TUITION RISES IN 1962

Two Hundred Dollar Increase Fifth In Ten Years; Salaries To Benefit

The MIT tuition rate will increase from fifteen hundred dollars a year to seventeen hundred dollars beginning in September of 1962, it was announced yesterday by President Julius A. Stratton. The increase was voted by the Corporation earlier in March, and marks the fifth rise in tuition since 1950.

"We deeply regret the conditions that make this change unavoidable, and we are postponing the increases for a year to give you more opportunity to plan for it," Dr. Stratton stated in a letter to all students and their parents. "The timing of the increased income will go toward alleviating the problem of attracting younger men into the (Please turn to page 8)

NASA Satellite Carries Device Designed At MIT

The National Aeronautics and Space Administration's deep space probe launched on Saturday, March 26, carried an instrument designed by the MIT Laboratory for Nuclear Science to detect and measure interplanetary plasma.

Interplanetary plasma is a magnetized, electrically neutral mass of ionized gas that scientists believe is emitted from the sun and is responsible for a variety of physical phenomena both in space and on earth.

Dr. Bruno Rossi, professor of physics at MIT, is in charge of the Institute's interplanetary plasma project. Assisting him are Drs. Herbert S. Bridge, Franz Scherb, Alan J. Lazarus of the Laboratory for Nuclear Science, and Ervin Lyon of the MIT Lincoln Laboratory in Lexington.

All-Tech Sing Is Success

One of the highlights of All-Tech Sing was the presentation by "a matter of student and faculty guests" of "Ein Musikkeller Fass". A musical joke by "an hour," notably present in the group were Prof. Klaus Lippmann and John Conley who have been known to attempt more serious pieces.
Centennial Week at MIT features many exciting and interesting events, including art exhibitions and musical entertainment of considerable variety. These events are laid out in a well-organized schedule for the week, April 2 through 9, and should prove more than adequate entertainment for the delegates and guests attending the week's celebrations.

Paintings, drawings, and sculpture from the private collections of MIT alumni will be on exhibition in the Hayden Gallery at the Institute and will remain there through the end of April. Included in the collection will be 40 paintings, ten drawings, and prints, and 15 pieces of sculpture. Except for a small group of items, all of the works are by 20th-century artists, ranging from Manet down to the present day. Many prominent alumni have loaned works for the exhibit, including I. M. Pei, architect for the forthcoming MIT Center for the Earth Sciences; Nathaniel Saltonstall; Robert D. Pattee; John J. Wilson; Mrs. Edward Saltonstall; Robert D. Pattee; the Brazilian March; Overture and Finale from "Music Man," by Meredith Willson; Amportie Roca, piano solo by Jaime Touzidor; "Knightsbridge March from London Suite" by Eric Coates; Standard of St. George, professional English march by Kenneth Alford; the national anthem of St. George, Spangled Banner and God Save The Queen. Choir members will be Stars and Stripes Fovey by John Philip Sousa, and the Colonel Bogey March by Kenneth Alford.

The final musical event of the week will also be on Sunday, April 9, at 8:30 p.m., in Kresge Auditorium. This will be a presentation by the MIT Choral Society of Frans Joseph Haydn's "Creation." This will be a special Centennial concert in Kresge Auditorium at 8:30 p.m., Klaus Liepmann, conductor. The final musical event of the week will be held as a part of the Atona for Peace Award on Thursday evening, April 8, at Kresge Auditorium, when Lady Susan Jeann, the noted English organist and music researcher, will play two organ works during an interlude in the ceremony—the "Prelude and Fugue in D minor" ("A Wedge") by J. S. Bach and the "Toccata in C major" by Franz Schubert. Lady Jean, widow of Sir James Jaen, will be in this country on a concert tour and will also play a public concert, the final program of the MIT Organ Concert Series, on Wednesday, April 12, at 8:30 p.m. in Kresge Auditorium.

