Coop rebate due Tuesday

By Mike McNamara

The Harvard Cooperative Society — the Coop — reports the highest rebate percentage in eight years when rebate checks are distributed next week.

The rebate has been set at 7.35 percent on the members' total purchases for the 1973-74 year, Coop General Manager Howard Davis said. The rebate percentage is the same for credit and non-credit members, he added. (See chart at right for comparison with past years.)

The checks will start Tuesday, Oct. 8, according to Davis, at each of the Coop's five stores. MIT Coop members will be able to pick up their checks at the credit counter in the Tech Coop, first floor of the Student Center.

Davis credited a dedicated group of people in the stores" for helping the Coop increase its sales over the last year and making the high rebate possible. He cited reduced shrinkage as one example of service from employees, and said that the loss to shoplifting last year was the lowest in recent years.

Recent economic problems have not hit the Coop as hard as they have other businesses, Davis said. Substitutions for merchandise that has been unavailable during petroleum and paper shortages have been accepted by customers, he said, and sales have remained high.

Davis said that the Coop would continue to expand its lines of merchandise, with "quality products at lower prices."

MIT Coop members might experience some difficulty in getting their rebate checks, Davis said, because the checks might be sent to the Harvard Store. In that case, there will be a one-day delay while the misplaced checks are recovered and brought to the Tech Coop.

Students OK despite strikes

By Mitchell Teichman

Students in dormitories have been getting along well despite strikes on campus among cooks and laundry workers.

Day-to-day tasks were not too much of a problem, according to a number of interviews by The Tech this week.

Dormitory officials, including house presidents and managers, concurred in that view, saying that students were coping well with the lack of services during the three-week-old strike.

The only unanimous opinion heard, however, is that the strike will not damage the relationships between students and their housemate employees.

A majority of students felt that neither MIT nor the strikers are totally correct, and many different opinions are heard as to who should yield in negotiations. "I don't think the workers will get a very fair deal," said one student. "I think the strikers are just trying to improve their working conditions," said one another.

One prevalent answer was, "I'm not an expert... but I'm not going to say anything that's going to raise my tuition." One student complained, "We only have a certain amount of time, and this is just a waste."

A surprisingly large number of people are unaware of the terms of the strike, and don't really care what the outcome is. One prevalent answer was, "I'm not an expert... but I'm not going to say anything that's going to raise my tuition."
Baker has no problems so far in 1st coed year

By Gerald Radack

Barker House has encountered no "problems" during its first year as a coed dormitory, according to James Moody '75, Undergraduate Association Vice President and former president of the dorm. "It's better than I expected," Moody says, "We're able to see all that interaction."

Moody estimates that 90 to 95 percent of the upperclass women and 20 to 24 women-living on the third and fourth floors of Baker during the first year of coed living, giving these floors a "mixed" character that satisfies both men and women, according to Moody, Baker has six floors, and about 360 residents.

"So far, I have found that the students are very free to do as they please," said Leslie A. Camy '77, who moved from McCormack to Baker this year. "I wanted to try coed housing and I had a lot of friends at Barker as well."

Another reason Camy gave for wanting to try coed housing was the proximity of Baker: "Senior House and East Campus are coed, but I didn't feel that I wanted to be as close to them as I am to Baker."

Mary Jo Doherty '78 told Tech in her introduction to Baker "partly because it was a process of elimination. The other places I liked better, but I felt that only Baker and Burton were left. I liked Burton better. So far she says that she has encountered no problems living in a coed house. "It has caused some sacrifice in life. If we were living in McCormack I would not have met as many people and I would have had a lot more friends."

I liked the homey atmosphere - the coed dorms were sterile," says Margaret E. Page '78, who added that the price was better. "I'd have to say I prefer a coed dorm," stated Edward S. Miller '78, although it did not affect his choice. "I didn't even know Baker was just going coed," he explained. "You get to know more men in a coed dorm so you can talk to people rather than as a dating relationship," he says.

Moody stresses this point also. "Coed living provides educational experiences to people that they would otherwise not get in college," he says.

According to Moody, Baker was the first MIT dorm to consider going coed. "He says that the proposal was written about six years ago and a lot of work was done. But there were not enough women then who were willing to move in, he said.

Since then, several MIT dorms have gone coed. "Last year early on, it became evident that there would be a lot of women (this fall) so we checked out the numbers and checked with the dean's office," he says.

