Philosophy dept. wins faculty endorsement

By Alex Makowski

The faculty Wednesday overwhelmingly endorsed the philosophy section’s bid for departmental status.

A bare dozen professors registered their disapproval in the standing vote, which left the future of a new department the responsibility of the Corporation.

In another important issue, the faculty voted 66-37 to accept the recommendation of an inquiry committee and drop further consideration of whether or not some faculty members played when President Johnson’s office was seized by radical protesters.

The Nominations Committee recently released the report of Hubert Rogers to succeed his mathematics colleague Ted Martin as General Chairman of the Faculty.

Philosophy

While the faculty is only empowered to create new degree programs, MIT’s undergraduate cal-endar of philosophy discussion centered on whether a separate department was advisable. Section Head Richard Cartwright set the stage for the discussion by quoting from his fellow professor’s memo to the Academic Council.

He noted that philosophy is generally characterized as a professional activity, and inquired to improve the group’s position vis-a-vis the administration, and foresaw further progress in this direction when dealing with colleagues outside MIT.

Other discussions of the move included biology professor Joseph E. Keilin, who argued that philosophy had always occupied a key position in the drive for increased knowledge and “should not have to apologize for itself.” Departmental chairman Hans Temer (psychology) and Boris Magasanik (biology) also linked themselves with the supporters of the proposal.

Engineering opinions

Mayhew, who is engineering department failed to materialize. Electrical Engineering Head Louis Simon, who argued against the spin-off at an earlier meeting last year, voiced another viewpoint when he argued that “we should not go on record as opposed to this [the move].”

MIT Commission sentiment was divided. Ken Hoffman and Mervi Shurta reiterated their earlier opinions: the move; coming at the same time as a study of the role of the humanities at MIT, is ill-advised, and the implications for undergraduate education have not been adequately explored. But Erik Mols-Christenson urged his fellow faculty not to block the philosophy staff’s attempts to organize their own discipline.

The components’ main arguments stressed the value of a philosophy program.

CJAC sees Simplex plans

By Curtis Reeves

Emphasizing that the concern was not in a position to give directives” on the use of the Simplex property, the Corporation Joint Advisory Committee (CJAC) listened to Richard Dover, project director of planning for the property, as he gave a detailed account of the corporation’s planned uses.

A number of the attendees included biology professor Joseph E. Keilin, who argued that philosophy had always occupied a key position in the drive for increased knowledge and "should not have to apologize for itself." Departmental chairman Hans Temer (psychology) and Boris Magasanik (biology) also linked themselves with the supporters of the proposal.

Mayhew, who is engineering department failed to materialize. Electrical Engineering Head Louis Simon, who argued against the spin-off at an earlier meeting last year, voiced another viewpoint when he argued that "we should not go on record as opposed to this [the move]."

MIT Commission sentiment was divided. Ken Hoffman and Mervi Shurta reiterated their earlier opinions: the move; coming at the same time as a study of the role of the humanities at MIT, is ill-advised, and the implications for undergraduate education have not been adequately explored. But Erik Mols-Christenson urged his fellow faculty not to block the philosophy staff’s attempts to organize their own discipline.

The components’ main arguments stressed the value of a philosophy program.

The fiscal outlook is discouraging, as a vivid picture of the commercial market is available. Dover noted that he was "not able to come up with a single beer company."

Working with Cambridge official will be necessary for re-moving the political constraints, since that process will involve the changing of some zoning ordinances in the Simplex area, as well as the closing of many streets during construction. Dover also pointed out later that, if this is true, then the health defect problem in south Vietnam is almost absolutely a result of the drug."

The meeting began with an anti-war film, entitled "My Day."

The movie was clearly political in nature, focusing on the techniques of the quick-cut-of-context and the heavy visuals with unrelated radio track to make its telling point.

Albert spent most of his speech talking not much about apathy, at what the mood, was that the only proper mood, should be in the Movement this spring. He stated that there should be a sense of urgency, since the US and the North Vietnamese (and Viet Cong) have reversed their views of the war.

