Rogers report cites political implications

By Lee Giguere

The report of the Rogers Panel on the Vietnam Moratorium and the MIT Community which was released last Friday recognized that the November Actions were political in their nature and that they were unusual in their importance and novelty. It further pointed out that "for many, if not all, of those in the MIT community who participated, the chief springs of action were strongly held views of a political kind." Furthermore, "they are without precedent, either as to scale or to kind, at MIT."

In its efforts to determine what sort of disciplinary actions to recommend to the Institute, the report considered the historical nature of the disciplinary procedure at MIT. The report said that the present disciplinary machinery "to serve and limit members of the faculty and staff who have administered that machinery." The panel's report begins with a summary of the week's events and its own interpretation of them and their political implications. The views cited are: opposition to war, opposition to military research at MIT, and a desire for "fundamental and extensive changes" in society. The panel also concluded that "only a small fraction of the MIT community was involved."

The panel concluded members of the community for their efforts to avoid violence during the week. It did, however, feel that the events of the week had "two important historical implications:

- They were the first efforts to avoid violence during the week and their potential for individual violence, and
- The major role played by persons outside the MIT community."

The panel, in the next part of the report, says that a re-examination of disciplinary machinery take place at part as a "final examination of the policies and goals of the university. This is to be expected to define its general goals and to state further the procedures of the university. Finally, the university is expected to consider in detail the context in which each challenges to its operations occur, to consider the content of any dissent which is associated with such challenges, and to state further its policies of the university."

Rights and responsibilities

The Panel follows this with a statement of rights and responsibilities in the MIT community. The panel feels that all members of the university participate, in some form and at some level, in the development of procedures for the university. The univers is expected to define its general goals and to state further the appropriate policies as above.

The panel acknowledged the rights of the community to express their political views as long as they respect the rights of others. The panel also called upon the Institute to respect the right of the community to express their views. In terms of specific disciplinary actions, the panel recommended that the "first line of action" be a seminar to explore the issues. The panel also called upon the Institute to respect the right of the community to express their views. two others. Five of the 19 men left in the last year. Two of these went to other jobs, two simply left work and weren't seen again (not too rare), and one left during his probationary period. None of the 19 were fired.

Members of MITSDS stated that they had talked to a worker (who asked to remain anonymous) who stated that 28 men left under Ciulla during one month, with a total of between thirty and fifty leaving during his entire tenure.

MITSDS question No. 2: Is it true that under the threat of being fired by Doan, many workers took the option of quitting with recommendations? The administration said that this was done to one man who was still in his probationary period. It was his first job, and they offered him this option in order that he not have a big blot on his record.

MITSDS question No. 3: Has the average workload of the maintenance workers increased since Ciulla was made a supervisor? The administration answered that the average load had not increased. Some workers' loads have increased recently because it was found that some workers were working twice as hard as others. More work was piled on the lightly loaded men.

Make a New Year's Revolution.

1970 just could be the year of the Great Emancipation. Yours.
> It could mean the difference between another do-nothing summer at the beach. Or the chance to do something you really want.
> Take the Bastille in Paris. Go over the wall in Berlin.
> Declare your independence in Limerick or London or Lisbon.
> You call the shots.
> Have a man-to-man talk with your parents now. And tell them what you really want for Christmas.

Tell them how easy it all could be. And how important it is to you.

Quote Robespierre. Quote Shakespeare. And if they say they can't afford it, quote a Pan Am Travel Agent. (Call him, or us at 482-6910.) We can give you budget fares and bargain tours and pay-later plans and all the ammunition you'll ever need to bring the Establishment around to the airport.

Pan Am makes the going great.
10 things America's new small cars won't talk about.

Nova talks about things those new little cars prefer not to mention. For instance, (1) a cargo-guard luggage compartment; (2) an extra set of fenders inside the fenders; (3) flush and dry rocker panels that help prevent rust and corrosion; (4) a quality built Body by Fisher; (5) Magic-Mirror acrylic lacquer finish; (6) a firm, steady ride programmed by computer-selected springs; (7) six different engines and five transmissions available; (8) an available lighting group that even includes a monitor for your windshield wiper fluid; (9) radios you can order, and take two NoDoz. It'll help you drive home without talking. Nova does.

Nova also has a very appealing price. And a lot of loyal friends, Wonder why.

Putting you first, keeps us first.

Nova: America's not-too-small car

"I know the way home with my eyes closed."

Then you know the way too well. Because driving an old familiar route can make you drowsy, even if you've had plenty of sleep.

If that happens on your way home for Christmas, pull over, take a break and take two NoDoz. If it's help you drive home with your eyes open.

NoDoz. No car should be without it.

Johnston sees support fade

(Continued from page 1)

ment, insisted that MIT has a historical responsibility for the labs that would be betrayed by a premature divestment. Reminding the faculty that the labs constituted a "national resource," he insisted that the institution could not discharge its duty lightly.

