Secretariat; Finance, Budget, and Student Services

Interview for Chairman, today — Election, March 5

Mayor John F. Collins presented a guest lecture for 15,099.

(Public Policy and Management) Thursday afternoon. Earlier in the day, he delivered a special lecture for a seminar in government-business relations.

Mayor Collins delivers lectures to Management students Thursday

By Robert Blackman

Bob Horvitz '68 of Alpha Epsilon Pi from Boulder, Ill., was elected Undergraduate Association President for 1967-68 in the annual student government elections held yesterday. Horvitz deflected two other candidates for the highest post in the undergraduate student government. Rick Kazen '68 of Sigma Chi from Boulder, Colo. finished second, while George Phillips '68 of Dartmouth College, from Williamsburg, New York, was third.

Class Officers

Horvitz's statement

Upon notification of his victory, Horvitz released the following statement to The Tech: "I am very happy to be elected and I promise to do my best to represent the student body. My specific goals for the year include those issues on which my campaign was based. I would like to thank everybody who voted for me."

1967 votes were cast in yesterday's election as compared with last year's record-breaking total of 2331. This year's turnout was an average one and did not create any problems such as last year when additional ballots had to be printed up for every race except Class of 1966 offices.

Dow Chemical picketed at placement interviews

By Don Minling

The Student Placement Office was the scene of picketing by members of the MIT chapter of SDS Thursday. They were protesting the Dow Chemical Company recruiting interviews then in progress on the basis that Dow is one of the manufacturers of Agent Orange, a herbicide used in Vietnam. SDS Wednesday, Thursday. They were protesting the Dow Chemical Company recruiting interviews then in progress on the basis that Dow is one of the manufacturers of Agent Orange, a herbicide used in Vietnam.

The demonstration consisted of about ten protesters parading in the halls outside the office in front of the building's elevators with picket signs. At one point a SDS protestor was arrested.

Tech Show aims beyond Institute

By Ronald Bohm

This year's Tech Show at eight-thirty, TECH SHOW '67 opens in Kresge Auditorium. The word that best describes the event is "manifestly" in connection with this year's show, "LUCKY WILLIAM L. B. STEWART AWARD". Rightly in connection with this year's show, "LUCKY WILLIAM L. B. STEWART AWARD". This will be the fourth year of the awards, which come yearly in connection with the Institute's annual student government election. The award was established in memory of Mr. Stewart, a member of the class of 1903 and a member of the class of 1903 and a member of the class of 1903 and a member of the class of 1903.

Activities and Individuals

Nominations for the William L. Stewart Awards for outstanding contributions to extra-curricular life at MIT are now open. Any member of the MIT community may nominate an individual, which must be turned in to the Institute Office, Room 401 in the student Center, by Friday, March 10.

Nominations are due in the organization for the following year's show, "LUCKY WILLIAM L. B. STEWART AWARD". This will be the fourth year of the awards, which come yearly in connection with the Institute's annual student government election. The award was established in memory of Mr. Stewart, a member of the class of 1903 and a member of the class of 1903 and a member of the class of 1903.

Dr. Smith's interests turned to religion; however, it is not theology, per se, which concerns him, but rather the philosopher or religion, which he calls "philosophical anthropology." For example, in his paper on the "Teachings of the Buddha," he spent the autumn of 1964 among monks in China. Indeed, in the course of his studies, Dr. Smith has traveled throughout 19 countries in Asia and the Orient.

Dr. Smith's interests turned to religion; however, it is not theology, per se, which concerns him, but rather the philosopher or religion, which he calls "philosophical anthropology." For example, in his paper on the "Teachings of the Buddha," he spent the autumn of 1964 among monks in China. Indeed, in the course of his studies, Dr. Smith has traveled throughout 19 countries in Asia and the Orient.
Philosopher Smith attempts to understand man, religion

(Continued from Page 1) Although Dr. Smith makes no claim for spiritual development in his students, he notes that his legs have certainly changed. 

What, then, are Hunter Smith's personal views on religion? Although he does not doubt that he has been "slightly influenced by Asian thought," he has "no inclination to become an Orientalist or to become enamored in one camp." Instead, he insists, "It's the perspective that interests me." And as to his own behavior, he states, "In theology I'm a universalist and, in practice, a Liberal Christian. What I mean by this is that the forms and symbols of other Christian denominations are available to me." 

