Green compares societies

By Karen Wattle
American Freudians and British Marxists was the topic of the December 8 lecture of the MIT Course 20 Society, given by Dr. Martin Green. At present he is a lecturer at the University of Birmingham, England. He has been a professor at Wellesley College and taught at Tufts University from 1963 to 1965. He received his doctor’s degree at the University of Michigan, making an analysis of the reputation of D. H. Lawrence in America. A native of London and a former pilot in the Royal Air Force, Dr. Green has also studied and taught in England, Wales, France, and Turkey.

Interest in Science
During his stay at Wellesley, he became interested in the relationships of science and humanities, and studied science subjects at MIT in his spare time. Mirror for Anglo-Saxons, a book comparing English and American cultures, was written during this time also.

His most recent book, published earlier this year, is The Problem of Boston, in which he traces the rise and fall of Boston as a world culture center.

In his talk Thursday, he compared the post-Freudians to the post-Marxists as phases in American and British life, respectively. Living in both countries gave him personal background for the compassion. He considered the two movements mutually hostile.

No Party Connection
Both groups are not strict followers of all ideology embodied in the concepts, but are concerned with what they can make of the root implications. For example, the post-Marxists have no direct connection with the Communist Party, Russia or China. They feel that it is necessary to form a successful community, to define one’s relations to other men. Then, the individual becomes universal.

The post-Freudians feel that the regeneration of individual responsibility comes with the degeneration of community life and the re-awakening of individual life. For them, the essential function of art is to release man’s sensuality. While content is important to the post-Marxists, “the medium is the message” for the post-Freudians. They wish to do away with “stifling ethics.” They trace all problems to their roots in the human body.

Individual And Society
Dr. Green accounted for some of these differences in that the countries have different histories of thought. In England there is a drive for the fruitful interaction between the individual and society. In America there is an emphasis on self-reliance.

“Each movement,” said Dr. Green, “is the antithesis of the other.” He saw himself as driven from one set of truths and ideas to the other. The important question is what pattern others may make of the movements.

Kindleberger predicts slowdown

(Continued from Page 1)

world growth will proceed in a fashion similar to that of U.S. that is, with considerable more periodicity and less force. In regard to the problems involved in international monetary policy, he sees himself as “a little more disposed than those people who expect a crisis.”

As indicated by his present work, Dr. Kindleberger’s interest lie in the field of international economics. He is author of such works as “Europe and the Dollar,” “Economic Growth in France and Britain,” “International Economics,” and “The Dollar in World Politics.” Since 1960, he was appointed to the President’s Advisory Committee on International Monetary Arrangements, and this year he was elected Vice President for American Economic Association. It is a question of his interest and expertise in the areas of international economic policy, and a sociologist with respect to American economic policy.

Professor Kindleberger currently teaches two courses: “International Economics” (125T) as well as a graduate seminar in International Economic Theory (145B).

Since 1965, he has also been Chairman of the Faculty and, ex officio, Chairman of the Faculty’s Committee on Educational Policy. When questioned about the major problems of educational policy confronting the Institute, Professor Kindleberger first referred to what he called “pressure on the faculty.” Concerned with the problem of inadequate supplies, he is particularly impressed by the timeliness of some professors to neglect their teaching duties because of their commitments to research, indysty, or government.

Greene tackles beauty question

(Continued from Page 1)

beauty produces good psychological effects on workers and thus is something to be encouraged. Dr. Kindleberger’s main remarks will be seen as an example supporting the notion that what is beautiful is all built with something besides utility in mind — may not be as much as seems to be a simple aesthetic. Of course, one exception must be the students’ appreciation for the beautiful, even when it is in its performing its assigned tasks. Occasionally, in the hands of a professor, the appreciation for the beautiful can be as beautiful as well, such as in a super-classic atmosphere. Of course, this entire portion of the discussion was plagiarized by the students. “What constitutes beauty?” The effect of society on an individual’s choice is determined, as might have been predicted, as conclusions were drawn here.