Farmer Albert Mike Albert discussed the importance of an active movement in hastening the end of the war.

Previously, he contend-ed, the US looked at the war as a "data quick effort," while the Vietnamese viewed it as necessary to ensure freedom for their grandchildren. Now that the US is trying to destroy the fabric of their society, the Vietnamese wish to end the war before there is nothing left to fight for, while the US publicly to stay as long as is necessary to bring about the kind of end to the war that it wants to see. In addition, Albert stated that the recent Laos operations have shown that the US can’t win on the ground; and that there is now a strong, broad-based (students, women, and doubled winners, as well as the community) anti-government movement in Vietnam.

Albert stated, clearly and simply, that if the US anti-war movement is passive, Nixon will remove a few troops as a sop to the public, contain the South Vietnamese anti-war movement, utilize the war (making it look like war), and improve the conditions of Vietnamese and less directly for US troops, a bitter enemy of the fabric of South Vietnam. If the movement is active, Albert says, he knows where.

ME professor outlines problems of reclamation

By Alan Precup

"Take an old stove, add a nylon stocking, a pile of computer output, a couple of beer caps, throw in a few crawdads and sprout, with some old crankcase oil. Now build a machine that will sort out the material with enough purity so that they will be re-usable." This is the reclamation problem as described by Professor David G. Wilson of the Mechanical Engineering Department in an Earth Day seminar.

A large part of the problem is sorting. A recent breakthrough in a machine that can "sort glass, plastic, and paper," according to Wilson, "is not presently available. Wilson also notes that, in his experience, the most efficient and comprehensive programs like newspapers and automated salvage are being implemented.

Wilson also showed how municipal solid wastes may be used in land reclamation. Cambridge recently put into operation a compacting plant that converts trash into usable fuels. With a capacity of 3,000 tons per day, Wilson expected that some open dumps could be closed. The blocks could be shipped to strip mines as landfill.

He proposed a tax on resources as a longrange solution to the problem of the oil depletion allowance. For example, companies should be taxed for extraction. Initially, this tax would be interest. In the amount of the resource remaining. This would make it more profitable to manufacturers to use reclaimed materials.

If the broader problem of depletion of the world’s resources is to be avoided, Wilson feels, Americans must realize that the US cannot continue using 60% of the world’s resources.

Philosophy dept.’s preaches urgency

By Paul Schindler

Mike Albert, chairman of the Joint Advisory Committee (CJAC) at the Simplex property, called today’s meeting the beginning of an anti-war film, entitled "My Day." The movie juxtaposed the views of the US Congress with the words of Presidents Kennedy and Nixon in support of continuation of the war. Accusations were made against the US government vis-a-vis a war of mass genocide, including an allegation that one of the US’s defoliants is known as Thompsonide (Professor Eugene Bell, who attended the meeting, pointed out later that, if this is true, then the health defect problem in south Vietnam is almost absolutely a result of the drug.)

The fiscal outlook is discouraging, as a vivid picture of the commercial market is available. Dover noted that he was "not able to come up with a single beer company."

Working with Cambridge officials will be necessary for removing the political constraints, since that process will involve the changing of some zoning ordinances in the Simplex area, as well as the closing of many streets during construction. In the amount of the resource remaining. This would make it more profitable to manufacturers to use reclaimed materials.

If the broader problem of depletion of the world’s resources is to be avoided, Wilson feels, Americans must realize that the US cannot continue using 60% of the world’s resources.
Albert sees urgency in ending Asian war

(Continued from page 1)
first time that it can be instrumen-
tal in a quick end to the war.

Finally, referring to apathy, Albert asked the rhetorical ques-
tion: "Why would someone who feels the war is an abomination not take any action to end the war?" He proposed two possible answers: fear (possibly even for one's life, considering Kent State) and cynicism. The real reason, he went on, is that the American people do not really understand how atrocious the war is; they have no real compre-
hension of the daily horrors perpetrated on the people of South Vietnam, Laos, and Cambodia by US troops and bombers.

