Subscription, \$2.00 per year in advance.
Single copies, fifteen cents each.

Communications requested on matters of general interest.

ALFRED MUDGE & SON, PRINTERS, 34 SCHOOL STREET, BOSTON.

STUDENTS AND FRIENDS:

GREETING.

TO-DAY is issued the first number of our paper; and, although we tremble at the thought of the work before us, we begin it gladly. We believe that the same public spirit that founded THE TECH will sustain it to the end.

The Institute has never been rich in papers. Only one, we believe, has ever been published. Some years ago, the *Spectrum* shone for a time, but soon faded away. Still later, an attempt was made to establish another paper, but in vain; the first number never appeared.

And now comes THE TECH, asking its share of favor. Even as its predecessor, it attempts great things. It will be its aim to promote the interests of the students of the Institute, and maintain a friendly spirit among them, breaking

down the ancient barriers of class and department. It will exercise a guardian care over the members of the school, protecting the Freshman, curbing the Sophomore, correcting the Junior, and supporting the Senior in his old age. It will open an avenue for the expression of public opinion, and will aim, in every possible way, to help all in the development of their young manhood and young womanhood. It is hoped, too, that it will keep the interests of the Institute before its graduates, cherishing among them the memory of their *Alma Mater*. Our brother and sister colleges, also, will become better acquainted with us through this paper.

We cannot look far into the future. We cannot tell what buds of genius may be unfolded in these columns. But even if genius does not bloom; even if the beauties of rhetoric and poetry are not developed here; even if this paper becomes, like the school it represents, only a field for plain, honest work, — we shall nevertheless be sure that the efforts we make are stepping-stones to further attainments, helping us all to the higher and nobler uses of our lives.

IT may be interesting to the graduates and friends of the Institute to know the history of this paper's formation, and its plan of management.

About a month ago, a meeting of the students was held for the purpose of considering the publication of a school paper. A committee of five was chosen, with instructions to examine the matter in detail. A week later the committee presented a report in favor of the proposed paper. The recommendations of the committee were subsequently embodied in the present form of government.

The management of THE TECH consists of a board of directors of seven, representing the
