Concourse proposes to become part of EE

By Bob Wasserman

The Concourse program has submitted a proposal to become a permanent program under the jurisdiction of the Electrical Engineering Department. Concourse was created as a temporary program in 1973 as an alternative to the traditional freshmen seminar curriculum with the stipulation that after five years the program would be reviewed to negotiate its future status. This spring a subcommittee of the Committee on Educational Policy (CEP) evaluated Concourse along with the Experimental Study Group. The CEP concluded that Concourse must remain a temporary program administered by CEP during the 1976-77 academic year. CEP reported that Concourse must "find an appropriate administrative department" by the end of the 1976 fall semester or it will not gain permanency.

Professor of Electrical Engineering David Adler said he was "optimistic" about the possibility of Concourse gaining permanent status, possibly by the spring turn. Adler and Professor of Electrical Engineering Jerome Lettvin are the new directors of Concourse for 1976-77. Adler has taught for several years in the Concourse program. Lettvin also is experienced in Concourse and currently is on the program's faculty. Concourse did not find a department interested in overseeing the program until the summer, when the Electrical Engineering Department expressed an interest. The EE Department at first planned to replace much of the teaching staff with its own faculty, according to Assistant Provost Hartley Rogers, Jr. He further noted that EE later agreed to leave the Concourse program unchanged after discussion with the CEP.

Both the Provost's office which had been working with Concourse to find a permanent home for the program, and the CEP look favorably upon EE as a home for Concourse due to the size and quality of its department.

Lund named new Lobby 7 coordinator

By Stephen Bosen

"There will be no big apples and no more rain in Lobby 7" according to Joan Lund '77, the new coordinator of the lobby's activities. Lund, successor to the controversial Suzanne Weinberg, promises to bring many new ideas to the lobby. One of the most significant changes will be the disappearance of the large three exhibits which were Weinberg's trademark, because the budget will be "no-where near what has been spent previously," explained Lund.

A major difference between Weinberg and Lund is the spirit of cooperation and enthusiasm for Lund and her ideas, as opposed to the lack of cooperation effort mentioned by Weinberg's co-workers.

Sharing Lund's enthusiasm is Mary Morrissey, head of the Information Office and a Lobby 7 committee member. She favors smaller, more practical exhibits, Lund's present interest. To add diversity, Lund will look toward the Institute's resources. She feels that "MIT has a lot to offer at little cost."

Morrissey would like to "see apopcorn of exhibits," many of which will be contributed by various MIT community groups. She would also like to see the lobby clear once in a while so that passersby may enjoy the beauty of the lobby itself.

Morrissey, one of the most outspoken committee members, said that more attention should be paid to safety and noise levels of the exhibits. She concluded by saying, "The lobby activities are fantastic and I love being a part of them."

Weinberg left MIT last June when the Lobby 7 Committee, chaired by John Wynne, Vice President in charge of Administration, failed to renew her contract. Wynne's assistant, James Callim, said that eliminating the "normal budget reductions" opposed to some of Weinberg's projects and exhibits. Lund's appointment on a part-time basis has slashed the committee budget by $3,000.

The LSC-SACC conflict: reviewing the first week

By Kent Plummer

Members of the Social Action Coordinating Committee (SACC) have revised their plans to appeal a decision made last week by an Executive Committee meeting of the Association of Student Activities (ASA)

When the ASA ruled to allow SACC to show only the first three in a series of movies and thereafter to require that SACC obtain LSC approval to show any further films, the SACC members had originally planned to appeal directly to the General Assembly; however, after further consideration, they have decided to follow the more traditional procedure for appeal, bringing the question before a general meeting of the ASA.

Last Friday (Sept. 17) was the first of three evenings on which the ASA and SACC have scheduled competitive film screenings for identical admission charges. Each group has made its provisions about the potential impact of the competitive film series running on campus, and the attendance figures from these movies are expected to provide a prime source of information to support the arguments of both groups when the issue goes before the ASA.

Representatives of SACC seemed very pleased by the first evening's outcome. According to member Kathleen Williams '79, "Catch-22" drew full houses to both showings. In fact, she reported that SACC was forced to turn away nearly 100 people due to lack of seating space.