After Albert finished speaking, the crowd, largely sympathetic, also heard Profes-
sors Bell and Wayne O'Neil.

The consolidation. Byers
was concerned that this cause may be the
result of these meetings is the
publication schedule, as the
request of the editors of The
Tech and Thursday, he said, the
paper would not appear on
either Tuesday, Thursday or
Friday. During the experimental
period, the paper is to come out
on Wednesday mornings.

Byers reported that the stu-
dent editors did not feel the new
publication would affect them.
However, he commented that
Tech Talk, which would cover
many of the "more mundane"
events at MIT would leave the
student media fee to cover
events in different ways. It
might, he noted, "be a vehicle
which complete" transcripts
of special reports could be made
available to everyone. To pro-
vide for this, the proposal
includes provision for eight,
twelve and sixteen page issues, as
well as four-pagers.

Savings

The consolidation. Byers
pointed out, represents a-
total savings of $2000 in produc-
tion costs (on the basis of 50 issues a
year) over the current costs of
both Tech Talk (every other
week) and the Calendar (week-
ly). Larger savings, he said, are
contemplated if the paper
succeeds and can replace the
direct mailings.

The paper. Byers stated, is an
effort to "enlarge the number of
people who receive the news." He
decided to distribute 1000 copies of
the publication in The Bag. The
total press run for the newspaper
is to be 15,000, an increase of
1,200 over the current Tech
Talk run. Byers noted that the
extra copies would be used to
augment the deliveries made to
dining groups, which now take
75 copies.

Byers didn't expect the paper
to be "controversial," pointing
out that it is an "administra-
tion report." He does "hope to
get reaction" on it, however,
adding that "once we have it,
we'll see people using it." How-
ever, Byers emphasized, nothing
is being done "that we can't end
quickly."

Student media

The consolidation. Byers
was careful to note that he
was concerned about the im-
 pact the new publication would
have on the student press, saying
it is "not our desire to weaken
them." During the planning
stages, he said, the proposal had
been discussed with representa-
tives of the campus media. One
result of these meetings is the
publication schedule, as the
request of the editors of The
Tech and Thursday, he said, the
paper would not appear on
either Tuesday, Thursday or
Friday. During the experimental
period, the paper is to come out
on Wednesday mornings.

Byers reported that the stu-
dent editors did not feel the new
publication would affect them.
However, he commented that
Tech Talk, which would cover
many of the "more mundane"
events at MIT would leave the
student media fee to cover
events in different ways. It
might, he noted, "be a vehicle
which complete" transcripts
of special reports could be made
available to everyone. To pro-
vide for this, the proposal
includes provision for eight,
twelve and sixteen page issues, as
well as four-pagers.
By Peter Peckarsky, WASHINGTON - The possibility of fringe violence around the Washington peace rally tomorrow raised the tension in the nation's capital late this week.

The National Peace Action Coalition (NPAC), rally organizers, are planning a non-violent demonstration, are being urged to keep the demonstration under control.

Crowd estimates from the Justice Department's 50,000 to the NPAC predictions of hundreds of thousands. One neutral observer suggested that the organizers would be lucky to draw 100,000. The record anti-war demonstration was a march in New York City at minimal cost for less than $40 a year.

IMPLICATIONS OF THE APOLLO 11 LUNAR MATERIAL by Dr. John A. Wood, Smithsonian Observatory

SYMBIOTIC THEORY OF THE ORIGIN OF HIGHER CELLS by Prof. Lynn Margulis, Boston University

EXPERIMENTS ON THE ORIGIN OF LIFE by Prof. Carl Sagan, Cornell

Students who are curious about the topics above are invited to use an experimental system containing these interactive lectures, which were recorded specifically for individual listening. The lectures are unique in that they include a great many recorded answers to interesting questions. The answers extend and deepen the discussion, and can be quickly and conveniently accessed.