Dr. Smith notes that "from one-fourth to one-third of the general population will have religious experiences if they take the drugs. These may be experiences of a scientific nature, independent of measurable psychological conditions." "This," he insists, "raises all kinds of theoretical questions about the meaning of these experiences.

Author, teacher

Author of The Purposes of Higher Education, Professor Smith is quite concerned with the problem of modern education. He suggests, for example, that "One of the weaknesses of higher education is that what students are learning is under-related to their activities. In an effort to deal with this he is teaching Philosophical Anthropology (21.597). In a "highly experimental" fashion, he is designing a "laboratory course in philosophy". This is an attempt to "bridge more nebulous, yet not less important, gaps between student understanding of government, held its organizational meeting Friday evening in the Student Center.

About 50 representatives of the Student Center.

Campus Interviews

THURSDAY, MARCH 2 & FRIDAY, MARCH 3

MCPSA holds first meeting

By Mark Belsis

The newly-created Massachusetts Community Public School Association, dedicated to increasing student understanding of government, held its organizational meeting Friday evening in the Student Center.

About 50 representatives of the Student Center were present to support the program and to hear from government officials who were unfamiliar with programs for government internships. They were familiar with the needs of LTV Aerospace Corporation, one of the city's major defense contractors, as well as for government internships.

The newly-created Massachusetts Community Public School Association (MCPSA) was formed in order to provide a forum for students to discuss their concerns and to hear from government officials who were unfamiliar with programs for government internships. The MCPSA is dedicated to increasing student understanding of government and to organizing regular seminars with government officials.

Said the co-chairman of the MCPSA, Gerald LaRue, "We are quite concerned with the need for students to understand the role of government in their lives. We have been organizing seminars with government officials who have been unfamiliar with programs for government internships. We are now building a network of supporters who will help us to carry out our program.

The MCPSA is also concerned with the need for students to learn about the role of higher education in society. We are organizing seminars with government officials who are unfamiliar with programs for government internships. We are also concerned with the need for students to learn about the role of higher education in society.

Philco is looking for people who don’t know all the answers

As a major subsidiary of Ford Motor Company, Philco is involved in virtually everything that matters to people today. We are fast approaching $1 billion in annual sales to consumer, industrial and government markets. We design sophisticated equipment. All three are armature motors and data processing equipment. All three are modulated. We're growing—but not so fast that you'll feel lost in the shuffle—or wind up in dead-endsville—or be known by a number instead of a name.

Join Photocircuits, we promise you job satisfaction, Don gets a terrific kick out of changing the State-of-the-Art into the state of being. So will you.

PHILCO

Don had his pick of jobs but he chose Photocircuits. For a good reason. Today he's Manager of Corporate Planning and Systems... quite a responsibility for a guy in his mid-thirties. But Don can handle it. That's why Photocircuits picked him for this key management position. For Don, it's paid off handsomely. Besides enjoying plenty of personal fulfillment and job satisfaction, Don gets a tremendous kick out of changing the State-of-the-Art into the state of being. So will you.

Don Fischer (MIT '53, Harvard MBA '59) is manager of corporate planning and systems. He's in his mid-thirties. He works at Photocircuits.

Photocircuits Corporation, Glen Cove, New York. Phone (516) 676-9050

Ms. T. W. Harrington, Jr., head of the Placement Office, also commented on the peaceful and orderly execution of the demonstration, but said on behalf of the administration: "Any hostile employer of MIT graduates should be allowed to conduct interviews in a business-like manner."

Don Fischer, if you're a Ch. E., EE, Chemical, or M.C.E., come to the National Technical Meet with Bachelor, Master or Doctorate degree, see us.

Letters to The Tech

To the Editor:

As a fellow graduate student, and an outside observer to the current UAP election, I must agree that it was indeed disheartening to watch the method of reporting which The Tech used in its article purporting to show the positions of the UAP candidates. Particularly, in the case of Mr. George Phillies, you took phrases out of context and attributed to him comments that he did not make and does not believe. Mr. Phillies does have some positive suggestions which ought to be acted upon. Although I do not agree with all of his ideas, I believe they would be productive. Many people would like to see something different from what they would call "the status quo," rather than what your reporter said.

