

Plans for facilities at the Shiraz Technical Institute at Shiraz, Iran, have been completed, while MIT and Wentworth Institute faculty continue work on curriculum for the school under a contract with the government of Iran.

## Plans for Iranian school progressing on schedule

By Eileen Mannix

Plans for the development of a technical school in Shiraz, Iran are well under way at MIT and the Wentworth Institute of Technology.

MIT's involvement in the joint endeavor will be devoted to the development of an appropriate curriculum for the Shiraz Technical Institute, according to John McWane '71, Research Director of the project. While MIT is engaged in its Technical Curriculum Research and Development Project, Wentworth will be training several Iranians who will form the skeleton faculty for the school. Three Wentworth instructors are currently in Iran, teaching some fifty students in

temporary headquarters.

Architectural plans for the Shiraz Technical Institute were finished last week by Hugh Stubbins and Associates, Inc., of Cambridge. Flemings said the expected date for completion of the construction is September, 1977. There is a plan now under consideration, said Flemings, to use only solar energy in the operation of the buildings. This would provide a valuable lesson in solar technology, as well as demonstrate an efficient application of it.

The enrollment is expected to be 1000 students in 1980. When asked if this would be typical of class size thereafter, McWane

(Continued on page 2)

## IM's: unique in size, scope

By William Lasser

The intramural sports program is one of the few activities, with the inevitable exception of tests and problem sets, in which the majority of MIT students participate.

Over two-thirds of the student body has, at one time or another, taken part in IM sporting events ranging from football and softball to chess and table tennis.

Indeed, MIT's intramural athletic program is unique, if not among all American colleges, at least among those in this area. In size alone it far surpasses the programs of Harvard and Boston University. And in scope — with twenty different sports — it is unrivaled.

In fact, IM sports are just a part of a larger program, which includes intercollegiate athletics, physical education classes and facilities for unsupervised recreation, and which is catered to the student of average, as opposed to exceptional, ability.

The IM program is run entirely by students, with the help of David Michael, the IM advisor. "Besides playing," Michael explained, "students also make the administrative decisions, organize

the leagues, and referee the games."

The most popular sports are the "big three" — softball, football and basketball — followed by volleyball and hockey, in that order. Last year, there were over 100 teams and 1300 players in the softball program, and this year, basketball team entries jumped by almost thirty to 139.

Each sport, Michael explained, is divided into two or more leagues. The style of play in each is determined by the player's abilities and attitudes. In the A leagues, competition is fierce, whereas the B and C leagues exist for those more interested in playing than winning.

Most of the team entries are in C leagues, and now in the newly organized D leagues. For example, 75 of the 139 basketball teams this season are in either C or D leagues.

The IM program is not without its problems, however; the shortage of funds and facilities are the most pressing.

"Three or four years ago, our entire refereeing budget was under \$4000 per year," said Michael, "but now it is over \$10,000."

Most of this increase is due to the new pay scale  
(Continued on page 3)

## Presidential hopefuls organize at most colleges — except MIT

By Thomas Mayer

Less than five months before the presidential primary, Democratic presidential candidates are organizing on every college campus in Massachusetts — except MIT.

Seven candidates have set up offices in Massachusetts, but only one — Senator Birch Bayh, D-Ind. — has an organization at the Institute. Bob Gordon (Harvard '76), staff director for Bayh's Boston office said that Bayh's college organizations "are the backbone of our local Boston area operation."

Bayh has "organizations" — consisting of a coordinator and at least five to ten "strong workers" plus outside supporters — at six campuses in the area, including Harvard, Boston University, Boston College, Brandeis, and Wellesley in addition to MIT. This organizational effort paid off last night when Bayh spoke at Harvard to a crowd of over 600 people.

But if Bayh has a lead at the Institute, other candidates are matching the effort at other campuses.

Tom Driscoll, head of Utah Congressman Morris Udall's Boston office, said that the Udall campaign has "organized in 30 of the largest campuses in the state." In each of these campuses the Udall group is large enough to qualify as a student organization. Udall drew 500 people when he last spoke at Harvard. Workers for Terry Sanford, the ex-governor of North Carolina, have visited "every four-year college in the state" according to Sanford's Boston director George Vaughan. Vaughan said that Sanford has a fledgling organization at MIT.

