The "People's Lobby," which opened early Monday morning as an alternate style of protest to the traditional sit-ins and marches that are often accompanied by revolutionary speeches and slogans, was held in the basement of Killian Court.

Instead of listing demands, the protesters established a "People's Lobby" and focused on the problems of the previous demands, hoping to rekindle interest in them. Meanwhile, the protesters say they are having fun. With this in mind, they have come equipped with a week's supply of popcorn, marshmallows, balloons, and popcups.

At first, the participants sat near the center of the corridor leading from Dewey Labs and Brown Stairs to the main entrance to Killian Court, and many went to other places.

The protesters have developed one that can do this for 47 mph.

They have a weekly supply of the General Motors, and they have come having "fun."

Meanwhile, the protesters hoping to rekindle interest in the "People's Lobby" are reminding passers and lookers by revolutionary speeches, etc.

They are to study GM detrimental to the health, safety, and comfort of employees, etc.

They wanted the Corporation to vote its proxy for the Nader Nader's proposals seem to be having a proxy fight in that the GM's proxies are to be in early May in behalf of absent shareholders. Most shareholders routinely sign their proxies over to the management, which votes them in effect and red elects itself and its policies.

When a challenge is to the management's policies, the result is usually a proxy fight, with the dissident faction attempting to get minority shareholders to sign their proxies over. In such a manner an owner of a few shares can, by getting many other shareholders to destroy but present by proxy a sufficiently large body of

uninjured. (National Safety Transportation Bureau has developed one that can do this for 47 mph.)

Ask GM to meet HEW all pollution standards before 1975.

Ask GM to increase non-white dealership, presently numbering 7 out of 12,000.

Nader's proposals seem to be leading to a proxy fight. "Proxies" are votes cast at the annual meeting (GM's will be in early May) in behalf of absent shareholders. Most shareholders routinely sign their proxies over to the management, which votes them in effect and red elects itself and its policies.

"People's Lobby" is that once one resolution has been stopped. He presented his motion calling for the administration to try to eliminate military hardware contracts as a middle of the road approach.

Professor of Physics Philip Morrison pointed out the need for some to group to form public opinion on national defense. He felt that universities such as MIT, where the Defense Department is a major source of federal aid, are not doing enough to influence defense research and that even a group of professors would have to take an active role in the funding and direction of basic research. He emphasized the importance of taking the time to protect the interests of all involved. His objections to the labs were their size, their professional self-interest, their small connection with the outside world, and their staff. He stated that he didn't think "the laboratories can be justified on an educational basis."

By Lee Giguere

The authors of several of the motions to be considered at tomorrow's special faculty meeting had written down a meeting sponsored by UCS.

Professor Bernard Feld of Polymer Science, another group of professors, and a group of students were noting proposals on the Special Laboratories on the basis that they had nothing to do with the report to the faculty on the issue. He conceded, however, that since resolutions had been presented, others cannot be stopped. He presented his motion calling for the administration to try to eliminate military hardware contracts as a middle of the road approach.

Horrors of giving up

By Steve Carhart

There are two recent events which have sparked my interest, which I think is a part of a pattern which I find to be coupled in a particular way. This pattern is something significant because it seems to indicate that broader, more universal patterns are at work. One of the startling increase in the use of heroin in non-metropolitan areas, and the other is the sharing of living, and problems of fraternity working on commons, coed housing, and the expansion of the strategic and political considerations of the special laboratories and by the Review Panel on the Special Laboratories and by the Faculty to test the feasibility of the recommendations made by the Review Panel on the Special Laboratories and by the Executive Committee of the MIT Corporation, and to report on this test by May 1970.

Several motions before the Faculty at its meeting of March 11, 1970, dealing directly with the Special Laboratories appear in conflict with this resolution. The Student Association and the Undergraduate Association, by Thle Tecdr, faculty postson at community organiz-

Faculty vote

Statement by the Standing Committee for the Special Laboratories for the meeting of May 11, 1970.

On October 22, 1969, the MIT Faculty approved, by a large majority, a proposal by the President to test the feasibility of the recommendations made by the Review Panel on the Special Laboratories and by the Executive Committee of the MIT Corporation, and to report on this test by May 1970.

So you know, several motions were introduced at the special faculty meeting, held on February 22, 1970, which would have directed a discussion of matters relating to the Special Laboratories. Of these motions, offered by Professors Low, Morrison and Sar- ton, is not directed toward the operation of the laboratories; it is intended as a demonstration of the name of the faculty of the Institute, expressing concern at the operation of the special laboratories, and races, and concluding.

We call upon the President and the Congress of the United States to discontinue the development of high-accuracy MIRVs, and to give the high-accuracy elements (the 1976 Republican budget) a different priority.

Many factors determine the future and progress of a nation. In MIT's case, the focus at the same time most subtle is to be him. Such a nation's culture toward optimism or pessimism, toward a belief that life is worth living or that it isn't. This portion of our culture seems to be taking a turn which we do not wish to see.

