siderable price. If the athletic club could get a long
lease of some suitable piece of land, the money could
be raised in a number of ways. The money now paid
for hiring grounds could be saved and used for the
purpose; the number of home games could be con-
siderably increased, thus adding to the fund; tennis
courts could be laid out and run on the same principle
as at Harvard, thus serving the twofold purpose of aid-
ing tennis at Technology, and also paying in part for
the athletic field. All this would make a very good
start, and many other schemes would undoubtedly be
suggested if the matter were taken up. Then if the
graduating class, instead of leaving a memorial to the
Institute each year, would give the money to the
athletic club to help support the field, it seems as if
the scheme might be carried out. It is certainly
worth trying anyhow.

A. D.

The new Co-operative tickets are on hand,
and may be obtained from any of the directors.

The third-year classes will begin reading
Auerbach's "Joseph und Benjamin" this week.

Professor Cross addressed the first-year men
in Course VI. on their future work, on Satur-
day.

Professor Bates gave an extra lecture in
English Literature to the Sophomores last
week.

The men in Courses V. and X., '95, visited
the Low Art Tile Works, at Chelsea, last Friday.

The class of '92 will hold its second an-
numal dinner at Young's, on April 27th, at
6.30 p. m.

Allen W. Jackson, formerly of the class of
Ninety-six, will probably return to Tech-
ology next fall.

C. A. Phillips, '95, of the Architectural
Course, will leave in June for a three-year's
course of study in Europe.

Mr. W. Z. Ripley, instructor in Political
Economy, will sail next month for Europe,
where he will spend the summer.

Saturday morning an attractive list of pic-
tures of the French players, taken by Notman,
was placed in the Rogers Corridor.

In the exhibition of water-colors at the Bos-
ton Art Club are two pen and ink sketches by
H. Mott-Smith, '94, which he sent from Paris.

The Bugle Corps of the cadet battalion is
now thoroughly organized. Its officers are,
1st Sergt., John Taylor, and 2d Sergt., Lin-
coln Crocker.

President Walker and President Andrews
of Brown, have been invited to be present at
the International Monetary Conference to be
held this summer in London.

At the present time a test of the boilers of
the Rogers Building is in full operation.
These tests are very complete, and careful
work is required in every department.

All those who attended Mr. Bartlett's lec-
tures on sculpture were provided with tickets
for the loan exhibition of William Morris
Hunt's pictures at the St. Botolph Club.

At a recent meeting of the co-operative
Board, the date of the annual meeting of the
Society was changed from the first Saturday
in April to the first Saturday in October.

Mr. Moody, of the General Electric Com-
pany, gave a lecture to the Course VI. Sen-
iors last Wednesday, on "Long distance
transmission of power by alternating currents."

The statistician will be glad to supply a list
of questions to any member of the Senior
Class who has not already received one.
Address C. A. MacClure, Box 164, "Cage."

The Senior Architects have begun the fin-
ished drawings of their theses. The buildings
are smaller than usual, but the large scales at
which they are drawn necessitate large boards.