Alfred Geller '77, also speaking for the SACC movie committee, said that he felt the atten...
The Hewlett-Packard first family of calculators are in a class by themselves.

Hewlett-Packard built the world’s first advanced pocket calculator back in 1972. And led the way ever since. Today, Hewlett-Packard calculators are recognized as The First Family by more than one million owners worldwide, including Nobel Prize winners, USA-USSR astronauts, explorers, educators, scientists, business men, and students. Here’s why:

First family performance.
Hewlett-Packard means the kind of performance that includes RPN logic with four-memory stack, a full range of advanced functions, and much, much more.

First family reliability.
When you buy a Hewlett-Packard calculator you get one year’s protection on parts and labor. And a two working-day turn-around on most repairs.

First family support.
Every calculator comes with its own comprehensive Owner’s Handbook. In addition, a complete selection of optional accessories increases the versatility of the calculator of your choice. Hewlett-Packard offers more because Hewlett-Packard’s got more to offer.

Free booklet while supplies last.
“What To Look For Before You Buy An Advanced Calculator” helps you make a wise purchasing decision. Pick up your free copy at your campus bookstore. Or telephone 800-538-7922 (in Calif. 800-662-9862) toll-free for the name of your nearest dealer.

The series would later diverge into films. Although SACC's present concern about profit stems from having Campus Patrol present, the cost of the film, the cost of having a GA appeal — if it goes that far — Geller says that SACC will try again with the General Assembly. Whatever the outcome of this summer, Gene flew in tactical support of the ASA. This summer Gene flew in tactical support of the ASA.

Both groups have established their cases — the issue now goes before the ASA.

The cost of the films, the costs of having Patrolled present, and miscellaneous other costs (such as publicity and film transportation), very little profit remained.

Casper explained that LSC's concern about profit stems from the fact that the funding of their lecture series is to a large part dependent on these profits. LSC is attempting, he said, to provide a service to the students of MIT by presenting its lecture series at the lowest cost possible. If profits go down, its ability to effectively continue this service will decrease.

On the other hand, SACC representatives also insist that their organization is attempting to provide an important service to the local community by offering an alternative to the LSC films. Although SACC's present schedule of films offers shows of much the same type as those shown by LSC, members seemed hopeful that the theme of the series would later diverge into "heavier," more politically-oriented topics after SACC had established a reputation with its initial run of feature films.

Members anticipate that the movie series will act as a catalyst, generating greater political awareness in the MIT community.

Geller stated that he felt that the workings of "student government should ultimately reflect the wants of the students." In an effort to better assess the wants of the students, SACC will now go before the GA assembly. Whatever the outcome of the GA appeal — if it goes that far — Geller says that SACC will abide by the decision.

The great debate — a great disappointment?

By William Lasser

President Ford and Governor Carter will face off Thursday evening in the first presidential campaign debates in sixteen years. The stakes are higher than in the greatest fight since Ali-Frazier, as some would have us believe. I am inclined to think that the debate will turn out to be the biggest disappointment since Camel Koolhats.

Candidates have no incentive to turn a televised debate into a great entertainment spectacle or even a worthy news event. Debates are contrary to the best interests of those running for public office. Such a forum forces candidates to take firm positions on issues. It requires them to think quickly and to make broad statements of policy without direct consultation with key advisors.

Debates are instruments of last resort. Traditionally, a candidate is made by an underdog who can see no other route to victory; his opponent calmly refuses the offer and goes on to win the election. Occasionally, a candidate will accept his adversary’s challenge, being either convinced of victory or afraid that refusal would cause irreparable damage. Presidential candidates, etc. of course. etc.

The Ford challenge was indeed issued because the President could see no other way of winning the November election. The offer came in a climate of despair, at the last night of the Republican National Convention, in which Ford was almost defeated by, incredibly, a man to his political right. The President’s support was soft, and the polls showed Carter ahead by a seemingly insurmountable margin.