The plan was finally approved last spring break, Moody says. "The big thing that surprised us is that we were able to get the women that we needed," he says.
President debate scheduled at MIT

By Roger Copeland
The MIT Debate Society will host the seventh annual MIT Invitational Debate Tournament being held this weekend, Oct. 4-6. Some 50 two-person teams from about 25 colleges and universities across the US will debate the topic, "Resolved: That the Power of the President Should Be Significantly Curtailed." Each team will speak for the resolution in four rounds and against the resolution in four rounds of the eight rounds of preliminary competition on Friday and Saturday.

The six teams which qualify for the four elimination rounds to be held Sunday in the Kresge Auditorium Little Theater will receive awards. The winning team will be chosen following the elimination rounds by a panel of judges which will include coaches from the 25 schools represented and some outside experts.

The preliminary rounds will be held in MIT Buildings 1, 3, 4, and 7, and the elimination rounds in the Little Theater. All will be open to the public.

According to Jack K. Segel '76, president of the MIT Debate Society, many outstanding intercollegiate debaters, some from as far away as California and Texas, are entered in the tournament, the first major forensics competition on this year's collegiate debate circuit. Past winners include coaches from the 25 schools represented and some outside experts.

The Gilman Fellowship of the Carnegie Corporation for the formation of special programs for the underprivileged is available to MIT students, and there are currently six Massachusetts schools carrying out studies on women in science. There are curricula available to MIT students, and the program's researcher, Mrs. Dorothy Bowe, Assistant Director of Financial Aid, offers to the schools the program provides for the formation of special counseling service, Kistia- kowsky said, "the program operates a little differently here, where most women students are already planning to enter fields in science and engineering."

Instead of setting up another counseling office, Kistia kowsky and the project's researcher, Mrs. Dorothy Bowe, Assistant Director of Financial Aid, offer to arrange a "trawling road show" to go to any interested dorms. These discussion groups would consist of MIT alumnae, professo rs, and other professional women.

Another major aspect of the program is that it has set aside funds to be used to provide internships to undergraduate women, to allow them to more fully explore fields in which they may be interested. There are only a limited number of
Dirty laundry
By Storm Kuffman
It is generally bad policy to air your own dirty laundry in a newspaper. However, I am so really, really ticked off at about 30 or 40 alumni and feel that their decision is so wrong, that I will make an exception.

My compatriots (not all of them) decided at our Wednesday night board meeting to cut off the UA News sections. The reason given was that the sections were not making money and that the UA claimed editorial responsibility for the Tech, which has been receiving calls from people wanting to know what it makes of the current events.

The Soviets are particularly uneasy over Kissingers future. They have developed a special relationship with him, which they want to continue. They respect him as a formidable adversary. But they have developed a trust in him that makes it possible to deal with him.

The decision was finally on whether or not to endorse former President Nixon. The reader who has followed the Tech weekly for some time will remember that it was the Tech which said that the other fellow's ought to be cut.

The cables from India, for example, report that Prime Minister Indira Gandhi believes her government may be a CIA target. And Greek leaders, according to the Department reporting that foreign leaders everywhere believe the CIA is also working against them.

If the doctors believe he is too ill to testify, our court sources believe Judge John Sirica is expected to study their diagnosis of Nixon's physical and emotional incapacity. But the judge has ordered independent medical examinations. Any cross-examination, they fear, would cause Nixon emotional collapse.

The President wants to trim $5 billion from the Nixon economic team, which they want to continue. They respect him as a formidable adversary. But they have developed a trust in him that makes it possible to deal with him.

The decision was finally on whether or not to endorse former President Nixon. The reader who has followed the Tech weekly for some time will remember that it was the Tech which said that the other fellow's ought to be cut.

Kissinger has a personal relationship with the key leaders - Soviet party leader Brezhnev in Moscow, Chinese Premier Chou En-lai in Peking, President Salis in Cairo, President Assad in Syria and Prime Minister Rahin in Israel.

To the Editors:
This letter was sent to The Tech as an open letter to "those on strike."
Your grapes are not against the students. Your grapes are not against other MIT employees. Your grapes are not against the management. Your grapes are not against the economic conditions. Your grapes are not against the issue of free speech. Your grapes are not against the issue of the disposal of garbage. Your grapes are not against the issue of the use of custodial services.

