On Wednesday evening, March 26, one of the sections of the third-year class in applied mechanics, including the mechanicals, architects, and electricals, enjoyed a pleasant social gathering with several of their instructors at the house of Prof. Lanza. After promoting mutual friendship by conversation, all were invited to partake of a generous spread to which they did full justice. President Walker was present during a portion of the evening. The visitors, on leaving, showed their appreciation of Prof. Lanza's hospitality by a hearty M. I. T. cheer.
