Newman elected UAP by slim margin

By Jordania Hollander

Barry Newman '79 and Tom Morgenthaler '80 were elected UAP and UAPVP Wednesday when 1,562 students turned out to vote.

John Hakala '81 ran a close second in the Newman vs. Newman ballot, the final vote being 647 to 598.

Newman said that he and Morgenthaler were "obviously very happy to be elected because I was the one that they had really wanted." Newman's term of office begins immediately and he plans to call a General Assembly meeting as soon as he can gather the necessary representatives.

Newman said that he hopes the ULA will become more visible, focusing on "a work that reacts to issues of importance to students. He added that he will probably keep the ULA budget in the "same range" as it is now.

The winners for the permanent officers of the Class of 1978 were James Biggulage for president, Diana Christian for vice president, and Dave Browne for secretary-treasurer. Steven Broun, Carol Brown and Geoff Burklot were elected to the Executive Committee (ExeCoom). The nine Class of '78 officers are Beth Marcus as president, Victoria Chang as vice president, and Michael Ross as secretary-treasurer with Bruce Bornstein, Steven Steinberg, Gregg Stave on the ExeCoom.

Mike Johnsen will be president of the Class of 1980 with Jerry Hammond as his vice president and Barbara Johnson as secretary-treasurer. The ExeCoom consists of Debra Utko, Russell Steinweg, and Barry Star.

Andy Ubel was declared the winner of the race for the UA president. The vote was contested, however, and a recount was ordered to be held next Tuesday by Newman. Tom Chang was elected vice president for the UA, with Steven Steinberg as secretary-treasurer. John Delles, Anne Keenan, and Jennifer Kish on ExeCoom complete the list of class officers.

The winners for the permanent officers of the Class of 1977 were Mike Mike as president, Tom Chang was elected vice president, with Jenny Ford as secretary-treasurer. Mike Mike won by a margin of 1,476 to 1,453.

Iranians disrupt Colby talk

By Elaine Douglas

Iranian student demonstrators who showed up at a lecture by former CIA Director William Colby in Kresge Auditorium last night told The Tech that the political situation in Iran in the past seven months has been marked by incidents of violence and popular uprisings in which hundreds of people have been killed by the Iranian government and thousands arrested. The students said that within the last ten political prisoners have been shot, and three of the prisoners recently died.

Some 50 furiously angry Iranian students disrupted Colby's talk, which was intended by an audience which filled Kresge Auditorium to about a third of its capacity. A large number of Iranian students had spent the day demonstrating in downtown Boston.

The students are foes of the Shah of Iran, an authoritarian leader who took power in Iran by a 1953 coup which William Colby acknowledged aided in the CIA. The coup deposed a popularly elected leader named Mohammad Mossadeq, who had nationalization of the industry.

Due to the large number of political prisoners in Iran, the US and Britain have been helping to keep them in line, the students said.

"We assisted the Shah to get, back to power," Colby said during the lecture, "and I think the US is better off with the Shah's leadership than it would have been with the leadership of Mossadeq who takes over Iran."

Iranian students told The Tech that they had been particularly intense in the Iranian cities of Qum and Tabriz. In Tabriz about six weeks ago rioters smashed all banks, government buildings, and cinemas in the city, a student said.

Troops, ordered to fire on the population, refused to do so and other troops were brought in from a distant location to quell the uprising which was aided by the CIA.

"The Shah will not be able to count his troops, ordered to fire on the population, refused to do so and other troops were brought in from a distant location to quell the uprising which was aided by the CIA.

One Iranian student declared that in the event of a mass uprising, "the Shah will not be able to count his troops, ordered to fire on the population, refused to do so and other troops were brought in from a distant location to quell the uprising which was aided by the CIA."

Another Iranian student claimed that a March 50 British and American soldiers were on the road in adjoining Iran and that in the event of a mass uprising, "the Shah will not be able to count his troops, ordered to fire on the population, refused to do so and other troops were brought in from a distant location to quell the uprising which was aided by the CIA."

