By Kyle Richardson

The end we will have lost the public's trust but it will end the public issues- is a dangerous solitude into a political partisan on the country to turn the university and of faculty members around and of the highest priority is on educational innovation and on the quality of opportunity on our academic environment.

The report outlined the past year's academic improvement and political developments. It also defined the roles of politics and academics on campus.

Johnson praised the development of the Experimental Studies Group, the Unified Science Study, the increased opportunities for power systems, and public transportation.

Johnson: Politics to endanger MIT future

By Reid Ashe

President Howard W. Johnson

The topic of dissent, Johnson added, “is a powerful source for change and improvement. To rule it out or to rule it with the fire of either majority or minority would be to create the antithesis.”

President Johnson stressed, accept the first and deny the second.

Opening the financial conference, Howard J. Foster, professor of Physics Howard J. Foster, is at MIT this term as a participant in a new exchange program is “to combine talents and resources to stimulate interest in science and research among students and faculty of the schools involved.”

Fulmer characterized Johnson’s philosophy of management as permissive. He admitted that “the system is so well planned that nothing could go wrong.”

The Flexibility essential

Fulmer reports V-P roles

Fulmer hopes to have a more profitable year in the Commons rate as permissive. He attributed the small number of job openings being created as a result of closing the fewest dorms and losing the least amount of money, was represented by maintaining compulsory commons but closing the Adams House-House Dining Hall, which loses more money than any other cafeterias when in operation. The combination of compulsory commons and Adams and Burton dining halls would result in a projected loss of only $10.00, the least loss for the MIT dining Service would have had in recent years. By contrast, however, the closing of compulsory commons, with the remainder of the residents spending 30% of their food budget within the system.

The best single plan of the ten is, he added, the ability to have the fewest dorms and losing the least amount of money, was represented by maintaining compulsory commons but closing the Adams House-House Dining Hall, which loses more money than any other cafeterias when in operation. The combination of compulsory commons and Adams and Burton dining halls would result in a projected loss of only $10.00, the least loss for the MIT dining Service would have had in recent years. By contrast, however, the closing of compulsory commons, with the remainder of the residents spending 30% of their food budget within the system.

MIT alumni officers confer

(Continued from page 1: conference to help in this re-
gard," the letters continued.

MIT changes

Both Friday and Saturday sessions seemed to hinge heavily on the changes MIT is under-
going both structurally and with respect to the changing attitudes of the student body.

Many alumni seemed reluctant to accept the idea that college students today are largely confused about where their lifetime and career goals lie. In addition, there seemed to be considerable sentiment for re-introducing some of the aspects of the MIT curriculum that existed in the 1930's, such as blacksmith shops and sur-
veying courses, so that engineering graduates would have a "feel for the actual hand labor involved."

Student activism

One of the most predominant topics throughout the dis-
cussions, however, was student activism. Many alumni seemed to feel that "social awareness" should be something that devel-
ops after graduation.

The impression was left on many that the alumni by and large have not been able to keep up with "many changes which are and will be taking place," and that the conference made relatively little headway in accomplishing its avowed pur-
poses.

Johnson: Politics to endanger MIT future

(Continued from page 1)

For the integration of MIT's intellectual efforts with "a broader structure of education," Johnson relied upon the Com-
mission on MIT Education. Here, he reiterated his earlier charge to the Commission. He urged reconsideration and re-
formulation of MIT's goals in its commitment to the student and its relationship to society; the determination, on the basis of these goals, of policies of priorities and limitations of MIT;

re-examination of the principles of education, research, and ad-
mistration here; and proposal of modifications in MIT's en-
vironment in order to attain these goals.

Johnson concluded his report by saying "This is a time for both reconciliation and for for-
ward, for bringing the generation closer to either in understanding so that they can turn their joint energies toward a common purpose."

Don't marry a rich girl!

Not until you find out just how rewarding a career in Computer Sales or Systems Support is with RCA.

Computer Salesmen at RCA are selling packages that are eight-
een months ahead of major com-
peletors.

Large time-sharing computers

that can support over 350 remote terminals.

And, this is only the beginning.

We are, at present, doubling our sales force.

And, this is only the beginning.

We are, at present, doubling our sales force.

We also intend to increase our business at twice the rate of the computer industry.

We are a highly diversified, tota-
systems oriented company—con-
cerned with the problems of the future.

So THINK about your future. Our sales force is drawn from a va-
diversity of majors—total en-
dustry is not required—we are more interested in your motiva-
tion.