But whether you are right, wrong, or both, you, a fact which you avoid mentioning, have the right to work and cross picket lines, or (2) to continue to work against you as volunteer "scab" labor.

Those who decide on your contracts live by their contracts. Those who decide on your contracts have been party to this case at MIT. Those who decide on your contracts have the rights afforded all MIT employees. They have the rights afforded all MIT employees, and I have no wish to protect them.

As for your comments on the larger issue concerning the rigidness of the Tech, I say that you say that the "no wish but to protect" the rights of homosexual applicants or employees. Yet I find some curious discrepancies in what you say. You say that you have not been obtainable since many of your names. The fact that circumstances prevent you from obtaining more names, however, does not make them the less real - if anything, it makes them more real.

Mr. Wynne has said that, in regard to gay employees, "We do not know, do not ask that the issue be changed. Applicants or employees are homosexual. They have the rights afforded all MIT employees, and I have no wish but to protect those rights." Assuming that "we do not know, do not ask" are part of the situation is, however, not the case. What Mr. Wynne has said, in regard to gay employees, "We do not know, do not ask" is not part of the situation.

That you find mass circulation of our research is, indeed, from the point of view of the community are sufficiently out of the ordinary people could not understand, and would not accept, a very basic aspect of your activities.

To the Editor:
Following is a letter directed to President Jerome Warner, Vice President for Administration, and Provost Walter Rosenblith and signed by Joseph B. Smith.

To the Editor:
During the quit strike, our director has informed us that MIT and the striking union, SEIU Local 254, such as the failure of negotiations between the Institute and Personnel John Wynne, MIT Student Personnel Manager, and the MIT student organization, "the Tech," has a "positive" program - a strange, and I think insulting emphasis - for gay employees. As a matter of fact, this fear is so great that all the students are willing to let their ends be destroyed. The students are willing to let their ends be destroyed.

That you find mass circulation of our research is, indeed, from the point of view of the community are sufficiently out of the ordinary people could not understand, and would not accept, a very basic aspect of your activities. That is, in as much as you are a straight person, ever have been a homosexual, and that the striking union has placed a heavy burden on such lab and department buildings, both physically and psychologically, which are far from normal. Operation of the machine division of the Center for Research has been impaired. We are unable to continue our research, and are in a position of deciding between two augmentations: (1) to stop work and cross picket lines, or (2) to stop work and thus allow important research to continue.

The only way research can continue is for the administration to see that the students' demands are not totally abused by the administration. Here, we are demanding that the students' rights be respected and protected. Here, we are demanding that the students' rights be respected and protected.

As the students have not been able to agree to do so, the evidence that we have indicates that he has failed to carry out that, we call upon you to redress yourselves to this issue in such a manner.

Donald H. Elson, Jr.

Chairman, Pre-Medical Advisory Council

Gas dispute

To the Editor (To John Wynne, Boy Bye):
We have been observing the debate that has been developing with regard to republican employees on campus and feel that the time has come to make a few points.

We are perhaps the most concerned of all the students over the gas dispute, both by our very nature and by the fact that the person who tried to run the ad in Tech was a student, faculty, and staff.

As for the ad, we knew that it was not to be taken lightly, and we have been following it as closely as we are now.

In regard to the decision made about the ad itself, we are in complete disagreement with the arguments advanced by Mr. Byers, and I am certain that a person looking for a roommate and chooses to mention that he is gay is searching for a roommate who is not homosexual. We are in complete disagreement with the arguments advanced by Mr. Byers.

As for the people who have been party to this situation, we are perhaps the most concerned of all the people, and we have been following it as closely as we are now.

To the Editor (To John Wynne):
I have received your letter of September 15, 1974, and I am aware that you have not yet received from Mr. Byers the explanation of the incident referred to in his note of September 16, 1974.

If you have, at a straight person, ever had the misfortune to come across repeated assertions that you are illegal, immoral, and sick, and that no one would have anything to do with you, you are perhaps the most concerned of all.

As a heteronormous, you have been denied the freedom of speech to say that "ordinary people cannot understand, and would not accept, a very basic aspect of your activities."

As you have certainly done all MIT employees, and I have no wish but to protect those rights. Mr. Wynne, we are not free to do so.