The T (lech

Iransians question Colby

"(Continued from page 1)"

in," the Iranians screamed "a
justification for murder!" When
colby said the CIA "had
intelligence on its own..." the
Iranians shouted "religious
justification for murder!"

When Colby said the CIA "had
sht intelligence on its own..." the
Iranians shouted "religious
justification for murder!"

And when he asserted US in-
elligence is now operating within the
law, they responded with derisive laughter. When Colby
recalled how CIA agents had been
asked to sneak their files to see
"how many you've killed!" the
Iranians shouted, and when he
told the CIA "replaced its old
dirty directories," the Iranians
shouted "like you!"

The students accused the
United States of "waking all the
other peoples' blood and natural
resources" and when Colby said
he saw "threats in the under-
developed world" they shouted
"you know the world is turning
against you, that's why you are so
cursed."

The first student speaker in the
tumultuous question period was
an American, who suggested that
the "dangerous world" Colby had
alleged "may be due to the dis-
gusting activities engaged in by
the CIA," which, he said, Colby
had "hardly referred to" in his
talk. Another US student, who
asked of a "breakdown in the in-
ternational system" was reassured
by Colby that "the US can keep
its guard up."

Experienced Computer Programmers
and Engineers

Positions from $18,000 to $35,000
Winter, Wyman and Company is a full service employ-
ment consulting firm, specializing in the placement of
experienced computer professionals. Our business and
reputation is built upon trust, capability and high
standards of professional practice. This reputation
allows us to maintain excellent working relationships
with a very broad range of clients in the computer
industry, including computer vendors, users, peripheral
manufacturers, system houses, software houses, engi-
neering and research firms.

Our clients have urgent needs for:
Microcomputer Systems Programmers, Compiler Design-
ers, Real Time Assembly Language Programmers,
Microprogrammers, Diagnostic Programmers, Data
Analysis Specialists, Software Consultants, Programmer/
Analysts, Systems/Analysts, Business Programmers,
Microprocessor Designers, CPU Architects, Logic and
Circuit Designers and System Engineers.

Client companies assume our fees. Evening interviews
can be arranged. Call or send resume in complete
confidence.

Bostons highest form of entertainment
costs less than a movie.

It's the Hancock Tower Obser-
Vatory, located 740 feet above
the ground, atop the tallest building in New
England. And from here you can see and
feel the total Boston experience.

With 60 miles of breathtaking
scenery, it's the most fantastic view
of Boston there is. Especially night.

Plus you'll see multi-media exhibits
like an exciting light and sound
show about the Revolution, featuring a
20-foot scale model of Boston in 1775.

The Observatory is open Monday
through Saturday from 9am to 11pm
and Sundays from noon till 1pm, every
day except Thanksgiving and
Christmas. Admission for students
with a college I.D. is only $2.25. You'll find
ticket office on St. James Avenue
opposite Coppely Square.

So next time you spend a night on
the town, visit Boston's highest spot. It's
not only less expensive than a movie.
It's free.

John Hancock Observatory
The Best Place to See Boston.
Neutron bomb called inhumane

(Continued from page 1) in a wide area with radiation sickness lasting for a few days to a few months depending on how close the blast was. Kistiakowsky continued by stating that the neutron bomb, which was developed in response to the Warsaw Pact countries armed forces' 3 to 1 superiority in number of tanks, was not the most effective anti-tank device available. He pointed to the extreme efficiency of non-nuclear "precision-guided" munitions when used against tanks during the 1973 Arab-Israeli War.

He also noted that neutron bombs are most effective against tanks massed in large numbers, as at the beginning of an attack. When the tanks begin their attack, they scatter like "ants coming out of nest when disturbed," said Kistiakowsky, further reducing the efficiency of such weapons.

