of the first two years, the Faculty have shown that they are alive to the very best interests of all. Certainly every man should appreciate very fully these efforts in his behalf.

The Physics library, as well as the Architectural and the Engineering library, is now provided with electric lights. The circuit has not yet been extended to the Chemical library, and the libraries of the Rogers building are still dependent on flickering gas jets. The lengthening days lessen the immediate need of better lighting facilities, but the Tech hopes to see the wires extended still farther before long. The General Studies library, which is used more than any other library of the Institute, especially needs better arrangements before another year. The Tech will be glad to record further improvement in this important matter.

Calendar.

Feb. 8th.—“Architecture in America, and Influence of the French School.” Prof. D. Despradelles, Room 12, Architectural, at 8 p. m.

“Naval Architecture,” Prof. C. H. Peabody, Room 27, Rogers, at 7:30 p. m.
