Assistant Dean Bonnie Kellerman will be leaving the Office of Freshman Advising for another post in the Dean’s Office. (Photo by Steve Scholnick)

Dining group issues draft report

By Jay Glass

After completing a comprehensive reevaluation of the MIT dining system, the Committee on Campus Dining has drafted a report, now under discussion. The report includes recommendations that would make sweeping changes in MIT’s dining programs. Among the recommendations now being reviewed are those that establish a student food co-operative, revize meal plan options, expand and renovate dining facilities, set financial aid packages to actual room and board expenses, and appoint a member of the DSA as coordinator of the dining program.

Thus far, the proposal that has attracted the most attention is the establishment of five “commons” houses, whose residents, beginning with the Class of 1984 — this year’s freshman class will not be affected — would be required to subscribe to a meal plan of 12 or 19 meals per week, taken usually in their house’s dining facility. The five so-called dormitories would be Baker House, McCormick, MacGregor, Next House, and East Campus. The remaining five houses would be considered “cooking” houses, although their residents would still be able to purchase a meal plan if desired.

The expected increase in utilization of MIT dining facilities caused by the new system would be met by the renovation and expansion of Pritchett Lounge on East Campus, the re-opening of the dining hall in McCormick, and the addition of a new dining facility in Next House, the new dormitory which is scheduled for completion in the fall of 1983. While the details have yet to be worked out, as in many of the recommendations, it is expected that the McCormick dining hall would be accessible by all undergraduates.

In addition to the new dining facility, plans for Next House call for inclusion of enough storage and freezer space to permit system-wide ice cream purchases. (See page 2 for more details.)

Drink law a new R/O problem

By Michael Tavis

“The main reason Rush week isn’t based on alcohol consumption but rather on the number of people who are satisfied with their new living group,” according to Mike Johnson, ’80, Interfraternity Conference (IFC) Rush Chairman commented. (The biggest problem we could have would be rain at the Picnic.)

There is no need to describe all the details of fraternity rush since they are readily available elsewhere. A few times bear mentioning, however. A fraternity cannot accept pledges until 7am Sunday morning and bids cannot be accepted until Monday at 8am. The only exception to this rule is Zeta Phi. As a new frat on campus they have a few special privileges. They were permitted to start their rush at 6:30pm last night. Also, they can enter bids on Saturday morning at 7am, and these bids can be accepted at 8am Sunday. In all, the fraternities are looking for about 400 pledges.

Women should not feel excluded from any portion of Rush. They may take part in the activities of any fraternity, including the all male ones. The five coed independent living groups at MIT are: Pika, the Number Six Club, Epulon Theta, Student House, and Fenway House. Fenway is going to be coed for the first time this year. The Women’s Independent Living Group (WILFG) is an alternative for those women who would prefer single sex housing. In the dormitory system the following areas are coed: all of Baker, Burton, French, German, Roxinian, Spanish, and Senior Houses; and seven floors (out of ten) of East Campus. All-female portions of the dormitory system are McCormick and one floor in New House (3rd floor of 69).

Search for new dean not yet completed

By Steven Scholnick

The search for the new Dean for Student Affairs (DASA) will probably be the most striking feature of the newly energized Deans’ Office which greets freshmen today. The Advisory Committee on the selection of a new dean, chaired by Professor A. P. French, has not yet “concluded the process” which will eventually result in a list of two to six candidates to be presented to the Chancellor. According to Vice President Constantine Simonides, who conducted a review of the Office of the Dean for Student Affairs (OSDA) last year, “It is vitally important that the Committee, which has come this far, be allowed to complete its deliberations.”

French said that the advisory committee would not meet again until September and it was unclear whether that meeting would prove sufficient to conclude their business. Since the list of candidates must then be evaluated by the Chancellor, it seems unlikely that the new dean will be selected before the end of September.

Simonides said the new dean would take office immediately, although commitments to his current position could delay his actual assuming duties. French blamed many of the delays in the process on difficulties in assembling the committee and applicants over the summer. Delays were compounded by the unexpectedly large number of applicants (300 to 400) as well as French’s three-week mid-summer trip to China.

Meanwhile, changes continued in the makeup of the OSDA. Assistant Dean for Student Affairs Bonnie Kellerman ’72 announced she would be leaving her post in the Office of Freshman Advising, now Undergraduate Academic Support (UAS). She will be moving to the Office of the Vice President for Student Life.

THE TECH

PAGE 2 FRIDAY, AUGUST 31, 1979

Overcrowding level to be about 75 to 100

(Continued from page 1)

Bob Sherwood, the current Dean for Student Affairs in charge of the Residence Program commented that since we've added four additional areas for women living (as noted above), we're hoping that McCormick as first preference will diminish. Plus the number of women accepted seems a little shy of what was hoped for.

