UCS sets up March 4 to focus on arms race

By Joe Kastel

MIT's Undergraduate Concerned Scientists (UCS) will sponsor a series of symposia March 4th with the goal to address issues raised by last year's work stoppage on March 4, 1969.

UCS spokesmen emphasized, however, that this year's program will not be billed as a work stoppage. Although they will make vigorous efforts to ensure a large turnout for the day's events, no attempt will be made to call a strike.

Leo Sartori, Professor of Physics, said that this year's program will center around the world armaments race and factors affecting it. Speakers will concentrate on issues such as the upcoming flight against the extension of the Strategic Arms Limitation Treaty (SALT), the Threatened Nuclear Arms Race, the Strategic Arms Limitation Target (SALT), the Threatened Nuclear Arms Race, the March 3rd symposium which will be held at Sanders Theatre, Harvard, at 8 pm. Kick-off speakers will be Theodore Wiesner, President, formerly of the Massachusetts Institute of Technology, and Michael Har-...

Faculty gets calendar plan

Proposal would offer month for independent study; exam conflict seen

By Alex Makowski

Wednesday's faculty meeting saw the presentation of an academic calendar featuring a one-month independent study period. At the present time, 74 professors showed up for the monthly meeting, no vote could be taken, but the consensus of the group was rather favorable.

Skepticism of the proposal, plus input on the idea from students and departments, as well as with the present meeting. Should the faculty approve the calendar, it could be initiated next term.

The proposal resulted from several months of work by the Ad Hoc Committee on the Calendar. Chaired by Professor James Munkres, who presented the plan on the floor, the ad hoc group and the Committee on Educational Policy narrowed down a list of many ideas to the three offered today. Of the three present calendar, 2) a modification of the present calendar with three four-weekend sessions, first term classes ending in December, second term classes concluding by May, and 3) a first term extending from September through December, a month of independent study in January, and a second term from February through May?

Finally create problems

Time constraints, however, have forced an important pre- condition to the adoption of the third proposal. The four weeks for independent study could not be scheduled in the present September to May school year; the nation have been active in a number of fields since last year, this year's symposium would give people a public opportunity to rededicate themselves to programs started last year. Similar programs will be held this year at the Chicago area universities and laboratories, Berkley, and the University of Washington at Seattle. About forty universities participated in last year's events.

The first symposium will be held at Sanders' Theatre, Har- ...

UCSacakings tickets seen fusing

By Duff McRoberts and Harvey Baker

Late yesterday afternoon, Paul Johnston '70, president of Burton House and candidate for UCS, announced that he and his fellow candidates, Taylor Thompson, a Brun- ton freshman, whether or not Dresser or Johnston will get togethet depends on many factors, among them the outcome of last night's RFC election, which was still unknown at press time.

The question of who would run for UCS and who for UAP, he emphasized, had not yet been decided.

Previously, at the meeting, Professor Kenneth Hoffman, chairman of the MIT Commission of Education, appeared that group's work. Concentrating on the Commission's efforts to make community involvement, he emphasized the need for the faculty task forces recently established to investigate ecology, governance, and programs and outgrowths of the Sartori explanation that while a number of candidates for UAP were present last month, they are even more uncertain today with no candidates seen for the ticket. While UCS is not calling for a work stoppage the creation of a plan, the possibility is highly controversial, it is believed that the result would be an uncertain one, but that an attempt would be made to consider a student vote.

Furthermore, Sartori contended that if UCS and affiliated groups throughout the nation have been active in a number of fields since last year, this year's symposium would give people a public opportunity to rededicate themselves to programs started last year. Similar programs will be held this year at the Chicago area universities and laboratories, Berkley, and the University of Washington at Seattle. About forty universities participated in last year's events.

GA group recommends revamped judicial code

By Lee Gigaere

The establishment of a dual judicial system, as prescribed by the Code of Rights and Responsibilities, was the main recommendation of the General Assembly's Judiciary Task Force.

The Task Force, however, did not feel capable of the creation of a new judicial system, and instead has developed a set of recommendations and presented them to the Judicial Working Group of the MIT Commission for its further study. One part of a student referendum, awaiting General Assembly approval, was also prepared by the Task Force, dealing with the judicial system in general. The Task Force is interested in the future issue of The Tech.