If you would like to try the system, please call 864-6000, ext. 2800, or write a short note to Stewart Wilson, Polaroid, 730 Main St., Cambridge (near MIT), mentioning when you might extend and deepen the discussion, and can be quickly and conveniently accessed.

TO BETTER SERVE YOU NEW COOP HOURS
As of April 26, 1971

HARVARD STORE:
Mon., Tues., Wed., Fri., and Sat. — 9:20 A.M. to 5:45 P.M.
Thurs. — 9:20 A.M. to 8:30 P.M.

BUSINESS SCHOOL STORE:
Mon. through Fri. — 8:45 A.M. to 5:00 P.M.

MEDICAL CENTER STORE:
Mon. through Sat. — 9:30 A.M. through 5:45 P.M.

TECH STORE:
Mon. through Sat. — 9:15 A.M. through 5:30 P.M.

These new store hours are in response to your requests and to the Coop studies of shopping patterns. We hope you will find these changes both convenient and beneficial.
By Paul Schindler

The time has finally come. I readily declare the spring of 1971 at MIT, born in Boston a free-of-winter zone. I realize that with the snow and all which occurred last week, that this is a risky business. But even the most hare-brained idea has its moment, if it is finally time to bloom, and since we are forewarned from the Charles, it is probably safe to call an official halt to the spring of 1971! It would be a real shame to have summer get here without any job, his love, and peace rallies.

Faculty order (to his finals, his summer parted from the Charles, it is finally time to bloom, and the magnolias have decided that this is a risky business. But even a transgression of cherished university rights and privileges, it is extremely difficult to project mass action several years in advance of an anniversary event. Such a period is a natural moment for the commencement of further disciplinary investigation. Instinctively, one responds to the idea that the condemnation "wholly intolerable" of the events in Washington, D.C. was accepted with a 66-37 vote. The Committee's report was accepted with a 66-37 vote.

Equal Opportunity: The term "equal opportunity" was selected by the Task Force on Equal Opportunity that MIT has significantly increased the number of black students by providing an education here. Over the past 2½ years, while many people probably thought the "meal on a table," available in a downtown restaurant for the price of $2, is not an "undergraduate," one of them.

The service, on the several occasions I have been there, is too expensive for the price range from reasonable to very generous. Hospitality is fair to good. There exists a collection of canned pop which may be purchased to go with the "meal on a table," available in a downtown restaurant for the price of $2. No one said that the place is an exclusive upper club, or anything of the sort. It has its drawbacks, but none of them too significant. I recommend it.

Anti-war warning plans canvassing, info booth

By Ken Kayd

At a special meeting Thursday, April 15, in the Sala de Puerto Rico, possibilities for MIT's involvement in anti-war activities were discussed. Plans were made to establish an information booth in the lobby of building ten and begin canvassing the dorms and departments to build anti-war commitment.

Dates announced

Three major possibilities for action were described. A spokesman for the Viet Nam veterans reported a huge crowd was expected for the April 24 March on Washington. MIT's participation in these activities were available at 15 Seller Street, opposite city hall in Central Square. It was emphasized that these would probably not be "able to get to Washington this weekend, the May 5 rally is a main focus for anti-war sentiment. The idea of May 5 is to stop all "business as usual." Finally, leafletting Hancocks Field, in Lexington, is being planned for May 9. Alan Graubard emphasized the importance of the fact that far greater destruction is carried out by US planes than in actions like this. "If we win, it is not as visible. He also said the organizers are looking for "cre-"...".

LANGUAGE DEVELOPMENT
Children ages 3 to 5 years are needed for a study in language development. If interested, please phone Miss Esther Sorokos, weekdays at 492-3872.

HELP WANTED: Spacetime or full-time opportunity advertising and/or staffing envelopes. Earn $27.00 per thousand and shipping costs. Can send money making deal. Send $2 for complete instructions and list of firms using address to: C and S Company, Dept. 479; P.O. Box 53153, Oklahoma City, Okla. 73104.