The overall number of freshmen is not optimal, however. Current figures have 1074 for the size of the class of '83. Sherwood hopes that this will eventually be pared down to 1066 actual arrivals. Even then there will be some overcrowding. The exact number is difficult to determine but there is likely to be between 75 and 100 overcrowded students. Sherwood hopes that no one will take this as gospel, however.

Complete information is found in the pamphlets entitled Housing Notes for Freshmen (1979), which is part of the Freshman Packet. The situation this year is worsened since graduate and transfer students are having extreme difficulty in finding off-campus housing.

Sherwood hopes that most of the housing difficulties will be alleviated when the new dormitory, dubbed Nest House, is opened in September, 1980. "It's projected to reduce the crowding and to allow us to accommodate transfers and re-admits." Voluntary crowding would remain since this permits reduced rents.

news roundup

World

Two suspects in Mountbatten slaying — Two men are being held by high police in Dublin in connection with the murders of Lord Mountbatten and three other people caused by a bomb explosion on Mountbatten's launch on Monday. Police sources said traces of nitroglycerine and seawater were found in the suspects' clothing at the time of their arrest.

Nation

US oil imports increase — Despite the lack of Iranian oil for most of this period, US oil companies imported nine percent more oil in the first six months of 1979 than in the same period in 1978. Most companies reported an increase in crude oil supplies, at the same time as gasoline supplies to service stations were being cut by as much as fifteen percent.

Local

MIT researchers find cancer marker — A research team here announced Wednesday that, with aid from researchers at Massachusetts General Hospital, they have detected an esophageal, galactose, transferrin, found in much higher levels in human bladder cancer cells than in normal cells. It is hoped that the discovery may lead to the first reliable diagnostic test for bladder cancer.

Hunger strike continues — The inmates of Walpole State Prison's Cellblock 10 continued into the ninth day of a hunger strike yesterday. The inmates in the segregation cell block are attempting to draw attention to their grievances with prison authorities.

New dining facilities proposed

(Continued from page 1) Purchases would be considerably less expensive than the current practice of each facility ordering only for its own needs. Also planned forWest House is a bakery that would serve the needs of the dining system, reducing expenses further.

In support of the students who choose to cook, kitchen facilities are proposed to be added to at least four;enters of Senior House, which has a recent history of non-cooking facilities. "Country kitchens" in each suite are planned for Baker and for East Campus, whose Tobin Lounge will be expanded to a cooking capacity for two floors or 80 people.

An aid to students who cook and to the fraternities should be a proposed Food Co-op joint venture of students, fraternities, and the MIT Food Services. The store-front operation would emphasize poultry, fresh produce, dairy and other perishable items. The program would also supply consumer information and other cooking support services. The location for the cooperative would be in the Burton dining hall kitchen, now inactive, and a storage room underneath it. Referring to the aids for students who cook and the system expansion, Dean Phillips, '80, a Dining Committee member, says "once people realize the proposals include a lot more than just five houses being on the combined room and board plan, their attitudes toward the proposals often change." A concept described as "particularly important to pursue" by the committee is the recommendation that "changes in financial aid policies be explored to reflect student's actual room and board expenses in aid packages." The committee admits that the concept might have "considerable operational problems," however. To guide the dining program, much of the proposed housing program, the report's draft recommends "that a member of the DSA [Dean for Student Affairs] staff have the specific responsibility for coordinating the dining program and strengthening its role within the overall residence program." MIT Chancellor, Paul Gray, 54, will, in this case, use the consensus method to evaluate the dining program proposals. "There will be no edict, but no referendum either," said Vice-President Constance B. Simonides.

Dean selection not yet made

Last minute advice on living R/O Week

Okay, freshmen, this is it! R/O Week is finally here. Yes, that fun-filled week of excitement that you've heard so much about all summer is upon us and now you are going to get to experience it. Here are the last bits of information you will get before you head off to MIT.

Freshman picnic

R/O Week begins this afternoon with the Freshman Picnic. Barring rain, the picnic will be held in Killian Court, which in case you haven't noticed, is located just inside those imposing gray buildings on the east side of Massachusetts Avenue. The Court is one of the few serene spots on campus, so you will want to take a break from the Institute if not actually get away from the Institute (it is after all surrounded on three sides by MIT buildings).

The rush

The rush begins as a quite literal rush of hundreds of fraternity brothers who have independent living group representatives into Killian Court. Don't be hesitant about going off to the fratere. Even if you are sure you don't want to join a fraternity, you should at least go and spend a weekend's worth of free food. Who knows, you might even find that fraternities aren't quite what you thought they were and you might even want to join one.