The Task Force initially attempted to set bounds on the scope of judicial system, des-...
Announcements.

- The MIT Socialist Club will meet Friday night in room 491 of the MIT Student Center at 8 pm. Derrick Menzies, National Executive Committee Member of the Young Socialist Alliance, will speak at the memorial meeting for Black Nationalist leader Malcolm X. The talk will be on "Malcolm X: His Legacy to the Black Struggle." The meeting is open to everyone and tapes of Malcolm X will be played. There will also be a display of literature and pamphlets available.

- UAP and dean office petitions can be picked up in W20-401 (Student Center-4th floor) anytime between nine and five. To place names on the ballot, they must be returned to that office by 5 pm, Friday, February 27. Nominations will then be proceeded for an election day. Everyone interested in helping to computerize the election should contact Dave McFalls (x3187) anytime day or night.

- People (i.e., students, faculty, staff, or other members of the MIT community) interested in organizing, helping, or speaking at the Ecology Teach-in at MIT should call Jon Abrahamson at x7565 or x3788. Help is needed immediately in finding speakers and lecturers on ecology and/or pollution for April 22.

- MIT Tech Dames will hold their Annual International Night at 8 pm Friday, February 26, in the Sala de Puerto Rico. Special features will include entertainment, booths displaying art, crafts, and food of 32 foreign countries (free samples of foreign cuisines), and a Japanese Tea Service Demonstration. Admission will be a small donation at the door. Everyone is welcome.

- Teach science in the Boston schools. "Boston School Volunteers" needs people to help elementary school teachers with their science curriculum. If you are interested, contact Tony in the Urban Action office, Student Center room 421, x2894 or x1740. Teach once a week for two hours.

- There will be a Hillel election brunch at 11 am Sunday, February 28, in room 10-101 (the Bush Room), to be followed by the election of officers at 11 am.

- There will be Rosa Luxembourg SDS meetings every Sunday night at 7:30 in the Baker Dining Hall.

- A Teach-in on the Middle East will be held at BU (Hayden Hall) February 25th at 7:30. Panel will include Norman Chomsky, Hellen Shankard, Leon Gilder, Zvi Katz, and Emmanuel A. Drexler. February 26th at 7:30, the program will include a Newsreel film and Peter Buch, Max Zaman, and Larry Lockwood. This is sponsored by the BU Students Union.

- Registration for English Conversation Classes for foreign wives at MIT will be held on Friday, February 26, from 10 am to 12 noon in the Emma Rogers Room (10-340). Sponsored by The Technology Matrons, Zylla, and Larry Lockwood. This is sponsored by the BU Students Union.

- The MIT Socialists will meet Friday night in room 491 of the MIT Student Center at 8 pm. Derrick Menzies, National Executive Committee Member of the Young Socialist Alliance, will speak at the memorial meeting for Black Nationalist leader Malcolm X. The talk will be on "Malcolm X: His Legacy to the Black Struggle." The meeting is open to everyone and tapes of Malcolm X will be played. There will also be a display of literature and pamphlets available.

There are three times when regular appointments are made: (1) Appointments as visiting professors seem to be controlled by the department chairman and are often unknown until they actually arrive: (1) when a professor leaves or retires, (2) when the department receives a special grant to hire one or more faculty members in a specific field, or (3) when the executive committee of the department determines that the department should add another member in a specific field. The executive committee usually bases its decision on the whole department's approval of specific recommendations contained in a report of a subcommittee or task force.

When one of these three occurs, the executive committee selects from two to six people to form a "search committee" to find, screen and recommend a candidate suitable for each appointment. Unlike the executive committee of the department, which is composed only of faculty, the visiting search committee may have junior professors on them and, perhaps soon, graduate students as well. The committee's work can vary from several months to several years. The executive committee acts upon their recommendations and decides whether or not to offer the position to the candidate that the visiting committee recommends. The committee usually follows the recommendations of the search committee. There are three times when appointments are not granted: (1) "permanent"-with tenure (at least 3 years) -without tenure and with the understanding that either (a) the contract will not be renewed or (b) the department has no intention of offering full-time tenure, and (c) "indefinite"-the ultimate tenure of the individual is left in doubt.