RCA
Prof. Foster wins $10,000

(Continued from page 1) and have gained knowledge. And they’ve expressed real joy at being able to participate in the program.

The future might also see MIT students spending a semester at a southern Black school. Foster reports that several students have expressed an interest in such an exchange.

Foster credits the staff of the Center for Theoretical Physics with originating the idea for the exchange, and adds that “the Black Student Union had a whole lot to do with it.”

The grandson of a former slave, Foster grew up in Gadsden, Ala. At the age of 17, he dropped out of the 7th grade to help support his family. “I had a good knowledge,” he recalls, “of what it means to be in poverty, and of what it means to face a racist society.”

He was later drafted, and it was when he was in the military that he decided he should continue his education. “I was in the service that somebody put his finger on me and encouraged me to have faith in my own ability.” That person was his sergeant.

He eventually went back to school, completing grades seven through 12 in nine months time. He graduated with high honors from Fisk University, a Black school in Nashville, Tenn. In his senior year he won a fellowship to study physics at MIT, but a student from Fisk University, a Black man, “put his finger on me.”

Foster feels that his experience as an educator reinforces my belief that there are bright people in this country who may never know that they are bright until somebody just puts the finger on them like that sergeant put his finger on me.

“There are Black students . . . who need somebody to put the finger on them; but not just put the finger on them, but also provide them an opportunity to learn — and that’s what we’re doing here [in the exchange program].”

Foster is enjoying his stay at MIT. “I often wondered,” he said, “how it would be to work and teach in a place like this. And I believe it meets with what I expected it to be like: bright students, serious-minded students, a lot of freedom on the part of the students.

He feels that the program goes beyond the benefits to visiting Black students. “It increases understanding between people . . . you see, this is a two-way exchange.”

Beware the Body Shirt Snatcher!

You’re fair game when you wear a Van Heusen Body Shirt. Don’t lose your shirt to a light-fingered lovely! Cause the perfect fitting body shirt from Van Heusen is meant for YOU, man! It’s the tighter look for the ’70s, sparked by bolder stripes and solids, new long point collar and 2-button cuffs.

This is what we have against blades.

A shaver that shaves as close or closer than the new platinum and chromium blades. 10 men tasted our Norelco Tripletreader 3ST against these new blades. Each shaved one side of his face with a blade and the other with the Tripletreader. Our three floating heads followed the curves of their faces. And our eight rotating blades shaved in every direction at once (that’s the way beards grow).

Blades can’t do all this. They’re straight. And that’s why seven out of ten men said the Tripletreader shaved them as close or closer than the new blade.

What’s more, the Tripletreader has a pop-out trimmer. So you can get your sideburns straight and even for a change. Now what blade can compete with that?

This is what we have against other rechargeables.

A rechargeable that gives up to twice as many shaves per charge as any other rechargeable.

Our Rechargeable Tripletreader 46CT has all the features of our regular Tripletreader. It has three Microgroove floating heads. And eighteen rotating blades that continuously shave, allowing you to cut down on bothersome blade replacement. And a hidden pop-up trimmer for easy sideburns and mustaches.

It also has some special features all its own. A Shaver Cover that automatically counts your shaves and tells you when to recharge. A Charge Indicator that lights up when it’s recharging. And, of course, the Rechargeable can shave with or without a cord. Now what rechargeable can compete with that?

The Norelco Tripletreaders

You can’t get any closer.
Physical Education

Three weeks ago The Tech offered the following observation on a crucial need in reform:

"When the MIT Commission report is released in November, we will undoubtedly cover a wide range of issues. But there is one minor point that will probably be ignored, as all other committees and study groups have ignored it in the past.

"We speak of that epidemic of classical educational rigidity, the object of hatred for hundreds of tools -- the physical education requirement. From out of the misty past, this dogma has sur- vived to harry and worry undergraduates. Like Montezuma's curse, it threatens the physical and emotional well-being of those who ventured onto the campus.

"During summer vacation, hundreds of letters went out to hundreds of students, warning them that they were ineligible for a degree unless they spend four years attending all those lectures, grind- ing out dozens of problem sets, rioting for a lower grade, and study groups have ignored it in the past.

"The Student Committee on Educational Policy has already begun its program for action during the fall term. Nothing on the physical education requirement, President Johnson has released his annual report on MIT. Nothing on the physical education requirement. The University Action Group has complained vociferously of mistreatment of MIT tenants. Nothing on the physical education requirement.