Carter, whose campaign had been one of personality rather than of issues, would have been wise to refuse to debate, except that he would have then destroyed much of the credibility which he had established. Thus, he made the best of a bad situation and accepted with apparent relish even before the President had finished his speech.

But that was over a month ago, and new conditions are completely different. Carter still leads in the national polls, but the latest figures show the two candidates virtually even outside the South. Carter has made numerous errors in running what has been a defensive campaign, and when he has taken definite stands on issues they have been full of ambiguity and logical inconsistencies.

The Democratic nominee has pledged to support sweeping social programs while insisting that he will balance the budget, a logistical impossibility without raising taxes, which no one wants to do. He has advocated the pardoning of draft resisters without granting them amnesty, a “half a loaf” proposal which pleases few. Carter’s position on abortion is as clear as the US tax code:

Meanwhile, the President stands by his usual conservative positions, which, even if one disagrees with them, are at least self-consistent. Still, by controlling inflation at the expense of jobs, he has left himself open to Carter’s charges that he is insensitive to his fellow citizens’ sufferings.

Thus Ford will sit back, act “Presidential,” and quote economic statistics proving that the country is in better shape than ever. And Carter will counter with the same statistics, showing by his interpretation that we are in a state of utter economic collapse. Neither man will be right. The President will attempt to force Carter into a mistake. “Ethnic purity” could have been more costly than it was — a similar error could literally cost Carter the election.

Richard Nixon, after the last in 1960, gave the following advice to politicians: “be yourself!” He soon learned the folly of that counsel, as did everyone else. So this year, each candidate will have a panel of experts who will brief them on how to speak, how to sit, how to act, and, least important of all, what to say.

It is possible but unlikely that Carter will ignore the Madison Avenue image-makers and finally answer the persistent question: Who is Jimmy Carter? If that happens, the debates could have a dramatic effect on the election results — either way.

On the other hand, if on Friday, morning we still do not know who Jimmy Carter really is, maybe we will all wish that they hadn’t pre-empted the debut of the Tony Randall show.
* TCA's first meeting of the term will be at 8 this evening in its office on the fourth floor of the Student Center. TCA is a student-run organization—you help would be more than appreciated. Come to the meeting or give them your name, residence, and phone number.

* The MIT Debate Society will hold demonstration debate for all those interested in joining MIT's debate squad on Wednesday Sept. 3 at Room 469 of the Student Center at 7:30 p.m. If you are interested and cannot attend or would like more information call the Debate Society at x3787.

*TCA's first meeting of the term will be at 8 this evening in its office on the fourth floor of the Student Center. TCA is a student-run organization—you help would be more than appreciated. Come to the meeting or give them your name, residence, and phone number.

* The Activities Development Board is receiving applications for capital equipment funding for student and community activities until Sept. 27. Applications may be received from Dean Holden's office in Room W20-345.

* Transcripts with Summer Session must be returned to the Registrar's Office the week of Sept. 27.

**Support the MARCH OF DIMES**

**PLATINUM ITALIC SET**

Contains a fountain pen, five Italian nibs, and instruction manual, all for only $5.50.

At art material 6-10 shops, college book stores... or send check to Pentamic Corp., 152 West 22 St., N.Y., N.Y., 10010.

Add 50 cents for handling.

---

**The Classic CORDUROY SPORTCOAT**

$45

Push cotton corduroy that looks and feels right anytime, any where. Patch flap pockets, fully lined. In antelope, brown, and sage green. Sizes 36 to 48 regulars.

---

**MONEY! Interested?**

Gain real business experience and a bit of extra spending money by working in the business department of The Tech.

**DO YOU SUFFER FROM 8-DIGIT MANTISSA?**

If you suffer from the limited accuracy of eight digits in your calculator readout and yearn for more, here's fast relief.

The 4660 from National Semiconductor.

It has a 10-digit mantissa plus 2-digit exponent. Not to mention other dynamite stuff like three separate addressable accumulating memories, algebraic logic and scientific or engineering notation.

And our cure is very reasonable. Suggested retail price at the Harvard Coop is under $85.

Suffer no more.