On Friday evening, April 7, the United States Navy Band from the Boston Naval Base under the direction of Warrant Officer, Glenen H. Weig, will play prior to, during, and after the third General Assembly at p.m. in Rockwell Cage, when Prime Minister Harold MacMillan of the United Kingdom will address Centennial delegates and guests. The program will include the Brazilian March, Parilisien Suite, by Jacques Offenbach; Overura and Finale from "Man of Steel," by Meredith Willson; Amportie Roca, piano solo by Jaime Touzidor; "Knightsbridge March from London Suite" by Eric Coates; Standard of St. George, professional English march by Kenneth Alford; the national anthem of St. George, Spangled Banner and God Save The Queen. Choir members will be Stars and Stripes Fovey by John Philip Sousa, and the Colonel Bogey March by Kenneth Alford.

The Centennial Convocation Sunday will be opened by the MIT Choral Society, conducted by Klaus Liepmann; it will sing the 6th Psalm in a setting by Charles Ives. During the program, the first performance of Gregory Peterkin's "Centennial Overture," which was composed especially for the Centennial, will be performed by the MIT Concert Band under the direction of John Conley.

The final musical event of the week, also on Sunday, April 9, will be a presentation by the MIT Choral Society of Frans Joseph Haydn's "Creation." This will be a special Centennial concert in Kresge Auditorium at 8:30 p.m., Klaus Liepmann, conductor. The Cambridge Festival Orchestra will conduct the chorus and the Cambridge Festival Orchestra.

TESTIMONIAL

RICHARD THE LIONHEARTED SAYS:

I WOULD NEVER HAVE SURRENDERED ENGLAND

... IF I'D HAD JOCKEY SUPPORT

CROWN, Dick! You're rationalizing, Jockey support might never have secured you against the Emperor. But it certainly would have provided some protection against the physical stresses and strains of active life. Your armor never tailored a coat of mail more knowingly than Jockey tailors a brief— from 11 separate, body-conforming pieces. 1.

Get the real thing. Look for the same Jockey on the world band.

If you'd like to join this team and have the personal and technical qualifications required, Stone & Webster Engineering Corporation has an opportunity for you.

And no future could be brighter. You'll be working with the latest developments in engineering. You'll be working for a long established, world-wide corporation which is able to offer greater continuity of employment because of the diversity of its activities. You'll be working with a team that's strong in every position.

If you're interested in an opportunity for accomplishment, we invite you to get in touch with us.

Dr. Frood presented the automobile industry with this magnificent pre-compact. Hurt and disillusioned because the auto industry preferred to develop their own compact, FROOD NOW OFFERS HIS CAR TO SOME LUCKY COLLEGE STUDENT! This is a brand-new, gas-driven, REAL CAR. It features four (4) wheels, genuine foot-power brakes, "fresh-air conditioning," and actual left-right steering mechanism! The economical 7.9 horsepower engine saves you hundreds of dollars in hay and oats! Goes 32 miles per hour, gets up to 65 miles per gallon. The Froodmobile can be licensed in every state except New Jersey. (New Jersey hates Frood.) WIN this beautiful car (with "FROODMOBILE" mounted in brass on the cowl!). Actual value over $1,000.

TO ENTER THE LUCKY STRIKE FROODMOBILE CONTEST, simply finish this sentence in 25 words or less:

"I need the Froodmobile because..."

Entries will be judged on the basis of humor, originality and style (preferably Froodian). If, in the opinion of our judges, your answer is best, the makers of Lucky Strike will deliver to you, on campus, the Froodmobile. A carton of Lucky Strikes will be given to the first 100 runners-up. All entries become the property of The American Tobacco Company. Send your entry (or entries) to LUCKY STRIKE, P. O. BOX 17A, NEW YORK 10, NEW YORK.

TO CHANGE TO LUCKIES and get some taste for a change!

Non-Commercial Shows To Come From Walker

Shown above are several scenes of the open house held last Friday at the new WTBS radio studios in Walker 030. The station has occupied the studios since Thanksgiving vacation. At upper left, William Mohn, Chief Engineer, demonstrates the Ampex stereo tape recorder. At lower left, Phil Marcus engineers at the console while visitors observe his technique. In the background are relay racks which will hold FM broadcast equipment. At right, announcer Russ Norvig shows how a Night Owl request show is run. The scene is in the station's newly equipped Studio A.

WTBS is preparing for FM broadcasting which will start April 10. The station will occupy a non-commercial channel at 88.1 mc. FM and will transmit to the Greater Boston area. All photos by Boyd Estus '63.