"Isn't anyone out there listening? Don't members of our own editorial board be barred from the degree list for not putting out a little sweat twice a week. Our own informal survey (using the latest techniques, we picked out a typical member of the student body) proved conclusively that the time for change must be soon. We urge the faculty and students to end this repression of MIT students and remove "9 units of physical education" from the list of requirements.

These observations suggest what student efforts might be the most appropriate response to the grand jury's report. Mass marches would have small effect; letters to congressmen or on vigils against Nixon will likewise do little to repair the breach within our country.

"We can only again emphasize the need and importance of direct contact between universities and Middle America. Too many adults retain profound misconceptions about students' attitudes, goals, and overall thought. Pre-election canvassing provides one way for effecting such communication, but efforts need not be limited to a few weekends. Students home for the October vacation (and later vacations as well) should visit their neighbors and discuss recent developments on campuses and within our society.

"The best way to combat Agricole rhetoric is face-to-face contact of our own. Those who believe that meaningful social change can be achieved with college-centered actions are deluding themselves. The way to avoid future Kent State tragedies, and the way to begin repairing our city, lies in extensive communi- cation with the rest of our population.

Analysis

Johnson's report

By Alex Makowski

President Howard Johnson's recently released report provides a useful focal point for reform, and much progress has been made in the past. From what directions MIT should explore in the future.

The document also presents a revealing outline of Johnson's own ideas, beliefs which were translated into MIT policy for four years.

An increasingly crucial issue since Johnson assumed the post of president concerns the role the university should fill in society. His first address on assuming office forecasts that the "general sense of purpose" will shift more and more to not use such standards to differ- ences among current problems.

Perhaps in the light of the "health" of MIT. Johnson insists that "society, outside the university as well as inside it, is constantly reducing the quality of opportunity in our social environment. Unfortunately, for whatever reasons, have the same commitment to improving MIT, to improving the univer- sity as we do."

To get the most from this report, we are de- pending on the Commission. The report may reward the community's months of patience with the long-term effects of improving the univer- sity are considerable.

And it will continue to show MIT Commission Johnson cities of what must be expected from working in the community of patchwork repairs, but an overall proposal for educa- tion.

These are only two of the im- portant issues Johnson covers in his report. One other well worth considering is the present question of "health" of MIT. Johnson insists that the school is sound in both this and that. Students, fac- ulty, and administration have dedicated to improving MIT, and recent efforts at disruption have proved futile.

Johnson's own efforts were certainly better than the defense of both academic fre- edoms. None of his efforts have proved valuable standards for running MIT. We can only hope that that will continue to prove able to defend these principles from extremist attacks.
By Emanuel Goldman

The revolution is a change of heart, an inner change which makes a difference in the whole organization of society. Even though the change may be only in one's self, that change itself can be a victory, for it is a victory over the illusion that a change will take place, 20, 30, 50 years. It won't happen overnight. Carry It On is a film about the revolution. It is a film that shows the film's story of a year of the life of the man from a month before his husband David Harris was sent to jail for refusing induction into the army. The film reflects the basic premise of the film: with Harris in jail, Baez has to "carry it on." And ultimately, it is up to all of us.

As a social document, Carry It On brings an important, albeit unwitting, perspective to the radical movement. In this era, both the left and right usually look up to the opposition in a homogeneous grouping. But implicit in Carry It On is the fact that the left is very heterogeneous indeed. Many of us often tend to blur the enormous distinctions between the violent and non-violent left. It is a different issue, larger than the "left." It is a difference of lifestyle, a difference reflecting fundamental philosophies. As Baez states, "A little more violence is just adding to the hate.

In her frame of reference, the social document, Carry It On succeeds in merging the poor genre of filming real-life rock-musical performers, and the never-too-popular documentary. Baez comes across as a full individual, with much more to her than a stage presence or a radical outlook. Harris provides the necessary dialectics, with arguments such as "The initial assumption about conscientious objector is that the life of that person doesn't belong to him -- it belongs to the government." Together, they make a memorable couple. The film is prefigured in this film. At the Kenmore Square Cinema.

Rock Festival

New Youngbloods

Rock Festival - The Youngbloods (Racoon/Warner Brothers)

At last, there is a new Youngbloods album. Their last record, Elephant Mountain, one of the most exciting albums of 1969, was a minor masterpiece and a growing number of fans have been patiently waiting for the next gem from the group. Rock Festival is more than just that. It is a major milestone in the Youngbloods' career, a fine and well-produced effort.