The Institute does have certain specific policies on the continuance of staff without tenure (from 2.22.)

There are (a) appointment as Professor carries tenure; tenure appointments will not be made in the ranks of Instructor, Assistant Professor, and Lecturer. (b) must be granted an Associate Professor with a total of seven or more years of service if he is continued after age 35. Continuation of a faculty employee after age 33 will be limited to the rank of Associate Professor, unless the faculty member has five years of service. (c) the head of each department must review annually with every member of the academic staff not on permanent appointments the individual's prospects for future permanent appointment at the Institute. Not later than December 1 of the last academic year in his term of appointment, each Assistant and Associate Professor must be officially notified as to whether or not he is to be recommended for tenure.

Important activities will be held the same day. Each of the panelists will give a presentation to MIT for the day and will participate in the seminars. In the morning, discussions will be held with MIT's campus media, after which panelists will eat lunch at various living groups. During the afternoon, no seminars will be held. The first of these will concern itself with the treatment of foreign policy in mass media. Tentatively, the second will deal with current political problems of exist-

I can't get no satisfaction... The pretense of force on judicial procedures made a good many relevant points and brought on some of the most obvious. Further, their reluctance to make concrete proposals is un-standable. Any proposal on disciplinary procedures would get one thrown into a lava pit of thermore, their reluctance to advocate is, no matter what troubles will go away. It don't mater to try and punish trials of Mike Albert and the defendants will be defend. The attention focused on the Discipline Committee is quite right when the con-

At any rate, there seems to be no reason to alter disciplinary apparatus for cases of cheating, plagiarism, etc. Political cases are another matter. We could try trial by ordeal if the defendants will be strapped into chairs in the music library and will listen to ten hours of Holo's recorded speeches through headphones, and if in the end, whoever is left, anyone staying awake must be punished by demons. In any case, we must institute procedures of trial by ordeal as in the Luddite Kuttab, MIT's at 2500 miles apart.

As a result of. Course. But no so much because of the pointless exercise of devising procedures for obtaining justice within a system considered unjust and illegitimate. The defendants. A viable university requires at least three concerns that the university is right in what it does; nothing works quite right when the con-

Perhaps the committee lacked concrete objectives and a sense of priorities. The perceptive of the people I have beenYou may have difficulty keeping up the flow of consciousness on the Discipline Committee, and many reasons have been put forward to question its usefulness. Even the recent disruptions at MIT, which have caused the effective-ness of the committee, should have considered some of the criticisms that have been levied. The MIT community, like any university, is a society with a particular and unique human organization, it must define certain rights and responsibilities of its members. In the first place, of course, we are all governed by the laws and the institutions they defend. The attention focused on the Discipline Committee is quite right when the con-

inconsistently in the judicial system itself. One important component in the dual system mentioned above, consists of an informal arbitration system and a formal adversary system. The informal system would center on an "operative medi-

ation group" composed of representatives of the faculty, students, and staff. The de-

defendant and plaintiff, and ad-

vocates of their choosing, would meet in private with the group to "establish the facts," and "attempt to reach a settlement.

Both parties would still have

next to the second part of the system, however. The second part of the system would be a formal ad- 

versary process, requiring the presence of qualified legal ad-

dvocates. If who would be drawn from a pool which would provide both prosecutors and counsel-

ors. The Task Force recom-

mended that the "trial" be presided over by a three- man tribunal composed of a faculty mem-

ber, a student, and a staff mem-

ber. Verdicts and sentences, however, would be determined by a jury composed, according to the group, either of five of the defendant's peers and four of the plaintiff's peers, or randomly selected members of the Institute community, subject to challenge by either of the litigants. Decisions would be rendered by a two-thirds major-

ity.

Other features of the systems include an appeal process and a neutral investigating group. This group would serve to discover the facts surrounding the case and present them to the Institute Court. The purpose of the refer-

endum is to provide additional input into the Judicial Working Group's deliberations. The refer-

endum attempt is made to determine what sort of structure students prefer for the system, and what sorts of protest and violence are considered acceptable.