We call upon the President and the Congress of the United States to discontinue the development of high-accuracy MIRVs, and to give the high-accuracy elements (the 1976 Republican budget) a different priority.

In this age of technological advancement, it seems as though the world is moving faster than ever before. The pace of change is so rapid that it is difficult to keep up with the latest developments. This has led to a sense of anxiety and uncertainty among many people, who feel as though they are being left behind.

The book "Changing Man" by Harold Fedewor is a fascinating exploration of the effects of technology on society. The author argues that technology is not neutral, but has the potential to bring about significant social change.

Fedewor believes that technology is not simply a tool, but a language that shapes our understanding of the world. He argues that the way we use technology reflects our values and beliefs, and that this can have profound effects on our society.

One of the key themes of the book is the role of science in society. Fedewor argues that science is not just a set of facts, but a cultural system that shapes our understanding of the world. He suggests that science can be used to advance the interests of certain groups, and that this can lead to social inequality.

Another important theme in the book is the role of technology in shaping our identities. Fedewor argues that technology is not just a tool, but a way of thinking and a way of being. He suggests that technology can help us to make sense of the world, but it can also lead to a sense of dislocation and anxiety.

Overall, "Changing Man" is a thought-provoking book that asks us to consider the role of technology in our society. It provides a unique perspective on the effects of technology on our lives, and encourages us to think critically about the way we use technology.

The book is not without its flaws, however. Some readers may find the book too theoretical, and may prefer a more practical approach to the subject. Nonetheless, "Changing Man" is a valuable addition to the literature on technology and society, and is highly recommended for anyone interested in this field.
“You’re allowed to defend your house. If you shoot them in the back yard, drag them into the swimming pool,捆住他们, I’ll have to trust everyone. If we all learn early in life, you can’t trust anyone in this society.

In another scene, we see a ‘Sunny Dense’ advertisement advertising a man made swimming pool in every yard, and a golf course behind the verrun. And you know, to con- 

assumes that the other side will get away with it. That’s not imagining the reception that way. Thus, he decides to abandon his vision of a utopia, too idealistic, too honest. He feels that revolutionaries, is too violent for the scene, too.

Evils. As Daria muses in the novel, and indeed, there are no better uses of the flute to appear ‘Fancy Colours’ is one of the most referred to in the film, as is evidenced by the fact that Mark and Daria are non-pro- 

characterization of Daria. As in all of Antonioni’s films (with the exception of Blow Up), the central woman is the character of Daria. As Mark’s early arrest radicalizes him, Mark’s ultimate fate radical- 

Daria. But radicalization means different things to different people. Whereas he was moved to political violence, she was moved to a prophetic vision, a self-conception, a commitment. There will be no more compromising for her.

Easy Rider was widely criti- 

cized for showing only the American South. The liberal establishment could thus classify it as part of the zone of ‘Klaxx Klan, lynching, and Southern Belles’. But Zabriskie Point brings the message right home. It is Los Angeles where all this is happening, where a police
cornman makes a tear-gassed black
driver.
Mark and Daria of “Zabriskie Point” are too far gone; they are in their own world, stoned, try to strip bar, and are totally incapable of com- 

munication: the natural end-products of the sick society. Just as Mark’s early arrest radicalizes him, Mark’s ultimate fate radicalizes Daria. But radicalization means different things to different people. Whereas he was moved to political violence, she was moved to a prophetic vision, a self-conception, a commitment. There will be no more compromising for her.

eclipse:
Only 54 more years

If you missed Saturday's solar spectacular, don't worry—you'll have another chance in 2024. Or you could always fly to Northern Alaska in 1972. If you can't make it either way, here's how the eclipse looked to The Tech staffers, some of whom were almost swept out to sea trying to paddle across Monomoy channel in a liferaft, while others raced down Nova Scotia's coast at 100 mph looking for a patch of clear sky 10 minutes before totality. A few managed to get on the Nantucket Ferry; three went to Virginia or Florida. Staffers were also part of a Physics Department expedition to Mexico. But most of us just took half an hour out from the weekend routine to see a tantalizing 96% of the sun black out over Cambridge.
Subsidies close one Harvard Bridge lane

By Lee Giguere

A sag that developed in the Harvard Bridge only four months ago has now closed one southbound lane of traffic and the bridge, for two weeks on the same side of the river.

Fencers take on New England championships this Saturday. The MIT fencing team won two out of three matches, including a victory against Brown. However, the team faced some challenges, such as a shortage of experienced fencers. The MIT fencers are preparing for the New England championships, which will be held on Saturday. They are aiming to win the tournament and secure a spot in the national championships. The MIT fencing team is one of the strongest teams in the region and has a strong history of successful performances. The team is composed of experienced fencers who have participated in numerous national and international competitions. The MIT fencing team is training hard to prepare for the New England championships and to ensure their success in the upcoming tournament.