The Youngbloods are a breath of fresh air. Their sound is different from that of the average, hit-on-over-the-beat approach that so many groups use now-days. It comes as a surprise when the music slips by and you realize that you enjoyed it. Jesse Colin Young writes beautiful songs and has a soft voice which creates most of the warmth the Youngbloods bring to their music. The arrangements are mostly jazz based and subclty is the guideline for the whole sound. And with a voice like Bananas to play the instruments, they really don't need anything else. It often seems hard to see how much amazing music can come from three guys, but they do it without suffering any for the lack of hands. Most of the material on the new album is recorded live and there is no discernable difference between the studio and the concert cuts. There is a little something of everything the Youngbloods do on this record. Banana is fine, as usual, on guitar and electric piano and banjo. Jesse Colin Young sings lead and billows in the rhythm section and sings as beautifully as ever. And Joe Bauer adds the kick to the music without over playing. In short, the Youngbloods play like they always do. The only possible complaint about the entire album concerns Banana's vocals. They are very harsh and give the music a strange feeling alien to the group. But it is easy to see that the whole thing was done with a great sense of enjoyment. There are the usual screw-around numbers but they are light and harmless. And just to show how they can do it, there is a real rock and roll number with a harmonica and almost a heavy beat. Overall, though, Rock Festival is just plain, good Old Youngbloods, no more and no less. That should be enough for anyone.

--Jaye Pollack

SDS

By Alex Makowski

American subgroup of the Revolutionary Movement: Students for a Democratic Society. On October 5th, the Committee on Internal Security (HCIS), House of Representatives, presented the film Carry It On. The film concerns an investigation into the Vietnam conflict by the National Student Association (NSA), an organization that promotes non-violent confrontation between Progressive Labor members and the Revolutionary Youth Movement. The NSA's purpose was to reveal the lie of the establishment by proving that "the SDS is not known to do anything that will take 20, 30, 50 years. It won't happen overnight."

Carry It On is the style of the 175 page document, but the film's tone is more personal than the book's. The book is written in a straightforward manner, while the film is more intimate and personal. The film's tone is more informal and laid-back, while the book is more structured and formal.

Carry It On is a two-man reed section of Dave Young and Joe Bauer. They handle the solid bass or rhythm on the studio and the concert cuts. Their playing is consistently great, and they complement each other perfectly. Joe Bauer is a great bass player, and Dave Young is a great rhythm player. Their combination is perfect.

Carry It On is a fine and well-produced effort. It is the jazz-rock film that we have been patiently waiting for. It is the film that we have been waiting for. It is the film that we have been waiting for.
Little Fauss vs...

Little Fauss is a dumpy, down-home backwoods boy with a big motorcycle. Big Halsy is a tough, capable roughhouse who knows his way around. Little Fauss and Big Halsy is a fast-moving picture with minimal plot and excellent performances by the two principals, Robert Redford and Michael J. Pollard.

The action is centered around the two main characters and a girl (obviously forming the "normal triangle") with a setting involving some of the most realistic California desert scenes on recent film. The plot calls for Halsy (Redford) to use Fauss as a means of re-entering national motorcycle racing. The function of the girl isn't entirely obvious, but eventually Halsy and Fauss split up in a dispute over her body.

The acting of Redford is especially notable as being another step in the formation of a new "super star." Redford's characteristic wide-mouthed grin is as distinctive as Clint Eastwood's cigar. The part of Big Halsy is as distinctive as Clint Eastwood's cigar. The part of Big Halsy, Pollard makes the role of the traditional good vs. bad conflict, but done in an attractive way. There's a lot of fun in this film. Little Fauss and Big Halsy, starring Michael Pollard and Robert Redford in the title roles, and Lauren Hutton as Rita, Nebraska, will be opening soon at the Crete Theater Complex.

There is a tremendous over-range of tired cliches and bad slang which makes Redford's job much harder; one can almost feel him wince as he delivers twenty-seven consecutive old slang phrases.

Pollard's role is much more fitting and correspondingly easy to play; his big round face and curly unkempt hair lend credibility to an otherwise difficult role. Pollard makes the role of Little Fauss into a living character, one can see him changing with exposure to types like Halsy and cities like Los Angeles.

The primary justification for this movie was originally going to be a dramatization of the small-time motorcycle racer, with plenty of action scenes and very little aesthetic value. The exact opposite is accomplished; by the conclusion of the picture, Fauss' and Halsy's positions are reversed. It's basically a re-issue of the traditional good vs. bad conflict, but done in an attractive way.
MNC joins canvass with computer dating

By Alex Malowiski

Momentum for a New Congress has developed a surprising motivation to encourage students to work for peace candidates—a plan to match male and female students for canvass "dates."