Men of all ages to NORTH SLOPE, ALASKA, and the YUKON, around $3000 a month. For full information write to Job Re- sources, P.O. BOX 161, 8th Ave., Toronto, Ont. Enclose $3.00 to cover cost.

WANTED: Students (full or part time, by and for hospitals for better body rehabilitation or community services. Cambridge with transportation to work for 8 weeks. Begin June 27.

TROPICAL WATERBEDS: Box 2243, Honolulu, Hawaii 96813. (Economy models are also available in all stores.) Would you like to make your own foot bath, or any project as just for you self? Sell your own foot baths to sports and dealers.

ECOLE BILINGUE
French-American School of Chicago.
380 Concord Avenue, Accredited private school (Guzelian I). Now enrolling for pre-school classes (Nursery Through Pre-Kindergarten). Parents interested in a quality education plus French language program, please phone.

The War in Indochina must be stopped!
We, individual members of the M.I.T. community, believe that it should and can be ended on the principles of the following Joint Treaty of Peace between the people of the United States, North Vietnam, and South Vietnam.

A Joint Treaty of Peace

1. The Americans agree to immediate and total withdrawal from Vietnam and publicly commit to the date by which all American forces will be removed. The Vietnamese pledge that as soon as the U.S. Government publicly sets a date for total withdrawal:

a) They will enter discussions to secure the release of all American prisoners, including pilots captured while bombing North Vietnam.

b) There will be an immediate cease-fire between U.S. forces and those led by the Provisional Revolutionary Government of South Vietnam.

c) They will enter discussions of the procedures to guarantee the safety of all withdrawing troops.

2. The Americans agree to end the imposition of Thieu-Ky-Kien on the people of South Vietnam in order to insure their right to self-determination and that all political prisoners can be released.

3. The Vietnamese pledge to form a provisional coalition government to organize democratic elections. All parties agree to respect the results of the elections in which all South Vietnamese can participate freely without the presence of any foreign troops.

4. The South Vietnamese pledge to guarantee the safety and political freedom of those South Vietnamese who have collaborated with the U.S. or with the U.S.-supported regimes.

5. The Americans and Vietnamese agree to respect the independence, peace and neutrality of Laos and Cambodia in accord with the 1954 and 1962 Geneva conventions and not to interfere in the internal affairs of these two countries.

6. Upon these points of agreement, we pledge to end the war and resolve all other questions in the spirit of self-determination and mutual respect for the independence and political freedom of the people of Vietnam and the United States. By ratifying the agreement, we pledge to take whatever actions are appropriate to implement the terms of this joint Treaty and to insure its acceptance by the government of the United States.

The undersigned, endorse the Joint Treaty of Peace:

Greeks exile urges boycott

By Harvey Baker

Elias Demetracopolous, Greek exile and outspoken critic of the ruling Greek military junta, spoke Wednesday afternoon at MIT, and called for a six-point proposal by the US to withdraw government support for the colonels' junta.

First, Demetracopolous asked for a clearcut repudiation by the Nixon administration of past policies of friendship to the Greek government. He said that US support was crucial for the maintenance by that government of a strong police state, and that, without it, the government would be hard-pressed to continue in its present fashion.

Second, Demetracopolous called for the termination of all military aid to the junta. On September 22, 1970, the Nixon administration decided to resume shipment of heavy armaments to Greece, despite the fact that the Greek army was being used more for domestic counterinsurgency than for fighting any external aggression.

Demetracopolous said that pressure should be applied to the junta in the form of a joint NATO action on diplomatic, political, and economic fronts. Greece would be caught on the wrong side of a war of national liberation. Such a situation would be detrimental to the US, and would ultimately result in a weakening of NATO.

Greece is considered important of NATO, and a strong, free Greece is on the southern flank of the US. Without it, the government of a strong police state, and that, of Greece becoming "another Vietnam," and said that conditions are ripe for a Vietnam-type popular movement in Greece, with the US government once again being forced to resign from the Council.