Another member, Professor Peter Elias, noted that solutions to the war research problem are difficult and complex. Putting possible remedies on a three to five year time scale, he emphasized that finding sufficient funds for the large-scale projects envisioned could not succeed overnight.

Three sound arguments for retaining the special labs in some form also developed. One was financial. Comptroller Paul Canick revealed that the labs annually contribute seven million dollars toward reducing MIT's overhead. Funds granted to the labs include a calculated amount to pay for salaries, maintenance, etc. With the L-labs separated from the Institute, this large source of revenue would be lost.

Educational value.

Second, several people emphasized the educational and research values of the lab. Lab administrators have made a special effort over the past months to involve more students in their off-campus projects. Finally Frank Brown emphasized that MIT professors cannot avoid contributing to weaponry as long as they remain active in teaching and publishing. Therefore, "To maintain contact with the results of your teaching and research, I urge you to work closely with the special labs."

INFORMATION TECHNOLOGY

Full or Part Time Employees Desired

*PROGRAMMERS
*SYSTEMS ANALYSTS
*SYSTEMS DESIGNERS

Our computer based consulting group needs:

1) people interested in doing applications programming for commercial clients;
2) programmers familiar with software systems;
3) systems analysts and programmers.

As the recently-released report of the panel which considered internal discipline action related to the November Actions has pointed out, the existence of such machinery for determining and protecting the rights and responsibilities of members of the MIT community is important. In the light of both the sort of situations it has recently faced and is likely to face.

As the year wears on, it will probably be necessary to draw firmly lines which have been hazy in the past. This is a process which the community must take part in. In the past there has been a tendency on the part of the community to avoid having to face these issues, accompanied by a tendency to criticize the apparatus set up by default to control these situations. This will no longer do.

Some of the questions on which MIT must reach some sort of consensus include: Who composes the community? What are the rights and responsibilities of members of the MIT community? What rules and procedures should guide the exercise of these rights? What actions should be taken against those who violate the rights of others?

These issues must be resolved by everyone, or else the relationship offaito de facto by the acts of those at whose desk the buck stops.

The debate on the MIRV/Conversion Specials issue has moved into a new phase during the last week or two. We include a box cold to cold — from a war of actions and speeches to a war of papers and words.

The myriad committees formed this week by the various November Actions have begun to file their reports, or the reports of their subcommittees. And along with the final Pounds Panel report, which paper grows ever thicker, there are a few observations to be made about the effect of MIT's policy and planning.

That is to say, there probably won't be much effect. In those cases where the report conflicts with administration policies this columnist thinks it will be more rather than less ignored. Those reports which will be either agreed with the policy or be blithely ignored. This is because it seems clear from the reactions of the administration to current reports.

The Pounds Panel report mad references to the point in which, at the behest of Howard Johnson and without too much real consideration by the common group, a report was accepted on a trial basis for the balance of the year. But, as the story of the actual deliberations of the Pounds Panel becomes clearer it is evident that that group's recom-

**Announcements.**

* All students should obtain an examination schedule at the Course Catalog Office, Room 7-111. Examinations not listed or a conflict in examinations must be reported to the Schedules Office by Wednesday, December 31, 1970.

* The first transcripts of the MIT Commission on Student楞mers are now available in the lobby of the Student Center.

* All MIT undergraduates are eligible to apply for the Minority Research Fellowship. Further information is available in room 5-319. The fellowship will publish details soon.

* The Department of Metallurgy and Materials Science will offer a course in Techniques in Metal Stamping (1.19, 6.43) next term. Interested students should contact Mr. Tony Zara, x5397, room 4-133.

* Copies of Urban Action magazine are available in room W20437, the Urban Action Office in the Student Center.

* Daffodils, tulips, etc. - Help plant them at 10 am Sunday in front of the Student Center.

**VOLUNTEERS WORK IN THE COMMUNITY**

(Continued from page 1)

The MIT Vietnam Moratorium Committee, which meets every Monday at 7 pm in the East Lounge of the Student Center, has also planned a continuation of the community project in which they participated on November 14. The project involves working at the Urban Redevelopment site in the South End. This project falls under Low Cost Housing, Inc., a non-profit organization which renovates and rebuilds dilapidated housing. By using volunteer labor in part, this organization is able to build housing at 35% of the cost normally required.

According to Schaeffer, the reason for making this project a part of the December Moratorium events is that it will emphasize the beneficial work that could be done if less money were spent in Vietnam and more were spent to promote such useful projects.

A minimum of 300 members of the MIT community will be needed for the canvassing and the community project. One hundred Simmons and Wellesley students are also expected to participate.

