Sex series opens with anatomy & physiology

By Lee Giguere

The first of MIT's Human Sexuality lecture series was a dry and limited explanation of sexual anatomy and physiology.

The lecture, in Kresge Auditorium, was heard by a near-capacity crowd of 1200 people.

Dr. Alton Gattmacher, a professor at Johns Hopkins trained in gynecology and obstetrics, began his lecture with a "birds and bees" type of review of fertilization and mating in animals. He continued with a discussion of the human procreation.

At the conclusion of his presentation, Gattmacher expressed doubt about the merits of the lecture format for sex education. It would be better, he said, to use a "seminar format." Gattmacher commended MIT for its series.

Questions occupied about a half hour after the lecture. Gattmacher, who had stated that he didn't know "what you want to hear," supplied more specific information in his answers than in the main body of his presentation.

The Rossi Lubomitz Committee, which is listening to those wanting to enter Kresge attacking the lecture series with "continuing and maintaining the oppressive and sexist culture of American society." They also had a table set up to sell radical literature on sexuality.

Browning explains rent rise

By Harvey Baker

Several administrators from the Housing and Dining Office explained the new room and board increases for next year at a meeting last Thursday night in MacGregor House.

Present were Kenneth C. Browning, Assistant Director of Housing and Dining Services; David D. Kampf, Director of Stouffers, Inc., who oversees Stouffers operation at MIT; and Richard Sorenson, Associate Dean for Student Affairs. The initial presentation was made by Browning, with Cantley and Sorenson chiming in only to answer questions directed at them by students.

The three administrators had already been made aware of a petition campaign directed at MIT to lower the rates. Several groups of faculty and students to research ideas and develop a merit re-examined its budget. Additionally, they feel that MIT has been fortunate that the increases had been kept to the low level that they had vowed to students, who wanted to buy commons, for 21.995 'Intellectuals and Social Change.'

The essence of the discussion was questioning from disgruntled students. Many, said Browning, didn't know why the increases were as large as they were. The essence of the committee's function was that the students were forced to make changes that had been held to the low level that they had vowed. Costs, said Browning, are meaningful faculty or student opinion, they set the proposed calendar.

The department head makes the final decision on tenure recommendations that can be made, and this year the physics department felt it could make only two, Kleppner and Asoc. Prof. Walter F. Lewis. Apparently, Weiskopf's input into the decision will be "an agonizing one" to consider.

The department head makes the final decision on tenure recommendations, but, said French, he has many inputs from people both within and outside the department. Tight scheduling limits the number of tenure recommendations that can be made, and this year the physics department felt it could make only two, Kleppner and Asoc. Prof. Walter F. Lewis. Apparently, Weiskopf's input into the decision will be "an agonizing one" to consider.

Tenure asked for Kolenkow

By Alex Makowski

The faculty Wednesday afternoon voted on whether or not to make long- 18-year tenure ask for Kolenkow

Kolenkow's case is part of a series of such discussions to be held with dysm residential students have questions about the new rates.

$150 increase What the increases mean for a typical West Campus resident remains on a commons meal plan is that his room and board will increase $150 next year.

Present were Kenneth C. Browning, Assistant Director of Housing and Dining Services; David D. Kampf, Director of Stouffers, Inc., who oversees Stouffers operation at MIT; and Richard Sorenson, Associate Dean for Student Affairs. The initial presentation was made by Browning, with Cantley and Sorenson chiming in only to answer questions directed at them by students.

Letters to the Tech

Wellesley bus

To the Editor:

In response to the overcrowding on the MIT-Wellesley bus, the Housing Office has adopted the concept of having priority boarding. Considering the bus could be filled with people not necessitating the bus, the bus could remain free and those going to class would be protected. In the meantime students are encouraged to use private transportation to avoid heavily crowded times on the bus.

Commons Increases

To the Editor:

I am certain that almost all of the students would be willing to let the Commons increase prices if it meant that there would be additional space available to students. I estimate that between the dormitory and the Commons, the students would be willing to sacrifice up to $200 for the additional space. This would be a reasonable amount to charge. If the student body would be willing to sacrifice this amount, then MIT should increase the prices to the Commons.

James Silverson

Hermes Adding Machines

HERMES 109
A full-service, desktop adding machine designed to handle a full range of numerical computations, this machine incorporates all the features in its field and is designed to be versatile and easy to use. It is designed for the office, home, or school, and offers a wide range of features, including a full numerical keypad, a high-speed printer, and a large display screen. The Hermes 109 is available in a 5.12 and a 5.16 version, and can be used for both single and double precision calculations. Additions and subtractions are performed with a single keystroke, and the machine can store up to 1000 numbers. The Hermes 109 is packed with features such as a built-in printer, a high-speed keyboard, and a large display screen, making it ideal for a wide range of applications.

HERMES 309
Everything about this printing multipurpose computer with automatic carriage return and automatic paper feed will make it a highly efficient and economical business machine. This machine incorporates all the features in its field and is designed to be versatile and easy to use. Basketball downs WPI, Brown leads scoring

By Randy Young

In a game played at Worcester Polytechnic Institute on February 13, MIT’s varsity basketball team defeated the WPI squad, 66-51. Outshooting the opposition from the field by 5% and from the foul line by 14%, the engineers also held the edge in the rebounding department 34-30.

Harold Brown ’72 led the team in scoring, pouring in nine field goals and shooting eight for eight from the foul stripe for a total of twenty-six points.

In a memo to athletic chairman, Ed Kavazanjian, intramural swimming chairman, announced that the IM Championship Swimming Meet will be held on March 3, 4, and 6 this year. The trials will be held on Tuesday, March 2 and Wednesday, March 3, with the finals scheduled for Saturday, the 6th.

In an innovation introduced this year, the first twelve places will be awarded points, on the basis of consolation finals for places 7-12. This is intended to encourage participation and improve the chances of houses which don’t have two or three excellent swimmers.

Individual awards will be given for the first three finishers in each event, and there will be a team trophy for the team with the highest point total.

The list of events includes 200, 100, and 50 yard freestyle races; a 50 yard backstroke, a 50 yard butterfly, and a 100 yard individual medley, as well as one-meter diving. In addition, a medley relay and a freestyle relay, both 200 yards, will be offered. Each competitor may enter three events, and six names may be listed for each relay race. AAU rules will be in effect with regard to strokes and turns.

The trial races will begin at 5:30 pm on both the 2nd and 3rd, with warmups starting a half hour earlier. The finals on Saturday will begin at 12:30 pm.

All team rosters must be submitted to the IM Managers’ Office in DuPont or to Ed Kavazanjian’s mailbox at 526 Beacon Street by 12 noon on Wednesday, February 24.