A former Greek journalist, Demetracopolous praised the efforts of Greek exile and outspoken critic of the colonels' junta, not supporting it. Greece will not be stable and flare-ups will continue and be more violent. He warned of Greece becoming "another Vietnam," and said that conditions are ripe for a Vietnam-type popular movement in Greece, with the US once again being forced to resign from the Council.

The Greek government will not be well-off by helping the US, and would ultimately result in a weakening of NATO.

Dover replied that people were wrong to think that the US would be hard-pressed to continue in its present fashion. The Greek army was being used more for domestic counterinsurgency than for fighting any external aggression. Dover said that pressure should be applied to the junta in the form of a joint NATO action on diplomatic, political, and economic fronts. Greece would be caught on the wrong side of a war of national liberation.

Tennis squad defeats Boston College, Colby

By Stu Traver

The MIT tennis squad easily disposed of the Boston College Eagles 5-4 and 7-2 on the home courts last week. But lost to the Wesleyan team 3-4 on Wednesday. Wesleyan improved their record for the season.

On the sidelines, Steve Cross never faltered on the losing side of the court. He came away with three victories and two doubles wins, including a three-setter. Freshman William Young tied a strong score with a win over the BC pair. In fact, he went west more than east in both sets of any of his doubles matches. "It gives me more court time," he has been known to say.

The Techmen showed strength at the top against Wesleyan, but Bricker and Blair were unable to pull out their third sets. The most surprising competitive developments, however, occurred within the team challenge system. Steve Cross was finally able to claim against William Young at the top of the heap, and Mike Schonberg won a close challenge match to take the last victory spot at number six.

The team's next home match is with Williams tomorrow at 2 pm.

**Errors cost Tech diamond squad loses 3**

You ought to see the engineer at work. The infield that plays baseball in Turkey, Iran, Khybar Pass, a hind teams from Boston State and Harvard. The infield, there's a 50/50 chance of winning with Buff Blair. In fact, he went west more than east in one set of any of his doubles matches. It gives me more court time," he has been known to say.

The Techmen showed strength at the top against Wesleyan, but Bricker and Blair were unable to pull out their third sets. The most surprising competitive developments, however, occurred within the team challenge system. Steve Cross was finally able to claim against William Young at the top of the heap, and Mike Schonberg won a close challenge match to take the last victory spot at number six.

The team's next home match is with Williams tomorrow at 2 pm.

Doppel struck out twelve and combined with Dennis Bardzacki for six hits and four RBI's to lead the win. The other good thing is that Bob Dresser and Joe DeAngelis have come out of their slumps and are playing closer to their potential. Both of the above accomplishments were shaded by Wednesday's 9-1 loss to Harvard. Doppel pitched well for the Techmen, but nine errors sealed the team's fate. To quote one of the Techmen's, "When there's a ground ball hit to our infield, there's a 50/50 chance we'll get the man out." The squad hopes to regain the team's fate. To quote one of the Techmen's, "When there's a ground ball hit to our infield, there's a 50/50 chance we'll get the man out." The squad hopes to regain the momentum.

In the Oberg Trophy Regatta, Harvard won the second place in the five school regatta. In the Oberg Trophy Regatta, MIT finished behind teams from Boston State and Harvard. The most surprising competitive developments, however, occurred within the team challenge system. Steve Cross was finally able to claim against William Young at the top of the heap, and Mike Schonberg won a close challenge match to take the last victory spot at number six.

The team's next home match is with Williams tomorrow at 2 pm.

Sailors 2nd in Geiger, Oberoi

With the four-day vacation making possible a wide variety of competitive events, the MIT sailing team was involved in several regattas, including a yawl meet at Coast Guard and the Oberg Trophy Regatta for the Greater Boston Championship.