Analysis

Judicial system needed

By Alex Makowski

The administration claims its October 28, 1969 actions, released its findings. December, the Rogers panel, one stood by reviewing events over judicial process. And unless resolve this case by its own conclusion, the same problems will recur.

Perhaps the extent of these problems could be best understood. by reviewing events over the past two months. Early in December, the Rogers panel, one of the two committees Johnson set up to review the November Actions, released its findings. While advising against judicial action for all but a select few incidents during November, it recommended special consideration of the GE demonstration October 28. The unusually high level violence, to use the panel's phrasing, necessitated this recommendation.

Dan Nyhart, Dean for Student Affairs, hoped to make the charges against four students identified as participants as close to the Rogers panel as possible. That was why, by wording the participation in a demonstration when it was, in fact, an act that was deemed appropriate, rather than a forthright accusation of committing violence.

But was any action necessary at all? The slow, old offense of violence have insisted that the pushing and resisting were the sole act. Albert, who was buried in the middle of the movement, was guilty of no more than pushing the student and the faculty guarding the door. It was guilty of no more than pushing the administration claims its action was not motivated by political considerations. Why, then, was this charge brought against Albert, while dozes of regular LSC viewers get off scot-free?

Now consider the role played by the Facility Discipline Committee. Remember that it acted in a period of high emotional tension. As Chairman Roy Lambertson's undoubtedly well-meaning attempt to open up the meeting backfires. He'll be the guy with the long white scarf.

We're a diversified company. A big one. Our sales will run more than half a billion dollars this year. We'll come from computer service, education systems, helicopters, farm equipment, space systems, all kinds of technical services.

Truth is, it would be comparatively easy. But we want somebody with more than a pat answer for everything. We need electrical engineers, physicists, mathematicians and systems analysts who can think creatively and speak their minds. People who can think logically about solving communications, radar or information systems problems for the defense of the free world.

Get in touch with us. A robot couldn't do the job we have in mind.

If we want a robot who answers "yes" all the time, we'll build one.
Satisfy your ambitions at Southern California Edison.

We specialize in power.
What we need are people to help us generate, transmit and distribute it.
Come live and work with us in Southern California.

Aside from the fact that Southern California is the advanced technology capital of the world, you'll enjoy great weather and unlimited outlets for sports and entertainment.

And opportunities to grow with Edison.

In the next eight years, we must double our generating capacity to meet the growing demands of Southern and Central California.
Our plans call for investing more than a billion dollars in plants and equipment — every three years.
Plus we're deeply involved with nuclear power:
We completed construction — in 1967 — of the nation's first non-military nuclear-fueled generating plant of its type to produce electricity on a commercial basis.

Last year we completed the San Onofre nuclear generating station, one of the largest in the U.S.

Additional facilities are in the planning stages.
We're also active in EHV transmission, both A.C. and D.C.
We're looking even further ahead to direct conversion methods:
Fuel Cells, Thermonics, Thermo-electrics, Magnetohydrodynamics.

That's why we need talent.
And we're willing to pay to get it.

Good pay, plus excellent opportunities for advancement into management.
Also, we'll pick up the bills for employees working toward an advanced degree.

Interested? Check with your placement office.
Or write: Personnel Recruitment Administrator, Southern California Edison Company, P.O. Box 351, Los Angeles, California 90053.
Or phone collect: (213) 624-7111.

Southern California Edison
An Equal Opportunity Employer

By Bruce Schwartz

About 30 people attended an organizational meeting of the MIT Student Mobilization Committee Wednesday night in the Student Center. The meeting, chaired by Stu Singer '71, had been called to revive SMC here in order to build toward the massive antiwar demonstrations planned by national SMC for April 15.

Those demonstrations, which are planned for virtually every major city and many other places, were decided upon at an SMC national conference in Cleveland last weekend, which was attended by over 4000 delegates.

Discussion at the Wednesday night meeting centered around building support and enthusiasm for the protests, and setting up publicity to attract participants to the National Anti-Vietnamization New England Conference set for MIT the weekend of February 27-29. Virtually every antiwar group in New England will be represented, Singer said, including SMC and New Mobe.