Techmen Place Third In Math Competition

The MIT Math Team placed third in the Mathematical Association of America's William Lowell Putnam Competition this year. The University of California (Berkeley) and Harvard placed first and second respectively. Members of the MIT Team were: Frank Rubin '62, John Wells '63, and Stephen Orszag '62, who was awarded Honorable Mention in the Individuals category.

In addition to the team, six Techmen, ranging from sophomores to seniors, competed as individuals.

Corporation Member, Professor Kaye, Dies

Two individuals of long-standing service to MIT died last week. Joseph Kaye, '34, Professor of Mechanical Engineering, died on Monday, March 20, after 22 years of association with MIT. He was the co-inventor of the thermo-electron engine, a device to generate electricity directly from heat.

James McGowan Jr., '08, Life Member of the MIT Corporation, died in Philadelphia on March 15. Mr. McGowan was the former chairman and president of the Campbell Soup Company, and was elected a Life Member of the Institute Corporation in 1952.
Senior Insurance

The Senior Class has been caught in a crossfire of conflicting claims over the insurance program for the class of 1964. Among the insur- ance companies offered programs to the Sen- ior class, and one was accepted. The company that lost out to the insured a statement setting out its benefits versus the accepted program. There is a certain amount of honest confusion among the students and among the company representatives over just exactly what each program is about. They offer dissimilar benefits and dissimilar rates.

Many Seniors also have questions about the actual need of purchasing insurance at this time. It would be helpful if some objective data were provided by the MIT legal department, which would take it upon itself to delineate the whole insurance program for interested Seniors.

Letters:

To the Editor:

The student committee on educational development, in its effort to understand that its motivations behind the report on the relevant evaluations have been misunder- stood. In undertaking the study, the Committee had hoped that the channel of communication between the students and the faculty was not adequate at teaching was not adequate. This conclusion was rephrased by the student committee representatives from the three freshmen who dealt with the report.

In order to provide a basis for consideration of the needs and concerns of the students, it was distributed to the faculty members involved with the report, along with the comments on other subjects and lecturers would be invited to the lecturer in assessing comparative reaction to the report. It was the intention of the Committee to provide a means of communicating the opinions of the faculty and students. The intent was to be of the student body when a report is drafted and that corrective action in the department is underway, or to the publication of the report. The following is from the report:

A tabulation of all the specific comments on the lecturer can only be straining the meaning of the word "lecture". In the future, some depart- ments have requested a more detailed program. A survey of such conduct is based on their own terms. Thus, we hope, is the first instance of any serious result to be gained from the evaluation.

Romney B. Biddulph
Chairman, SCEP

To the Editor:

Since you have complained about a lack of respect from the faculty, we feel it is necessary to criticize faculty to the re- cently published intemperate criticism of the faculty. I trust you will be pleased to receive and post any letter that is to correct cer- tain factual errors in your own opinion, to present the errors and mistakes of your own views. As you are aware, the Committee surveyed many of your views, a number of lecturers are opposed to the publishing of the report. We have heard from other sources that the report is, admittedly, far from what it was expected to be. The report is, indeed, not very vividly reflected in the evaluation.

The report is, admittably, far from what it can be. Any survey or poll is wide open to many possible errors and may be more so than others. The report is not completely worthless however; it is not true that the student who fails the course is necessarily the opinion of the instructors is a poor one. Obviously the instructors who received some of the evaluations are the Mathematische Lecturers are listed this week. We will publish the Physics, Chemistry, and Engineering lectures. The discussion is in the regular issue, which will appear after next week's special Centennial edition.

Pro. Hofmann: Too many jokes - a joke session.

The Committee did initially approve the pub- lication of the report. In the comments of Mr. Biddulph of SCEP who now says that "specific comments on the lecturers only can lead to strained stu- dent-faculty relations," we can only reply that there is no understanding between the Com- mittee and the lecturers to encourage the publication of the report. Comments from other sources have, m%

lectures. No one, for that matter, has to come to MIT. For many people a lecture is something that does not usually have a serious discussion. The lectures are not organized.

With regard to Pro. Mattuck's letter, as re- ported by Pro. Cottam, that Pro. Mattuck's feeling as expressed verbally to The Tech are indeed not very vividly reflected in his letter. Comments from other sources have, m%

In answer to the comment of Mr. Biddulph of the Tech, I think we have been far from "reasonable" and responded.