Soldiers meet reporters

By Ken Downes

Most college students are exposed to a myriad of theoretical arguments on why the US should or should not be in Vietnam. Rather than listen to the ideological arguments of classmates, it is worthwhile to listen to some of the soldiers who have actually been to Vietnam.

A meeting was held Monday, Dec. 5, for Purple Heart winners, as well as for young ladies who have served in the college press. Sponsored jointly by the US Navy and the Northeast Boston Hotel, the purpose of the meeting was to give the girls a chance to interview these servicemen and to obtain their personal picture of the war in Vietnam.

In speaking to several army privates and a squad leader in the 1st Infantry, they are all of college age and enlisted in the service although they did not choose to go to Vietnam. The following views were found predominant:

(1) that the US should step up its efforts in the Vietnam war to end it as quickly as possible, and (2) that the morale of US troops is very high.

Little word from home

They have heard very little about the campus protests at home, (as a matter of fact, because the campus is far from the fields all the time, they receive very little word from home except through letters.

It was agreed that our troops belong there but that they might be going about fighting in the wrong way. They felt that Communist aggression must be stopped somewhere, and that it is not in Vietnam, it is in Thailand, or India (at which point they will have one third the world’s population behind them). Although they don’t feel that we could achieve a military victory, they felt the Communists would suffer a humiliating defeat if pushed out of South Vietnam.

One private first-class thought that we should step up our bombing and “level” Hanoi and destroy their entire industrial area. He was quoted as saying “we should step up our bombing and flatten somewhere; if it is not in Vietnam, it must somewhere; if it is not in Vietnam, it must be beautiful as well, such as a super-classic atmosphere.

Skepticism about Christmas

Concerning the proposed Christmas truce, the servicemen were very skeptical, leading to the statement that “trapped” in one big circle, and that the “level” bombers would be “saved” by bringing in the enemy. They were also skeptical of the legions of territory that what is beautiful (or at least is built with something besides utility in mind) may not be as much as seems to be a simple aesthetic. Of course, one exception must be the students’ appreciation for the beautiful, even when it is in its performing its assigned tasks. Occasionally, in the hands of a professor, the appreciation for the beautiful can be as beautiful as well, such as in a super-classic atmosphere. Yuletide spirit

We have reached that time of the year when the spirit of Christmas should be invading the campus, and the Boston Public Relations Committee is doing its part. At the risk of sounding like a group of being labeled dribbling sentimentalists, we urge all students to attend this distinguished institute of technology to relax, smile and reflect on the fact that the Christmas season is here to stay for another week.

Two events will help make the coming of the holiday season. The first of these is the annual Christmas Convocation in Kresge at 11:00 Thursday morning. If MIT has traditions, the Christmas Convocation is one of them. We urge all students to attend this student planned and administered event. Freshmen, in particular, might be interested to a side point--which isn't nearly as cold and gray as the concrete outlines of the main buildings on these dreary December days would suggest.

Friday afternoon, from four to six pm, the Student Center Committee is sponsoring a Christmas party in the S.A.C. of the Student Center Building. Last year's party was successful; this year's party should draw even bigger crowds.

Go to the Convocation, attend the S.C.C. party--and you'll have the best possible way to get into the spirit. The students of MIT who circulate, and on his next trip, if the time conditions have not been honored, his books are removed, and his course books are circled around the entire area about a policeman. We don't need a policeman. We don't need a police force to keep the "slobs" in their place.

I sit.

Let me state that the "slob" is in the Student Center Library. I also wish to make it clear that the opinions I am expressing as an individual, and the following opinions are mine and mine alone.

In some, as I am on the desk at this particular library Monday through Friday from 4 pm until midnight, I believe I have a clearer understanding of the situation than any student.

It is with this in mind that I reply to Steven Pecsenye '69, who, in your issue of December 3rd, mentioned that no librarian should be forced to being a policeman against his will.

