British Scholar Will Speak to Students

A British scholar from the University of Leeds will lecture on the problems of knowledge tomorrow and Thursday. Dr. E. K. Reid, Professor of Theology at Leeds, will speak May 17 and at 12:45 p.m. in the Hayden Library Lounge.

The lecturer, sponsored by the Protestant Ministry, will be Science Fiction Lee and The Knowledge of God.

Dr. Reid comes to M.I.T. from Yale and Princeton where he delivered the Warfield lectures. He has studied at the Universities of Birmingham, Heidelberg, and Strasbourg. He is a member of the Church of England.

Dr. Reid's particular interests include analytic philosophy, demythes, and Walther Grundtvig. While on campus Dr. Reid will also speak to faculty groups.

U.S. Air Force Honors Draper

Dr. Charles S. Draper, left, receives the citation and medal accompanying the Exceptional Service Award from Lt. Gen. Roscoe C. Wilson, Deputy Chief for Development, Air Force Scientific Advisory Board. It was given in recognition of meritorious service in development of guided missiles and space probes.

President Julius A. Stratton announced the promotion of forty-two members of the Faculty to the rank of Professor or Associate Professor.

Promoted to Professor by the Executive Committee of the MIT Corporation were: Holt Athey, Department of Chemical Engineering; David P. Shumaker, Department of Chemistry; Lucian W. Pye, Department of Economics and Social Sciences; Peter Elias, Truman S. Gray, Yuan Wing Leong, and Louis D. Benuela, Department of Electrical Engineering; George R. Thomas, Jr., Department of Mathematics; Carl L. Swenberg, Department of Mechanical Engineering; Bernard L. Ackerman, Department of Metallurgical Engineering; William F. Brey, Department of Modern Languages; David J. Rose, Department of Nuclear Engineering; Malcolm W. F. Brandwei, Department of Physics; Max Isambard, Department of Physics.

Named Associate Professors were: Edward W. Marshall, Department of Chemical Engineering; Albert C. cattle, Department of Chemistry; Frederick J. McGarry, Department of Civil Engineering; Florence M. Belcher, Department of Electrical Engineering; David A. Hove, and John A. Beut, Department of Mathematics; Dean A. Arden, Department of Metallurgical Engineering; William H. Fronon, Jr.; and Arthur J. Wolfe, Department of Electrical Engineering; Robert E. Macario and Harold A. T. Wilson, Department of Industrial Engineering; John A. Coburn, Department of Mechanical Engineering; Robert E. Ogilvie, Department of Metallurgy; George W. Clark and George F. Koster, Department of Physics.

The MIT varsity lightweight rowing and rowing team of Columbia and Cornell Saturday to win the Geiger Cup at Ithaca, N.Y. It was M.I.T.'s first varsity lightweight victory since 1965, when the 100-pounders won the Royal Henley Regatta for the second consecutive year.

The Cardinal and Grey finished the tricky one-mile course in 1:42:3, one full length and four seconds ahead of the Big Red and two lengths in front of the Lions.

The Junior varsity M.I.T. defeated the Engineers by twelve lengths and Columbia by fourteen. The final finishing times were: M.I.T. 1:42:3; the Big Red 1:45:0; and the other at 1:52:5.

The Beaver crews tumbled all afternoon and forced a seven-minute start to equalize the distance around the course. The crews rowed up without struggle because the water was too rough to anchor them.

The Engineer varsity, given the outside lane, were staggered almost ¾ of a length ahead of Columbia and over a length up on Cornell. The Beaver quartered with a fine start, something they had been improving all week. By the first bend the Big Red had caught the Lions, while the Engineers led by half a length.

The varsity of 33 to 35 as M.I.T. kept count to a 30 or 31, M.I.T. pulled in a length and a half margin over both opponents. The situation remained constant up to the next turn, where the Big Red, taking good advantage of the inside lane, moved ahead of the Lions and within one length of the Beavers.

But with victory just a mile distant, M.I.T. was not to be caught. Gradually increasing the count to 38, then 41, and finally reaching 42, the seeming margin till they swept across the finish line.