When all the arguments on both sides of the question have been mumbled, it is clear that the department is not only not "reasonable" and responded.

The Committee did initially approve the pub- lication of the report. In the comments of Mr. Biddulph of SCEP who now says that "specific comments on the lecturers only can lead to strained stu- dent-faculty relations," we can only reply that there is no understanding between the Com- mittee and the lecturers to encourage the publication of the report. Letters (Continued from Page 4)
To the Editor:
This letter is to encourage Professor Prentice to produce your promised book on 18.01 in general — need more time for problem solving — an extra problem solving period would be very good blackboard technique is more understandable, when teaching chemistry. The book doesn’t mention interesting sidelines, only presents essential information. This certainly is a blunter approach, but it has been made clear that the chemistry of Pierre Dufay was not properly engaged. Daily reading is a matter of personal choice, not a duty — but as a matter of personal interest. The selection of a good teacher, a good teacher, is very hard — and it’s hard to read a paper that is written in a matter-of-fact point of view.

E. Albertton
Asst. Professor of Chemistry

To the Editor:
I respectfully request to dis- cover with Professor Prentice. Let me first point out that I do not think The Tech acted correctly in publishing their "report" on the freshman ques- tion. I would like to have seen a more detailed discussion of the teaching at MIT in improving their teaching power.

Joseph Harrington ‘63

OPERATION ABOLITION: In Its Intended Mission

Many questions have been raised as to the accuracy of "Opera- tion Abolition," this reviewer has not attempted to evaluate or comment upon these charges, as it is our own merits that count.

"Operation Abolition" pur- ports to show "Communism in action." It is the result of only too easily found, but it is itself the result of serious criticism and criticism of important new materials. The book is an attempt to prove "an inflexible position of grind." I look upon serious criticism any as a right, as a duty; and I con- sider publication a legitimate vehicle just because it does prove dis- tinction.

A lecturer is not a paid en- tertainer, of course, nor do stu- dents expect him to be one. Nevertheless, I still think this teaching is important to be given. If he sincerely desires to teach well, he will be grate- ful to students who attempted to improve his presentation. On the other hand, he feels that his "teaching" should immediately be critical, he should not ac- cept teaching duties. Most MIT students have made sacrifices in order to obtain a really fine education, and a man with no intention of helping them in this quest should not pretend to do so.

Professor Mattuck’s sugges- tion that an uninteresting poor- ly prepared lecture may well be an inspiration and a capa- ble to the "reduction of ab- surdities" that no lectures at all would constitute the best sys- tem. I am far more likely to interest a student in investigating the sub- ject than one who himself seems totally uninterested by the topic.

An education provides a stu- dent with more facts and concepts, but knowledge is not necessarily important. It will also distill attitudes. A succession of dull lectures given by men who do not seem to care whether any one understands or becomes inter- ested in one of the worst that can be expected from a professional spirit of devotion to first-rate work. The suggestion by a member of the faculty that the depressing and discour- aged result was agreed to by all student criticism should be muffled lest anyone be offended, and that such criticism can not any and should not be effective, can only help to weaken any enthusiasm for good work that the student possesses bodily.

Irving H. Thomas ’02

**Sellers Crime Spoof At Exeter**

"Two-Way Stretch." Peter Sellers' latest appearance at the Exeter Street Theater, is a mildly amusing spoof of British prisons, law and order, and the British army, complete with a moral that crime does pay, almost.

One couldn't help comparing this production unfavorably with Sellers' previous effort, "I'm All Right, Jack," a parody simultaneously on unions and management, but this may be as a result of this reviewer's relative unfamiliarity with the subject matter of the former.

The plot deals with the efforts of Dodger Lane (Peter Sellers) and his two cronies to escape from Highbury Prison in order to rob the Sultan's jewels and then return to their cell unnoticed, thus providing the perfect alibi. Their scheme is aided by a dishonest parish

Schiotz To Sing Tonight

Tonight at 8:30 p.m., Aksel Schiotz, Danish baritone, will present a concert in Jordan Hall. Accompanied at the piano by Paul Ulanowsky, Mr. Schiotz will perform the song cycle by Schubert, "Die Winterreise" (The Winter Journey).