Let me state that the "slob" situation, as of this writing, is becoming more and more serious. I recently mentioned that no librarian should be forced to being a policeman against his will.

The three best players--end Lon-

n

Football is of utmost importance at many campuses today, and everyone goes all-out to win. Rejoicing follows a victory, and mourning. The ultimate goal is to send the team to a bowl game. At one campus, this is not so. Football is a whispered, hushed word. The attitude of the team is that they are playing to relieve their tensions, not necessarily to win. They have been placed in the farmed Rose Bowl stations by the press, but few actually pay any attention to these all-star teams in football.

metaphor, pointing out that the scholarship programs of other schools are typically of the same ilk.

The Public Relations Committee of the student body has, for the past several years, worked to improve the intellectual environment of MIT. As a result, the student body has been divided into several groups, which have become known as the "slob" groups.

To the Editor:

Many times these excellent young men and women give me the impression that their work is returned to their "own" territory after they leave the library, and they are therefore deprived of a sense of belonging when they are away. Once a slob, always a slob. These "slobs" will NOT DIS-
Case might be appealed (Continued from Page 1)

ion, a member of the MIT Corporation. At the announcement of the session, Williams offered to step down if either counsel objected to his doing so; however, both counsels declined. Associate Justice Richard A. Cutler also refused Berlin when he claimed that "the superficially innocuous oath had menacing implications." Berlin's argument is that the teachers' oath penalizes any teacher who disobeys it, this being a violation of the guarantees of due process.

Decision by the Court is not expected before next month. Should the Court uphold the position of the state, Peddowby's only course of appeal would be to the US Supreme Court.

Case for the football games.

We'd like to clear up what appears to be a misunderstanding. It is somewhat popular on campus to decry a business career on the grounds that you stop learning once you start working for Cliché Nuts & Bolts. That idea is groundless. We can't speak for Cliché, but we can for ourselves—Western Electric, the manufacturing and supply unit of the Bell System. Out of 10 college graduates who have joined us over the past 10 years, for example, have continued their higher education. How're these for openers:

The state of the art, never static, is where the action is. At Western Electric, what's happening is the exciting and satisfaction of continued doing and learning. If this happens to appeal to you, no matter what degree you're aiming for, check us out. And grab a piece of the action.

New sitting club seeks members

Several students are currently organizing an on-campus ski club. What they intend to do is coordinate weekend skiers so that discounts may be obtained. They will also organize several trips.

After December 18...

The Tech Coop Lobby Shop will no longer be open on Sundays after December 18th. Otherwise, regular store hours will prevail.

Pass the word.

Peace Corps seeks volunteers

A group of ten former Peace Corps Volunteers presently studying on the MIT campus have organized themselves to handle Peace Corps recruiting at MIT this year.

They are working in cooperation with Miss Sally Howes of the Placement Office and with the Peace Corps throughout the year.

Anyone who would like further information should contact Miss Sally Howes at the placement office or John Briscoe at 868-7879.

Wanted: NORWEGIAN TEACHER Refer to times to be arranged
EL 4-2124, 9 a.m. - 5 p.m.

1965 Volkswagen 5-speed, radio, seat belts. One owner. Excellent condition. $1100 - will haggle.

Call 868-2638 after 5 p.m.

Last year, thousands of lawyers, bankers, accountants, engineers, doctors and businessmen went back to college.

And not just for the football games.

Center in Princeton, N. J. Selected employees are sent there from all over the country for a year's concentrated study leading to a master's degree. You get the idea. We're for more learning in our business. After all, Western Electric doesn't make buggy whips. We make advanced communications equipment. And the Bell telephone network will need even more sophisticated devices than the ones you're using now. The state of the art, never static, is where the action is.
Dear Mr. Hill:

There is no substitute for ability.

And neither the age nor the genealogy of a high-ranking executive has a crucial bearing on whether he's able or not.

It's a fact that the top men in the 30 largest U.S. businesses have an average age of about 60. But it's also a fact that these wouldn't be the largest companies if their chief executives weren't men of outstanding ability.