Kistiakowsky's third argument against the development of the neutron bomb is that it would up- low the American lead in its development, he added, and it may also lead to the Soviet Union beginning with an all-out nuclear attack.

The position of the US's NATO allies was "all mixed up" by Kistiakowsky. In West Germany, the military and right-wing parties support the deployment of the warheads while left of the center parties oppose it. The Dutch Parliament voted against the deployment of the neutron bomb. In general, Kistiakowsky said the problem was that the European nations want the bombs to be developed and then they would decide whether to allow deployment while the US wants a promise to be able to deploy the warheads before it starts manufacture.

Kistiakowsky concluded by saying that in his opinion the neutron bomb should not be manufactured and the idea should be "mothballed" along with other battlefield nuclear weapons.

Head for the mountains.

COMFORT IS CRUCIAL. If you mountain in public, pick a padded bar stool, preferably one that spins (to facilitate admiring the scenery). At home, a comfortable chair or sofa will do. Rule of thumb: if it feels good, and the police don't seem to mind, do it.

Then turn on the tube or spin a tune or crack a good book. The choice is strictly yours. Of course, some mountaineers say the smooth, refreshing taste of Busch is entertainment enough. And thank goodness they do, because it's an excellent conclusion.

(Comfort is crucial.)
Scientific research and federal funds

By Bob Wasserman

Federl research funds to universities could be reduced drastically if a constitutional amendment becomes law. The Office of Management and Budget's (OMB) new approach would reduce funding available for federally sponsored research projects and would also require university officials to provide detailed accounts of the way these funds are used.

The amendment, proposal by the OMBy comes at a time when federal funding and interest in scientific research of the last ten years. College administrators are trying to reverse this trend, and one of the main ways their efforts have been directed is toward basic research is MIT President Jerome Wiesner.

In an article in the Rhode Island this year, Wiesner asserts: "The vitality of our nation's basic research is of critical importance to its survival -- spiritually, intellectually, and materially," Wiesner is concerned with the "decade of decline" of the number of federal research grants, and also with short-term funding and basic bureaucracy. Wiesner says that there now exists only some of their time simply writing proposals.

Large federal grants for scientific research is not a traditional practice, it is, as Don K. Price, of Harvard, writes, "The immediate occasion of our university go to support basic science was... the plight of World War II."

After the advances of atomic energy the 1940's, and the space race in the 1960's, federal funding began to decline. Time columnist Hugh Sidey sees this decline as the result of distrust of the scientific community by President and Congress.

Currently, hopes from American scientists seem to be bolstered by the efforts of MIT. Carter has received the federal budget for scientific research, perhaps because of his engineering background. Carter even spends quiet evenings with his family, writing scientific reports presented by Carter.

Scientific support on lower levels of governmental bureaucracy is uncertain, however, as is the case of the Office of Management and Budget. This support is uncertain even though, for example, "Executive hierarchy is inflated at the top levels with men whose personal interests and views are conditioned by scientific and technical education," according to Don Price. These men in the top include MIT Professor Frank Press, who is the President's Science Advisor, and Wiesner, who has also served in that role.

"A government is 'infiltrated' with men of science: actions by universities over the past few years have hardened US können die administrative and technical education, perhaps because of his engineering background. Carter even spends quiet evenings with his family, writing scientific reports presented by Carter.

Now comes Miller time.
Guys and Dolls a sure bet for a good time

By David Shaw

Guys and Dolls, the Musical Theatre Guild's production of Guys and Dolls is a lively and exciting presentation of an excellent musical.