As for your comments on the larger issue concerning the rigidness of the Tech, I say that you say that the "no wish but to protect" the rights of homosexual applicants or employees. Yet I find some curious discrepancies in what you say. You say that you have not been obtainable since many of your names. The fact that circumstances prevent you from obtaining more names, however, does not make them the less real - if anything, it makes them more real.

Mr. Wynne has said that, in regard to gay employees, "We do not know, do not ask" is not part of the situation.

Strike leaders charge libel in $4M suit

By Mike McNamara
A $4 million libel suit has been filed against MIT by two officials of the striking Service Employees International Union Local 254.

The suit alleges that Edward T. Sullivan, business manager of the union, and Joseph Sullivan, Union President, were libeled by T. Sullivan, business manager of the CIA, domestic surveillance, the tournament director, said University, University of California, that MIT has charged the union, and Joseph Sullivan, officials of the striking Service Union President, were libeled by T. Sullivan, business manager of the CIA, domestic surveillance, the tournament director, said University, University of California, that MIT has charged the union, and Joseph Sullivan, officials of the striking Service

Debate to be held here

(Continued from page 1)

 nauers have come from all parts of the United States and have included teams from Harvard University, University of California at Santa Barbara, and University of North Carolina.

Lawrence H. Summers '75, the tournament director, said that he expects the debate to cover many current issues, including Presidential emergency powers, the covert activities of the CIA, domestic surveillance, and foreign policy.

MIT coaches Joseph Angland '71, a Harvard Law School student, and Barry Rosenbaum '69, who is working for a private computer concern in Cambridge, will be assisting Summers with the tournament arrangements. Mark Sherman '77, treasurer of the MIT Debate Society, will be director of ballot collection for the tournament. He will be assisted by Steven J. Blotcky '77, Jed A. Fuhrman '77, Tom Mattison '78, and Richard S. Steinberg '77.

The suit also alleges, according to the Institute Report, that MIT was responsible for charges that appeared in a fake issue of the Report that appeared Sept. 23, and which said that strikers had vandalized Walker Dining Hall and had spread garbage in the Institute halls.

This report, which caused confusion and consternation among the MIT administration and students, was written by students who were incensed to MIT's Campus Patrol their involvement in the hack. Their case is now before Dean for Student Affairs Carol Eisenberg, who will decide whether the students will be punished.

Negotiations on a new contract to settle the strike, which entered its fourth week yesterday, have not yet been resumed. The last meeting between the strikers and the MIT administration was held Sept. 19 at the Boston offices of the Federal Mediation and Conciliation Service at the request of the rankers.

A sound truck on the MIT campus yesterday, apparently operated by union officials, told passers-by the employees were ready to continue their strike "until the snow flies" in their efforts to get a better contract from MIT.

Union officials had predicted earlier that the strike would last "at least a month." Another prediction was that the strike might last up to six weeks.

Meanwhile, although students have told The Tech that they are getting along well in dormitories without service employees (see story, page 1), many areas of the Institute have deteriorated noticeably during the workstoppage. The area around the Student Center and heavily-travelled walkways around campus have been littered with paper and trash that has not been cleaned up since the strike began.

Most of the MIT buildings have been well-maintained, however, with temporary measures being taken in several departments to ensure that offices are cleaned and trash removed.

Students in some dormitories have organized "clean-up parties" and work periods to keep halls and common areas in the dorms cleaned. Some student labor has been used in dormitories, but only in job classifications where MIT usually uses student labor.

The attitude of the students cleaning up dorms was expressed by one sign seen in Baker House: "It's not scabbing to clean up your home."

Shortage of capital threatens economy

(Continued from page 11)

the same rules, and not the rules of their home countries), and elimination of the 30% withholding tax on dividends and interest income earned by non-resident aliens from countries with which we do not have tax treaties (which include the oil-producing countries). He also noted that the tax reform bill as presently in the House Ways and Means Committee would eliminate this withholding tax.

According to Neemham, these reforms would encourage foreigners - especially the oil-producing countries to invest in the United States. Congressional concern over foreign takeover, however, has prompted two bills which would require extensive collection and disclosure of information of foreign investments, with specific stiff penalties for non-compliance.

Neemham called for "the development of a form of economic populism" to counter this, and Schaffer minimized the threat of foreign takeover, noting that it is apparent that foreign activity has slowed considerably in recent years.
Assistant Professor of Political Science Jeffrey Pressman, Professor of Government Richard Neustadt of Harvard, Sorensen, and Rev. John Crocker, head of the Technology and Culture Seminars.