The aim of SMC at the moment, he continued, was to make the April 15 demonstrations the biggest in U.S. history. But several people expressed skepticism, citing the 'Vietnamization' program as an example that the war isn't ending but that President Nixon has managed to convince many people that it is. They questioned whether further October 15-style demonstrations could move the President.

Many expressed visible frustration with the course of events, and some favored more radical activities.

'Some radical activities' was the topic when the meeting began at 7:30 pm, as 3 representatives of TDA showed up to inform people of the group's plans. They said 'group discipline' would be informal, and they contemplated no violent behavior. For the police expected to be on hand, Singer said, police 'could not expect to be like the police here in Southern California.'

Another topic was the plan to move the President.

Singer argued with one member of the group that such a move would probably lead to confrontation with the police, and that it was 'not in the movement's interest since the police have all the weapons and, further, the violence requires some form of moderate support. SMC's strategy for ending the war has been to remain one of building in a broad base as possible for massive demonstrations.

The TDA representatives responded that 'the war hasn't ended,' but Singer rejected that by claiming Lyndon Johnson's decision not to run for re-election and to end the bombing of North Vietnam conformed partial victory for the movement. He speculated that without the antiwar demonstrations 'we might have put 2 million men into Vietnam and just wiped it out.'

MIT-SCM plans at the moment only to build awareness of the forthcoming demonstrations through leafleting and similar activities. A booth will be set up in Building 10 next week to distribute literature. In addition, SCM will probably act in concert with MITSDS when that group pickets the administration building on March 4th; and they will try to inject discussion of April 15 into the programs presented by the Union of Concerned Scientists on the same date.

SWing a Little!

Open A Can Of Wine Tonight!

That's right. We canned the most luscious California wine grapes grown because they make the most flavorful and abundant wines.

Just pop top and pour. All aluminum can chills quickly. Great for one or two glasses. But most of all, we used the most luscious California wine grapes grown because in Party Time Wine, taste is where it's at.

NOW AT YOUR LOCAL SUPERMARKET, PACKAGE OR WINE STORE.

Students meet to plan Nader-type research

By Lee Giguere

Socially-conscious research is the aim of a group of students who are organizing themselves to gather information for use by people in need of technical advice.

Most of the students, especially the undergraduates, will be doing library research in an effort to gather already published data and collect it into useful forms.

Individual students will be responsible for the use to which their work will be put. Don Lombardi of the Education Research Center, who is serving as coordinator, explained that the group will not act as an information bank, but instead will try to bring together "the people at M.I.T. who know or would like to find out about" certain technical problems, and people outside M.I.T. who need information to help them write laws, initiate reforms, and use as testimony in hearings.

Politics of change

Lombardi hopes this project will get the students to think hard about the politics of change. The group's formation was inspired by Nader's Raiders, a deeply committed radical group of students who worked for Ralph Nader over the summer to provide him with information for his work on behalf of consumer rights. Bob Tinker, who had met several of these students during the summer, played an important part in setting up the group at MIT. A meeting held February 11 seemed to bring together people at M.I.T. who are interested in doing this sort of research.

Counterbalance Lobbyists

Lombardi, noting that most state legislators do not have much staff assistance, hoped that a "group of concerned people at MIT who are competent could provide independent research," which would counterbalance the influence of the lobbyists on whom most legislation now depends for their information.

While he feels that the most obvious way to put information to use is through legislators, Lombardi emphasized that each researcher will have to decide on the most effective way to get the kind of reform he wants accomplished.

ANALYSIS...

(Continued from page 6)

used to form the list of those taken to court. At least one hundred people spent lengthy periods of time in Johnson's office, yet only 30 names were presented to the county judge. Wouldn't it have been better to have these criteria decided on by representatives of the whole community, rather than a high-level group of Institute lawyers and administrators?

Unless corrective action is taken now, there will be more problems when the students involved in the takeover are brought before the Discipline Committee.

MIT must adjust its judicial procedures to keep pace with the changing attitudes of both students and faculty. The present structure, a holdover from the pre-censorship period, is all but incapable of fairly dealing with cases involving political issues. The MIT community must arrive at a new judicial code, then develop a judicial system to administer justice.