Although Senator Henry Jackson, (D.Wash.), just opened his Boston office last month, his people have made "significant inroads" on college campuses according to Boston coordinator William Ezekiel. Finally, Fred Harris, former senator from Oklahoma, will "hit most large colleges and universities" according to Harris' Boston coordinator Gary Ford. Harris arrived in

Boston yesterday to speak at BU and Harvard.

The candidates appear to be organizing the same campuses. Almost all have organizations at Harvard. Bayh's office claims 20 workers at that university, and Sanford's office said that their Harvard organization is ready to be turned over to the national organizers. All candidates have people at Boston University and in the five-college area around Amherst.

For some candidates, such as Shriver, Udall, and Bayh, the Massachusetts primary will be crucial. For some competitors this is sufficient reason not to match organizations in this state: Carter's New Hampshire coordinator has Massachusetts students working in that primary but expects the Carter Massachusetts campaign to be "less massive" than that of other candidates.

On the other hand, Jackson's Boston coordinator plans an extensive campaign on campuses in Massachusetts. Ezekiel said that

Jackson has "more cash in hand" than all the other candidates put together, but that he plans to spend little of it in Massachusetts. Instead, the Jackson campaign will head for the campuses along with the rest — the president of the Harvard-Radcliffe Young Democrats is said to be a Jackson supporter — and Ezekiel expects that the Jackson campaign "organizationally will exceed every other campaign in the state — with regard to colleges, liberals, regulars, anything." Ezekiel plans a "very sophisticated campus program, with a training program for coordinators."

Methods range from the highly organized Jackson program to the Sanford campaign's more informal approach. Coordinator Vaughan said that the emphasis at this stage is on "identification" of workers, without much formal structure. Vaughan emphasized the "low key" character of the Sanford effort; "we're not trying to sell you a used car," he said.

## CPs seize gunman after Lobby 7 assault

By Mike McNamee

A gun-wielding assailant is being held on \$50,000 bond while MIT Campus Patrol and city police investigate the assault of two Campus Patrol officers in Building 7 Wednesday afternoon.

Joseph Doherty, 29, of Somerville, is being held on charges of assault by means of a deadly weapon and two counts of assault and battery for allegedly holding a Campus Patrol Officer at gunpoint and injuring another officer who attempted to disarm him.

Investigations by Campus Patrol, Cambridge Police, and "several other agencies" had yielded no motive for the incident, according to Campus Patrol Chief James Olivieri. An apparent suicide note, dated Sept. 30, was found on Doherty,

Olivieri said, and the Patrol chief speculated that "he might have wanted to do himself in."

According to Campus Patrol, Doherty walked up to Officer Clarence A. Henniger in the main corridor near Lobby 7 at about 3:45pm Wednesday, pulled out a .45-cal. automatic pistol, and told Henniger to "stand still." Forcing the officer against the wall in Lobby 7, Doherty told Henniger, "I want your gun," and ordered him to take off his belt.

Henniger tried to talk Doherty out of taking his gun, Campus Patrol said, but Doherty was "distracted and agitated" and told Henniger "I don't want to talk." Henniger then began to remove his belt.

Calls to the Campus Patrol had resulted in a bulletin going  
(Continued on page 6)

Football, from the lowly D Leagues to the powerful and prestigious A's, is the most popular of MIT's ever-popular IM sports.

UMOC candidates are (from left to right) Eric Black '77, Eric Brown '79, Rich Goldstein '79, Ed Schwalenberg '78, and Mike Dornbrook '76 (not pictured).

## UMOC contest begins today

By Margaret Brandeau

Campaigning starts today in the Ugliest Man on Campus contest, with five contestants vying for donations to the American Heart Association.

The candidates will be campaigning today through next Friday throughout the Institute. Alpha Phi Omega, which sponsors the contest, will also maintain a booth in Building 10.

According to David Anick '77, Project Chairman for UMO, "we can expect to collect \$2000 to \$3000." He said that the average amount of money collected each year in the contest has been about \$2200 each year, with a record \$3000 collected in 1973. He noted that, "the money raised has been pretty much steadily rising since the contest was resumed in 1966."

The contest had run up until 1955 when it was stopped because "the contestants were getting pretty gross," he said. One contestant that year took a bath in the nude in the Great Court and "the local police didn't like

this too much."

Entrants to the contest now have to sign a disclaimer which says, "I attest that I will do nothing in my campaign... which is not in the best interests of the Alpha Chi Chapter and the Massachusetts Institute of Technology, its employees, and its student body..."