On the other hand, I belong to the Young Presidents Organization. It has more than 2,000 members—men who qualified for membership by becoming presidents of million dollar businesses before they were 40. Some YPO members are sons of business founders. The majority, however, started their own businesses.

In addition, there are a great number of successful "family" businesses founded originally by one man or by a family group—for example, DuPont, Ford, IBM, R. J. Reynolds, and, also, Motorola.

But I really don't see why these facts should be of great concern to your generation. Most mature young men embarking on a business career will not be too disappointed if they do not occupy the president's or board chairman's seat by the time they're 35 or 40. Of course, some will but there are also rewarding and challenging positions along the way.

There is no question that it's difficult to convince a young man that experience is important—he has to see it to believe it. But, in many situations, in and out of business, a knowledge of the past is essential to an understanding of the present. Most young executives quickly discover they have a lot to gain from their older colleagues.

From personal experience, I can tell you that being the son of a company's founder poses some unique problems. For the most part, I worked and studied twice as hard as might have been the case in another company. And, as it turned out, I had 16 years of experience before becoming president at 36.

Perhaps my situation may have elicited some resentment, some jealousy—that's only natural. But, I very much doubt whether any young man would decide to avoid work at Motorola, or at DuPont, or at Ford solely because of the resentment, some jealousy—that's only natural. But, I very much doubt whether any young man would decide to avoid work at Motorola, or at DuPont, or at Ford solely because of the top of the hierarchy is dominated by nepotism and senescence.

—James Hill, Harvard University

THE ISSUE:

"Ability is only of secondary concern."

There is no substitute for ability. And neither the age nor the genealogy of a high-ranking executive has a crucial bearing on whether he's able or not. Frankly, he doesn't have to see it to believe it. But, in many situations, in and out of business, a knowledge of the past is essential to an understanding of the present. Most young executives quickly discover they have a lot to gain from their older colleagues.

From personal experience, I can tell you that being the son of a company's founder poses some unique problems. For the most part, I worked and studied twice as hard as might have been the case in another company. And, as it turned out, I had 16 years of experience before becoming president at 36.

Perhaps my situation may have elicited some resentment, some jealousy—that's only natural. But, I very much doubt whether any young man would decide to avoid work at Motorola, or at DuPont, or at Ford solely because of the top of the hierarchy is dominated by nepotism and senescence.

—James Hill, Harvard University

The decisions that had to be made were obviously major ones—involving IBM's computer future. And these decisions embraced an extremely touchy 4 or 5-year period. The article featured photographs of 8 immediately concerned, key individuals. Two were IBM's chairman and president. The other six executives, who had aged during the deliberations, were from 35 to 43.

There's no doubt about the trust that IBM had in the ability of these executives. There's also no doubt that their abilities were recognized early.

Your letter implied that in many businesses ability is only a secondary concern. Obviously, I disagree although I've heard similar statements made by other young men. Isn't it possible that the reason for this erroneous impression is simply unfamiliarity with the business world? Or, perhaps, sometimes it's due to the fact the student hasn't really been tested—he doesn't know whether he's able or not. Frankly, he doesn't know whether he can cut it in business.

No one can supply a pat answer or promise a Horatio Alger future. I can only state, on the basis of conviction and experience, that business gives the highest priority to ability and talent—to young, intelligent leaders with a capacity for accomplishment.

I'm sure you've heard comparable statements made by others in business. Generally, they represent corporate thinking and policies. No responsible company promises something it doesn't think it can deliver. Part of the life blood of any successful business is preparing for and anticipating the future. What the future will be is the responsibility and the opportunity of today's young people.

Excellent taste was exercised by the MIT Dramashop in choosing 'Heartbreak House' for their production. Typical of the works of G. B. Shaw, 'Heartbreak House' is a pleasingly snide look at the domestic drama.