Canvassers will meet in the East Lounge of the Student Center on Friday, December 12, between 4 and 7:30 pm, and on Saturday, December 13, between 9 am and 2 pm. Groups will also leave the Student Center between 9 am and 12 noon on December 13 to go to the Urban Redevelopment site.

Swimmers win one, tie one

by Mike Chrzanowski

The varsity swimming team soundly defeated their varsity counterparts from RPI last Saturday. With three events left, the Engineers already had the victory clinched. The final score was 56-39; a substantial margin, even though Tech did not use its best swimmers as often as it could have. On Tuesday Tech could manage only a tie against U-Con.

The Tech squad looked very strong against RPI. Excellent times were turned in by several swimmers. Junior Alan Graham swam the 200 yd. freestyle in 1:54.4. This is comparable to the time Lee Dilley was turning in this time last year. Lee went on to win the New England 500 yd. freestyle championship. Graham also turned in an excellent 2:15.7 in the 200 yd. backstroke. In the 200 yd. IM, captain Jim Rosenthal '70 turned in a 2:15.5 to take a first place. Bronzehaufer also took first in the 200 yd. butterfly.

One very promising new addition to the team this year is sophomore Pete Sanders. He won the 50 yd. freestyle in 23.0 and the 100 yd. freestyle in 52.0. In the diving, Jen Heiness '70 seems to be doing as well as ever. He failed to find any serious competition in the first meet of the year.

This year's freshman team also looks very promising. Last Wednesday they defeated tough Phillips Exeter 46-47. The meet's outstanding swimmer was Ed Karatzanis who swam the 200 yd. freestyle in 1:55.0 and the 100 yd. freestyle in 47:20.9. This is the first time the freshmen have beaten Exeter since the 1966 season.

On Tuesday both the freshmen and the varsity met always tough UC-Ann. Although the freshmen had some good efforts, they lost 71-30. First places were taken by Doris Pau in the 1 meter diving and by Bob Pastor in the 500 yd. freestyle.

The varsity fared better although no one was pleased with the final result. Tech was far behind for the first two-thirds of the meet. But after taking first and second in the 500 yd. freestyle, the 200 yd. breast stroke, and the 3 meter diving, Tech was leading 52-45 with only the final relay left. The relay was the most exciting event of the evening with the final times differing only three tenths of a second. However, Tech lost and the meet ended in a tie 52-52.

Several outstanding performances were turned by Graham, who took firsts in the 200 yd. freestyle and the 100 yd. freestyle, by Dave James '71 and Larry Markel '71, who took first and second respectively in the 500 yd. freestyle and by Sanders and Lawrence who took first and second in the 200 yd. breaststroke. The diving was spectacular with Heiness picking up first in the one meter and the three meter diving, and Charlie Gronauet '72 taking second in those events.

IMMEDIATE VENTURE CAPITAL AVAILABLE for new businesses

We are looking for graduate students who have sound ideas for new products or services as well as the capabilities to head up as principals new organizations to see projects culminated.

Reply only in writing, submitting detail plans. Do not include confidential information.

As carefree as a shirt can be!

- Arrow -
Decton Perma-Iron

This easy-care favorite can be popped into the washing machine time after time, and tumble dried to a wrinkle-free finish. The luxurious fabric of 65% Dacron polyester, 35% cotton, need never go near an iron. To be any more carefree a shirt would practically have to launder itself! "Sanforized-Plus-2" labeled for lasting fit. Available in today's most-wanted collar styles. Long sleeves $7.50

*DuPont R.T.M.

From Arrow, the white shirt company.

Benchwarmer

By Jay Zager

This year's Intramural Council has been thrown a hot potato by IM hockey manager Joel Bergman; and before they get rid of it, intramural sports on campus may have a new outlook. The question is eligibility and the standing rule that any athlete out for an intercollegiate sport may not participate in any IM sport during the season with few exceptions. Bergman's proposal would allow an athlete to compete in every IM sport with the exception of the IM sport corresponding to that athlete's varsity sport (e.g. baseball to softball). Such was the significance of last Tuesday's meeting that MIT Athletic Director J. Ross Smith made a rare visit to the council in order to present the athletic department's view on the subject. Prof. Smith warned that such a motion would have a marked downward effect on intercollegiate sports at MIT and would tend to turn the first class IM participant into a second class IM player.

The council recognized four available alternative solutions. One would keep the eligibility rule as it now stands. Two columnists, having previously declared himself opposed to the new motion, and urges varsity athletes to vote with an intent to put the four proposals to a questionnaire to shift the burden of decision to the individual coach, who would be given the choice of limiting his athletes in IM participation. A second proposal, made by Bergman, would open IM sports to virtually every athlete on campus. In addition, two compromise plans were offered. The first would give the Executive Committee of the Council the right to expand on those IM sports for which there is no restriction as to participation. As of now, only two IM sports, bowling and table tennis, have no eligibility rules. The last proposal would shift the burden of decision to the individual coach, who would be given the choice of limiting his athletes in IM participation.