Called "Canvass-Match," the computerized plan would pair students with similar interests for a day of stamping for one of five local peace candidates. The system was developed by the Inner Areas MNC, questionnaires and IBM cards were distributed Sunday to surrounding areas at such schools as Boston University, Northeastern, Simmons, and MIT.

MIT response

The response at other schools has not yet been determined, but the Canvass-Match should prove successful in attracting students, a student at MacGregor reportedly finding two roommates busily filling out the IBM cards that must be returned to the Cambridge MNC headquarters.

The questionnaire is sufficiently detailed to allow most students to specify their "dream" precinct worker. They can ask for one of four hair colors, seven eye colors (including bloodshot and dilated), half a dozen height ranges, two sexes, and any age. Respondents may choose from a list of interests including social sciences, natural sciences, fine arts and literature, history, engineering, and Tibetan mythology.

Three candidates

The questionnaire also provides a choice among the three congressional candidates MNC is supporting in Eastern Massachusetts: James Drinan (Newton, Waltham, Watertown), Michael Harrington (North Shore), and Studds (Cape Cod, New Bedford). Student canvassers will continue daily in these three areas right through to election day.

A rather appropriate symbol for the Canvass-Match adorns the upper right corner of the questionnaire—a heart superimposed on a peace symbol.

Commons plans weigh closing dining halls

(Continued from page 1)

Lobdell, under compulsory commons, would lose $28,100 as opposed to only $21,200 if commons were optional.

This is because Cartley projects an increased volume at both of these dining halls if commons were to become optional. At the same time, labor costs at the halls stay much the same; hence, increased profit.

A final interesting note is that contrary to rumor, McCormick Hall is not the least profitable commons dorm due to "high overhead." In fact, the statistics show that McCormick is the most profitable, being the only dining hall on campus projected to show a profit during the next academic year.

Bootsers drop 4th straight

By Niki Minasz

The Boston soccer team was disappointed again on Saturday when they fell to a 4-0 loss against Amherst. This was the fourth straight game lost to Amherst, 5-1. They faced an Amherst team much better than last year’s but failed to do any better than last year’s 4-0 loss.

Amherst pretty much dominated the first three periods. They scored at the 6 minute mark of the first period when left wing McKeen took a right to left cross pass and put it past Tech goalie Rich Streiff. 74. For the rest of the game, the Amherst followed a pattern of short passes and rushes aimed at building its way through the MIT defense.

In the second period, Amherst center forward Stott scored on the seven and nine minute mark of the second period, both on shots from right in front of the goal. One came on a semi-breakaway, the other came on a lob pass past the goalie.

In the third period, the Techmen feared no better. They failed to make a move against the direct kicks. Amherst did little to help it either. With the 3rd and 4th minute mark of the third halftine lead, they scored after only 31 seconds on a cross pass and planted it 44 on the engineer had but one shot on the third period and rarely worked the ball into the penalty area. Amherst finished off their scoring for the game with a score at eight minutes of the period when McKeen scored his second goal of the game.

In the fourth period, the Techmen finally came back with the kind of quality soccer that they played in the Trinity and Middlebury games, but it was too late. Jerry Mackiewicz ‘71 took the ball into the right corner, dribbled along the end line, eluded 3 defenders in the process, and sent a pass out to Dave Peterson ‘71 in the penalty area, from where Peterson put a hard shot in the far corner. With the shutout broken, MIT relaxed and played well but the game was obviously out of reach. The rest of the period saw an excellent short passing game but the engine had the same problems that had plagued them in the last few games. They clicked on passes, but outside the penalty area, they could not connect.

Wednesday, the soccer team meets Brandeis in a Greater Boston League game. The game is at 3:30 pm on Briggs Field.

On Wednesday, the Water Polo team plays its biggest game of the fall season when it meets Harvard in the first meeting of these teams this year. MIT goes in rated as number one in New England and Harvard goes in at number two, MIT with the best defense around and Harvard with a 19 goal per game offense. The game is at 4:30 in Alumni Pool and it promises to be most exciting. All support is encouraged.

IM Sports

Simmers toundes DTD

In key games this weekend, SAE ‘A’ toundes DTD and LCA narrowly edged BTP to narrow the places of the championship down to just 2 teams. SAE and LCA meet next week to decide the title.