The action is set in the house of a retired sea captain. The plot revolves around the arrival of his long-absent daughter, Lady Utterby, played by Kathryn Walker, and the scheming of his older daughter, Hetione Hushabye (Joan Tolentino) to break off the uncoming marriage of Ellie Dunn (Lisa Kelley) to Boss Mangan (Jeff Meldman), a caricature Capitalist as seen by the Socialist Shaw.

The play is well suited to production by the Dramashop, and the Dramashop production was a good college performance. It was unfortunate timing that the superb professional Theatre Company of Boston had performed on campus so recently. Nonetheless, the Dramashop's cast possessed the wide spectrum of talent and experience evident in the best of amateur productions.

Excellent acting

Particular compliments go to Joan Tolentino for a convincing performance. Special congratulations also were earned by Lisa Kelley and Robert Moore, as the husband of Hetione Hushabye. The fine acting was complemented by the background, which enhanced the scenes effectively.

Throughout the first act, the performance is sparking. Even the most demanding audience would have been satisfied with this portion. Conditioned by the great start, the audience is transported well along into the second act, where some of the sparkle wears off, and the play begins to lag. This lasts until the third act, where the animation of the characters is revived, and the play proceeds to a lovely finish.

Although this production is not quite on a par with the professional (as exemplified by the recent performance of 'Mamet/.Safe' in Kresge), it is a pleasing effort and certainly worth seeing.

Ali Akbar Khan here tomorrow

The noted exponent of classical Indian Music, Ali Akbar Khan, will give a performance tomorrow night at 8 p.m. in Kresge Auditorium. He will be seen playing the Sarod, with an accompaniment of Tabla and Tamboura, which his wife will play.

His first American performance was at New York's Museum of Modern Art in 1953.

It has an impressive reputation as a composer, having written five ragas.

MIT Dramashop presented 'Heartbreak House,' by George Bernard Shaw, this past weekend. Good acting coupled with an excellent play to make this production quite entertaining. It will be shown again next weekend at Kresge.
Nobody watches meteor shower

(Continued from Page 4)

Until dawn, drew many students of Chicago University to a point on Lake Michigan several weeks ago. From 1 to 5 am they counted meteorizations, climbed around large piles of rocks (thereby even fell in the water) and discussed Nietzsche beneath the advancing winter-dawning radar installation. Even though they went out there originally to see the meteors, they became so absorbed in those activities that nobody seemed to care that the sky was so completely overcast that not even the moon was visible.

Instead.

The computer method of finding dates has many happy customers, but at least one male applicant is dissatisfied with the results. The computer matched him up with his own sister.

EL TERRON

The MIT Concert Jazz Band Sunday under the direction of Herb Pomeroy, Mr. Pomeroy, one of the foremost jazz educators in the country, deserves much of the credit for the improvement shown by the group.

The group sounded strongest on the Gary McFarland arrangements and Quincy Jones compositions. Jaki Byard's arrangements of Ellington's "Salts Doll" seemed a bit too difficult for the band, although the piano and bass work was very good here.

One of the highlights of the concert was the inclusion of a piece by a band member, Richy Orr. Although it was rather unimpressively compositionally, his arrangement did give us a chance to hear the excellent piano and bass work of Richy Gilgud and Bobby Schullman, who were usually obscured by the heavy brass arrangements characteristic of Pomery.

Sidle trombone solos

Richy Orr's valve trombone solo here was just a delight, in the best tradition of Bob Brookmeyer. Orr, an outstanding soloist on slide trombone, who was particularly prominent on Quincy Jones' "Meet Benny Bailey," should consider "doubling" more. The inclusion of two pieces by a recent winner of the band was nice, and I hope that a larger portion of the spring program will be devoted to this group, who could really be doing well by then.

Other problems.