The Tech has a new monopoly on news about the campus, and should exercise great restraint in its presentation of the news. It must avoid slanting simply because it reports in an opinion-oriented, or political style or personal style of an individual. Anyways, last year's UAP election, the Tech was effective in making an opinion on the candidates. If the Tech had not so severely reported the candidates the editors did not favor.

The political opinions of the editors of The Tech may be reasonable, yet I don't feel that this paper is a true news source. I do not currently the information which might lead someone to form another opinion. George Phillies' positions are valid ones, and he deserves serious consideration.

Arthur T. Reny, Jr.

Letters to The Tech

To the Editor:

Just recently a trial program was instigated on campus at the expense of MIT. Just as recently I, a Walker patron, have noticed that the services have gone from the occasionally hovering spoon fail to the постоянно гребущие helping. It is somewhat more reassuring to constantly find the Students' surf shaking out the contents of the serving spoons and deliberately glopping of the extra portions from your plate because he thinks he gave you "too much." Whether this move by Buddhists is a conspiracy to starve people onto customaries, or to undermine the Therakam's capi- table incentives into the public environment, it is not known. As the program stands now, however, it represents an econo- mic waste of a limited amount of problematics, and the non-commons patron. The latter is now getting a spoon full of money and the food he formerly got is now being used for seconds, a program for which MIT is supposed to be footing the bill. As the non-commons patron has more or less already paid for this food, now Students come out charging with nearly two full portions.

In conclusion, I suggest to you that if regular portions were not so enormous, the students probably would not need to go back for seconds, thirds, and the second portions would be commoner and poorer would be unnecessary.

**One thing you can assume at this child's responsibility**

The quicker the better. And the time has never been better for fast individual growth. The demand for our products has never been higher (111 new products and product families introduced by our divisions last year). And company sponsored research and development amounts to over $11 million dollars yearly. We make it as easy as possible for the creative individual to assume responsibility and move up. (Freedom to follow ideas through, Minimum of red tape, Lots of technical support and cross-beratiliazed ideas.) And we have many young associates to prove it.

Each one of the 13 operating divisions functions autonomously, enabling each one to concentrate on its own product development and research. We've found it to conflict usually found in large centralized corporations in which many products—and men—compete for management attention and action.

Openings in most locations for all degrees: market research, design and industrial engineering, sales management, marketing, chemistry, field sales, production engineering, accounting, systems engineering, finance, manufacturing engineering.

Our representative will be on your campus soon to give you all the details about openings with any one of these 13 operating divisions across the country:

- **Semiconductor Division, Mountain View, California 90404, (415) 962-2011**
- **Automotive-semiconductor test systems: digital multimeters; curve tracers; bench model semiconductor test and measurement equipment; solid state amplifiers.**
- **Controls Division, Hicksville, New York 11745, (516) WE 5-0020**
- **Potentiometers; pressure sensors; solid state relays; solid state pressure transducers; dye lasers; accelerometers.**
- **Space & Defense Systems Division, Syracuse, New York 13201, (315) WE 1-6000**
- **Photographic and electronic imaging systems for aerospace reconnaissance; electro-optical image mapping; closed circuit television; counter-measures; fusing, programming; timing, safety and arming devices; precision optical systems; basic knowledge in photographic chemistry; aerospace environmental testing.**
- **Graphic Equipment Division, Plainview, New York 118011, (410) WE 5-0000**
- **Web perforating offset presses; electronic color separation equipment.**
- **Teletypewriter Systems for automatic teleprinting and teletype machines.**
- **Cable Division, Joplin, Missouri 64801, (417) MA 3-1776**
- **Multiconductor cables; wire harnesses; junctions, box breaks and terminations.**
- **Industrial Products Division, Plainview, New York 11801, (410) WE 5-0000**
- **Beam sound film projectors for teaching, training and display.**
- **Multiconductor test systems for aerospace reconnaissance.**
- **Teletype and teletypewriter systems.**
- **Cable Division, Joplin, Missouri 64801, (417) MA 3-1776**
- **Laminates for television and computer data transmission equipment, and high-speed computer systems.**
- **Selenium diode amplifiers; memory storage units.**
- **Industrial Products Division, Plainview, New York 11801, (410) WE 5-0000**
- **Beam sound film projectors for teaching, training and display.**
- **Multiconductor test systems for aerospace reconnaissance.**
- **Teletype and teletypewriter systems.**
- **Cable Division, Joplin, Missouri 64801, (417) MA 3-1776**
- **Laminates for television and computer data transmission equipment, and high-speed computer systems.**

**MCPSA intern program stressed**

(Continued from Page 2)

The government officials, they need to be aware of opportunities available in the government internship program. These discussions also tried to indicate to those unfamiliar with this program what has been accomplished in the older, established programs of Smith and Simmons.