---

**ACADEMIA?**

Acadia offers the smallest conversation language classes in Boston—only 3 to 5 people per class. That means more contact with your instructor.Please instruction is available for intensive language training. Travelling with a friend? Ask about the "two for the price of one" private instruction. Call 354-6110.
Boston frats must alter stairs

By Daniel Nathan

Back Bay fraternity houses face a costly renovation of their staircases in order to comply with a city safety code.

The safety ruling, which went into effect Jan. 1, 1975, has a clause requiring that the large circular staircases be enclosed as a deterrent to the spread of fire from floor to floor. The code also calls for two safe means of exit from each floor, a need the renovated stairways would meet.

The clause requiring enclosed staircases differs from most other clauses in the code because it applies retroactively to buildings that are already completed.

The costly building of a cement wall around stairways is complicated by a stipulation in the code that any building being partially renovated at a cost of 20 percent or more of the building's worth must be renovated to meet the complete code. (Buildings are or more of the building's worth that are any building being partially renovated to meet the complete code.)

In addition, the Dean's Office has been working with the MIT Safety Office and Physical Plant on a "self-inspection checklist" to continually keep the fraternities' "eyes open" for needed improvements, according to Associate Dean for Student Affairs Ken Browning '66. Much of this booklet, which will be available in the fall, is the result of work done last IAP to compile the parts of the Boston safety code that are relevant to fraternities.

Although the fraternities are separate from the MIT dormitory system, MIT "has the responsibility to give them the stamp of approval," Browning said. Because freshmen are generally required to live in a dormitory or fraternity, MIT has an obligation to see that fraternity houses are safe to live in, Browning said.

Several committees are trying to use the fraternities' predicament. The IFC safety committee, working with safety and maintenance experts from Physical Plant, has been thoroughly evaluating houses "building-code-wise," according to Galuardi. However, their written report with costs and suggestions will take a long time to prepare. A less thorough evaluation producing no written report takes only about 2 days, Galuardi added.

The IFC safety committee will come out with a safety booklet in the near future, containing ideas and people to contact for the various problems.

The Dean's Office has also helped many fraternities by recommending contractors to do wiring, plumbing, and other construction. These offices can also recommend alternative methods of meeting the safety requirements, such as enclosing stairwells with a "water curtain" which sprays a cascade of water down the stairwells in case of fire. This is "definitely much cheaper" than enclosing stairwells with concrete walls, Galuardi stated.
Concourse to be part of EE?

(Continued from page 1)

Adler recently announced changes in this year's curriculum: "Concourse lectures will assign the same problem sets as in regular freshmen core subjects, occasionally with additional lecture material. These extra lectures are designed to integrate the course areas into a universal theme."

Adler said that approximately 170 members of the class of 1980 expressed interest in Concourse this fall, and a lottery was held during R/O Week to choose fifty students. Adler explained that fifty is an "ideal" number of participants in the program, although the optimum balance between teacher-student ratio and Concourse's budget allocations.

The UA Coffeehouse

PETER ALSOP
Saturday, Sept. 25, 8:00pm.
MIT Student Center
Admission $2.00
Free Cider and Sangria — Door Prizes
Tickets available at UA Office or at the door.

"a time to weep and a time to laugh, a time for silence and a time for speech; a time to embrace and a time to refrain from embracing."

The UA Coffeehouse presents Hillel Classes

The following courses are being offered free of charge, by Hillel of M.I.T. and are open to all those interested.

Hebrew 1
Mon. and Thurs. 4:00-5:00
Hebrew 2
Tues. 5:00-6:00
Hebrew Literature
T.B.A.
Talmud 1
Wed. 4:00-5:00
Talmud 2
T.B.A.
Rebbinic Philosophy
Wed. 5:00-6:00
Introduction to the Bible
First meeting Tues. 9/21
First Restoration of the Jewish State
First meeting Tues. 9/21
Laws of Bladder and Gossip
8:00 at Hillel
The First Restoration of the Jewish State
8:00 at Hillel
Thurs. 11:00-12:00

Tuesdays

Tues. 4:00-5:00
Trop (Torah Reading)
Wed. 8:00-9:00
Chazanut (Service Skills)
Wed. 7:00-8:00
Scribal Arts
Tues. 6:00-6:00
Jewish Legal Literature
Shabbat
Fri. 11:00-12:00
Passover
Wed. 8:00-9:00

Hillel Classes will begin the week of 9/27. If you're interested in registering you still can. Call Hillel at 253-2982 or come down to the Religious Counselors office — 312 Memorial Dr. All courses will be held in the Religious Counselors Blgd.