Mr. Schiotz, who was recently bestowed the honor of singing before their Majesties the King and Queen of Denmark, is currently on the faculty of the Royal Academy in Toronto, Canada. It is noteworthy that this concert will climax a series of three performances of the "Winterreise"... the first at the National Gallery, Washington, D.C., and the second in New York's Town Hall.

Tickets for the concert may be purchased at the Jordan Hall Box Office for those interested in what will probably be a fine evening of entertainment.

Duca's Metal Sculpture On Display in New York

Alfred M. Duca, Boston artist and research associate in the Department of Metallurgy of the Massachusetts Institute of Technology, is having a one-man show in New York City. The exhibition of his 21 pieces of metal sculpture opened on Tuesday, March 11, in Mrs. Edith Halpert's Downtown Gallery and will run for a month.

Included in the collection are five new works: "Schweltz- ey," "The Survivors," "Dreadhorse," "Family Group," and "Stoic." All have been cast by the ceramic-shell process, a new casting method being explored for sculptural application by Mr. Duca as a part of his research.

Personalizing the merger of artist-craftsman with scientist-technician, Mr. Duca has been carrying on experiments in art casting in cooperation with regional industrial foundries. His research points up his command of a variety of molding materials, such as stainless steel, ductile iron, bronze, malleable, and aluminum.

The artist talks of his work in terms of "principle integrity... to reproduce faithfully the artist's effort in a permanent material, regardless of style." Anyone interested in metal sculpture and who will be in the New York area in the next few weeks, why not stop in at Halpert's Downtown Gallery and take a look at an artistic product of MIT's research department?

- Craig W. Kramers '64

Sigma Chi Wins Tech Sing

Sigma Chi walked off with the best in show cap as the MIT Baton Society presented the All-Tech Sing in Kresge Auditorium last Saturday night. Beta Theta Pi was second in the serious music division behind Sigma Chi. The Theta Chi Chorale won in the light music division, the Association of Women Students was second. The special "Egyptian" award for the most novel performance was won by the Association of Women Students.

Dean Frederick Fassett, Jr., was Master of Ceremonies. Approximately 800 people attended the show.

Theta Delta Chi started the show off well with three American folk songs. They were well arranged and the group showed good harmony. The "Bartons" of Barton House sang an amusing selection of songs. Beta Theta Pi came forth in a large group which sang "From Boston Harbor." "Ado- ramus Te" and "Tutti Venite Arnali," the last an Italian soldiers' ditty.

The Association of Women Students did a song and dance routine written and arranged especially for the show. Considering the new women's dorm soon to be built, their first number was, "The Code of the Future Will Have Class." Then requested the audience stand up for Meledodotion's "Halettu- liah," but sang just one half- line.

The Senior House Russian colony sang four songs in Russian. A trio from Theta Xi, complete with guitars and a banjo, sang three songs including an original ballad entitled "The MIT Man."

Sigma Chi sang three beautiful choral pieces. As winner of the best in show award, their group name will be put on a permanent trophy. The Theta Chi Chorale, winner of the light music division was next. Their first number was a hilarious rendition of "Mary," followed by a new version of that old classic, "The Halls of Ivy." It was an eight verse story of MIT entitled "The Walls of Ivey."

A quartet from Lambda Chi Alpha sang two ballads, and the Non-Resident Student Association sang four songs.

While the judges were reaching their decision a group entertained the audience with "Ein Musikalischer Spass," by Mozart. The name translated means "A Musical Joke," and was composed by Mozart as a satire on contemporary Musi-

ers.

(Continued from page 4)

South's vulnerable overall of two hearts will pass with the silence it deserves. West's double was almost mandatory after his shaded opening, and North's pass cannot be criticized. East had quite a problem in deciding whether to bid 3NT, 5♣, 6♦ or pass, but he correctly decided that 6♦ would have its problems and lesser bids could be adequately compensated for by getting 3 hearts doubled two tricks for 300 points.

West's opening lead was the ace of spades, on which East played the deuce, persuading West to switch to the ace. South's king and South led the heart jack for a finesse through West's queen. East won the ace and wisely cashed it after leading a spade for West to ruff. South could have held his tricks to down one for a good score had it not been for this alert play by the dealer.