Anick feels that "enthusiasm for UMO at MIT has definitely been increasing, both in the amount of money we get and in the amount of work candidates are willing to put in." He said that the number of candidates each year remains fairly steady. "We generally have 5 or 6 candidates who start out, but by the end of the contest usually only 1 or 2 or 3 are still strong," he said.

Candidates this year are:

— Ed Schwalenberg '78, who is running for his second time. Last year Schwalenberg upstaged other candidates by appearing at the APO office totally without costume. "I was so ugly they forced me to wear a fig leaf," he said.

— Eric Black '77, who calls himself the Multics I/O Daemon.

— Eric Brown '79.

— Rich Goldstein '79.

— Mike Dornbrook '76, LSC chairman, who is running on the platform that "raising movie prices to 75 cents is very, very ugly."

## MIT, Wentworth proceed with Iran school plans

(Continued from page 1) said it was too early to tell but that no plans for any further expansion are currently in the works.

According to Flemings, it is hoped that the Shiraz Technical Institute will serve as a model for the development of other Iranian schools. The educational level corresponds to the junior colleges of the U.S., and the education itself will be comparable to the two-year technical programs offered by Wentworth and other technical institutions.

The Technical Curriculum Research and Development Project is in no way connected with the training of the Iranian nuclear engineering students at MIT, Flemings said, adding that the association with Iran on this particular project has raised no controversy.

MIT's advisory role is to be fulfilled by two committees composed of MIT personnel. The joint MIT-Iranian Imperial Organization for Social Services

advisory committee members are Sloan School Dean William F. Pounds and School of Engineering Dean Alfred A. Keil, both ex-officio members, Merton C. Flemings, Professor of Materials and Engineering, Myron Tribus, Director of the Center for Advanced Engineering Study (CAES), and K. Nagaraga Rao, Senior Research Associate of the Center for Policy Alternatives (CPA).

The members of the Research Committee include Flemings, Prof. Herbert H. Richardson, head of the Mechanical Engineering Department, Bruce D. Wedlock, Director of the Lowell Institute School, and Dr. John McWane, Research Director.

# MIT intramural sports unique

(Continued from page 1)

for referees which was instituted last year, primarily because of the efforts of Michael S. Cuchissi '75. Now, a student can earn from \$2.25 to \$4.00 per hour, depending on his competence, as a referee or umpire.

There has been an increase in recent years in the total number of games played as well as in the total number of sports offered. In addition to forcing an increase in the officiating budget, this has led to problems in finding enough fields, courts and other facilities. Time to use the outdoor hockey rink is in especially short supply.

Last year, animosity was created when the Intramural Council ruled that all IM participants must hold MIT athletic cards. In 1974-75, there was an increase of 600 over the year before in the number of cards

sold. It is estimated that four hundred of these sales can be directly attributed to the IM regulation.

There has been of late a push for more involvement by women in the program. This year, McCormick Hall fielded a football team in D league. "We didn't expect to win," said one player - and they didn't - "but

we really only wanted to meet people and have a good time." McCormick also plays soccer and basketball, and has allocated a sports budget and elected an IM Chairperson.

By and large, students appreciated the IM program but tend to take it for granted. Said one: "It's better than doing problem sets."

Rob Mitchell

The planned MIT cable system will have thirty-four terminals at locations on campus.

## 'Open access' cable planned

By Mike McNamee

The MIT cable system should open on Jan. 5, 1976, and offer programming time for teaching materials, cultural events, and news broadcasts, a committee has recommended to President Jerome B. Wiesner.

The committee has also recommended that the Institute buy a large amount of equipment and offer it to students and departments at cost to hook into one of the 34 terminals on the cable system, which the group suggested should originally operate three channels for up to 16 hours a day.

The committee's report "has been received with favor and interest" by Wiesner, according to Professor of Political Science Ithiel de Sola Pool, who chaired the group. MIT administrators are now studying the group's proposals, Pool said, "to see how they can be implemented while minimizing the financial impact."

"We're going to try to get the system going, but remain within the Institute's budget," Pool explained. "That's going to require some hard choices about how to

best do things."

The group's report stresses the role of the cable as a teaching tool, pointing out that "the primary function of the MIT cable is a teaching device, rather than a pure mass medium." To make the cable useful to teachers, the report recommends building two-way capabilities for interactive remote teaching into as many terminal locations as possible.

A policy of "open access" for any MIT activity or group is urged by the committee, which stressed that the managers of the system should not serve as censors. "Activities using the cable should not be excluded because the production quality of what appears is below professional standards," the report also notes.

The report recommends extensive involvement in cable programming for departments, centers, and laboratories, suggesting that each department be required to appoint a cable coordinator. Student members of MITV, with assistance from the staff of the Center for Advanced Engineering Study, would maintain and operate the system.

To help with the finances of the cable, the committee proposed a request for an extension grant from the Sloan Foundation, which provided \$500,000 for the original cable planning and development.

## Theatre vs. circus: searching for the line

Can American writers produce theatre which is relevant to the average American?

The Department of Humanities tried to answer this question Wednesday when it presented "American Drama and American History: Explorations," a seminar featuring an afternoon discussion with playwright Arthur Kopit and an evening performance of *Calvin Coolidge Follies* by the Newbury Street Theatre.

Kopit, the author of several well known plays including the recently filmed *Indians* maintains in his latest work, *Lewis and Clarke*, that there should be no boundaries between stage and audience, or between actors and viewers. *Lewis and Clark's* "stage" consisted of a football field full of different platforms, enabling the audience to join in the play as they walked around, under, and on the platforms.

Multistage and interactive theater is not a new concept. The latest Broadway production of *Candide* uses 18 different playing spaces, and plays as old as *The*

*Skin of Our Teeth* relied for effect upon audience participation. But the new and innovative part of Kopit's work is to combine the two, presenting the show in a circus-like manner, juggling scenes and sequences.

This type of theater presents a great deal of problems for the actors. In the first place, it can be difficult to tell the actors from the audience. A lot of standard acting devices go out the window. Punches can't be pulled in a fight where the crowd is a foot away from the fighters, but people with good gymnastic training and a highly developed skill and timing can "fight" each other over a distance of twenty or thirty yards.

The basic problem with this new theatrical technique is that the lack of temporal cohesiveness makes it difficult to handle. Is it possible to have drama and not a circus side show when there is no clear cut temporal arrangement of scenes? Arthur Kopit, his actors, and a lot of people in Connecticut seem to think so; Boston may have a chance to see his work

this coming summer in City Hall Plaza.

Following Kopit's talk, the Newbury Street Theatre performed *The Calvin Coolidge Follies* in a mediocre fashion. The play, an adaptation of Geoffrey Bush's biography of President Coolidge, was excellent *per se*; cohesive and well written, it was funny enough to keep the audience's attention riveted to the stage; unfortunately, the actors have not produced the play since last summer. No lines were muffed, but Lee Cooke Cal-

vin's wife as Grace, walked through her part almost totally devoid of any style. Roy Wilson and Debra Abramhoff had a few fine moments in their humorous small roles, but the rest of the cast were out of touch with their parts.

Can American dramatists produce American theatre for the American people? Arthur Kopit and Geoffrey Bush are trying.

— William Schaffner.

## Wordless show not lifeless

The Spectrum Performing Arts Series is designed to bring professional-quality theatre and concert music to people who can't afford the prices of downtown theaters. The second of this season's Spectrum performances by the National Mime Theatre at Kresge Little Theatre showed the success of the Spectrum formula, as this company is one of the best in the United States.

Mime is the art of theatre without words. A few simple props and movement are used to develop the plots and characters. Costumes are white tights, the mimes are in whiteface, and every motion on stage must be directly involved with the development of the skit.

The National Mime Theatre show, "Beyond Words," was performed by Kenyon Martin, the artistic director of the company, and Drucilla Markle. Composed of a dozen skits designed to show the versatility of the actors, the show also spotlighted the range of subjects mime

can cover. The opening skit, for example, was concerned with an office worker who goes to lunch in a nearby park — a seemingly trivial topic, which was fresh and interesting when handled with a technique that exposes every nuance of movement to the viewer.

By far the best performance was that of Kenyon Martin in "Street Clown," where he mimed juggling, weight lifting, and tight-rope walking in one of the finest mime demonstrations seen recently in Boston.

Unfortunately, the show was seen by only a few people; the 4pm show played to less than half of the Little Theatre's small capacity. For a \$2 show on a Sunday afternoon, this is a poor turnout. So — just in case bad publicity was the problem — the next MIT Spectrum concert feature will feature the Musica Orbis Company at 7:30pm Friday, Nov. 21 in the Sala.

Roy Wilson, of the Calvin Coolidge Follies

## A 'fun' musical: Celebration

Another "pure entertainment" musical by Schmidt and Jones — the people who brought you *The Fantasticks* — opens tonight in Kresge for a two-weekend run as the MIT Musical Theatre Guild performs *Celebration*. One of the last of the old "formula musicals," with the familiar boy-meets-girl, boy-loses-girl, boy-gets-girl plot, *Celebration* is full of fun — and little else. The emphasis is on the "ritual" nature of the show, as actors parade on a huge platform stage a continuous pageant of color which embellishes an almost-nonexistent plot. The music is good, if

not memorable, and the choreography ought to gladden anyone who saw the MTG's *The Fantasticks* earlier this fall.

MTG's *Celebration* is directed by Norman Nuber, who played Higgins in *My Fair Lady* for the company last fall, and produced by Brian Rehrig, with music direction by Tom Gilligan, who doubles up to play Mr. Rich. The show will be performed tonight and tomorrow night, and Thursday, Friday and Saturday of next week.

"Some people say that today is the day when the winds will rise and blow the

world away," the opening song starts out. If you're in the audience, you'll probably be having too much fun to care.

— William Schaffner

# NOTES

## Gun-carrying assailant injures officer in Bldg. 7

(Continued from page 1)

out over police radio network and three officers were heading for Lobby 7 within minutes, the Patrol said. Sgt. William Lyons, a plainclothes investigator for the Patrol, came into the lobby from the main corridor. Seeing that Doherty was ignoring passers-by — “some people didn’t even notice,” as one student told *The Tech* — Lyons waved back the uniformed officers and moved behind Doherty.

Lyons then grabbed Doherty, who swung around and struck Lyons at the hairline with his gun, cutting Lyons. Lyons struggled with Doherty until the officers helped to take Henniger’s and Doherty’s gun from him. No shots were fired. Lyons was treated by the Medical Department for a cut on his forehead.

Campus Patrol said that although Doherty had taken Henniger’s belt, “he seemed to have decided to give it back just before Lyons seized him, telling

Henniger “I really don’t want it.” The note which was found on Doherty led police to speculate that he wanted to use the gun on himself, Olivieri said.

Doherty’s gun was found to be empty, Olivieri said. Cambridge Police took him to the city police holding cells, where he was charged and bond was set at \$50,000.

“This whole incident just shows the extent to which MIT’s corridors are extensions of the streets and sidewalks of Cambridge,” Olivieri told *The Tech*. “We find more and more that the problems of the city are our problems here.”

Olivieri said that Doherty had no affiliation with the Institute, and had “just walked in off the street.”

“All our officers played it coolly, and I’m very pleased with the way they responded,” Olivieri said. “We’re handling the further investigation with the help of the city and several other agencies.”

\* Discount tickets for the BSO Open Rehearsal on Wednesday, Nov. 19 are on sale now at TCA, Student Center Room 450, x3-4885.

\* Anyone who drove for the R/O Shuttle and hasn’t received money for expenditures may stop by the FAC Office and get reimbursed.

\* The Assistant Campaign Manager from the Committee to Elect Birch Bayh in 1976 will be answering questions for all interested on the race for the Democratic nomination from 4:30 to 6pm today in the Student Center Mezzanine Lounge. Free Admission.

\* The Activities Development Board is presently receiving applications for capital equipment funding for student and community activities until Nov. 17. Applications may be secured from Dean Holden’s office in room 7-101.

\* Monday, Nov. 10, is the day the Institute turns into a sun temple. About quarter past four, just before sunset, the sun shines directly through the main corridor and illuminates the west side of the chemistry building. There is a possibility of the effect occurring Tuesday since it is so close to the leap year.

\* Armageddon — A Vegetarian Hand Grenade in Four Acts, a science fiction radio theater in the tradition of Robert Heinlein, Firesign Theater, Swami Cinerama and Captain Sid Arthur, will be performed “live” by the East Coast Karnic Annex at 8pm Monday, Nov. 7 in Room 26-100. Free.

\* There will be a general meeting of the African Students Association at 8pm Friday, Nov. 7 in Room 4-231. For more information contact Emmanuel Bediako.

\* Physics UROP Symposium will be held Wednesday, Nov. 12. Scheduled talks are: “Fluctuations in Soliton States,” Patrick Diamond; “Phase Shifts in Plasmas,” Kelly Pan; “The Nitrogen Laser,” William Rapoport; “Crystalline Properties of Zn,” Gregg Higashi, and “A Rainbow Film,” Patrick Jamieson. Talks will begin at 3:15pm in Room 26-414. Refreshments.

\* The MIT Logarithms and the ConnChords, a women’s singing group from the University of Connecticut, will be performing a midnite concert on Friday November 21, in Lobby 7. Bring a blanket and a friend.

\* “The Odd God: Art Works,” an exhibition of paintings, prints, watercolors, and glass works by five New England artists, opens at the Boston Center for the Arts, 539 Tremont St. on Nov 20, from 5pm to 9pm and runs daily 11am to 7pm, through Dec. 5. Free admission.

\* Workshop on Sex and Love will be offered at 1pm Nov. 15 at Boston YMCA. A presentation geared to help individuals learn more about themselves, love and sex and how to overcome “love” problems, it will be conducted by psychologists at the Institute for Rational Living. Call 537-1756 for information.

\* Ford Hall Forum, America’s oldest platform of public opinion began its 68th year, Sunday, October 5 at 8pm, as WGBH broadcast a live address by Angela Davis from Northeastern University. Further scheduled programs include:

October 26: R. Buckminster Fuller world-acclaimed architect, engineer, inventor and poet. Topic: “The New Reality.”

November 2: Nora Ephron — journalist, author and a leader in the feminist movement. Topic: “Crazy Salad: Some Things About Women in the Age of Liberation.”

For more information contact: Carol Moreau, WGBH Radion, Boston, MA 02134.

\* Film sponsored by Department of Foreign Literatures and Linguistics: Moliere’s “Le Bourgeois Gentilhomme” (Comedie Francaise performance) at 7pm Nov. 24 in Room 54-100. English subtitles.

# You Want Hifi. Not Just Stereo.

hand, refers specifically to the way a system sounds. A high fidelity system will reproduce music with tonal quality, dynamic range, and volume that comes close to matching the original performance. Sometimes uncannily so. It takes good audio equipment to do it.

Here’s a real high fidelity system with a Cambridge Audio 1500 am/fm stereo receiver, Maximus 16 loudspeakers and the fully-equipped BSR 2260X automatic turntable for only \$199.

\$199

All stereo is not hifi.

It’s an important distinction to keep in mind when you shop for your stereo system.

Just because a system has two speakers, doesn’t mean it’s going to sound great. Or even good.

“Hifi,” on the other

The kind of audio equipment we sell at Tech Hifi.

So while all stereo is not hifi, all Tech Hifi stereos are. And surprisingly enough, many of our hifi systems don’t cost any more than ordinary stereo systems.

Tech Hifi systems start as low as \$199.

With the accurate, wide-range Larger Advent Loudspeakers, a powerful Nikko 5055 am/fm stereo receiver and a Philips GA 427 belt-drive turntable complete with base, dustcover, and an AudioTechnica 90E cartridge, this \$559 Tech Hifi system is as good as most people could ever desire.

# Police Blotter

(The Police Blotter is a report written by the Campus Patrol on crimes, incidents and actions on the MIT campus each week.)

A gunman was subdued Wednesday in Lobby 7 after disarming at gunpoint and threatening to kill an MIT officer on routine patrol. Surprising the officer as he entered Lobby 7 from the main corridor, the assailant pointed a .45-cal. automatic pistol at the officer's head, demanding that he surrender his pistol and radio, under threat of his life. Passersby notified Campus Police Headquarters by telephone, precipitating an immediate response by Officers to the scene. A detective sergeant dressed in plainclothes was able to get close enough to the assailant, now armed with both his own .45 and the officer's loaded .38 caliber revolver, to jump him from the rear and pin him against a wall. Joined instantly by the assaulted officer, a brief but wild battle ensued for control of the two pistols. The assailant was finally overcome as more officers arrived at the scene. Incarcerated at the Cambridge City Jail, the suspect was arraigned Thursday at the Third District Court and charged with armed robbery, assault with a dangerous weapon and assault and battery with a dangerous weapon. He is being held on

\$50,000 bail pending trial. The detective sergeant who jumped the gunman from the rear suffered head wounds when he was pistol whipped during the fighting by the suspect. He was treated by physicians and released from the Medical Department.

Patrol officers Tuesday arrested a suspect who repeatedly refused to leave the Student Center, although he had no MIT affiliation. At his arraignment at the Third District Court, it was discovered that the suspect was wanted by the Boston Police on charges of rape and robbery.

A resident of Burton House reported that at approximately 10:30pm Saturday, while he was conversing on the telephone, two unknown males entered his room, stole a camera valued at \$830 and fled.

A New House resident discovered the loss of a calculator valued at \$120 last Thursday evening. The machine disappeared shortly after the owner had given directions to two young men who told him they were "lost."

A two-way radio valued at approximately \$570 was stolen from the top of a sand urn at the Magnet Lab where it had been inadvertently left last Sunday afternoon.

Officers are investigating the

theft last Friday evening of a Texas Instrument calculator valued at \$90 and a small amount of cash from an unlocked room in Monroe Hall of East Campus. This is one of several incidents to take place in the East Campus area recently. Dormitory residents in the area are urged to be particularly careful to lock their doors and keep an eye out for strangers.

## BU bounces booters in brawl-filled game

By Gregg Fenton

The MIT varsity soccer team lost a very trying game Tuesday, 5-0 to Boston University. The score reflects little of the actual closeness of the game. MIT out-shot BU 23-11 and seemed to move the ball better, but luck was against the Engineer eleven.

The first half was played with a strong wind blowing in MIT's favor. The BU goalie was pressured by several good Engineer attempts, but MIT was rushing its shots, and as a result all were either easy saves or just wide of the posts.

BU was completing a very tough schedule with this game. Having learned to make good the chances that they got, the Terriers were able to score twice on their only first half offensive thrusts.

The officiating had not been of high caliber at first, and by the end of the first half MIT started getting some seemingly poor calls. A penalty kick was awarded BU on what appeared to be a clean play, certainly not "charging" as was called. This goal in the last minute of the first half was followed by a score in the first minute of the second half. A bad backpass was intercepted for an easy score and a 4-0

deficit.

Although badly behind, with the wind against them the Engineers continued to play well. BU showed no superiority as it got only five shots in the half. However, several players on both sides started getting rough as penalties were rarely called.

Certain BU players started to get people on edge, a reminder of last year's game in which five players were ejected. A fight began between Mike Raphael '79 and BU forward Phil Melman. When another BU player joined in, the fighting became more general. Both benches did not completely empty into the fray, but tempers were strained.

As had been the case all day, the referees did not take control of the situation. Raphael and BU defenseman John Gallagher were ejected and the last five minutes were started. BU scored again in the last minute, but no one really was paying attention.

Almost to be expected, another fight erupted after the final gun, ending with the BU team's retreat and Engineer Coach Walter Alessi calming down his players, bringing the situation under control despite repeated shouted threats from the Terrier squad.

MIT's Rob Currier '79 (1) attempts to outrace his BU counterpart to the ball as Engineers Jan Krakauer '77 (9), Steve Rice '78 (6), and Paul Culter '77 (7), look on in the varsity soccer team's 5-0 loss to the Terriers Tuesday at Briggs Field.

## Volleyball vanquishes URI, SMU

By Fran Lussier

The MIT women's volleyball team emerged victorious Tuesday night in a triangular match with Southeastern Massachusetts University and the University of Rhode Island.

The women had lost to undefeated Eastern Nazarene last week in a close match marked by excellent individual performances but lackluster team play. This broke MIT's eleven-game regular-season winning streak, but the team bounced back to defeat Boston College two days later.

Tuesday night, MIT opened

the three-team meet by topping SMU 15-5, 15-8, in a competent performance exhibiting strategic team play.

The following match against URI was much more competitive. MIT lost the first game easily, 15-3. Making the necessary defensive adjustments, the women fought back to win the second.

Spikers Linda Yester '76 and Kathy Mensler '77, with their aggressive net play, and setters Sue Coppersmith '78 and Lisa Albright '78 led the attack. A hustling defense was marked by timely blocking and diving saves by Lisa Jablonski '77 and Michelle Roybal '79. The intense

team effort led to the 15-12 second game victory.

Spurred on by the vicious serves of Karyn Altman '78 and the powerful hitting of Sheila Luster '78, the team hung on to take the third game, 15-9, and the match, in an emotional victory.

The MIT 'B' squad quickly defeated SMU, but lost to a tougher URI opponent.

MIT's record now stands at 8-1. The squad's convincing defeat of SMU and URI, the two toughest teams it has faced, shows that MIT will be a strong contender in the Boston city tournament coming up this Saturday at Boston State.