Classes will end the week of 12/17.

DID YOU HEAR THE ONE ABOUT THE REVERSE POLISH NOTATION?

The story goes that this guy walked into a college bookstore and bought a calculator that worked backwards, or sideways, or something. But once he got the hang of it, he found that Reverse Polish Notation meant he worked with only two numbers at a time, solving the most complex sequence calculations quickly, accurately and naturally.

The machine of all these and many other marvels is the Model 4510 (the "Mathematician") from National Semiconductor. Suggested retail at the Harvard Coop under $25. And that's no joke.
Golfers top Plymouth, 5-2; Dornbusch has low score

By Leo Bonnell

The MIT varsity golf team opened its season on an encouraging note last Thursday with dual match victories over Plymouth State and St. Anselm's, and he is a rarity in the past — as all varsity players except new captain Bob Kneeland '77 contributed at least one match victory apiece to the team effort. Winners against Plymouth State were Mike Varrell '79, Leo Bonnell '77, Les Suna '9, Mark Hughes '79 and Mark Swenson '78. Against St. Anselm's Varrell, Dornbusch, Hughes, and Swenson provided the winning margin.

Low scores for MIT were Dornbusch's '79, a fine 81 by Kneeland in a losing cause, an 82 by Varrell, and an 83 by Suna. The team is fielding its strongest lineup in many years, and has an excellent chance of doing well in the New England Championships in mid-October.

Trojans tackled by SAE

By Glenn Brownstein

Sigma Alpha Epsilon (SAE) carried a two-touchdown lead into the final quarter and weathered a freak field-length touchdown pass in the game's final minute to defeat the Baker Trojans in the A-League IM football opener Sunday afternoon, 20-13. SAE's victory appeared to be assured late in the fourth period, as the fraternity squad held a 20-6 lead and had a first down on Baker's six-yard line. Although SAE had seven chances to score, aided by a pass interference call against Trojan defender Peter Maimonis '77, the drive stalled and Baker took over deep in its own territory.

Two penalties and three plays later, the Trojans put the ball in play on their own three, second down and ten yards to go. Quarterback John Doyle '79 arches a looping pass toward Maimonis, standing near the right sideline 25 yards away. The ball was deflected by one SAE defender through Maimonis' hands, was tipped by another SAE player, and fell into the arms of Baker's star, completing 12 of 23 passes and gaining 32 yards rushing. McKinnon scored two touchdowns and gained 151 yards and two touchdowns for the other one, and gaining 32 yards rushing. McKinnon scored two touchdowns, converted two of three extra point tries, and came up with a number of long punts during the game, as Baker rarely had good field position with which to start a drive.

Strangely enough, the Trojans outgained SAE, 179-151 in the air and 87-32 on the ground, but suffered 13 penalties for a costly 90 yards, against SAE's 7 for 28. Doyle completed 12 of his 31 passes and looped a touchdown strike to Maimonis during Baker's first series in the game, giving the Trojans a short-lived 6-0 lead. SAE matched the touch-through, and never trailed again.

The A-league season continues next Sunday with a full schedule of A-League matches in the AFA at the Student Union at 2pm. Both contests will be held at the Rugby field.

TUESDAY, SEPTEMBER 21, 1976

Our Bicentennial exhibits are about to become history.
Time’s running out to see Victorian Boston and The Revolution. And to save on these exciting exhibits with student discount tickets.

Until you’ve seen Victorian Boston and The Revolution, you haven’t seen Boston! So use your student ID today to get 60% admission to these highly acclaimed exhibits. Because before you know it, it’ll be bye, bye Bicentennial.

Boston 200 student discounts.

The best way to see Boston’s Bicentennial before it becomes history.