One of the Techtonians' problems which still plagues the Concert Jazz Band is the drumming. A good big band drummer is rare in the first place, and is required to set or drive the rhythm for the entire band; listen, for instance, to the current Mel Lewis-This the big band of Sunny Payne's work with Count Basie. That Dave Kofman is a good drummer was shown by his work with the sextet; however, in the larger context his drumming was less than adequate. In some places it seemed that incomplete or incorrect rhythm changes were at fault, constraining him to more rhythmic colonizations; but if this band is going to swing, the drummer must set the pace; fortunately, the group seems to be aware of an intrinsic sense of rhythm anyway.

Alone: best trumpet

After Friday night, I guess a lot more people know that the Institute has a special blessing. Sam Abing, a course V sophomore, just happens to be the best trumpet player in the Greater Boston area. This is in no overstatement, for Sam can play with the best—he regularly sits in with professionals such as Elvin Jones, when he led a group at the Jazz Workshop, or Roland Kirk, when he was at Comody's. It is not clear that Sam intends to become a professional musician, but his solo on "Millionaire" was one of the best trumpet solos I've ever heard. This band could go far if they put right to work on their problems.

Comes in and try a Campus King, Shushlyk, the Hero, or one of the Hot Platters at the Twenty Chimneys... And have an old fashioned strawberry shortcake for dessert...

ZBT outskates LCA; Burton leads bowling

By Stan Kask

ZBT continued its pace past at MIT this week, even though the majority of students were Limited to 3 and 4. The major A league contest, the Tech-Tau defeated the Lewish 7 to 3, for a record of 110. The game of the game was never in doubt as the team started over, around and through LCA en route to the victory.

Intramural sports

Three weeks are completed in the Intramural bowling season, and Burton A continued to bowl well as they improved their total pin count to 3366, leading the lead over TEP which finished the week with a total of 3350. Sigma Phi Epik surprisingly also continued their winning ways as they managed to tie the Tops with 3360.

In the major A league contest, the Lewish A defeated the ZBT A, 11-0. The outcome of the game was never in doubt by a score of 11-0. The Lewish A defeated the ZBT A, 11-0. I would like to confer with representatives from the following graduate schools:

I AM INTERESTED IN AA'S MANAGEMENT PROGRAM.

Complete and return to American Airlines, Inc.
Manager of Executive Recruitment, 633 Third Ave., New York, N.Y. 10017

An Equal Opportunity Employer

A Plans for Progress Company

WHY DO GRADUATE BUSINESS SCHOOLS AND AMERICAN AIRLINES WANT TO SEE YOU AT THE WALDORF?

All college students are invited to attend America's second Jet Age Career Exposition. Specialists in their various fields will discuss career opportunities in flight, ground, and management positions.

Both are interested in interviewing you.

We hope that you will come to our Career Exposition. We believe that you will be well informed, and will give you a better insight into the exciting, challenging, and profitable job opportunities that are available with American Airlines.

A graduate of The City College of New York - Columbia University - Case Western Reserve University - Connecticut College - Eckerd College - Erindale University - Harvard University - Indiana University - Loyola University - Michigan State - New York University - Northwestern University - Ohio State - Oklahoma State - Penn State - Rutgers - St. John's University - Seton Hall - University of North Carolina - University of Pittsburgh - University of Virginia - Virginia Military Institute - Washington Graduate School - Wichita State - Wichita State University.

If interested, please complete and mail the above coupon.
By Paul Baker

Tech’s four relay teams split out weekend schedule — the hurdlers and distance runners overtook field and track, while the sprinters and hurdlers stood to defeat. The hurdlers had barely more than a bit of work when they posed by Williams, 27-6. Three seniors, John Lohmann, Ron Bley, and Fred Andreu, chalked up six for the latter and Flou, who was their final initial. However, Andreu has achieved the best time in two of the matches. In addition, four other engines using their opponents’ guns, Joe Barnen, Dick Williams, Walter pope, and Dave Alpert.

Williams managed to score in 221 and 160 pound divisions, but even Techs looked strong. The 160 claim, Joel Moss had shot well but could not overtake as an early deputy. Tech’s team record now rose to 14. In their two matches, the hurdlers scored 61 points, allowing the opposition team only 1. Tech’s mile relay team rose to the occasion Saturday, outdistancing Bates and taking the Engineers to a 3:36-48 victory.

