing Mozart quartets, smoking good Marlboros and throwing sticks for his faithful dog Trey. (Trey, incidentally, had died some years earlier but his habit is a strong thing and Dr. Sigafoos to this day continues to throw sticks.)

As everybody knows, Revanna turned out to be a madly successful shaving cream. Royalties in the first month amounted to $290,000, which came in mighty handy, believe you me, because the college had long been postponing some urgently needed repairs, and the rest of the money was spent on the basketball court, leather patches for the chess team's elbows and a prorector for the Director of Admissions.

In the second month royalties amounted to an even million dollars and the college bought a whole new line of Marlboro cigarettes for all students and faculty members. It is interesting that the college chose Marlboro cigarettes though they could well have afforded more expensive brands. The reason is simply this: you can pay more for a cigarette but you can't get a better flavor, a better smoke. If you think flavor went out when cigarettes came in, try a Marlboro. The filter cigarette with the unfiltered taste. You, too, can smoke like a millionaire at a cost which does no violence to your pocketbook.

Emphasis on philosophy of getting dates. Background of dateless stu-

dents and faculty members. It is interesting that the college chose Marlboro cigarettes though they could well have afforded more expensive brands. The reason is simply this: you can pay more for a cigarette but you can't get a better flavor, a better smoke. If you think flavor went out when cigarettes came in, try a Marlboro. The filter cigarette with the unfiltered taste. You, too, can smoke like a millionaire at a cost which does no violence to your pocketbook.

But I digress. We were speaking of the royalties from Revanna which continue to arrive at an astounding rate — now in excess of one million dollars per week. The college is doing all it can to spend the money: the student-faculty ratio which used to be thirty students to one faculty member is now sixty to one; the Gulf Stream has been purchased for the Department of Marine Biology; the Dean of Women has been assigned all his royalties from Revanna to the college and went off his beard instead of shaving it, it never even crossed his mind that he had come upon a key to fame and fortune he simply assigned all his royalties from Revanna to the college. In the age of what, and went on with his quiet life of writing in the laboratory, playing Mozart quartets, smoking good Marlboros and throwing sticks for his faithful dog Trey. (Trey, incidentally, had died some years earlier but his habit is a strong thing and Dr. Sigafoos to this day continues to throw sticks.)