After dinner, William Horwo Kelby, the director of College Relations for the State Department, stressed the "State Department's Internship Seminar Programs." In contrast to the earlier discussion, which centered on government employment opportunities on the state level, he emphasized the internship openings in Washington.

140 apply

Although there were over 140 applications for internships in the State Department this year, there are a limited number of jobs available because of the selective process used by the department. For this program, it tends to "differentiate between summer employment and junior internships." Kelby stressed that an attempt is made to assure that those interested in government work will be exposed to the workings of government, rather than serve as an errand boy.

The first seminar to be held by the MCPSA will be given by Senator Edward Kennedy Wednesday, March 15 at Boston University. Because space limitations, only ten people will be able to attend the seminar.

Those interested in the program should contact MTP's representative, Peter Boudreau, Department of Political Science, Prof. John A. Simmons, Dept. of Political Science, Henry Ftilrill, Jr.'s, 1st, of the Placement Office, 6th floor, MTP.

**College Graduates...**

**protect your earning power**

Here you are at the start of your career. But think a minute... All your education and training may have led you to believe you should suffer a disabling illness or accident and can't work.

What is the MCPSA? A New York Life Disability Income Program that provides a monthly income to help keep you going... help replace your loss of income.

**Timing is Key**

...because the amount of income you receive will be less than you expected. . . and less than you expected... and less than you expected...

**Contact us today**

You and I will talk about it. Don't forget.

An Equal Opportunity Employer (ME)
By Ray Hagstrom

Saturday evening, The Chamber Symphony of Philadelphia per-
formed in Kresge Auditorium un-
der the auspices of the MIT Music Society. The program presented
a variety of material — the Con-
mato in D major by Brahms, the Sym-
phony in D major by Luigi Cher-
ubini, and the Serenade No. 1 in D
major by Brahms. This well-
reputed orchestra gave a perform-
ance which was up to the expecta-
tions of all but the most critical
listeners. It cannot be denied that one of
the violin players misunderstood
during the performance of the
Stravinsky Concerto, or that
the tone of a few wind parts broke
from in D major for Strings Or-
chestra by Stravinsky, the Syn-
phony i D rrjor b L g Ch-

The first piece on the program
was the Stravinsky. The Concer-
to in D is one of his most melodic
compositions. The performance
and rendition were both fairly per-
fect. This is not to condemn
the orchestra or the conductor by
any means, but their first effort
was the least impressive of the
evening. The addition of the wind
instruments and stimulation of the
strings produced a beautiful per-
formance of well-interpreted ver-

A FISTFUL OF DOLLARS was the least impressive of the
2:15, 6:00, 9:50 evening. The addition of the wind
instruments and stimulation of the
strings produced a beaut per-
formance of well-interpreted ver.

LONELY ARE THE BRAVE
Starring Kirk Douglas
Starring Kirk Douglas

A HARD DAY'S NIGHT ~ Brusilow was exploiting all of
Brahms' romanticism to deliver a
rendition having superb, dynamic
control and excellent phrasing.

Of course there were many per-

Swimmers trounce HC; win nine events in rout

By Rich Brown

Colby College defeated the MIT 83-77, in a dual meet at Colby this past weekend. Colby is one of the better teams in the ECN, and Coach Bill Meehan said the Tech rosters were better than they have all season. Tech won the countrystyle, as they demonstrated their depth in the 8-3 decision over John Diadola, 3-1. Abranovic. In the unlimited class, Coach Bill Meehan accounted for the other 12, WPI 23-16. Only three straight pins were scored in the 23-16 dual, but all three were by MIT's varsity basketball team.

The Tech fencers started off very well, winning three of the first four bouts. By losing the last five, the Techs fell that day. However, the Techs went on to post a season-record 8-2.

Winners included:

- Tech fencers started off very well, winning three of the first four bouts. By losing the last five, the Techs fell that day. However, the Techs went on to post a season-record 8-2.

- Tech fencers started off very well, winning three of the first four bouts. By losing the last five, the Techs fell that day. However, the Techs went on to post a season-record 8-2.