In the SAE-DTD game, Bruce Wheeler ‘71 intercepted 2 passes and Steve Cooch ‘73 caught 3 touchdowns passes as SAE won handily, 35-0. A fine defensive line charge together with a potent defense have been the strength of the SAElors this year and these were the major factors in the game.

Scoring a touchdown with only 3 minutes remaining, the Lambda Chi A team edged the Bru’s by a 13-12 tally. LCA opened the scoring in the first period, when after two BTP running plays, the Bru’s Bob Marcutus ‘72 intercepted a BTP pass and went 30 yards for the touchdown. LCA made the extra point but it was called back for a penalty and the second attempt failed. BTP came back with Rich Casell ‘73 intercepting a LCA pass for a touchdown. Tim Obrien ‘73 made the score 12-6 with a 2 point conversion.

The third quarter saw a lot of movement at the half with neither team dominating. In the fourth, though, LCA put together a long, sustained drive with 5-10 yard plays and managed to get Jerry Loe ‘71 and Mike Ashmore ‘72 until Charlie Snell ‘72 took a quarterback keeper over for the touchdown. Ashmore caught a Snell pass for the deciding extra point. With 3 minutes left, the BTP defense could not move and the game ended 13-12. Next week, BTP and SAE meet with SAE seeking its third straight championship.

In other action it was PDT 8 - DU 7; SAE ‘B’ 27 - FLPLP 6; BSU 12 - PGD 7; St. House 32 – TC 6. SAM tied LCA ‘B’ 6-6 in a game that went into 2 overtime and the first downs even at one for each team.

Sailors close third in CG sloop regatta

By Randy Young

Strong, gusty winds characterized New England collegiate sailing this weekend, as the MIT sailing teams moved into the final three weeks of their season. The dropping temperatures were accompanied by chilling breezes that made conditions dangerous at times for yachtsmen at least one school in the region.

The varsity regatta scheduled to be held at Bowdoin College in Maine on Saturday was never completed due to excessively high winds and lack of adequate rescue facilities.

Several other events did go on as scheduled, however, including three varsity regattas, one women’s event, and a freshman meet.

The Coast Guard Academy of New London, Connecticut hosted the MIT sailing team Saturday and Sunday for the New England Sloop Championships. The event was sailed in Bates class boats, centerboard craft twenty-four feet in length and powered by a crew of four. Three races were sailed on Saturday and four on Sunday, and the school with the best total score received the White Trophy. Each school entered one crew, and boats were rotated after each race. MIT’s entry consisted of Pete Nesbeda ‘71, Tom Bergen ‘72, Dave Mark ‘73, and Dwight Davis ‘71. The end of the first day of sailing found the crew in third place, but going into the last race Sunday they were tied for the fourth place. The race finished, however, dropped them to third place in the series, one point behind second place Yale and two points back of winner Rhode Island. Bad luck plagued the MIT sailors throughout the regatta, as they suffered two breakdowns in the seven races. The second equipment failure came in the first race on Sunday, when the tiller broke off the rudder as the Tech crew held a solid second place. Finished behind MIT in the standings were crews from Harvard, Tufts, Coast Guard, and the University of Connecticut.

On Sunday MIT hosted an Open Regatta on the Charles River, with thirteen schools participating. Sandy Warrick ‘72 and Roger Flood ‘72 sailed in ‘A’ Division, and unhousted Steve Shantlin and Frank Miller crewed the Tech ‘B’ Division entry. MIT finished first in the regatta, three points ahead of second place Tufts. Boston State placed third.

Also on Sunday was the Hoyt Trophy Regatta, sailed at Brown University in Providence, Rhode Island. MIT placed fourth in a field of ten schools, with Larry Backer receiving his 3rd regatta sailing in ‘A’ Division and unhousted Bob Hart and John Lacy in ‘B’. The trophy was won by Harvard, with the team from Columbia University finishing second. In third place, and one point ahead of the Tech sailors, was Brown. Also competing were teams from Wesley, Williams, Holy Cross, Yale, Boston University, and Providence College.

In the Radcliffe Fall Regatta, one of the Boston area’s events of the fall season, Katja Jorns ‘71 and Maria Borrutta ‘73 skippered the MIT entries to a substantial margin of victory over second place Radcliffe. Sailing in ‘B’ Division, and Miss Borrutta won all but one of her races.

The freshman team traveled to Yale to compete in a regatta that came, and came away with a second place finish in a five school field. The regatta was won by the Coast Guard Academy, and Tufts placed third. Steve Cucko, Ronald Todd, Paul Shapiro, Wayne Martin, and Randy Young did the sailing for the Tech frosh.