In the JV race M.I.T. also proved the steady lane and held the small initial advantage. However Cornell surged forward, caught the M.I.T. at 30 and suddenly widened the lead to four lengths.

Rowing in the inside lane, the freshmen pulled even with Cornell. Yet, most likely due to inexperience, they had difficulty with the choppy water and the asphalt and sharper bend.

After being unable to raise the stroke rate as high as they desired, they lost another half length at the bend. The victorious varsity consisted of: Bow, B. G. Decker; 2, John Stollithoff; 3, John Sheinblatt; 4, John Pearson; 5, 6, Jerry Manning; 7, 8, Charles Bruggeman; 9, 10, Roy Wolf, University Dhy- eri, 11, 12.

The varsity heavyweight, at 55, was and one and a half behind the

Man and A Job

A recent decision of the MIT Administration resulted in a split of a certain group into two groups, with the pattern of responsibility somewhat changed. It was hoped that this would be a more efficient way of handling the matter of Government Services. We take no issue with this decision, but we do note one serious side effect. In the process of the changeover on July 1, the duties of Harvey Burrstein, the present Security Officer, will be cut from four days a week to two, and he will be relegated to tasks that for him are quite routine. There is a vast group of problems and emergencies involving the Burrstein's family, and we believe that the retention of regular legal help to plead a case. Anyone who has ever dealt with a recent decision of the Administration. Burrstein is undoubtedly in favor of this move because of his extensive experiences and knowledge in the law. We might add, beyond a first glance, no one came from 9 to 5 to get a technical education.

In our opinion, the Institute is, in our opinion, running a strong man idealy suited for the position of informal legal adviser. And, we might add, beyond a first glance, no one came from 9 to 5 to get a technical education.

With the advent of the Naval ROTC Program in September, MIT is, in our opinion, running a strong man idealy suited for the position of informal legal adviser. And, we might add, beyond a first glance, no one came from 9 to 5 to get a technical education.

New Air Force Program

When the Basic ROTC was changed from compulsory to voluntary in September, the Administration appointed a committee consisting of Professor of Military Science and Tactics in August 1937. At the end of this month, he will retire from the Army and go to the Institute's law-school. The proposal we are making here has been made in the Spring of 1935:

In form it parallels exactly those of the Navy and the Air Force programs. One hour per week (1-0-0) of orientation lectures on guided missile and nuclear propulsion, this amounts to almost complete credit for the course.

The proposal we are making here has been made in the Spring of 1935:

In form it parallels exactly those of the Navy and the Air Force programs. One hour per week (1-0-0) of orientation lectures on guided missile and nuclear propulsion, this amounts to almost complete credit for the course.

Army Program Changed, But Not Enough

Early this spring the Army announced its new ROTC program. It is a commendable improvement over the former one in that some of the purely weapons subjects have been reduced in scope or eliminated altogether, and some of the subjects which had been cast aside have been retained. The Army has some justification for this. As in every profession there are some barely legal routine things which the new member must know in order to prac- tice properly his profession. The Army would like these things to be learned while in college so the new second lieutenant is fully qualified on his first assignment.

The faculty believes that these things should be left to the summer after commissioning at an army school or on the lieutenant's first assignment.

As we believe there is room for compromise in these divergent attitudes, the faculty committee is now ready to go to the Army to present the whole idea to the commissio- naire, and to the State and Army, to look for some savings in the areas of small but meaningful improvements, than it does in the area of health, employment-seeking, or Selective Service.

The Techretary of Week From Bldg. 33

Theo Coughlin is this week's Techretary. Theo is five feet six, has brown hair and green eyes. She works in 33-412, the Fluid Dynamics Research HQ. Hailing from Lowell, Mass., Theo is nineteen and has worked at MIT since February, coming here in the latter half of her sophomore year at University of Mass. Theo is a graduate of Lowell High School.

The MIT man—"Can't very well pick out an average MIT man. Some are so awfully nice you wouldn't think they were from MIT."

Bermuda Shorts

It is predicted that this season will see a new high in the popularity of Bermuda Shorts. They are comfortable and smart. Good styling makes them acceptable for most occasions. Available in polished cottons, cotton cords, synthetic blends and India madras.