The meet was nip and tuck all the way. Ron Wilson ripped to victory in the 1000 yard run and finished second in the 400. Tech’s relay, John Held, Hamish Moles and Hadi accepted the 30 yard dash, while John O’Hara and Larry Ross placed first in the mile and two mile respectively. Bates stayed strong, close, however, with strong performances, and the score was even at 48-48 going into the final relay. Joel Hamburger, John Held, Alan Davis and Larry Ross showed their heels to the faces of the Bates aspirers, capturing the race and the meet.

Cougars Drupped

The Cougars courted their third defeat in five outings, losing 48-45 to SRIU Saturday evening.

The decisive factor in the contest was the height advantage enjoyed by Benson. The Bears averaged 6’2”, nearly two inches taller per man than MIT five. The difference took its toll. MIT controlled the backboards throughout entire game. Tech’s big men were ineffective, enabled the Engineers to take long and crushed shots. Tech’s side the lead early in the first quarter, but Benson quickly squelched the rally, jumped quick in the first and maintained the advantage throughout the game. Leading 23-20 after the third period, Nick Blandford popped 13 points topping SRIU’s scoring Steve Chamberlain in the last fol- lowed by Bruce Wheeler with 10. The fresh aspirants went down for the first time this season to SRIU 52-41.

Before the meet, the opposing coaches agreed to swap 300 yard medley and freestyle relays, and 100 yard breaststroke and butterfly backstroke events. This was due to the New England rules, which say that the last three are to be 300 yard events. RIE is not a member of the New England Association, and is still swimming under the old rule. A compromise was reached for this meet.

Tech splashed out to an early lead, 20-19, in the opening 50. Ron Riley, Steve Kimny, Jim Bonderman and Tom Rappleton captured the medley relay. However, grada-

lly pulled ahead. Tech stayed with limits by Bonderman in the butterfly and Riley in the backstroke. Bob MacPhail won the 200 yard medley and the 200 yard butterfly. He also won the 200 yard backstroke and the 100 yard backstroke.

The Cougars were run down in diving competition, while Bates handily defeated third in the event.

Mike Ryerson, Charlie Armitage’s freshman distance track team suffered its second straight defeat as Bates claimed a 504-5 victory in Rockwell Cage. The Engineers have beaten Bates only three times in the ten-year history of this rivalry. The last MIT met with n’2 recorded for the seasons.

Although they did well in the other events, the Techmen were unable to overcome the 25-point deficit created by their lack of hurdlers and sprinters.

The engineers were hoping to sweep the 15-pound weight throw. Dave Ibehen came closest with a throw of 23’6”. Art Van Waldogt ‘77 and Gordon DeWitt ‘77 placed second and third. Pete Berk ‘77 placed second in the shot put.

Greg Wheeler ‘77 won the long jump with 19’4 1/2” and Roderick ‘69 placed third in the shot put. Berkeley’s ‘80 won the pole vault at 13’”, and Art Van Waldogt took second place in the high jump to round out the scor-

The Engineers were led by two of their opponents, 18-19 in the field events. The Techmen placed second 19-18 in the meet. Steve Korkol ‘78 was up in the 110 yard hurdles, second, but he came back to win the two-mile event. In the first race he led up to the last lap, but was outdistanced by a Bates man. The winning time was a slow 4:23.5, Korkol’s time in the two-mile was 10:12.5. Pete Pedelbaum ‘77 placed third in 3:05. Richard ‘67 won the 1000-

run with his final kick. Pemberton’s jump took second place. In the 800-yard run Bob Pemberton placed third. Bates won the mile relay.

Tonight the teams will travel to Maine to meet again before Christmas vacation.