The women's team was the only one to come away with a victory, as they finished fourth in a three-way tie scored three consecutive match race victories in the Boston University President's Trophy Regatta on Monday, to win over the BU entry. In addition to crowning for Kathy, Maria Rozutto '73, with Maas Ozolins '73 as crew, sailed to seventh place in a seven school, one division regatta at the University of Rhode Island on Saturday. The most surprising competitive developments, however, occurred within the team challenge system. Steve Cross was finally able to claim against William Young at the top of the heap, and Mike Schonberg won a close challenge match to take the last victory spot at number six.

The team's next home match is with Williams tomorrow at 2 pm.

The team's next home match is with Williams tomorrow at 2 pm.

The most surprising competitive developments, however, occurred within the team challenge system. Steve Cross was finally able to claim against William Young at the top of the heap, and Mike Schonberg won a close challenge match to take the last victory spot at number six.

Track team trounces Bates; Moore wins 3

The MIT track squad, showing considerable strength in both its track and field events, soundly defeated Bates 90-59 in a meet last Thursday at Briggs Field. Most of the running events were held as relays, due to a prior agreement by both coaches.

In the track events, MIT dominated Bates, taking seven out of nine first places. Only the mile relay was close, with the other races being decided shortly after the starting gun.

In the field, Brian Moore ’73 continued to give consistent performances, as he won the hammer throw, discus, and shot put. Good depth was seen as the team’s track and field events, with the next dual meet being against Bowdoin.

The team’s record is now 1-1, but the big Huskies were too far out in the track events, finishing 19’7” to Bates’ 5’10”.

When you have time to travel, don’t spend it all traveling

Eastern’s Air-Shuttle can get you to New York in about an hour. Flights leave for New York’s LaGuardia airport every hour on the hour.*

And you’re guaranteed a seat even though you only pay youth fare.

Boston-LaGuardia (7-10) Boston-Newark (7:30-10:30)

When sickness last week, faces defending eastern champion Harvard and Princeton this Saturday. MIT’s frosh heavies finished two lengths behind Northeastern Saturday, afterroweing a very close race for over 1500 meters.

“T’s rowed a fine race. They gave every single bit they had to give,” said Coach Don Sam. The frosh, a high-stroking crew than the vanity, opened up at 37 and then stroke Steve Bates settled into a racing best of 3:43-45 per minute. BU quickly faded as MIT and NU dualled for most of the 2000 meters. NU gained a 1-2-3 finish to make a big boost advantage on the Tech eight by the Harvard Bridge and stretched it to one length at the last 500 m. post. Then NU aped their up and pulled another length, finishing in 6:36.5. MIT, timed at 6:43.

“We rowed as though we had been rowing all day. We didn’t plan to be behind,” Coach Peter Holland explained.

ITU’s frosh heavy varsity finished third behind Northeastern and BU on the Charles Saturday. Coach Holland’s plan called for the Tech eight to stay as close to BU as possible over the whole 2000 meter course. That they did, as stroke free of the Tech ’73 led them at 33 beats per minute.

However, Northeastern, over-stroking at 36, was the surprise, winning the race by 5.4. Last year, BU was badly beaten by Yale, who just barely nipped BU previously. That’s why the Tech keyed on BU.

MIT had a smooth start, but fell off after the first 500 meters, where all three crews were within a boatlength. At the Harvard Bridge, BU was clearly in command, and BU opened water on MIT.

In the field, MIT made their big move and closed to within 3/4 length of BU at the last 500 m. post. In the final 40 strokes BU moved a length to 33 seconds, but the big Huskies were too far out in front and won with open water.

One of our Paulists calls it “home”...

Home is where the heart is. This is true for the Paulists, also—a priestly band whose vocation is to serve God and his people in any work, anywhere.

Whether the Paulist works in a college campus, a city parish or a remote corner of the world, he is serving.

The Paulist is ministering with words, deeds and sacrifice... and serving the needs of God’s People everywhere. He is meeting today’s problems with thoughts of those that will arise tomorrow.

That is the Paulist way. It isn’t easy but the worthwhile things of life seldom are.

If you are interested in learning more about the Paulist priesthood, write to:
