### OUTSIDE

Patty Hearst lost two battles in the first two days of her trial. In the first, US District Judge Oliver Carter permitted cross-examination of psychiatrist Louis West regarding Hearst's use of narcotics prior to her abduction. Prosecutor David Bancroft claimed his purpose was to show Miss Hearst was not the "naive school girl" the psychiatrist portrayed. In the second, the judge sustained prosecution's objection to a statement by another psychiatrist that the heiress did not lie about her part in the Hibernia Bank robbery.

Louise Day Hicks, Boston City Council President and head of anti-busing group ROAR, told a US Senate subcommittee that she supports a bill funding school desegregation in Boston, although she still opposes busing. ROAR has registered sharp opposition to the bill. Mayor Kevin White claimed that the requirements of the federal court-ordered busing plan cost Boston \$24 million, almost three-quarters of its operating deficit this year. The bill should bring \$10 million in funds to Boston, according to Presidential candidate Senator Henry M. Jackson (D-Wash.), its sponsor.

## MIT to investigate Sayles dismissal

By Mike McNamee

The MIT administration has launched an investigation of the firing of Mary Lou Sayles, Director of Women's Athletics, by the Athletic Department.

Sayles, who was notified on Feb. 13 that her contract as women's athletic director and gymnastics coach would not be renewed, has met with President Jerome B. Wiesner and requested a high-level look at the circumstances surrounding her dismissal.

Provost Walter Rosenblith will conduct the inquiry in his capacity as chief academic officer of the Institute. Sayles told *The Tech* that she might request a further investigation by Mary Potter Rowe, Special Assistant to the President and Chancellor for Women and Work.

Sayles told *The Tech* she was notified that her contract would not be renewed because "of incompetency - specifically, they didn't like my teaching and

coaching." She said she planned to challenge the evaluation, and charged that the firing was a blow at women's athletics at MIT.

"There is no way I feel like I'm incompetent - I simply can't accept that evaluation," Sayles said. "After this incident I would have to agree that MIT's commitment to women's athletics is slackening - I wouldn't have thought so Feb. 12, but now I'm wondering."

Professor Ross Smith, Director of Athletics, refused to discuss the reasons for Sayles' dismissal, saying he "never discussed matters of personnel with the press." He denied that the Athletic Department intended to do away with the position of Director of Women's Athletics: "There has never been a question of dropping the position - it's a permanent part of the Athletic Department organization," he said.

## MIT presidential poll to be held

"Campaign '76" is a new feature of *The Tech* which will present news on the presidential, congressional, and state elections being held this year. "Campaign '76" is written by members of *The Tech* staff.

There will be an Institute-wide presidential poll taken next Monday, one day before the Massachusetts state presidential primary.

Special Assistant to the Provost Dr. Louis Menand III and the Lecture Series Committee are co-sponsoring the event, which will take place between the hours of 9am-5pm at a specially designated booth in Lobby 10.

All those participating in the poll will be able to cast ballots for the Democratic and Republican candidates of their choice, with results being made available before the local polls open Tuesday morning.

Publicity for the event will be handled by LSC, and MIT student campaign workers for the various candidates will assist in distributing ballots.

● An appearance by presidential candidate

Fred Harris on the MIT campus scheduled for Wednesday was cancelled at the last minute by his campaign staff, according to Lecture Series Committee (LSC) officials. It was the third time Harris has cancelled an MIT appearance.

The talk was arranged on Tuesday as an outdoor rally but was later changed to an indoor talk by the Harris campaign, according to Mike Dornbrook, LSC Lecture Subdirector.

The Wednesday morning cancellation of the 1:30pm talk was attributed at the time to "meetings in New Hampshire with aides to discuss strategy," Dornbrook noted. However, Harris appeared in downtown Boston at 1:45pm on Wednesday. The campaign's explanation was that "TV coverage was better downtown," Dornbrook said.

Winston Emmons, press secretary for Harris' Massachusetts campaign, explained

that Harris finished his New Hampshire meetings sooner than expected and got into Boston at 2pm. "We cancelled on the basis that he wouldn't make it, and didn't want to create more confusion by turning it back on," he said.

Previous cancellations were for lectures on Feb. 4 and Feb. 27, and were made well in advance.

● "We have the possibility to reach out and offer an alternative to the present system," Peter Camejo, Socialist Workers Party (SWP) presidential candidate, told a sparsely attended gathering in 9-150 Tuesday night.

Camejo's appearance was part of the Lecture Series Committee's (LSC) Politics '76 series. Other speakers in the series have included Milton Shapp and Morris Udall, Democratic presidential candidates.

## Anti-meals tax petition circulated

By Gerald Radack

A petition drive supporting a bill to exempt Commons and fraternity meals from the 8 percent state meals tax is now being launched by fraternity and dormitory officials.

The bill, known as H.766, along with several other similar

ones, will be considered by the Committee on Taxation of the Massachusetts legislature on March 8.

Associate Dean for Student Affairs Kenneth Browning told *The Tech* that he hopes to be able to present the petitions to the chairman of the taxation

committee before the hearing.

The Dean's Office has also sent letters to parents of students who reside in Massachusetts and to fraternity alumni corporation officers urging them to write to their state representatives in favor of the bill introduced by Rep. Barbara Gray, D-Framingham.

Browning noted that although he coordinated the effort, the petition was written and is being circulated by students.

"Inter-fraternity Conference put the petition in fraternity mailboxes, along with a cover letter," IFC Chairman Mark Suchon '76 stated. The petitions should be returned to him by 5pm today, he said, and until then "I'm not keeping tabs" on the number of signatures obtained.

Brian Hughes '77 said that petitions had also been handed out to dormitory presidents.

Hughes said he is hoping to get the signatures of 80 percent of the dormitory residents. "We are trying to walk through and knock on every door."

Neither Hughes nor Undergraduate Association President Lee Allen '77 knew how many dormitory residents had signed the petitions.

Even if the efforts to amend the tax law ultimately fail, the Institute will continue to "chase down every possibility" to get an exemption for college meals, Browning asserted. "If we lose this, we might try a test case." Browning said he knew of "at least two" fraternities that would be willing to withhold meals taxes in order to bring the matter to court.

"This is one of the few cases where we can save the students some money without having to figure out where in the Institute budget we're going to make it up," Browning noted.

Dave Green

# Camejo: disband FBI and CIA

(Continued from page 1)

Camejo said he would abolish the FBI and CIA as president and "let them work for a living." He accused both agencies of harboring criminals, noting that "if the FBI and CIA were law enforcement agencies, the first thing they would do is turn themselves in."

Camejo cited recent disclosures about the FBI's Counter Intelligence Program (COINTELPRO) and the CIA's alleged attempts to assassinate foreign leaders and CIA's alleged involvement in domestic spying to prove his charges.

Later in the two-hour speech, Camejo called for "the formation of a labor party to fight for human needs." He said a planned economy, democratically run, was the only hope for the country.

• "We're going to have full employment," presidential candidate Morris Udall said, even if it causes increased inflation. Udall said that unlike President Ford, who he charged is "fighting inflation on the backs of the poor," he would have Americans "change to a leaner life style that would give us more work and stable prices."

The Democrat from Arizona also announced that he would like to "restructure the oil industry - break 'em up, make 'em compete again." Rather than filing an antitrust suit, which he noted might take ten years, he would "make companies divest by law - make it illegal to be in refineries and production or production and retail."

Udall said he favors a similar approach for the automobile industry, noting that one company controls many competing forms of transportation. "General Motors makes most of the locomotives and buses, and they even bought up trolley companies."

Attacking the Ford administration on conservation, Udall

charged that "you've got to go back to Warren G. Harding to find an administration as insensitive" in environmental issues as the present one. He asserted that "Gerald Ford doesn't even know what you're talking about when you talk about saving the land."

Udall advocated a reduced defense budget, stating that "we have 8000 nuclear weapons; one tenth of that would be enough to scare anybody."

Former Special Prosecutor Archibald Cox, who has endorsed Udall's candidacy, introduced the candidate, whose talk before a capacity crowd in Harvard's Sanders Theatre, was sponsored by the Harvard Law School Forum.

# Gardner calls UN inadequate

By Tina Krontiris

"It is necessary to build up more effective international institutions," according to Richard Gardner, professor at the Columbia Law School and former Deputy Assistant Secretary of State.

"I believe that the institutions in existence are inadequate or ineffective," Gardner told a Center for International Studies audience. But most diplomats don't want to make changes in the structure, he said, citing the fact that a review group considering United Nations restructuring with which he worked was not allowed to seek answers outside the existing world organizations.

He added that the urge to create a new organization outside the UN is characteristically

American - other countries don't feel the same urge. "We would feel lonely outside the UN," Gardner remarked.

Summarizing the proposals he has submitted to the State Department and the UN as head of the State Ad Hoc Committee on the UN, Gardner said that the US should make use of multilateral diplomacy and should develop stronger relationships with the developing countries. The US must treat the developing nations, which constitute three-fourths of the UN voting power, as individual countries with different interests - not as a group - Gardner said.

In addition, he proposed that existing international institutions be reviewed, with an eye toward strengthening those with potential, and that a coalition of

like-minded countries be formed.

Gardner, who also has worked with an international group considering UN reorganization, told the audience he recommended a "concentric circles" approach to decision-making in the UN. According to this method, an issue can be taken out of voting until the parties involved have met with a chairman and reached an agreement.

Gardner also proposed that the UN centralize much of its disparate activities be pulled together into a central headquarter, that funding groups like UNICEF should be consolidated, and that the international body draw more heavily upon experts in specialized fields when considering technical issues.

The 10 to 12 MIT international affairs experts present at the talk challenged Gardner's proposals, asking how institutional changes could be made and how he would deal with political obstacles involved. One of the listeners told Gardner he found his proposals only "seemingly pragmatic."

## notes

\* The concert of electronic and computer music scheduled for 8pm tonight has been rescheduled to 8:30 due to publicity mistakes. A panel discussion on technology and the arts will follow the concert, which will be held in Kresge Auditorium.

\* MIT GOJU Karate Club holds meetings Monday, Wednesday and Friday, 7-9pm, in Student Center Room 407. Call 536-1830, evenings.

\* The charge for cashing personal checks in the MIT Cashiers Office, Rm 10-180, will be increased from 15 to 20 cents on Monday, March 1. The 5-cent increase is needed to offset increased check processing costs in the Comptrollers Office.

\* The annual fine arts show by junior and senior classes of Art Institute of Boston will be held in the MacIvor Reddie Gallery, 700 Beacon

Street, Kenmore Square, from Tuesday, March 2 through Friday, March 12. The Gallery is open to the public on weekdays from 10am to 5pm.

\* The MIT Concert Band will present a concert of contemporary band music at 8:30pm Saturday, March 6, in Kresge's Auditorium. The concert is open to the public, free of charge.

\* Jazz Celebrations will present Michael Gregory Jackson, guitar & voice, with Stan Strickland on Woodwinds, at 6pm Sunday, Feb. 29 at the Emmanuel Church, 15 Newbury Street, Boston. Donation: \$1.50.

\* The MIT/Wellesley Upward Bound program will present a benefit concert at 8:30pm on March 5 at Jewett Auditorium, Wellesley College. The concert will feature the the Wellesley Ethos Choir and the Ebony Singers from Wesleyan University.

# Industrial Liason Program expanded and revitalized

By Rich Newcome

A new revenue-sharing scheme involving MIT's research community with industry and a drive to increase the number of industries working with the Institute have revitalized MIT's Industrial Liason Program in recent months, according to ILP officials.

These innovations, along with the appointment of a senior faculty member to head the program — a sign of increased priority for the program — have brought about a 25 percent increase in ILP membership in the last 18 months.

The program, which has worked since 1948 to make MIT's research expertise available to industry, is working on expanding membership — and revenues — to counter the Institute's budgetary problems. ILP generated \$1.28 million in unrestricted fund support for MIT last year, with an operating budget of about \$500,000.

The drive for increased membership came as ILP institutes a plan to share the revenue gained from industrial members with on-campus researchers. Under the plan, 10 percent of the revenue from new members is given to faculty and staff members to supplement their research funding. In return, the researchers agree to participate in ILP's information gathering and dissemination, industrial workshops, and other activities.

"They (the researchers) encourage membership among industrial corporations and get extra money for their students and research projects at the same time," said Eric Johnson, an ILP officer. "Everyone concerned benefits."

The membership drive also coincided with the appointment of Samuel A. Goldblith, Underwood-Prescott Professor of Food Science, as Director of Industrial Liason in September, 1974. Goldblith is the first senior faculty member to head ILP in several years. Johnson said: "He is interested in several different industrial fields in the Liason Program, and I think the office's recent record reflects his active leadership."

The two changes have apparently had an effect. ILP's membership has grown from 96 companies to 120 firms in 18 months, a 25 percent increase. Each company pays a fee to be put in touch with MIT's \$160-million-a-year research community.

The program provides "an easy and convenient channel of

communication between the two," Goldblith said. "The character of MIT research is such that it complements, yet differs from, any one company's research."

The ILP office provides several services to its members. A directory of current research, the only complete summary of MIT research programs, is published by the ILP and is available only to members. Over 1800 research projects are listed in the directory, which is updated every year.

Also, a list of publications is mailed each month to members listing 60 to 70 publications which can be distributed to interested members prior to appearance in the journals.

The office holds more than 20 one-day symposia and half-day seminars on major research efforts at MIT each year. The symposia are detailed programs supplying information about various fields of research.

Presently the program is actively pursuing members in Japan, Latin America, and Europe to supplement the 18 foreign companies that are already members. "However, the office has no immediate plans for expansion of staff," said Johnson. "In fact, our clerical staff was cut back a short time ago to increase productivity."

# XEROX

# Police Blotter

A wild cross-campus chase Wednesday afternoon ended in the apprehension and arrest of an alleged burglar spotted in a west campus dormitory room. At about 1:00pm a resident returning to his room spotted an intruder just emerging from the room of a neighbor. The intruder bolted and ran, the resident hot on his heels. Others quickly took up the chase which led in the direction of Massachusetts Avenue. Officers on patrol spotted the running, shouting residents, and themselves converged on the area. The suspect disappeared from view for a few moments only to be spotted again by the officer on duty at the Bursar's Office. The chase on again, officers managed to box the suspect in at the Killian Court, where overcoming a brief but spirited resistance they managed to subdue the suspect.

Transported to the city jail, he was later arraigned at the Third District Court on charges of breaking and entering in the daytime, possession of burglary tools, and larceny. Trial date will be set by the court at a later time.

There have been several other thefts, including the larceny of a briefcase valued at \$75.00, and attempted thefts in the Sloan School area of late. A young man, 18-20 years of age, 5'7"-5'8" tall, usually wearing dark clothing has been spotted in the area of several of these incidents and may be involved in them.

A lone pedestrian on Amherst Alley was surrounded late Saturday night by six young men who threatened to harm him if he did not give them his money. The victim gave over his money as demanded, but this failed to satisfy the hoodlums, who ran off in the direction of the Mass. Ave. Bridge only after removing from the victim the watch on his wrist.

The Lost and Found Office of the Campus Police has accumulated a number of college and

high-school class rings, from a variety of schools, which have gone unidentified and unclaimed. They include three MIT Brass Rats. Anyone having lost a school ring in the MIT area is encouraged to visit Headquarters during the normal business hour (when the Lost and Found Office is open) and ask to speak with Sgt. Leo Balzano.

Understand you might also see an old Humphrey Bogart movie during some of those times.

Take a look. He might convince you.

Might even convince me!!

Layne Carlough  
Class of '77

P.S. If after watching . . . and thinking . . . you want to get involved in next Tuesday's primary by helping Jackson at the polls, call! 523-0710.

Or, go to 152 Bowdoin Street (Jackson Headquarters) 8am, or after, this Tuesday.

Or, just go to some polling place Tuesday and offer to help . . . somebody!!

## Gymnasts edge UVM on meet's last routine

By Paul Bayer

The MIT men's gymnastics team edged Vermont 143.65 to 141.85 in a meet held last Tuesday. Bojan Petek '79, the last man in the last event, scored a 5.65 on the high bar to give MIT the win. The narrow victory raised the team's record to 3-5.

The meet probably seemed like a runaway to the spectators as MIT built up a lead of 9.75 on the first four events. Wes Taylor '76 led the horsemen with 7.1, and John Felleman '79 took second. The Tech gymnasts also took 1-2 on rings with Jon Johnson '76 scoring 8.1 and Jack Smith '76 scoring 6.7.

the event, though, with less spectacular but better executed vaults. This trick-versus-execution contrast showed up in all events.

On parallel bars UVM started to cut down on the MIT lead, but David Lu '77 took second and Petek third to hold the UVM margin on the event to three points. So, beginning the high bar event, it was MIT up by 6.8. After two scores it was MIT by 1.75. Lu held his own against the UVM gymnast lifting the margin to 1.9. Finally, Petek's routine clinched the meet.

David Lu lead the MIT scoring with 38.7, Bojan Petek scored 26.75, and Jon Johnson scored 18.9. The team has their last dual meet Saturday at home against New Hampshire. They then travel to UNH on March 7 for the New England Championships.

The next event, vaulting, illustrated the difference between the teams. UVM was big on tricks as evidenced by the Sukahara vault by Bliven which scored 8.45, the high score of the meet. MIT was able to win

## foul shots

By Glenn Brownstein

"Hockey madness" begins this week. For the uninitiated that don't know what I'm talking about, it's time for the annual Eastern Massachusetts schoolboy hockey tournament, involving the top 50 high school hockey teams in this part of the state.

There will be 19 Division 1 (larger enrollments) and 32 Division 2 (smaller schools) competing in this year's tourney, and they should provide hockey buffs in this area with a lot of excitement in the upcoming two weeks.

In the past few years, unfortunately, excitement has not been confined to the local rinks where the tourney is held, but has spilled out onto the street, resulting in many ugly and malicious incidents.

MBTA trains have been thoroughly vandalized by disappointed, disillusioned, and ecstatic students either celebrating or taking out frustrations. There have been bottle-throwing incidents inside Boston Garden, and altercations outside the North Station arena.

Only two years ago, virtually all the games were held either in Boston Arena (the quickly-decaying but still usable facility near Symphony Hall) or in the Garden, but the afore-mentioned problems caused the Secondary School Principals' Association (the tournament sponsors) to move the championships entirely out of the Arena and confine the Garden's participation to the quarters, semis, and finals. Other tournament games are now held in suburban rinks, where the possibility of violence is lessened by relative inaccessibility and school-run transportation.

Last year, the policy worked, resulting in a general abatement of hostilities, and let's hope the trend continues. The next two weeks should provide some excellent hockey for local fans, and it's a pleasant, inexpensive way to see the schoolboy game, which compares favorably with anything here at MIT except the varsity.

A sprawling save by FIJI/Baker goalie Dave August '76 fails to bother LCA's Paul Thompson '79, who is about to push in the rebound and give Lambda Chi a 1-0 A-league win over FIJI/Baker. The game was apparently tied in the final minute, but the goal was disallowed, preserving LCA's win.

## Roundup

# W BB in state tournament

By Glenn Brownstein and Wendy Irving

Women's basketball (10-8) topped Bentley in overtime Tuesday night in the Cage, and adding to the team's elation was the announcement Thursday that the squad is one of sixteen invited to the Massachusetts Division 2 state tournament in Worcester next weekend. MIT's first game will be against Worcester state Thursday, Mar. 4 at 8pm.

MIT's hockey (7-9-1) team dropped to "club" status at the beginning of the season, the point being that the squad members might taste victory for a change. After two winless years, the team has improved dramatically, holding its own with almost every team on its schedule and playing some very exciting hockey. Tuesday night, the icemen edged Fitchburg State, 4-3 in a come-from-behind overtime win.

Jim Paulsen G scored a hat trick to lead the Engineers, tying the game in the third period and then notching the game-winner midway through sudden-death overtime. Captain Carsten "Wheels" Mortensen '76 tallied MIT's first goal. The team meets Tufts today at 4:30 at the rink.

Last week, the hockey squad split two contests, dropping a tight game to Nichols, 3-1, and topping Clark for the fourth

time this year at home Saturday night, 5-3. Nichols clinched its victory with a goal in the final minute, one of the few times it beat MIT goalie Dan Costa '78, who made 57 saves, a season high.

Women's swimming (3-5) defeated Bowdoin last Saturday by a score of 76-44. Lann Salyard '78, Tina Kangas '78, Peggy Page '78, and Wendy Irving '77 all gained two firsts in the meet, with Barbara Thornton '77 adding one race win, and both relay squads also emerging victorious. The team completed its season last night against Brandeis.

Varsity track scored six points in last weekend's Easterns at Tufts, as Rich Okine '77 remained undefeated in the 45-yard hurdles with a victory in that event. The Engineer two-mile-relay team of Jaxk Reeves '77, Barry Bayus '79, John Dillon '78, and Joe Egan '77, while finishing out of the scoring, nonetheless set a school record with an 8:01.4 time.

Okine and the relay team compete at Tufts this weekend in the New Englands, and Okine will travel to Princeton March 6 for the ICAAAA Championships.

Tuesday night was "Alumni Athletics Night" at MIT, and the 75 or so alumni present saw an old familiar sight — that of a Harvard team defeating the En-

gineers. Varsity wrestling (12-5) wrapped up its dual meet season by losing to the Crimson, 26-11, in perhaps its worst performance of the year.

The Engineers, coming off a disastrous 39-8 loss to powerful Springfield, could do very little right against its Cambridge neighbors, winning only two matches, and drawing one.

Gary Spletter '79 scored a dramatic win at 150, taking down Kelly Jensen with just six seconds remaining to, pull out a 3-2 victory, and mountainous Erland van Lidde de Jeude '76 lifted Harvard's Kip Smith off the mat and then dropped and pinned him for his 13th win of the year. Erland took just 22 seconds to dispose of Smith.

Bob Gerke '78 became the first person to roll a perfect 300 game at the MIT Student Center bowling lanes on Saturday, Feb. 14. The MacGregor resident, who averages about 175 normally, bowled his first 300 ever.

Men's fencing (12-1) trounced Brandeis, 17-10, Tuesday night at MIT. The squad travels to Fairfield this weekend for the New Englands, which MIT has won for the past nine years, and then journeys to Navy March 5 for the Intercollegiate Fencing Association championship, where the foil team will attempt to retain the "Little Iron Man" for the third consecutive year.

MIT's 150-pound wrestler, Gary Spletter '79, attempts to fight off Harvard's Kelly Jensen in the wrestling team's 26-11 loss to the Crimson Tuesday night. Spletter was one of two victorious grapplers, taking down Jensen with just six seconds remaining to pull out a 3-2 win.

Mark James