The Office of Admissions does not believe the tuition rise will adversely affect applications for the freshman class. Mr. Richard Willard, Statistical Analyst for the Admissions Office, admitted that final applications for the class of 1965 were "down about nine and one-half percent," but he did not attribute this to costs.

He said that the drop in applicants was probably due to improved guidance on the part of the high schools, and the possibility that many potential applicants were "fed-up" with the competition for schools such as MIT.

Mr. Willard noted that applications were down about ten percent in most of the Ivy League schools and other colleges of the same type. Most of these other colleges attribute the drop to improved school guidance, with one possible factor.

Administration spokesmen declined to predict what the next few years would bring in the way of further tuition rises. It was asserted that too much depends upon the state of the economy and other unpredictable circumstances.

Come and See a Shoe Sewn By Hand

Mr. Mark Grondin, master handsewer, from the "Bostonian" handsewing factory in Freeport, Maine, will be in our store

April 10th and 11th

You can watch Mr. Grondin actually sew a loafer in the same manner and tradition of the early Indian.

A man with Alopecia Universalis* doesn't need this deodorant

He could use a woman's roll-on with impinency. Mennen Spray was made for the man who wants a deodorant he knows will get through to the skin...where perspiration starts. Mennen Spray Deodorant does just that. It gets through to the skin and it works. All day. More men use Mennen Spray than any other deodorant. Have you tried it yet? 64¢ and 1.00 plus tax

*Complete lack of body hair, including that of the scalp, legs, armpits, face, etc
Meet The Coaches

Alex Sotir, one of the most recent acquisitions of the coaching staff, is a highly versatile athlete. He won three letters at his high school and during his undergraduate career at Springfield College, Springfield, Massachusetts, managed to accumulate an outstanding record.

As a prelude to his present position as the coach of a very successful wrestling team, he was the New England Heavyweight champion in wrestling for Springfield College in 1955. He also lettered in football at Springfield, a college noted for its athletic endeavors.

Alex served in the Navy for the years 1954 to 1956 and played with the Pensacola Navy Base football team. He joined the Coaching staff here in 1958 as wrestling coach and assistant track coach.

He expanded his activities both in physical education training and in varsity practice, and he presently teaches physical education courses in wrestling, squash and skating. His varsity coaching extends from his wrestling during the winter to his coaching during the spring.

Alex's reign as wrestling coach has seen a marked improvement in both the team's morale and performance through the years. From a losing season in 1958-59, MIT's wrestling team improved to a close 8th in the ratings of New England's eleven participating wrestling schools. The 1960-61 season has

"GIVE A MAN A TOUGH JOB AND A CHANCE TO GO SOMEWHERE ... AND HE'LL BREAK HIS NECK TO DO IT"

In 1958 when Bill Ebben was only a few months away from his engineering degree at the University of Detroit, he was in touch with 10 prospective employers.

He chose the Michigan Bell Telephone Company because: "This company offered the kind of engineering management opportunity I wanted — and they weren't kidding."

One of Bill's first assignments was a survey of Michigan Bell's big Central District to find out how long available building space could accommodate the switching equipment required by rapid telephone growth. "I wasn't given any instruction," Bill says, "I was just told to do the job."

So Bill did it. His report became the guide for planning and budgeting future construction.

On his next move, Bill proved he could handle supervisory responsibility. He was sent to head up a group of seven engineers to design a new long distance switching center for Saginaw, Michigan — a $4,000,000 engineering project.

Today, Bill is on the staff of Michigan Bell's Program Engineer. He's working on a system for mechanized control of telephone construction costs.

How does Bill feel about his job? "Give a man a tough job and a chance to go somewhere — and he'll break his neck to do it. Of course, I don't think I'm going to be running the business next year — but I'm getting every opportunity to hit the top. You don't worry about opportunity here — you worry whether you're as big as the job."

If you're a man like Bill Ebben, a man who can size up a job, figure out what needs to be done, and then do it — then you should get in touch with one of the Bell Companies. Visit your Placement Office for literature and additional information.

"Our number one aim is to have in all management jobs the most vital, intelligent, positive and imaginative men we can possibly find."