IM Council President Bob Dreiser stands in favor of replacing the current eligibility rules in favor of the Bergman motion. He agrees, however, that doing this would put considerable pressure within the individual houses on the so-called "jocks" on campus to play IM sports. This is the same Bob Dreiser who stood violently opposed to the IM point system on the grounds that it put too much pressure on the same jocks. There seems to be a lack of continuity in Bob's reasoning.

After much debate, the council voted to table the motion with an intent to put the four proposals to a questionnaire. The poll will be run by Ben Wilson, a current Varsity Club, of which every varsity athlete is a member. This columnists, having previously declared himself opposed to the IM point system and in agreement with Bob Dreiser, stands opposed to the new motion, and urges varsity athletes to vote to keep the eligibility rule as it now stands.

Basketball is a two phased game—it's OK to play a spirited offensive game and score 80 points, provided you remember to play defense so your opponent doesn't score 94. Such was the case last Tuesday in the Cage as Brandeis turned back the varsity five for the second straight year. Except for the unbelievable outside shooting of Bruce Wheeler '71 and Minot Cleveland '71, who combined for 53 points, MIT would have been blown off the court.

Remember Ben Wilson, 38 point man against Brooklyn College with 20 in the first half? He had three points at half time and took only one shot. Or Hal Browne, with 17 of 18 BC points in the first half? He shot one for two in the first half against Brandeis with no foul shots. On defense, the Tech forwards were unable to cope with the hot shooting of the Judges' big men. Senior Tom August scored 20 points in that half to give the visitors a 42-31 half-time lead.

Coach Jack Barry, trying to shake up his troops, decided to start the game with senior Nick Mumford in place of Junior Rich Koster at forward. But when Lefebvre was announced as a starter, he had to wait for a whistle to make the substitution. It didn't matter to the Judges as they rolled up a quick 8-0 lead, and only the accurate shooting of Wheeler and Cleveland kept the score as close as it was in the first half.

Brandeis remembered to score the first eight points of the second half, too, as they increased the lead to 50-31. The teams traded four baskets, and then the Engineers made their belated move. Brown regained his scoring touch as he combined with Wheels to score eight straight. That cut the margin to 58-47 with 10:38 to go. But the streak was shortlived, and the lead never dropped below double figures. A second belated rally with five minutes to go cut the margin to 10, but that was as close as MIT would be that night. At the buzzer the lead had crept back to fourteen at 94-80.

The game left the Engineers with a 1-2 record and a weekend home game against Trinity on Saturday.

No socket to it.

If you were always near a socket that housed a blade, that would be one thing.

But you aren't.

You walk by the place.

So you need a shaver that goes where the shaving action is.

A shaver like the brand-new battery-operated Norelco Cordless 20B.

With floating heads that fit the curves of your face.

And self-sharpening blades inside those floating heads that shave as close and smooth every day. The Norelco unique rotary action keeps the blades sharp while it's taking off whiskers. Every time you shave.

The Norelco Cordless gives you close shaves all day. Up to 30 days of shaving on only 4 penlight batteries.

Handsome, smartly styled in jet black and chrome, there's even a mirror inside the can. So you can see what you're shaving.

It's small enough to fit your pocket. Very self-sufficient. Even ready to go right out of the box.

Even on a beard as yours.

Brandeis thwarts cagers

University of Connecticut attacker controls the puck in the Tech zone. UConn went on to trounce the pucksters 9-1.

By John Kavanajian

The hockey team was outplayed, outshot, and outscored on Tuesday as a powerful UConn team handed them their worst loss of the season 9-1. Bill Wheel was a virtual no show in place of Junior Rich Koster at forward. But when Lefebvre was announced as a starter, he had to wait for a whistle to make the substitution. It didn't matter to the Judges as they rolled up a quick 8-0 lead, and only the accurate shooting of Wheeler and Cleveland kept the score as close as it was in the first half.

The UConn squad moved amazingly fast on the slow MIT ice, made even slower by the rain the day before. Early in the game, the Tech squad was able to keep up with them, though, and narrowly missed a couple of fair scoring chances. But as the game moved on, UConn increased its domination. Moving the puck without difficulty, even with a man in the penalty box, they appeared to move at will around the net and the Tech end of the ice. In the first period alone UConn put in five goals, one when they were a man down.

In the second period, the Engineers could fare no better.

The visitors poked after shot on Tech goalie Ken Lord '71 from center ice, the blue line, and seemingly every spot on the ice. Due to some good goaltending, only four of the over twenty shots scored. Most of those were screen shots, shots that goalie Lord did not even see.

The UConn routs skaters 9-1; record now 1-2