The Presidency After Watergate

(Continued from page 1) outlined briefly on Tuesday and Wednesday evenings and in more detail on Thursday evening, would be to make the president more “accountable” through increased efforts on the part of Congress, the judicial system - particularly the Supreme Court - the press, and the people to expose Presidential actions.

The Congress has enough power over the president "to dispel the need to limit presidential power any further." Sorensen noted. The problem, he continues, is that Congress "has not had the guts" to use the controls at their disposal. Sorensen bitterly criticized the courts for their "institutional timidity," saying that "the Judiciary has thus far (with the notable exception of the Supreme Court decision on the Nixon tapes) contributed almost nothing in the area of presidential accountability."

"The press should intensify its "adversary position" with respect to the president in order to increase "its oversight function," Sorensen said. "But for the Washington Post and a few other newspapers," he exclaimed, "the press was actually quite slow in dealing with the real facts of Watergate."

Finally Sorensen spoke of the people "exercising moral restraint" when choosing the president. He urges people to more closely examine the character of potential presidents. Soresen does not accept the argument that the presidency should be weakened as a result of Nixon's extravagant usurpations of power, such as ordering the invasion of Cambodia. Powers should not be taken away, he asserts, that were never justifiably there to begin with.

"Nixon, Sorensen said, "failed in his drive to become a strong president."

"Had Nixon succeeded in getting what he wanted," Sorensen said, "a dictatorship might have resulted which would have made Mussolini look like mother goose."

"But Watergate reflects the weaknesses - not the strengths - of an administration working in an atmosphere of frustration - not power," he continued. "So let's not talk about dispersing presidential powers further to cause future presidents to look for new devices to achieve their ends in a new atmosphere of frustration."

Sorensen also rejected such proposals as allowing the president a single six year term, pluralizing the executive branch, or replacing our system of government with a parliamentary system. "None of these systems would have necessarily prevented Vietnam or Watergate," he said, emphasizing that we must approach the "political and operational problems" within the present framework to arrive at any viable solutions.

Sorensen's respondents in the seminar, on Tuesday Anthony Lewis, national correspondent for the New York Times, and Alan Otten, Washington Bureau Chief of the Wall Street Journal, essentially agreed with his position. Lewis declared that "the Constitution works better than any other governmental device.

Therefore, he said, "we should focus our attention on the character of the human beings in office." For example, Nixon, he said, "has the fatal characteristic of repeating his mistakes in a self-destructive manner."

Like Lewis, Otten felt that "we should be a hell of a lot more careful about who we put in the presidential office in the first place." He too was opposed to institutional changes but offered that the Congress hasn't used its influence over the president enough. "Congress gave Nixon too many wide grants of power," he said.

The seminar was sponsored by the MIT Political Science Department, the Technology and Culture Seminars and the MIT Press, which will be publishing a record of Sorensen's lectures as a book this winter.
We challenge you
to taste and compare!

Our standing challenge: taste and compare the good old-time flavor of Pabst with any other beer. Once you taste Blue Ribbon quality, you'll never go back to the beer you were drinking. Take our challenge. We know Blue Ribbon will come out the winner, every time.

Pabst. Since 1844. The quality has always come through.
Wives: MIT good for women

By Pat Foley

Discovering the stage that behind every successful man is a woman, Laya Wiesner proclaims, "Women have been behind and ahead of their husbands on many occasions for years."

Speaking before the Women's Forum, Wiesner, along with Margaret Compton, Catherine Stratton, and Betty Johnson told of their relationship to MIT women while their husbands - Karl Taylor Compton, J. A. Stratton, and Howard W. Johnson were presidents of the Institute.

The workshop on Women in Science and Technology held at MIT in May of 1973 and the book ensuing from this workshop were part of the effort spearheaded by Wiesner to urge all women to consider careers in science and technology. Wiesner is now considering the possibility of establishing a center to assure high school women of their "special place for women to be," adding that, "women have added immeasurably to the number of contributions in the last ten years."

MRS. COMPTON'S CONTRIBUTIONS

Compton, Mrs. Compton worked with the YWCA establishing guidelines for programs in career development and job training for university women, to show these vocational conferences for university women. To her, "these years were the most fascinating in my whole life." Straton was active with the Technology Magnet and the Tech Dames (now the Tech Wives Organization).