Light Crew Gains 1st Win Since ’55

(Continued from Page One)

Tigers. Dartmouth came in a day, fourth. The JV’s were almost six lengths off the pace in their race against Penn that day, but were far enough back to continue their record of equally matched against the Crew, the Engineer frosh were barely out.

On Thursday the third varsity lights defeated Dartmouth in a “shirt” race on the Charles.

The varsity Cornell crew had a hold-over from last year’s aggregate that finished second in the Bantams ... “We didn’t figure MIT,” frankly admitted the Cornell mentor after the race ... Coach Fisk seemed to feel that his crew finally began to really click as a unit.

On Friday the third varsity lights defeated Dartmouth in a “shirt” race on the Charles. The varsity Cornell crew had hold-overs from last year’s aggregate that finished second in the Eastern sprints ... "We hadn’t figured MIT," frankly admitted the Cornell mentor after the race ... Coach Skov seemed to feel that his crew finally begun to really click as a unit.

The surprise of the packed crowd was best echoed by the Columbia JV oarsman who exclaimed, “Gosh! Those clods won!”

Sailors Are Fifth

In Owen Regatta

MIT finished fifth out of 13 instead of competing for the Owen Trophy, rival of Eastern spring sailing supremacy, at Brown University this weekend. Princeton won the regatta topping Navy, Coast Guard, Boston MIT, Yale, Dartmouth, Harvard, Army, Columbia, Williams, Cornell and Pennsylvania in that order. The New England sailing championships will be held at MIT next weekend.

Lacrosse Team Adds To Victory String

By Jay Salmon, '63

Victories over WPI by a 13-3 count Thursday and Bowdoin by 9-3 Saturday boosted the varsity lacrosse team to a 9-1 record with just two matches remaining on the schedule.

WPI offered only feeble opposition as the Engineers jumped off to an early 3-0 lead. The men from Worcester rallied briefly to a 3-2 count at the end of the first period but didn’t crack the Tech defense again until the fourth quarter. But by then it was all over, the host team having netted nine goals in the interim. Dan Michael, '60, and Phil Robinson, '61, scored three apiece for the victors.

Bowdoin Opening Typical

Coach Ben Mal-tin, who should by this time be used to such inauspicious beginnings, saw the Techmen permit Bowdoin to take a 2-0 lead before they caught fire for a 3-2 halftime margin. In the second half there was no doubt, however, as Phil Robinson, '61, Joe Skendarian, '61, Chuck Conn, '60, and co-captain Don de Reynier, '60, Nate Florian, '63, and John Castle, '61, scored to spark the Engineers’ blazing finish.

Brennecge Lost By Injury

Al Brennecge, '61, was lost to the Techmen for the rest of the season when he reinjured a knee in Saturday’s game. He had returned to the squad just three days before.

Continuing their pursuit of a third straight national class “C” championship, the strickmen face Tufts Wednesday and Trinity Saturday. Both games are scheduled for Briggs Field.

DEAR DR. FROOD:

Dear Dr. Frood: I told my girl I was in love, and she laughed. I told her I wanted to get married, and she laughed. How can I make her realize that I’m serious?
Serious

Dear Dr. Frood: I have been having trouble sleeping at night. Do you think it could be because I drink coffee?
Wide-Eyed

Dear Dr. Frood: Every night I come home tired and I find the house in a mess. There are dirty dishes and pans in the sink, and clothes are thrown all around. I’m fed up. What should I do?
Married Student

Dear Married Student: You should notify the police. Someone has obviously been there.

Dr. Frood, Ph.D.T.

Dear Dr. Frood: How far ahead should I call for a date?
Straight Arrow

Dear Straight Arrow: It depends. Some girls must be called at least a week in advance. With others, you just knock as you enter the door.
Patience

Dear Patience: Better buy another pack. He’s probably smoked them all by now.

College Students Smoke More Luckies Than Any Other Regular!

When it comes to choosing their regular smoke, college students head right for fine tobacco. Result: Lucky Strike tops every other regular sold. Lucky’s taste beats all the rest because L.S./M.F.T.—Lucky Strike means fine tobacco.