On the other hand, if you think you do want to join a frat, don't think you can join one by just saying, "This place looks nice; I think I'll join a frat." Quite the contrary, the fraternity brothers will have to decide that they want you first. This means that you will have to sell yourself to them. "I live here." In most cases, the fraternity brothers will have to decide that they think you can join one by just saying, "This place looks nice; I think I'll join a frat." Quite the contrary, the fraternity brothers will have to decide that they want you first. This means that you will have to sell yourself to them. "I live here." In most cases, the fraternity brothers will have to decide that they think you can join one by just saying, "This place looks nice; I think I'll join a frat." Quite the contrary, the fraternity brothers will have to decide that they want you first. This means that you will have to sell yourself to them.

By early next week you will probably have found a place to live. Then you can move on to the orientation part of R/O Week.

Academic orientation

"Trying to take a drink from a firehouse" is the most commonly used phrase to describe selecting courses at MIT. However, when you are a freshman, the choice isn't quite so difficult: most freshmen take one physics course, one math course, one chemistry course, one humanities course, and sometimes a seminar. The Freshman Handbook gives you information on the various options.

When you are making out your schedule, don't automatically sign up for the most difficult options. Remember this isn't high school, the difficult courses here are often more difficult. Unless you have a compelling reason to do otherwise, take the regular options.

Don't take as many courses as you possibly can. There is no real need to graduate in three years, and you can overextend yourself if you try. Finally, don't try to establish yourself as a genius by trying to ace all your courses. If you come up with a straight A average, people here are more impressed if you do B+ and get A's than if you do B+ and get A's. Please do try to pass your courses; you don't really want to find out about negotiated withdrawal.

After you choose your courses, the final phase of R/O Week begins:

Activity and athletic orientation

You may be bored by this time but don't let this opportunity to check out activities go by. Activities can give you some of the most rewarding experiences of your college education.

Don't just join the types of activities you were involved with in high school. Most of the Volunteer Board members of this newspaper were never even involved in journalism in high school.

And don't think you will be funded the most menial positions if you join an organization: nearly all activities are understaffed and can give you significant duties. So check out the athletic and activity midways next week.

The end

Like all good things, R/O Week must end, and unfortunately, it ends with classes. So enjoy the week while it lasts; you'll never have another experience quite like it: MIT.
Housing seminars were held on August 28 to advise transfer students on dealing with the tight apartment market. NRSA members discussed leases and landlord problems for the new students. (Photo by Mary Ann Hefferny)

Candy-O, the Cars on Elektra records 56-507.

Following the release of their eponymous debut album, the Cars were soon named the best new band of 1978. Their music was a refined mixture of pop and new wave trends that hinted at unexplored ideas and talent. It was hoped that these hints would be fully developed on their new release, but that is not the case; Candy-O finds the Cars trying to get more mileage out of old ideas.

The cover (drawn by pinup artist Alberto Vargas) and lyrics make it evident that songwriter Ric Ocasek is intent on continuing his car/sex/young girls motif; however, while his first set of songs displayed a subtle ironic touch, his new set replaces irony with cuteness. The songs "Since I Held You" and "Lost for Kicks," a poor Elvis Costello rip off. The album doesn't close as convincingly as the first effort. "All Mixed Up" was a haunting tune that the listener wanting more, but Candy-O's closer, "The Dangerous Type," makes you glad that the whole thing has finally ended.

It is evident from one listen that the Cars still have the talent, and it has improved. Elliot Easton's lead guitar has become sharper, the vocals are more polished, and the production has become more precise; but there are still difficulties that must be worked out. Greg Hawkes is suffering in the background filling in holes, but he should be made a little more prominent. He was responsible for "Moving in Stereo," one of the first album's finer moments, but was not allowed to contribute to the current effort.

With some more time and a willingness to experiment, the Cars will remedy their difficulties and possibly become worthy of one of their early praises. "The new music of the '80s."

Spectral Mornings, Steve Hackett on Chrysalis records CHR 1277.

While he was still the guitarist for Genesis, Steve Hackett released a solo album, Voyage of the Acolyte. He was assisted by fellow band mates Phil Collins (drums and vocals) and Michael Katherford (bass), and together they produced an album that met with some small critical acclaim, but was obviously rather Genesis-like. The success of this first effort inspired Our Hero to pursue a solo career and remove the Genesis stigma, hence O.H. rustled up a new bunch of famous musician-types to help on his next album. The combined efforts of Kansas' Steve Walsh and Phil Sharp, Tom Fowler and Richie Hawkes could not prevent the project's slow death — the album was called Please Don't Touch, and the public didn't.

Hackett decided that he might be better off working with unknown musicians, so he found a few and released them through his material in the hope of presenting it live. This combination of talent proved so successful that they have become Hackett's permanent band. Another album, Spectral Mornings, is released, and now Our Hero finally has an effort he can be proud of.