## Men sail second in Schell

By Chris Donnelly

Last weekend the men's sailing team had its finest performance of the season, placing second in the Schell Trophy for the New England Intercollegiate Sailing Association (NEISA) Fall Championship. The freshmen also fared well in their championship, finishing third in the Priddy Trophy at Yale.

The Schell Trophy field included eight schools from NEISA and four schools from other parts of the country. MIT hosted the two-day event on the Charles River in Tech Dinghies. Seven races were sailed in strong, gusty winds on Saturday. Due to the heavy wind, MIT lost most of its home advantage, and was buried in the middle of the fleet after the first day of racing.

In the final five races sailed on Sunday in light wind, MIT came back to finish second overall. Skippers Gary Smith '78 and Paul Erb '76 combined to place third in A-Division, Erb winning two of five races on Sunday.

In B-Division Bill Critch '77 finished in third place, only six points out of first, despite a capsize on Saturday. With victories in the last two B-Division races, Critch gained enough points for the team to overhaul Harvard for second place behind URI. Larry Dubois '76, Steve Gourley '77,

and George Orlov '78 crewed in the regatta. The top five New England schools qualified for the Atlantic Coast Championships to be held November 15 and 16 at Coast Guard.

The Priddy Trophy, the only freshman trophy regatta in the fall, attracted twelve schools. The regatta, sailed in 420's was also plagued by high winds on Saturday. The MIT team of Elliot Rossen with crew Bates McKee won the only race sailed on Saturday.

In order to sail a complete round robin, eleven races were sailed on Sunday. MIT placed high in the final three races to finish third for the series, behind host Yale and runner-up Bowdoin.

The varsity also competed in a Lark Invitational at Tufts on Saturday. Strong winds caused many capsizes, and two schools withdrew. Chris Donnelly '77 with crew Jordan Kreidberg '79 sailed in A-Division; Marty Lurie '78 with crew Spahr Webb '78 sailed in B-Division. MIT finished fourth overall in the eight-school field.

The women closed their fall season on Sunday in a Lark Invitational at Tufts, finishing sixth overall. Barbara Belt '77 with Sally Husted '78 sailed in A-Division. In B-Division, three different skippers sailed, Debbie Meyerson '79, Alanna Connors '78, and Carole Swetky '78,

## Sporting Notices

Starting today, all users of duPont Gym and Locker Room must present a pass card, obtainable at the equipment desk, to the gym supervisor at the gym door (weekends only). An athletic card will be required for identification.

Reasons for the new policy are to screen out non-MIT people, to reduce locker thefts, and to insure an efficient reservation program on the gym floor.

\* \* \* \*

This year's Class Day intramural crew competition will be held tomorrow. There will be a meeting tonight at 7:30pm in the Boathouse Lounge to draw lanes for boats in tomorrow morning's heats. All crews must be represented, but one individual can represent more than one boat.

\* \* \* \*

The IM Cross-country meet will be held Sunday. Registration will begin at 10:30am, with the race to start promptly at 11. The deadline for team entries has passed, but individual entries will be accepted until 10 minutes before starting time.

\* \* \* \*

The women's athletic department is looking for advisors from among the faculty and staff members of MIT for its varsity teams and clubs. The purpose of an advisor is to provide support for the individual teams, as well as someone to whom the team members feel they can talk. The only prerequisite is an interest in the sport.

An advisor would be someone a team member could easily contact any time during the day. In many cases the coach is hired on a part time basis, and, thus, is not always readily available.

Presently, MIT fields women's teams in tennis, crew, gymnastics, volleyball, basketball, fencing, sailing, swimming, and softball. Basketball already has an advisor, but if you are at all interested in advising any other team, please contact Mary Lou Sayles, Director of Women's Athletics, x4920, Patrice Desvigne, dl-8671, or Pat Schettig, 628-7471.

\* \* \* \*

The 1975 IM Wrestling tournament will be held Saturday, Nov. 15 in the duPont Wrestling Room. Team rosters are due by 5pm Monday in the IM Wrestling mailbox (W32-121).

There will be a seeding meeting at 8pm Tuesday at Sigma Alpha Epsilon, 484 Beacon Street, Boston. An athletic chairman or representative from each team is urged to attend.

\* \* \* \*

Proficient skaters are needed to teach members of the newly-formed MIT Figure Skating Club. Anyone interested in teaching or joining (prospective members must be able to skate backwards) should come to the club skating sessions, to be held from 11:30am-1pm every Sunday, beginning Jan. 16. For further information, contact Esther Horwich at dormline 5-8412.