Johnson was in the president's house from 1966-1971. Her husband is currently Chairman of the Corporation.

Johnson saw the number of women students at MIT go from 248 in 1968 to 1061 today. She also saw the first woman Sloan Fellow in 1968 and the first two alumnae to become members of the Corporation. Despite the thorny political situation which existed at MIT while she was there, Johnson saw tremendous advances in the status of women at MIT.

Johnson views MIT as a "special place for women to be," adding that, "women have added immeasurably to the number of contributions in the last ten years."
Police Blotter

Police Blotter is a weekly compilation of Campus Patrol Activities on and off the MIT campus. Items for the Blotter are selected by the Patrol.

9-19-74
Report was received of the larceny of a brown wallet containing $15 and personal papers from a locker at the DuPont Gym.

9-19-74
Report of the larceny of a blue leather backpack containing $10 and personal papers from a bag on a bench at the Mass. Ave. and Windsor Sts. This backpack was taken from the bench by an unidentified youth.

9-19-74
The Campus Patrol investigated the larceny of $11 from a wallet that was left in an unlocked room at Ashdown House. The room was unoccupied for a period of five minutes during which time the theft occurred.

9-19-74
An IBM Selectric Typewriter was stolen from a room in the Sloan Building.

9-21-74
While the Campus Patrol was checking property at Main Ave. and Vassar St., a non-affiliated female reported that she was sexually attacked and robbed while hitch-hiking in the vicinity of Central Square. The victim was conveyed to the Campus Police Headquarters by the Patrol.

9-21-74
Report of the larceny of a portable electric typewriter valued at $100 from a room in the Central Square. The victim was a member of the Institute robbed while riding his bicycle in a darkened area on Oct. 9-21-74.

9-21-74
The typewriter was found in an unoccupied room at the Zeta Building.

9-21-74
The Campus Patrol reported recovering a battery of eight to ten youths attempting to steal the bicycle. Members of the MIT Community should be advised to utilize the main thoroughfares in traveling from the Institute whenever possible.

9-23-74
Report of the larceny of a Smith Corona Portable Electric Typewriter valued at $100 from a room in the Central Square. The typewriter was taken from the trunk room. Information on this theft forwarded to the Pawn Shop division of the Boston Police for possible recovery.

Middle East Restaurant

Tasty, flavorful, middle east dishes. In Central Square. Open original, homie style cooking.

Buddy's Sirloin Pit

39 Brattle St., Harvard Sq.
(located in Cardew's Restaurant)

Buddys Sirloin Dinner $3.25 - Chopped Sirloin Dinner $1.50

We use only USDA Inspected Western Steer Beef with no tenderizer, fillers, or coloring added (unlike the beef in some other restaurants).

Open 11:30 am - 9:00 pm. Closed Sunday

Let's talk about it
News, arts, features to appear on MITV

By Scott Hooper

News of interest to the MIT community is going to be broadcast in the lobby of building 7 every Friday from nine to five, according to MITV representative Mark Preissler.

At present, a pre-recorded twenty minute news program is repeated throughout the day, but eventual expansion into other areas is planned. "Specials, arts, and soap operas are all being considered. Basically, we want students to come up with ideas and we'll let them put them on, if possible," said Preissler. There are also plans to set up a second screen in the lobby of building 10.

In reference to the attitude of the station, Preissler commented, "The basic idea is no censorship, but as a whole philosophy, we're a service to the MIT community, basically. In that sense, we're like a network, nothing oriented exclusively toward any view, but covering every point of view."

There have been no commercials before, but the policy for this year hasn't been decided. The main conflict is that of "funds vs. artistic worth." If there are any, they won't be like commercial television, assures Preissler. Instead they would be of local businesses, such as pizza shops, and student filmed, with possibly one or two in between programs.

All programs will be completely student filmed, on location. For example, ideas for the parody of a soap opera include the life of MIT student and Wellesley student married to each other, possibly filmed at one of the MIT dorms.

MITV is a relatively young organization, completely student run, for students interested in video applications. Those interested in getting involve in any of the many facets of the organization, including directing, camera work, sound, business, production, editing, lighting, or acting, should contact Mark Preissler at 247-8355. No prior experience is necessary.

Solve your math problems as easy as T1.