"Every day" opens the album on a forceful note; the song is a combination of driving ensemble work and soaring harmonies; it presents for the first time Hackett's straightforward, unadulterated guitar soloing. "The Virgin and the Gypsy" is a pretty ballad that acts as a showcase for lead vocalist Pete Hicks. The album's instrumental "The Red Flower of Tai Chi Blooms Everywhere," "Spectral Mornings," "Clocks — the Angel of Menus," and "Lost Time in Cordoba" display different facets of Hackett's songwriting ability, "Red Flower" is an experiment in Oriental modes and instrumentation, "Clocks" and "Spectral Mornings" are sparse solos against a keyboard background, and "Lost Time" is a simple, uncomplicated Spanish guitar exercise. The remaining tunes present some witty lyrics with unusual backing. "The Ballad of the Decomposing Man" (song by Hackett) is about a factory worker wandering around at a party ("What are all these people doing in my office?), the instruments featuring banjo took piano and steel drums. "Tigermoth" tells of the plight of a pilot who crashes and wakes up to discover that he is in the company of all the other dead pilots, the whole thing is set to music that could serve as a soundtrack for a war movie.

One thing that pervades the album is the consistently excellent guitar work and arrangements. This album makes it clear just what Hackett's contributions to Genesis were, and what his contributions as a soloist can be.

**Ken Cerino named SID**

By Bob Host

Athletic director Ross H. Smith announced an appointment in Kenneal J. Cerino as sports information director, effective August 1. Cerino replaces Jill Gilpertic, who had served in the in an acting capacity.

Cerino's responsibilities include publicizing the activities of the varsity and intramural sports, and at present he is involved with working out details of the football team.

Cerino told The Tech that he has prepared for the job by reviewing past issues of both this paper and Tech Talk. Although impressed with the coverage given varsity sports by The Tech, he noted that many articles were written by members of the teams themselves, and added that to alleviate this situation, perhaps work-study students working out of his office could handle some of the information.

Cerino, a resident of Needham, received his BA degree in journalism from St. Bonaventure in 1974 and had previously held similar jobs at Stena College in Albany, New York, and most recently at Iowa State University.

**Football Schedule**

Sept. 22 vs. Norwalk Community College, 1:30pm, (A)

Sept. 29 vs. Roger Williams, 7:30pm, (A)

Oct. 6 vs. Fairfield, 1:30pm (A)

Oct. 13 vs. New York Maritime, 1:30pm (A)

Oct. 20 vs. Fitchburg State, 1:30pm (H)

Oct. 27 vs. Stonehill, 1:30pm (A)

Nov. 3 vs. Stone Brook State, 1:30pm (A)

**FOOTBALL TEAM STARTS PRACTICE**

By Bob Host

The club football team is preparing for its second season with first-year head coach Dwight Smith. Practice began Monday (Aug. 19). Last year the team was 0-6, in the first season of football at MIT since 1942.

The team will have last season's entire starting backfield returning and Brett Biddle '79 at quarterback. Jeff Olson '81 at halfback, and Roger Sacilotto '82 at end. Also returning are offensive linemen Greg Henley '80 at end, Tom Fawcett '82 at guard, Dale Hight '81 at center, tackle Walt Crosby '80 (who started at center last year), and Bob Nager '82, who last season was a defensive tackle.

On defense, Keith Therrien '80, a linebacker, and Art Aaron '80, safety, Brad Pines '81, and cornerback Mike Barrett '81 are coming back which prompted Smith to note that "defensively, there'll be a lot of new faces." However, the coach, who was an assistant last year, says that the offense should be able "to move the ball and score points" after averaging 14 points a game last year. He stated that the backfield of Wrobol, Olson, and Sacilotto should be solid, but at present the offensive line is weak.

Today the team departs from its 5pm practices, starting at 9:30am instead. Over the Labor Day weekend, there will be specialty practices with double sessions set for next Tuesday through Friday. The first scrimmage is set for Saturday, September 8, with the following day off.

A new touch has been added this year, also. At the home opener, September 22 at the Indoor Stadium against Swarthmore Community College, programs will be available, according to sports information director Ken Cerino. Game time is 1:30pm.

Three-time swimming all-American Preston Vrielinck G was awarded a postgraduate scholarship by the NCAA, one of only 32 student-athletes to receive such an honor. This marks the third consecutive year an MIT student received one of the awards, with fence Mark Smith '76 earning one last year and track star Frank Richardson '77 getting one two years ago.

Vrielinck, who was all-American in the 200-yard breaststroke, also lettered four years in water polo. In addition to his graduate work at MIT, he will assist in coaching the MIT swimmers.

In this summer's Pan Am Games in Puerto Rico, MIT graduate Steve Cucchiara '74, a two-time all-American in sailing, won a gold medal in that event. According to MIT sailing coach Harold Brown, the 1974 team captain is a leading candidate to represent the United States in next year's Moscow Olympics.