— Francesc R. Kappel, President
American Telephone & Telegraph Co.
Water Polo In Second Year At Tech

By Jeff Traates '64

An offbeat activity in its second year at MIT is the Water Polo Club. These little-known tankmen compete on a club basis in a New York-New England league that includes such powers as Yale and Army. Coach of the team is Dr. Emery Parkes, physician employed by the National Research Corporation. Dr. Parks, who donates his services without charge, was captain of his college team in Budapest, Hungary.

Water polo is a grueling synthesis of swimming, soccer and basketball. There are seven men on a team. Ball handling techniques include passing to teammates and dribbling—controlling the ball without use of the hands. Any player may grip the ball with one hand, but he then becomes fair game for the opposition. The goalie alone may use both hands without fear of bodily harm.

Conditioning is of more value than exceptional swimming ability, claims Club President Ron Finn '59. Finn emphasized ability, saying that a player may grip the ball with both hands without fear of bodily harm. The squad scrimmages on Tuesdays, Thursdays and Saturdays.

Last year the club boasted a respectable 4-3 slate. A home weekend featuring two meets headlined the 1961 water polo season: MIT encounters Army and RPI on April 14 and 15 at the Alumni Swimming Pool. (Photo by Conrade Jaffee '63).

Coach of the team is Dr. E. M. Kapp, who directs the water polo department.

By Warren McCandless '62

As the Sailing Pavilion enters its twenty-fifth season on the MIT scene, the NA, or the National Association, is again planning a spring full of social events and good sailing for the MIT community. The pavilion and NA represent one of the largest and foremost collegiate sailing organizations in the country. Traditionally, one of the sailing powers in New England and the U.S. Tech long ago initiated intercollegiate sailing as we know it today in this area, signaling the beginning of the NEISA—the New England Intercollegiate Sailing Association.

### NA Plans Activities

The NA is one of the largest and busiest groups on campus. The student-run sailing organization under the guidance and able leadership of sailing master Jack Wood, handles intercollegiate competition and sailing instruction, and coordinates all activities at the pavilion.

In the line of instruction, the NA has long been planning activities to develop the Techman's nautical abilities from the inexperienced novice to the member of the varsity team. Everyone is invited to the Spring School, which begins Monday, April 10 and lasts into the next week. The first two classes will be lectures while the rest will take place on the water to give students the experience required for a man rating. Physical education classes will be available to the regular student body, giving a less hurried approach to sailing fundamentals. For sailors who have their helmman rating and wish advanced training, Coaches and Boatmasters will be happy to help on the weekends.

### Social Events

A great highlight of the NA spring schedule is Regatta Day, which is planned for Saturday, April 29. In this event all members of the MIT community will compete for the Voce, Carlson, and Hayden Trophies. Girls from several local colleges will also be sailing that day, and after the races a barbecue planned, at which the trophies will be awarded.

The Beavers, a group of the more-experienced sailors, who assist in the pavilion operations and round out the social atmosphere, have planned several events, including the annual moonlight sailing party and the harbor cruise.

Sailing Team Starts Soon

### Varsity sailors will be off to

Varsity this spring.

They have won six, lost five, and tied two. They lost met in 1960.

### NA Has Varied Program For Tech Sailors

For information or reservations, address Mr. Ralph Schaffner, The Biltmore, New York 17, N. Y. Madison Avenue at 43rd Street. Off one 110 foot yachts which make theCharlotte not only beautiful to watch, but also a time for some spirited seamen ship. Skippering will be Pete Gray '61, with Gary Heinig '62, Warren McCandless '62, and Walt Jackson '61 on the fore deck, and Don Nelson '63, Walt Hagedorn '61, Jerry Milgram '61 in the cockpit. Bob Gray '61 will go an alternate.

The following weekend the team returns for the Geiger Trophy on the Charles. There will be two Dinghy divisions, one 110 group and a division of Fireflies counting double. On the whole the sailing team is looking forward to another successful season filled with many active weekends.

### New Coach

The Tech fleet is in fine condition this year, due to the efforts of Jack Wood, Jerry Reed, and Joe Duplin. The last, a new addition to the sailing staff, is an experienced crew sailor and will assist Coach Wood in directing the Varsity this spring.

MIT's football team has a winning record against Tufts and Harvard as an alternate. They have won six, lost five, and tied two. They lost met in 1909.