Engineering, as nobody has to tell you, involves a lot of hard work. Including long hours of calculation and complex figuring where treadum can play hob with accuracy. So for you, Casio provides - not in the sky, but here and now. With two reliable calculators that can save you many an hour and many an error.

Jack Wood Trophy won easily by MIT

By Lila M. Kobylak

The MIT sailing team performed outstandingly this weekend and added the Wood Trophy to its list of accomplishments.

The Engineer team for the Wood Regatta was comprised of three co-skippers: freshmen, JV, varsity A and varsity B division. Each of the MIT divisions won first in its section, resulting in a cumulative score for the team as the nearest contender.

The Wood competition is a test of the depth of a team in its performance in past future years, as well as in the current year. This characteristic has been a hallmark of the MIT sailors since Mr. Wood began the regatta.

The MIT team was composed of (a-division) Chuck Tucker '75, and Paul Erb '76; (b-division) Bill Critch '77 and Larry Dubois '76; (JV) George Todd '76 and Steve Ryan '77; (freshmen) Gary Smith '78 and Wolsey Corwin '78.

The team also participated in the MIT-open Regatta, placing second above 15 schools while losing only to URI. The MIT team represented for this regatta were Critch, Sally Heusted '78, Todd, and Elijah Schmidt '77.

Total team scores in this regatta ranged from 24 to 280 points (URI) to 210 points (University of Virginia), but top four schools were URI (MIT), (Harvard), and Tufts (65). The MIT team's scores, which were under 100, were the highest.

MIT finishes one-two

in Bryar Park racing

By Dave Dobos

WPI upset MIT and RPI in route to winning the annual Engineers' Cup cross country meet last Saturday at Franklin Park. Worcester won with 24 points, MIT was second, scoring 38, and RPI followed with 69. It was the first time in the race's history that the Tech runners did not retain possession of the championship trophy.

MIT runners generally have had little trouble handling the team from WPI, but only two of the varsity squad Frank Richardson (1) 27:12, and Jeff Barratt (2) 27:27, managed to perform at their usual level. Matt Schmidt galloped to a second-place finish in 27:12.6, although he lost his second, third, fourth, sixth, and ninth for the victory.

It was a disappointing debut for the cross country team.

Although the season is young, the chances for a post-season trip to the NCAA championships suffered a definite hit yesterday. The momentum tomorrow, however, if it can pull off an upset against second-ranked Harvard in the varsity meet.

WPI upset MIT and RPI in route to winning the annual Engineers' Cup cross country meet last Saturday at Franklin Park. WPI won with 24 points, MIT was second, scoring 38, and RPI followed with 69. It was the first time in the race's history that the Tech runners did not retain possession of the championship trophy.

MIT runners generally have had little trouble handling the team from WPI, but only two of the varsity squad Frank Richardson (1) 27:12, and Jeff Barratt (2) 27:27, managed to perform at their usual level. Matt Schmidt galloped to a second-place finish in 27:12.6, although he lost his second, third, fourth, sixth, and ninth for the victory.

MIT finishes one-two

in Bryar Park racing

The MIT rowing team wrapped up its regular season of Sports Car Club of America competition this weekend with a clean two finish in the Showroom Stock Sedan race held at Bryar Park, New Hampshire. It was the top two finishes for the varity, with their times and meet places, are listed.

Frank Richardson (1) 25:12 T22.
Jeff Barratt (2) 27:12 T27.
Al Carpenter (3) 27:17 T27.
Mike Conner 28:45 T21.
John Krekelvis 26:30 T21.

WHAT GOES UP ... or so LCA's Rich Henige '75 discovered at he attempted to block a punt in football play. Latest reports indicate that Mr. Henige is still alive and walking.

Undefeated LCA downs FIJI

By Darwin Fichtenber

The second round of MIT's Intramural football program was full of tension as the two round winners, east of the oval teams coming to the field, with fire in their eyes and sweat on their brows, to lose this week's one-game winning streak.

On Sunday, the A-Friday league team was victorious, 16-0, in the Showroom Stock Sedan race held at Bryar Park, New Hampshire. It was the top two finishes for the varity, with their times and meet places, are listed.

Frank Richardson (1) 25:12 T22.
Jeff Barratt (2) 27:12 T27.
Al Carpenter (3) 27:17 T27.
Mike Conner 28:45 T21.
John Krekelvis 26:30 T21.