Marshmen edge Merchant Marine Rifles get year’s high score

By Tony Lanza

The varsity paint team closed out their dual competition Saturday, with a 225-215 victory over the Merchant Marine Academy in New York. The streakers with closed with a 1-4 record. Severes won with 497, Bob MacDonald 566; John Reykjavik 687, 56; Mike Dunseathu. 86, 56, and Roderick ‘69. The short- ers next match will be today with the New England Boston point league competition.

The riflemen won two matches.

They ousted Wentworth Friday 1263-257. Charles Marantz ‘70 shot the highest score of the year as he led the Engineers with a

275 total. Karl Laumann ‘69 had a 254, followed by Dennis Armason ‘66 (254), Bob MacDonald ‘66 (251), and Bob Pratt ‘67 (251). The total was the highest for the team in two years. The riflemen downed Coast Guard Club Saturday 265 to 255, tying the Engineers for the highest score. Laumann again led the team with a 265. Laumann had a 265, with Art Van Waldogt ‘77. Then Art Van Waldogt ‘77. The shooters’ record now stands at 5-5. They are 21 in Greater Boston, competition and 5-1 in New England competition. The team faces one of their stiffest matches of the year Friday, when they take on Harvard at the Crittore’s home grounds.

Does it hurt to chill beer twice?

Not that you’d want to. Sometimes it just happens... like after a picnic, or when you bring home a couple of cold 8-packs and forget to put ‘em in the refrigerator. Don’t you recall giving up the taste or flatten the flavor?

Relax. You don’t have to worry. A really good beer like Budweiser is just as good when you chill it twice. We’re mightily glad about that. We’d hate to think of all our effort going down the drain just because the temperature has its ups and downs.

You understand why when you consider all the extra trouble and extra expense that go into brewing Buds. For instance, Budweiser is the only beer in America that’s Beechwood aged. So... it’s absolutely safe to chill beer twice. Enough said. (Of course, we have a lot more to say about Budweiser. But we’ll keep it on ice for now.)

Budweiser

Page 11
Tech ahead with 1:44 left, I goal by reserve guard Roy Talus.

Gregg Ericksen '69 at 130 pounds, and round. Olson reversed Jack, the whizzer, each wrestler scored.

In the first period, Tech defeated a Williams squad 24-9.

In the final rack Ray pocketed the nine ball run in the 28th inning, Doug found a break and won the match. The Beavers' attack was very accurate enough to provide them with a win.

The Beavers' defense dominated the entire tournament as they played their best game of the season here January fifth. Doug Friedman '67 came from the field. The lead swung back and forth during the first half until the first half of the game. The Beavers won 61-43. This Burton A, visitor over Delta Upsilon the night before, 45-51. The game was won in the first period as he spread the margin for AEPi on the first day.

The SA8lor playmaker, had ten. Both skaters only beat WPI 4-1. If this is any indication of the team's improvement, we can look forward to some close contests in the future. The team's record is now 13-3, and their next battle is a rematch against WPI at home on Friday, January 27.

The Beavers chose the up position for the second period. A strong effort by #31 Troy, N.Y. brought a roar from the crowd and Bash controlled the boards. Lowell wing Brian Jones '68, who tallied 10. Tonight they have not played to their best. With the pressure mounting, Ray recovered taking the lead twice and Friedman took the lead back twice. With four seconds left in the period, Jack Wu '68 defeated a Williams squad 24-9.

The Tech skaters were routed 9-4 at Lowell Tech Thursday, but they obviously learned from their mistakes as they played their finest game of the season here Saturday, defeating WPI 6-4.

At Lowell, the Techmen were again out-sized, and out-muscled by the latter would throw the puck at the net. With the Beavers' attack was very accurate enough to provide them with a win.

In the final rack Ray pocketed the nine ball run in the 28th inning, Doug found a break and won the match. The Beavers' attack was very accurate enough to provide them with a win.

In the most exciting match of the afternoon, Jack Wu '68 defeated a Williams squad 24-9. The cagers won 61-43. This Burton A, visitor over Delta Upsilon the night before, 45-51. The game was won in the first period as he spread the margin for AEPi on the first day.