Guys and Dolls is based on a story by Damon Runyon and presents Runyon's picture of life in New York City, particularly the Broadway-Times Square section. The plot revolves around the love affairs of Nathan Detroit and Miss Adelaide, and the Mattresses and Miss Sarah Brown. Nathan and Adelaide have been engaged for almost twenty years, with Adelaide continuously pressuring Nathan into marriage, which he keeps postponing. Sky Masterson meets Miss Sarah Brown after a bet he made with Nathan. But the meeting seems to non-existent. "The Havana Dance" was played perfectly Off each other, as was the "Havana Dance". The orchestra rendered Frank Loesser's music perfectly. The fault lies with the song "Sit Down, Your Rockin' the Boat", which should have been the most lively number. Instead, the lack of movement on stage made it almost boring. The orchestra rendered Frank Loesser's score perfectly, playing loud enough to heard, but not loud enough to drown out the singing.

The technical aspects of the production were adequate. John VanderMeer's sets were simple and functional, but they seemed to limit movement of the actors in certain scenes. The lighting was poor in some scenes, but that is partially the fault of the theatre's construction; some of the lighting angles cast shadows across the actor's faces or onto the rear stage walls. Hopefully these conditions have been corrected.

All considered, the play should be seen for its fine acting and singing. You shouldn't miss this chance, because "The Oldest Established Permanent Floating Crate Game" might not return.

Guys and Dolls, the Musical Theatre Guild's production of Guys and Dolls is a lively and exciting presentation of an excellent musical.

Curt Fennell "78 was quite convincing in the role of Nathan Detroit, with his animated expressions adding just the right touch to his humorous role. His singing voice was somewhat lacking during his one song "See Me", but that might have been intentional.

Rosalie Gerut, as Miss Sarah Brown, was slightly inconsistent in her performance. She played her part well, yet her lines were not easily heard. Her singing voice, however, was excellent, especially in the song "I'll Know".

The part of Sky Masterson was well portrayed by John Colton. His singing, dancing, and acting abilities were put to full test in the song "Luck Be a Lady," which he executed flawlessly.

The performances of Jonathan Goldblith as Nicky-Nicky Johnson and Lance-Cedric Roberts as Benny Southstreet should not be ignored. They played perfectly off each other, as was demonstrated in the duet "Guys and Dolls."

The choreography varied from excellent to poor. "The Cruise Game Dance" was energetic and precise, a perfect production number; the "Havana Dance" was just as good. The Hot Box Girls were not seen for their excellence, with the performance of Dierdre Alexander as Miss Adelaide, typical Runyon "doll," was delightful. She was able to maintain her character's high-pitched voice and still make all her lines and songs clear and audible.

Her overall talent was best displayed in her musical numbers: "A Bushel and a Peck," "Adelaide's Lament," and "Take Back Your Mink."

dents in room 1-114. Possible topics
include job and research opportu-
ities and availability; type of material
covered in courses, etc.
Refreshments will be served.
Lacrosse 3-3 after NE losses

By Roger Renshaw

MIT's lacrosse team led by captain Gandy Zuerdorfer, began a tough New England season last week with games against Babson, Tufts, and Amherst. This followed a highly successful southern swing which saw coach Walt Alston's squad sweep a 3-0 record. The string consisted of three strong wins in three days beginning Tuesday of spring break at Randolph-Macon College in Virginia. MIT jumped out to a 3-0 first quarter lead, Randolph-Macon fought back however and at the half the score was knotted up 3-3. O'Connor scored his fifth goal of the game to pull out a 7-6 win. We Huskers finished a fine game in the net with 15 saves.

On Wednesday, MIT completely dominated the game with Georgetown, but numerous offensive opportunities were wasted, and the Eagles had to scrap hard in the 11-10 game. The Beavers had to scrap hard and the driving rain combined to take the edge off MIT's physical game and Babies controlled the entire contest and won easily. Zuey Zuerdorfer tallied both goals for MIT. On Thursday, a three minute lapse into the consciousness led to 6 Tufts' goals which broke open a close 3-1 game. Tufts rode the landslide out for a 15-2 victory. On Saturday, a tremendous defensive effort highlighted by Dick Cook's 24 saves and Paul Gault's bruising body checks went for naught as the offense was unable to score and Amherst knocked off the Engineers 6-0.