As for Mike Albert, there seems to be little that can be done. There is no doubt that Albert is a threat to MIT (he has said so himself), but those procedures used to expel him may prove just as large a threat. In any case, the police, by harassing and polarizing faculty attitudes, has put itself out the possibility of convincing the faculty of the need for a retreat. Hopefully, the faculty will rapidly approve a new judicial system, and the old procedures will not have to be used again, for cases involving political issues.
Markel, Graham lead swimmers past Brown

By Dennis Duber
Last week, the gymnastics squad moved closer to a possible New England championship by outperforming two more schools to record their win over 5-1. Last Saturday they scored 118-121 and then on Wednesday they dowed Boston 116-110.

Against Boston the only event which the team did not win was the high bar. In floor exercises, Dave Beck '72 grabbed first place with Dan Bocek '72 and Raysh Dobb close behind with excellent routines. Larry Wilson '72 pulled the team out of a temporary slump on side horse with a spectacular 9.05 score. Tech swept the rings with Tom Hafer '70, Dick Hood '70, and Larry Leffler, and Bos Paster.

Gymnasts win two more

Three Tech gymnasts, Beck, Hafer, and Hood, have already qualified for NCAA championships. A fourth man, Ken Gerber, is expected to qualify in the near future.

Captain Dick Hood '70 performs against Boston State which Tech swept 116-110. Tech's closest approach on the high bar in recent meet won 116-110.

MIT to host Yale

A week from tomorrow, Tech will host Yale in the Armory. Yale is Tech's biggest competitor and the meet promises to be the most exciting of the season. Yale beat Tech last year, but the team is ready for the Elis this year.

MIT loses to BU in first round of Colonial

By Deon Arkin
The MIT basketball team was soundly defeated by BU in the opening round of the Colonial Basketball Tournament which ran from Thursday to last Wednesday and Thursday. The final score was 98-85.

Tech's defense was very weak and BU quickly took advantage of this to run up a 58-42 advantage. Tech's closest approach came with three minutes left in the game when they briefly spurred to within ten points. BU had an 81-71 advantage when Tech had scored their 58-42 advantage. Tech's closest approach came with three minutes left in the game when they briefly spurred to within ten points.

The key factor in the Tech victory was the high bar, 2 pmni

White Water Club to host slaloms

An indoor kayak and canoe slalom race will be conducted by the White Water Club on Saturday, Feb. 28 at 7 pm in the Alumni Pool. Admission will be $5 cents at the door. This type of race is similar to a ski slalom, but here fiberglass kayaks and one and two man canoes are raced against each other first. The described course of gates suspended above the pool. Special maneuvers are required, including paddling backwards and rolling the boat 360 degrees (an "Estokim Roll"!), and penalties are exacted for hitting or missing gates.

The competitors, who include several members of the US team to the 1969 World Championships, come from throughout New England, including Brown, Dartmouth, Harvard, and Yale.

The IM council elected new major officers and four managers for this spring and next fall in a meeting Tuesday. Larry "Loo" Loe '71 was elected Chairman. Ken Weis- shaw '72 was elected Secretary of the council.

In the managerial elections, Dave Davis '72 was reelected sailing manager, Mike Ashmore was elected rifle manager. Ken Weis- shaw '72 was elected Secretary of the council.

Mormen win by 60-34 mark

The Tech Swimming team edged past by a 200 yard victory Saturday on February 25 at 5:15 pm. Gerry Loe '71 took the 200 and 500 yard freestyle events. Larry Wilson '72 pulled the team out of a temporary slump on side horse with a spectacular 9.05 score. Tech swept the rings with Tom Hafer '70, Dick Hood '70, and Larry Leffler, and Bos Paster.

The next swim meet is tomor- row against Holy Cross, where the varsity will go for their sixth win. The meet will be held Tuesday. Gerry Loe '71 took the 200 and 500 yard freestyle events. Larry Wilson '72 pulled the team out of a temporary slump on side horse with a spectacular 9.05 score. Tech swept the rings with Tom Hafer '70, Dick Hood '70, and Larry Leffler, and Bos Paster.
